Reinforcement Learning for Adaptive Dialogue Systems 2011-11-23 Verena Rieser The past decade has seen a revolution in the field of spoken dialogue systems. As in other areas of Computer Science and Artificial Intelligence, data-driven methods are now being used to drive new methodologies for system development and evaluation. This book is a unique contribution to that ongoing change. A new methodology for developing spoken dialogue systems is described in detail. The journey starts and ends with human behaviour in interaction, and explores methods for learning from the data, for building simulation environments for training and testing systems, and for evaluating the results. The detailed material covers: Spoken and Multimodal dialogue systems, Wizard-of-Oz data collection, User Simulation methods, Reinforcement Learning, and Evaluation methodologies. The book is a research guide for students and researchers with a background in Computer Science, AI, or Machine Learning. It navigates through a detailed case study in data-driven methods for development and evaluation of spoken dialogue systems. Common challenges associated with this approach are discussed and example solutions are provided. This work provides insights, lessons, and inspiration for future research and development - not only for spoken dialogue systems in particular, but for data-driven approaches to human-machine interaction in general.

world as avid gamblers with a long history of participation in games of chance. Historians have documented wagering on such games as far back as the early Chinese dynasties. Despite measures by ancient Chinese rulers to contain gambling, it proliferated, and Chinese games have evolved and multiplied since then. Desmond Lam provides a unique look into the little-known world of Chinese gambling from historical, cultural, psychological, and social perspectives. Chinese gamblers regularly patronize casinos in the United States, Canada, and Australia. The recent expansion of gambling in East Asia has attracted much global media attention. Macau, the only place in China where casino gambling is now legal, easily surpasses Las Vegas as the world's largest casino gaming market. Each year, Chinese from mainland China, Hong Kong, and Taiwan account for almost 90 percent of visitors to Macau. The expansion of the Chinese gambling industry has brought about much harm to Chinese communities, despite all of the development it has also stimulated. This book is the first to examine the beliefs, motivations, attitudes, and behaviors of Chinese gamblers, and will be of interest to students of history and sociology, as well as those studying the history and culture of China.

Biorefinery 2019-04-15 Juan-Rodrigo Bastidas-Oyanedel This book discusses the biorefinery of biomass feedstocks. In-depth chapters highlight the scientific and technical aspects and present a techno-economic analysis of such systems. By using a TEA approach, the authors present feasible pathways for conversion of biomass (both residual biomass, energy crops and algae biomass), showing the different possibilities for the production of biochemical materials, biofuels, and fertilizers. The concepts presented in this book will link companies, investors, and governments by providing a framework that will help reduce pollutants and create a biomass related economy that incorporates the newest developments and technologies in the area.

Teaching and Learning Secondary School Mathematics 2018-10-24 Ann Kajander This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and

International researchers and educators. It is both representative of mathematics education generally, as well as unique to the particular geography and culture of Canada. Development at the WTO 2012-02-23 Sonia E. Rolland Seeking to open paths for reconsidering the trade and development relationship at the WTO, this book takes into account both the heritage of the trade regime and its present dynamics. It argues that the institutional processes for creating and implementing trade rules at the WTO and the actual regulatory outcomes are inseparable. A consideration of the WTO's development dimension must examine both jointly. It shows that the shortcomings of the Doha Development Round are in part due to a failure to assess trade rules as part of the legal processes and institutions that produced them. This book devotes significant analysis to the systemic impact of the WTO as an institution on developing and least developed members. From a pragmatic perspective, it provides a coherent

and systematic analysis of the legal meaning, the implementation, and the adjudication of special and differential treatment rules for developing members. It then evaluates the different regulatory approaches to trade and development from a more theoretical perspective. The book finishes by presenting a range of proposals for a better balance between trade liberalization and the development needs of many WTO members.

Behavior Analysis and Substance Dependence 2021-09-23  
Simone Martin Oliani This book presents the main theoretical and practical tools provided by behavior analysis to diagnose and treat substance use disorders. Based on the theoretical framework of radical behaviorism, first developed by B.F. Skinner, behavior analysis offers a distinctive biopsychosocial approach to substance use disorders by considering both the biogenetic and environmental influences on behaviors associated with substance use, enabling the development of more integrative and effective diagnostic, prevention, and

