Percorsi: Pearson New International Edition PDF
eBook 2013-08-28 Francesca Italiano The first
edition of Percorsi quickly became one of the
best-selling elementary Italian texts. The new
second edition features a new design, more focus
on skills-development, updated cultural
information and a full version of MyItalianLab.
Percorsi is an introductory program that
promotes the acquisition of Italian language and
culture through the integration of the "5 Cs"
principles of the National Standards for Foreign
Language Education. Percorsi is designed to
provide beginning learners with a variety of tools
to develop their communicative competence in
the four major language skills—listening,
speaking, reading, and writing—as they acquire
familiarity with Italian culture. All of the features
in Percorsi have been carefully thought out to
support the two key aspects of the language
acquisition process: language comprehension
and language production. From the start,
carefully structured communicative activities
based on authentic materials and texts
encourage students to use Italian in everyday
situations. Generous use of authentic content
also offers students a chance to develop reading
skills while gaining cultural awareness and
understanding of Italian communities and
traditions throughout the world. In addition, each
chapter explicitly promotes cultural exploration
through illustrated presentations that are
followed by activities facilitating comprehension
and highlighting cultural comparisons. Students
are encouraged to analyze and compare
extremely varied aspects of Italian culture while
making connections to their own experiences.
MyItalianLab will be available for Fall 2011
courses.

Interculturality in Institutions 2022-11-24
Marilena Fatigante This book provides qualitative
analyses of intercultural sense making in a
variety of institutional contexts. It relies on the
assumption that in an increasingly culturally
diverse world, individuals often enter contexts
that have communal, historically determined and
stable sets of values, norms and expected
identities, with little cultural compass to find their
bearings in them. The book goes beyond
interpreting differences in people's ethnic or
linguistic roots and discusses instead people's
interpretive efforts to navigate different
sociocultural situations. The contributors
examine such situations in educational,
organizational, medical and community settings
and look at how participants with different levels
of sociocultural competences (such as, migrant
patients, migrant adult learners, children) try to
cope with institutional constraints and
expectations, how they understand symbols,
practices and identities in institutional contexts,

and how their creative adjustments come to light. This book provides insights from the fields of psychology, education, anthropology and linguistics, and is for a wide readership interested in cultural meaning-making.

Modes of Migration Regulation and Control in Europe 2008 Jeroen Doomernik
In Europe, immigration is a politically potent issue—especially when it comes to the treatment of asylum seekers and illegal labor immigrants. This volume draws the reader into the complex and contradictory world of migration regulation and control, covering the wide range of different policy approaches that aim to control the entry and residence of non-EU citizens. Revealing the common framework, tendencies, and policy convergences brought about less by design than a common concern about migration's impact on the future of the EU, *Modes of Migration Regulation and Control in Europe* questions the effectiveness of additional efforts in terms of their fiscal and societal costs. "This important book emphasizes that European countries individually and collectively are converging in their efforts to manage migration."—Philip Martin, University of California, Davis

Local Government and the COVID-19 Pandemic 2022-05-03 Carlos Nunes Silva
The book provides a global perspective of local government response towards the COVID-19 pandemic through the analysis of a sample of countries in all continents. It examines the responses of local government, as well as the responses local government developed in articulation with other tiers of government and with civil society organizations, and explores the social, economic

and policy impacts of the pandemic. The book offers an innovative contribution on the role of local government during the pandemic and discusses lessons for the future. The COVID-19 pandemic had a global impact on public health, in the well-being of citizens, in the economy, on civic life, in the provision of public services, and in the governance of cities and other human settlements, although in an uneven form across countries, cities and local communities. Cities and local governments have been acting decisively to apply the policy measures defined at national level to the specific local conditions. COVID-19 has exposed the inadequacy of the crisis response infrastructures and policies at both national and local levels in these countries as well as in many others across the world. But it also exposed much broader and deeper weaknesses that result from how societies are organized, namely the insecure life a substantial proportion of citizens have, as a result of economic and social policies followed in previous decades, which accentuated the impacts of the lockdown measures on employment, income, housing, among a myriad of other social dimensions. Besides the analysis of how governments, and local government, responded to the public health issues raised by the spread of the virus, the book deals also with the diversity of responses local governments have adopted and implemented in the countries, regions, cities and metropolitan areas. The analysis of these policy responses indicates that previously unthinkable policies can surprisingly be implemented at both national and local levels.

