The Bloomsbury Handbook of Rock Music Research 2020-07-09 Allan Moore The Bloomsbury Handbook of Rock Music Research is the first comprehensive academic survey of the field of rock music as it stands today. More than 50 years into its life and we still ask - what is rock music, why is it studied, and how does it work, both as music and as cultural activity? This volume draws together 37 of the leading academics working on rock to provide answers to these questions and many more. The text is divided into four major sections: practice of rock (analysis, performance, and recording); theories; business of rock; and social and culture issues. Each chapter combines two approaches, providing a summary of current knowledge of the area concerned as well as the consequences of that research and suggesting profitable subsequent directions to take. This text investigates and presents the field at a level of depth worthy of something which has had such a pervasive influence on the lives of millions.

A Philosophical Inquiry into Subject English and Creative Writing 2022-11-18 Oli Belas While engaging with the current political-educational climate of England, this book offers a timely contribution to debates around questions of knowledge in relation to education and school-level English by drawing together theories of individual and disciplinary knowledge. The book provides a philosophical conception of knowledge – as fundamentally embodied at the level of the individual, and a matter of cultural form at the level of shared or "common" knowledge – and an analysis of the implications of this for schooled English. The research draws from various related fields including literary criticism, philosophy (of knowledge and of symbolic form), and phenomenology. The book rethinks general notions of knowledge and lays out the problems that exist within knowledge and language systems in education, especially secondary and university levels. This highly relevant and informative book offers an insightful resource for academics, researchers, and post-graduate students in the fields of education studies, educational policy and politics, philosophy of education, and literature studies.

Teaching History in a Neoliberal Age 2019-09-04 Mary Woolley This book explores changing practice in history classrooms from the autonomy of the 1980s through the introduction of GCSEs and the National Curriculum to the prescription of the National Strategies and the pervasive influence of league tables in the first decade of the twenty-first century. It uses individual narratives from history teachers to shed light on a changing profession. Showcasing research that is crucial reading for leaders in education, it uses oral accounts from 13 experienced teachers to provide a rich testimony of the constraints and affordances acting on history teachers. The book offers a unique perspective to show how teachers experienced steady but substantial changes in policy and autonomy and how this affected their practice; this detail enhances an analysis of policy and curricular documents across three decades. The findings are crucial for educational settings today, facing crises of teacher recruitment and teacher retention. This book will be of great interest to academics and higher degree research students in history education, history of education and education policy. It will also be of interest to beginning history teachers and senior school leaders responsible for teacher development and curriculum.

40 Ways to Diversify the History Curriculum 2022-07-14 Elena Stevens In writing this book, Elena Stevens' aim is to respond to calls for a more diverse, decolonised curriculum - calls which have become more insistent following the reinvigation of the Black Lives Matter movement, the #MeToo movement and other landmark events. Highlighting the lived experiences of women, the working classes, and BAME and LGBTQ+ communities in particular, 40 Ways to Diversify the History Curriculum draws upon a wide range of personal stories to exemplify significant historical moments and shed new light on topics that have traditionally been taught through narrower lenses. The book serves as a resource bank for teachers wishing to enliven and diversify history lessons at Key Stages 2-3, GCSE, A level and beyond.Elena helpfully opens with a discussion of the theoretical/historiographical developments that lay behind calls to diversify the curriculum - and, to accompany each of the 40 historical case studies, she provides ideas and activities for translating the case studies into lesson plans and enquiries. Furthermore, Elena also guides teachers in shaping new enquiries from scratch.Suitable for teachers of secondary school and Key Stage 2 history.

Assessing 21st Century Skills 2011-10-16 National Research Council The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The modern workplace requires workers to have broad cognitive and affective skills. Often referred to as "21st century skills," these skills include being able to solve complex problems, to think critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning Assessing 21st Century Skills provides an integrated summary of the presentations and discussions from both parts of the third workshop.

Six Suspects 2009-07-07 Vikas Swarup The basis for The Great Indian Murder, now a streaming series! There's a caste system—even in murder From the author of the international bestseller Slumdog Millionaire comes a richly-textured tale of murder, corruption, and opportunity. Seven years ago, Vivek "Vicky" Rai, the playboy son of the Home Minister of Uttar Pradesh, murdered bartender Ruby Gill at a trendy restaurant in New Delhi, simply because she refused to serve him a drink. Now Vicky Rai has been killed at the party he was throwing to celebrate his acquittal. The police recover six guests with guns in their possession: a corrupt bureaucrat who claims to have become Mahatma Gandhi overnight; an American tourist infatuated with an Indian actress; a stone-age tribesman on a quest to recover a sacred stone; a Bollywood sex-symbol with a guilty secret; a mobile-phone thief who dreams big; and an ambitious politician prepared to stoop low. Swarup unravels the lives and motives of the six suspects, offering both a riveting page-turner and an insightful peek into the heart of contemporary India. Audaciously and astutely plotted, with a panoramic imaginative sweep, Six Suspects is the work of a master storyteller.

Teachers and Academic Partners in Urban Schools 2016-03-02 Lori Beckett 'Showing how critical thinking and local democracy can be a spur to very real educational development within schools that are facing severe challenges, this book provides us with one very valuable contemporary resource of hope.' Ian Menter, Professor of Teacher Education, University of Oxford, UK Teachers and Academic Partners in Urban Schools identifies and addresses a major problem for practitioners – teachers, student teachers and teacher educators – working in urban schools burdened by highly restrictive teaching methods and pressures to meet unrealistic benchmarks set by government. In this book, Lori Beckett investigates how to negotiate these tensions and challenges and offers an account of how to elevate practitioners' professional voice on quality teaching along more democratic lines. The book addresses key issues for teachers in urban schools, such as: fractures in teachers' professional communities; impacts of imposed marketizing policies and forced performative practices on schools; the complexities of teaching and teachers' concerns about practice, as well as teaching practitioners' perception of educational/schools policy. Both academic and teacher partners contribute to the work, showcasing the ways they have engaged with each other in joint work and with local government. Through this, the book supports a professional and politicized dialogue about teaching and teacher education, offering a meaningful account of how to fashion a form of educative schooling for students and families with complex needs. Written by a dynamic and experienced author, this book brings Beckett's experience to bear on a controversial and complex area – addressing the general trend towards increased regulatory policy in education. It is an essential read for anyone interested in a rich analysis of how practitioners can work to reassert their professional voice and regain control of schools and teacher education, and will also appeal to those interested in the larger project of restoring school democracy.
