on contracts for sale and carriage, documentary credits and marine insurance. It covers all varieties of maritime fraud, from the most serious downwards, describing the methods employed and the risks to traders and carriers. At the serious end of the spectrum, pirates capture an entire ship, often murdering the entire crew, in order to sell the cargo (to which of course they have no title), later to use the "innocent" ship to pose as innocent traders. Less serious (but perhaps of greater interest to lawyers) are misdescriptions of cargo in, or backdating of, bills of lading, and other deceptions, usually practised on purchasers and banks.

governments and insurers in Western countries has materialised in the form of war risk schemes that have contributed to the waging of war and the preservation of peace. The operation of those schemes has given rise to a curious, if not innocent, association between practices of statehood and practices of risk, which are theorised here under the label of 'insurantal sovereignty'. The book draws on the British experience of using maritime insurance as an instrument of war during the Napoleonic Wars, the two World Wars, and the early twenty-first century. It asks, what happens, when, under conditions of war, the sovereign adopts insurantal imaginaries and practices into its rationalities of government? In doing so the book makes a novel contribution to the understanding of liberal security and liberal governance which is central to the theory of Political