The Pillars of the Italian Economy 2016-10-27 Marco Fortis
This book offers a detailed analysis of the key sectors in the Italian economy, with the focus especially on areas in which the economy excels, such as the automatic packaging machinery sector, pharmaceutical production, the food and wine industry, and tourism. The book explains how, contrary to widespread opinion, Italy is one of the world's most competitive countries in foreign trade, as confirmed by a new index compiled by Fondazione Edison that highlights its strengths and top traded products. The main characteristics of the Italian productive system, which is primarily composed of SMEs, are

documented, and a map illustrating the importance of the various industrial districts is proposed, identifying their sectors of specialization, historical roots, and development. The principal steps in Italy's industrialization over the past 150 years are then outlined, in particular for the manufacturing system - the main driver of Italian exports. In-depth analyses of the mechanical industry and the machinery sector follow. In combining meticulous analysis of statistical data with a historical perspective, this book will appeal to all with an interest in the Italian economy.

School Systems, Parent Behavior, and Academic Achievement 2019-09-17 Emma Sorbring This volume takes an international and multidisciplinary approach to understanding students' academic achievement. It does so by integrating educational literature with developmental psychology and family studies perspectives. Each of the nine chapters focuses on a particular country: China, Colombia, Italy, Jordan, Kenya, the Philippines, Sweden, Thailand, or the United States. It describes the country as a cultural context, examines the current school system and parenting in light of the school system, and provides empirical evidence from that country regarding links between parenting and students' academic achievement. The book highlights similarities and differences in education and parenting across these nine countries - all varying widely in socioeconomic and cultural factors that affect schools and families. The volume contributes to greater understanding of links between parenting and academic performance in different cultural groups. It sheds light on how school systems and parenting are embedded in larger cultural settings that have implications for students' educational experiences and academic achievement. As two of the most important contexts in which children and adolescents spend

time, understanding how schools and families jointly contribute to academic achievement holds promise for advancing the international agenda of promoting quality education for all.

Bloody Italy 2014-03-08 Patricia Prandini Buckler These new essays comprise a critical analysis of present-day crime fiction and nonfiction works set in Italy (all of which are available in English). The writers discussed range from Donna Leon and Michael Dibdin to Leonardo Sciascia and Andrea Camilleri. Essays also deal with nonfiction by Roberto Saviano and Douglas Preston. An emerging theme is the corruption of Italian police and judiciary officials and the frustration of officers and politicians trying to work ethically within a flawed system. Many of the works discussed show the struggle of the honest characters to find at least a limited justice for the

victims.

The Private Sport Sector in Europe 2017-11-25 Antti Laine This book outlines the private sport sector in different European countries. Sport in the European countries is organized in three distinct sectors. These are the state/public sector, which provides financial and political support for sport infrastructure; the civic/non-profit sector, which provides sport activities and services for citizens, usually in the forms of sport clubs; and the private sector, which is comprised of profit-making private companies and professional teams that produce and sell sport products and services. The private sport sector is becoming ever more important in a global market economy and a financial climate characterized by a public sector in crisis. Taking this into consideration, this book provides a detailed outline of the structure and characteristics of the private sport sector,

discusses recent developments in the sector, and compares data across business fields and countries. Containing contributions from sport academics from eighteen countries, this book provides an overall, up-to-date picture of the private sport sector in Europe. Filling a significant gap in sport sociology and economics scholarships, this book will be of use to students and scholars of business and social sciences of sport as well as decision makers and the entrepreneurs.

The European Union

Women and Austerity 2013-09-11 Maria Karamessini Austerity has become the new principle for public policy in Europe and the US as the financial crisis of 2008 has been converted into a public debt crisis. However, current austerity measures risk losing past progress towards gender equality by undermining important employment and social welfare protections and putting gender equality policy onto the back burner. This volume constitutes the first attempt to identify how the economic crisis and the subsequent austerity policies are affecting women in Europe and the US, tracing the consequences for gender equality in employment and welfare systems in nine case studies from countries facing the most severe adjustment problems. The contributions adopt a common framework to analyse women in recession, which takes into account changes in women's position and current austerity conditions. The findings demonstrate that in the

immediate aftermath of the financial crisis, employment gaps between women and men declined — but due only to a deterioration in men's employment position rather than any improvements for women. Tables are set to be turned by the austerity policies which are already having a more negative impact on demand for female labour and on access to services which support working mothers. Women are nevertheless reinforcing their commitment to paid work, even at this time of increasing demands on their unpaid domestic labour. Future prospects are bleak. Current policy is reinforcing the same failed mechanisms that caused the crisis in the first place and is stalling or even reversing the long term growth in social investment in support for care. This book makes the case for gender equality to be placed at the centre of any progressive plan for a route out of the crisis.

