Opting Out

2020-01-22 David Hursh A 2020 AESA Critics' Choice Book Award winner The rise of high-stakes testing in New York and across the nation has narrowed and simplified what is taught, while becoming central to the effort to privatize public schools. However, it and similar reform efforts have met resistance, with New York as the exemplar for how to repel standardized testing and invasive data collection, such as inBloom. In New York, the two parent/teacher organizations that have been most effective are Long Island Opt Out and New York State Allies for Public Education. Over the last four years, they and other groups have focused on having parents refuse to submit their children to the testing regime, arguing that if students don't take the tests, the results aren't usable. The opt-out movement has been so successful that 20% of students statewide and 50% of students on Long Island refused to take tests. In Opting Out, two parent leaders of the opt-out movement—Jeanette Deutermann and Lisa Rudley—tell why and how they became activists in the two organizations. The story of parents, students, and teachers resisting not only high-stakes testing but also privatization and other corporate reforms parallels the rise of teachers across the country going on strike to demand increases in school funding and teacher salaries. Both the success of the opt-out movement and teacher strikes reflect the rise of grassroots organizing using social media to influence policy makers at the local, state, and national levels. Perfect for courses such as: The Politics Of Education | Education Policy | Education Reform Community Organizing | Education Evaluation | Education Reform | Parents And Education

Organization and Administration of Physical Education

2019-01-22 Jayne D. Greenberg If you want to know how to be the best, you learn from the best. Two SHAPE America Physical Education Administrators of the Year share what it takes to be an outstanding administrator in Organization and Administration of Physical Education: Theory and Practice. Jayne Greenberg and Judy LoBianco, veteran leaders in the field with decades of successful administration experience, head a sterling list of contributors who have taught at the elementary, middle school, high school, and college levels in urban, suburban, and rural settings. Together, these contributors expound on the roles and responsibilities of physical education administrators through both theoretical and practical lenses. The result is a book that will be highly useful to undergraduate students looking to enter the field, as well as a resource for administrators in physical education leadership positions who are looking to acquire new skills and innovative ideas in each of the five areas of responsibility covered in the book. Part I covers leadership, organization, and planning. It explores leadership and management styles and presents practical theories of motivation, development, and planning. It also looks at how to plan for the essential components of an effective, quality physical education program. In part II, readers examine various curriculum and instruction models and navigate through curriculum theory and mapping. This section also offers guidance on planning events, including special programs and fundraising projects, and how to build a team and secure community connections for those special events. Part III helps administrators plan and design new school sites or renovate existing ones, and it presents contemporary concepts in universal design and sustainable environmental design. It also offers ideas on how to incorporate technology to meet the needs of 21st-century learners, including the use of social media and robotics in delivering instruction and communication. Part IV explores written, verbal, and electronic communication issues, as well as legal and human resource issues. Administrators learn how to lobby and advocate for physical education, how the legal system affects schools, and how to examine personnel issues, bullying, and harassment. Part V explains the fiscal responsibilities inherent in administrative positions, including budgeting, bidding, and purchasing. It also shows how administrators can secure funding independent of district or local funding, offering many examples of grants and fundraising opportunities with sample grant applications. Throughout the text, special features—Advice From the Field and Leadership in Action—share tips, nuggets of wisdom, and examples of administrators excelling in their various responsibilities. The book also comes with many practical examples of forms that are useful in carrying out responsibilities, and each chapter offers objectives, a list of key concepts, and review questions to facilitate the learning. In addition, the text has related online resources consisting of supportive materials and documents. Organization and Administration of Physical Education: Theory and Practice, published with SHAPE America, offers the solid foundational theory that administrators need and shows how to put that theory into daily practice. The diamond was named the African Star, and it was the biggest and most stunning diamond in the earth. It was secured by a high-tech security system, and a group of armed guards. No one could rob it, or so they thought. But somebody did. Somebody succeeded to bypass the security, to evade the watchmen, to smash the pane, and to take the diamond. And no one saw them, no one heard them, no one identified who they were. They exited no trace, no clue, no testimony. They vanished into the nightfall, with the Star of Africa.