treatment strategies at the individual and collective level. The volume is divided in three parts. Part one presents an introduction to core concepts in behavior analysis and related disciplines, such as behavioral pharmacology, and their specific applications in substance use disorders diagnostics and treatment. Part two shows how different types of behavioral-analytical clinical and social interventions can be applied in practice to treat substance use disorders, such as: Contingency Management Exposure Therapy Functional Analytical Psychotherapy (FAP) Dialectical Behavioral Therapy (DBT) Acceptance and Commitment Therapy (ACT) Therapy by Contingencies of Reinforcement (TCR) Motivational Interviewing Finally, part three covers special topics, such as the interfaces between neurosciences and behavior analysis on drug use and dependence, effects of substance use in romantic relationships and their relationship with violence against women. Behavior Analysis and Substance Dependence will be a valuable tool for clinical and health psychologists, as well as other health professionals and social workers dealing with substance use disorders, by presenting, in one single volume, an overview of the tools offered by behavior analysis to deal with this serious health issue.

Natural Fiber Textile Composite Engineering 2017-07-06 Magdi El Messiry Natural Fiber Textile Composite Engineering sheds light on the area of the natural fiber textile composites with new research on their applications, the material used, the methods of preparation, the different types of polymers, the selection of raw materials, the elements of design the natural fiber textile polymer composites for a particular end use, their manufacturing techniques, and finally their life cycle assessments (LCA). The volume also addresses the important issue in the materials science of how to utilize natural fibers as an enhancement to composite materials. Natural fiber-reinforced polymer composites have been proven to provide a combination of superior mechanical property, dielectric property, and environmental advantages such as renewability and biodegradability. Natural fibers, some from agricultural waste products, can replace existing metallic and plastic parts and help to alleviate the environmental problem of increasing amounts of agriculture residual. The book is divided into four sections, covering: applications of natural fiber polymer composites design of natural fiber polymer composites composite manufacturing techniques and agriculture waste manufacturing composite material testing methods The first section of the book deals with the application of textile composites in the industry and the properties of the natural fibers, providing an understanding of the history of natural fiber composites as well as an analysis of the different properties of different natural fibers. The second section goes on to explain the textile composites, their classification, different composite manufacturing techniques, and the different pretreatment methods for the natural fibers to be used in composite formation. It also analyzes the composite material design under different types of loading and the mechanism of failure of the natural fiber composite. The effect of the fiber volume fraction of different textile structures is explained. The third section of the book, on composite manufacturing techniques and agriculture waste manufacturing, concerns the natural fiber composite manufacturing techniques, agricultural waste, and the methods

of their preparation to be used successfully in the composite, either in the form of fibers particles or nanoparticles. The book then considers the testing methods of the different composite components as well as the final composite materials, giving the principle of the testing standards, either destructive or nondestructive. This book attempts to fill the gap between the role of the textile engineer and the role of the designer of composites from natural fibers. It provides important information on the application of textile composites for textile engineers, materials engineers, and researchers in the area of composite materials.

Bridget Lewis This book provides a comprehensive human rights analysis of key areas of law affecting older persons, including legal capacity; elder abuse; accommodation and aged care; healthcare; employment; financial security, retirement, and estate planning; and social and cultural participation. The research identifies individual autonomy and participation in decision-making as fundamental to a human rights-based approach to elder law. The book argues that a paradigm shift must occur away from traditional medical and charity-based understandings of 'old age' to instead acknowledge older persons as active holders of enforceable rights. The book argues that a Convention on the Rights of Older Persons is an essential tool in achieving this, but that even without a dedicated treaty there is much to be gained from a human rights-based approach. Significantly, because the issues arising in 'old age' are often the culmination of experiences occurring throughout the life course, a human rights-based approach to elder law must begin with a commitment to human rights for people of all ages.

Memetics and Evolutionary Economics 2020-12-21 Michael P. theory that has the potential to combat the fragmentation of evolutionary economics while re-connecting the field with cultural evolutionary theory. By studying the intersection of cultural and economic evolution, complexity economics, computational economics, and network science, the authors establish a connection between memetics and evolutionary economics at different levels of investigation. The book first demonstrates how a memetic approach to economic evolution can help to reveal links and build bridges between different but complementary concepts in evolutionary economics. Secondly, it shows how organizational memetics can help to capture the complexity of organizational culture using meme mapping. Thirdly, it presents an agent-based simulation model of knowledge diffusion and assimilation in innovation networks from a memetic perspective. The authors then use agent-based modeling and social network analysis to evaluate the diffusion pattern of the Ice Bucket Challenge as an example of a "viral meme." Lastly, the book discusses the central issues of agency, creativity, and normativity in the context of economemetics and suggests promising avenues for further research.