The Italian Civil Security System 2014-03-15
Federica Di Camillo Civil security is an increasingly important policy field in Europe, as both Member States and the EU work to protect European societies from a range of threats and risks including natural and man-made disasters as well as terrorist attacks. Over time, each European country has developed a unique civil security system based on its national specificities, which interacts with both neighbour countries and the Union. This research paper analyses the Italian case on the basis of four analytical dimensions: cultural and historical aspects, legal aspects, the relation between the civil security system and citizens, the role of private sector. Three critical qualitative measures of the system are also discussed: effectiveness, efficiency and legitimacy. In addition, because of the importance of international cooperation and EU role in this field, the relations between the Italian security system and the European context are addressed. Specific attention has been devoted to the way the system responded to the earthquake in L'Aquila and the pandemic influenza A (H1N1), both occurred in 2009, as major crises faced in the last decade. In particular, the L'Aquila case study has underlined both strengths and weaknesses of the way the system does function. Several key points of the Italian civil security system have been identified, such as the flexible cooperation among institutional actors, the issue of levels of governance, the role of changing legal frameworks, the contribution of non-profit organizations.

Tied Aid and Development Aid Procurement in the Framework of EU and WTO Law 2014-07-18 Annamaria La Chimia This book is the first legal treatment of tied aid and examines in detail the compatibility of tied aid with EU and WTO law. The workings of the aid projects and aid procurement systems of donor countries granting bilateral aid are fully examined through case studies from the UK, Italy, the EU and the US. Tied aid refers to aid granted to developing countries on condition that goods and services for the aid-financed projects are purchased from the donor country only. The recipient country, in order to receive the grant or the loan, has no other choice but to fulfil the condition imposed by the donor. Economists have shown that tying aid undermines the effectiveness of aid. It leads to higher costs paid for the goods and services purchased and the distortion of the nature of the aid. Further, tying frustrates the potential of aid to foster trade between developing countries - in many of these countries public bodies and, in particular, aid-financed projects are major potential outlets for trade between neighbouring states. The importance of tied aid has been pointed out in economic literature but there is surprisingly little written on the legal aspects of tied aid practices and this book seeks to fill this major gap in the literature. The book is of interest to academics in the field of EU and WTO law, NGOs and practitioners working both in the field of public procurement and development policies.

Human Rights and Adolescence 2014-08-12
Jacqueline Bhabha While young children's rights have received considerable attention and have accordingly advanced over the past two decades, the rights of adolescents have been neglected. This manifests itself in pervasive gender-based violence, widespread youth disaffection and unemployment, concerning levels of self-abuse, violence and antisocial engagement, and serious mental and physical health deficits. The cost of inaction on these issues is likely to be dramatic in terms of human suffering, lost social and economic opportunities, and threats to global peace and security. Across the range of disciplines that make up contemporary human

rights, from law and social advocacy to global health, history, economics, sociology, politics, and psychology, it is time, the contributors of this volume contend, for adolescent rights to occupy a coherent place of their own. Human Rights and Adolescence presents a multifaceted inquiry into the global circumstances of adolescents, focusing on the human rights challenges and socioeconomic obstacles young adults face. Contributors use new research to advance feasible solutions and timely recommendations for a wide range of issues spanning all continents, from relevant international legal norms to neuropsychological adolescent brain development, gender discrimination in Indian education to Colombian child soldier recruitment, stigmatization of Roma youth in Europe to economic disempowerment of Middle Eastern and South African adolescents. Taken together, the research emphasizes the importance of dedicated attention to adolescence as a distinctive and critical phase of development between childhood and adulthood and outlines the task of building on the potential of adolescents while providing support for the challenges they experience. Contributors: Theresa S. Betancourt, Jacqueline Bhabha, Krishna Bose, Neera Burra, Malcolm Bush, Jocelyn DeJong, Elizabeth Gibbons, Katrina Hann, Mary Kavar, Orla Kelly, David Mark, Margareta Matache, Clea McNeely, Glaudine Mtshali, Katie Naeve, Elizabeth A. Each case study selected for this volume has been conducted with critical insight and methodological rigour, and makes a valuable

contribution to scientific knowledge in the descriptive and applied branches of a discipline that, since its foundation nearly 50 years ago, has concerned itself with the description, theory and practice of translating and interpreting.

