Developed by Lloyd M. Dunn and Douglas M. Dunn, the assessment is designed to assess vocabulary comprehension for Standard American English. It is quick and effortless to administer, preserving precious time so that

concentration can be set on executing effective interventions.

The PPVT-4 test subject matter encompasses a wide range of receptive vocabulary ranks, ranging from pre-kindergarten through adult age. The test items extensively sample words that depict 20 topic areas (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and home and school vocabulary.

The assessment offers two equal editions which contain various vocabulary terms, ensuring that the test-taker has not “learned” the test. One edition can be used prior to intervention implementation to evaluate people’s vocabulary comprehension and the second form can be employed for re-testing to assess and record progress. The PPVT-4 also contains a unique Growth Scale Value (GSV) which is responsive to small changes in time.

He didn’t realize where he was heading, he didn’t understand what he was doing, he didn’t know what he was looking for. He only realized that he had to depart, that he had to explore, that he had to find out. He started on a trip of a thousand distances, a journey of thrill, of difficulty, of knowledge, of growth, of change.
