There are a lot of myths with regards to acupuncture. Some of these are true; others are silly while the rest only have a half truth. As you read on, you will learn which ones are worth believing.

The first myth is that acupuncture is painful. This is not true because those who have tried it claimed they only experienced a tiny prick while others did not feel anything at all. There is no tissue damage when the needle is inserted into the skin or pulled out and only in very rare cases are there traces of bruising.

The second myth is that you can get hepatitis or AIDS from acupuncture. This is true only if the needles used are not sterilized. In the US, this will never happen because acupuncturists are required to use disposable needles thus you are not at risk from these two diseases.

##### **How does sticking needles into your body help manage the stress?**

In traditional Chinese medicine, much of the treatments depend on an understanding of the balance in our bodies and its internal organs. The sicknesses we sometimes develop are seen to be caused by imbalances in our lifestyles and environment. Stress is also affected by this imbalance. That is why when there is something wrong with your body, you typically have less of an ability to deal with stress. You get more irritable and find it really difficult to relax.

By sticking these very thin needles past the surface of our skin, the acupuncturist stimulates nerves in our body. These nerves send signals to our brain and scientists believe that the brain then releases its natural painkillers into our system. This immediately causes a feeling of relaxation for many people.

The needles could also help your body by stimulating its circulation. With the circulation between the organs of the body improved, a lot of the body's wastes could be cleansed properly. Your organs would also receive the full benefit of the oxygen from your lungs making its way into the cells of your body without any blockages. This makes your organs much healthier and leaves you feeling much better in the long term as well.

#### **Fight her sons girlfriend english edition pdf pdf:What This Ancient Method Does**

One of the foremost effects of acupuncture on the body is relaxation. Stress is frequently pinpointed as the main precursor for a host of physical ailments. There are particular points all over the body that direct the flow of harmony and relaxation and when these are entused, the patient becomes more at ease.

Another positive effect of this alternative therapy is increased pain control. During a session, a patient will usually feel very minimal pain as the thin needles are being inserted gradually. However, the needles are deliberately placed in varying depths, depending on the health requirements of the patient. When the needles reach the right depth, the patient will feel deeper pain, although the entire procedure is not necessarily painful.

It is also recommended for relief from chemotherapy fatigue as well as chemotherapy-related nausea. It has also been found to be largely effective for back pains, migraines, menstrual cramps, and as a pain controller for patients after undergoing surgical operations.

You can think of a session with the acupuncturist as very much like massage therapy. A good massage would help give you a very relaxing sleep that night and an acupuncturist could help you with your sleep as well. You might immediately start to feel drowsy as soon as the right nerves are stimulated by the acupuncturist's needles.

You might be asking yourself how you'd be able to relax if you're suffering from the pain of the needles attached to your body. What you might not realize is that because of the thinness of the needles, you would hardly feel anything. The most that many people claim they feel is a kind of tingling feeling where the needles are. And that is actually a sign that the process is working.

Acupuncture is a practice that helps you use your body's own ability to manage stress properly. This leaves you healthier, and more importantly, prevents any of the serious diseases that could come from unbalanced, stressful lifestyles.