Learning to Read across Languages and Writing Systems 2017-10-12 Ludo Verhoeven Around the world, children embark on learning to read in their home language or writing system. But does their specific language, and how it is written, make a difference to how they learn? How is learning to read English similar to or different from learning in other languages? Is reading alphabetic writing a different challenge from reading syllabic or logographic writing? Learning to Read across Languages and Writing Systems examines these questions across seventeen languages representing the world's different major writing systems. Each chapter highlights the key features of a specific language, exploring research on learning to read, spell, and comprehend it, and on implications for education. The editors' introduction describes the global spread of reading and provides a theoretical framework, including operating principles for learning to read. The editors' final chapter draws conclusions about cross-linguistic universal trends, and the challenges posed by specific languages and writing systems.

The Coronavirus Pandemic and Inequality 2023-03-31 Shirley Johnson-Lans This book examines the effects of the Covid-19 pandemic

on the degree of inequality in wellbeing (income and wealth, health, access to health care, employment, and education) in a number of different countries around the globe. The effect of socioeconomic inequality within a country on the outcome of the pandemic is also considered. This book studies the differential effects of Covid based on location, age, income, education, gender, race/ethnicity, and immigrant status. Special attention is devoted to indigenous populations and those who are institutionalized. The short- and long-term effects of public policy developed to deal with the pandemic's fallout are studied, as are the effects of the pandemic on innovations in health care systems and likely extensions of public policy instituted during the pandemic to alleviate unemployment, poverty, and income inequality.

Recognition of Kafala in the Italian Law System from a Comparative Perspective 2020-07-09 Adele Pastena The provision of Islamic kafala has no legal correspondence with secularised political systems and structures, and, as a result, requires a proper understanding of the legislative measures that are indispensable for the protection of the weakest groups of society, at least when the latter turn out to be mostly

vulnerable or abandoned. Most recent international conventions have placed much emphasis on the priority to be given to child protection rather than other personal interests. While no syntagmatic principle exists for a theoretical definition and boundary of religious freedoms and legal rules affecting Islamic kafala, it has become a prevailing interpretative canon which requires the scholar to aim for a proper understanding of the cultural identities and measures to safeguard individuals concerned. This book is a thought-provoking study of these important issues, and will serve to strengthen further research into this topic area for the benefit of both academic and professional readers.

Profitability and Balance Sheet Repair of Italian Banks 2016-08-19 Andreas Jobst The profitability of Italian banks depends, among other factors, on the strength of the ongoing economic recovery, the stance of monetary policy, and the beneficial effects of current and past reforms, notably to address structural obstacles to resolving nonperforming loans (NPLs) and to foster banking sector consolidation. Improved profitability would enable banks to raise capital buffers and accelerate the cleanup of their balance sheets. This paper investigates quantitatively the current and prospective earnings capacity of Italian banks. A bottom-up analysis of the 15 largest Italian banks suggests that the system is on the whole profitable, but that there is significant heterogeneity across banks. Many banks should become more profitable as the economy recovers, but their capacity to lend depends on the size of their capital buffers. However, a number of smaller banks face profitability pressures, even under favorable assumptions. There is thus a need to push ahead decisively on cleaning up balance sheets, including through cost cutting and efficiency gains.

Football Italia 2015-05-21 Mark Doidge Football has undergone a period of transformation over the last thirty years. Despite these global processes, different national leagues have adapted in different ways. After an initial period of success directly after Italia '90, Italian football has gone through a period of sustained crisis. It has been blighted by financial mismanagement,

corruption scandals and fan violence. This has impacted Italy's ability to compete on a global stage. Football Italia accounts for the development of Italian football in relation to the wider global transformations impacting football and addresses the reasons for Serie A's initial success and current malaise. Theoretically, this book locates Italian football within the wider power network of the state and how this has impacted political engagement. After an historical overview of the Italian political economy, Football Italia highlights how football is part of the wider political network. Football clubs are owned by powerful businessmen (and they are all men) who are also politicians. This centralisation of power within a small hegemonic group inhibits change. Within this broader structure, wider corruption scandals continue; from regular match-fixing scandals to doping. Meanwhile, stadiums are crumbling and police over-aggressive. It is within this context that we must place the fans. Both the ultras and supporters who attend official supporters' clubs are disaffected and without the power to change the status quo. Consequently, Italian football has been in decline throughout the 21st century.

A Companion to Italian Cinema 2017-04-17 Frank Burke Written by leading figures in the field, A Companion to Italian Cinema re-maps Italian cinema studies, employing new perspectives on traditional issues, and fresh theoretical approaches to the exciting history and field of Italian cinema.