Reinforcement Learning, second edition  
2018-11-13 Richard S. Sutton The significantly  
expanded and updated new edition of a widely

used text on reinforcement learning, one of the most active research areas in artificial intelligence. Reinforcement learning, one of the most active research areas in artificial intelligence, is a computational approach to learning whereby an agent tries to maximize the total amount of reward it receives while interacting with a complex, uncertain environment. In Reinforcement Learning, Richard Sutton and Andrew Barto provide a clear and simple account of the field's key ideas and algorithms. This second edition has been significantly expanded and updated, presenting new topics and updating coverage of other topics. Like the first edition, this second edition focuses on core online learning algorithms, with the more mathematical material set off in shaded boxes. Part I covers as much of reinforcement learning as possible without going beyond the tabular case for which exact solutions can be found. Many algorithms presented in this part are new to the second edition, including UCB, Expected Sarsa, and Double Learning. Part II extends these ideas to function approximation, with new sections on such topics as artificial neural networks and the Fourier basis, and offers expanded treatment of off-policy learning and policy-gradient methods. Part III has new chapters on reinforcement learning's relationships to psychology and neuroscience, as well as an updated case-studies chapter including AlphaGo and AlphaGo Zero, Atari game playing, and IBM Watson's wagering strategy. The final chapter discusses the future societal impacts of reinforcement learning.

Behaviour and Rationality in Corporate Governance 2008-03-10 Oliver Marnet Corporate scandals due to bad accounting happen far too frequently for a system of corporate governance to be deemed effective. This book tells why the safeguards designed to prevent bad accounting so often fail. By studying why the auditors and members of a board of directors regularly fail to deliver the truth about a company's financial state of affairs, this provocative book explores a serious problem in the system of reporting financial information. This book is unique in that it draws together various strands of the literature on corporate governance, accounting, law, cognitive research, psychology, behavioural economics and conventional economics to shed light on questions regarding the feasibility of independence and impartiality of boards of directors and external auditors as monitors and gatekeepers in corporate governance. The book is essential reading for professional accountants and auditors, directors, regulators, law makers, corporate lawyers, and investment bankers. It will appeal to all those interested in behavioural economics and corporate governance.

Invisible Victims and the Pursuit of Justice: Analyzing Frequently Victimized Yet Rarely Discussed Populations 2021-06-18 Blasdell, Raleigh Victims of crime may experience a wide variety of traumas that result in physical, sexual, financial, psychological, emotional, and/or social consequences. While the types of trauma can vary greatly and include lesser-known forms such as vicarious and secondary trauma, identifying and recognizing victims can be complicated. Throughout this book, experts and professionals from academia and the fields of criminal justice, social work, and mental health acknowledge victims historically overlooked by society, political movements, the media, and/or the criminal justice system - we acknowledge the invisible victims. Invisible Victims and the Pursuit of Justice: Analyzing Frequently Victimized Yet Rarely Discussed Populations pioneers the assertion that our view of victims needs to be more inclusive by exploring invisible victims that are rarely, if ever, a focus of discussions in traditional victimology textbooks. To educate the reader and begin working toward positive change, each chapter identifies an invisible

victim and provides the background, controversies, issues, solutions, and areas of future research. It is crucial to identify these gaps in the field as some of the most victimized populations remain absent from important dialogue on crime victims. This book is appropriate for a wide range of readership including but not limited to criminologists, victim service providers, psychologists, sociologists, social workers, advocate groups, law enforcement, lawyers, defense attorneys, criminal justice practitioners, academicians, researchers, and students studying criminology, criminal justice, victimology, social work, psychology, and social justice.

Early Childhood and Neuroscience - Links to Development and Learning 2013-06-03 Leslie Haley Wasserman Information from neuroscience is growing and being properly used, and misused which makes it imperative that educators receive accurate and practical information. This book provides the accurate and practical information educators (pre-service and in-service) and caregivers serving children birth through age 8 need to know. This volume takes a practical and cautionary stance. It reminds educators to consider the ethical implications of neuroscience when it is applied to education, reviews current findings from neuroscience and reveals the dangers of oversimplification and inappropriate extensions of neuroscience into curricula. It brings together a group of authors with varied expertise writing on an array of inter-related educational topics that will help educators use

neuroscience to understand and address the cognitive, emotional, social, and behavioral needs of all young children, including those with exceptionalities. They believe neuroscience can be insightful and useful to educators if applied ethically and with care. The book offers strategies educators and caregivers can use to affect children today and the adults they can become.
