The Peabody Picture Vocabulary Test Fourth Edition (PPVT-4) is a well-respected vocabulary test that has been in practice for almost half a century. Developed by Lloyd M. Dunn and Douglas M. Dunn, the assessment is made to measure receptive vocabulary for Standard American English. It is swift and simple to administer, preserving important time so that concentration can be placed on executing intelligent strategies.

The PPVT-4 test content covers a extensive array of receptive vocabulary levels, spanning from pre-kindergarten through adulthood. The evaluation items widely include words that portray 20 subject areas (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and home and school vocabulary.

The evaluation offers two identical editions which hold different vocabulary terms, guaranteeing that the individual has not “memorized” the test. One edition can be employed prior to intervention implementation to evaluate test-takers’ vocabulary knowledge and the alternative edition can be employed for re-evaluation to evaluate and document improvement. The PPVT-4 also contains a unique Growth Scale Value (GSV) which is responsive to small changes in time.
