An Introduction to Social Psychology 1926 Luther Lee Bernard "The present Introduction to Social Psychology represents an attempt at a more synthetic type of treatment of the field than has ordinarily been given. It seems to the writer that the time has arrived when "schools" of social psychology may properly be regarded as obsolete and the subject as a whole may be presented systematically. In a sense social psychology overlaps a very large portion of social science and of psychology and education. In this respect it is central to all psychological and social science disciplines. This fact necessarily renders the content of social psychology voluminous. It is no longer possible to treat this subject adequately in small compass. The text-books which have so far appeared, although for the most part excellent from their several viewpoints, are nevertheless but partial treatments. So notably true is this that there exists a marked controversy as to what properly constitutes social psychology. In Part I of this volume an attempt has been made to bring this controversy into relief for the purpose of enabling the reader to see the subject as a whole. Originally the writer intended to publish this volume in five parts to make the synthetic treatment more pronounced. But the length of the volume as thus planned was prohibitive and it was decided to change the plan somewhat. The synthetic character of the treatment has been retained, but the detailed presentation of the process of the development of personality and of self and social consciousness has been reserved for a second volume. The present volume treats the subject from the standpoint of the more objective factors which integrate the personality and its responses in a social environment. Throughout it has been the intention of the writer, not only to make the treatment complete in itself, but to keep the presentation on such a level that the volume can be used successfully as a second book in social theory, following directly upon the introductory course in sociology in departments sociology. If the approach to the social sciences is a psychological one, the organization of this volume should make it available as an introduction to the first course in sociology, economics, politics, and more advanced courses in history and literature, in those departments which care to use it in this way. That social psychology will ultimately be regarded as a necessary introduction to the several social sciences and the literatures can scarcely be doubted. While the present volume is intended for undergraduate students, it is hoped that it may also be used profitably in more advanced courses in combination with the more extended treatment of the subjective aspects of personality development later to be published"--Preface. Improving Palliative Care for Cancer 2001-10-19 National Research Council In our society's aggressive pursuit of cures for cancer, we have neglected symptom control and comfort care. Less than one percent of the National Cancer Institute's budget is spent on any aspect of palliative care research or education, despite the half million people who die of cancer each year and the larger number living with cancer and its symptoms. Improving Palliative Care for Cancer examines the barriersâ€”scientific, policy, and socialâ€”that keep those in need from getting good palliative care. It goes on to recommend public- and private-sector actions that would lead to the development of more effective palliative interventions; better information about currently used interventions; and greater knowledge about, and access to, palliative care for all those with cancer who would benefit from it.

Nanoscience in Dermatology 2016-08-13 Michael R. Hamblin Nanoscience in Dermatology covers one of the two fastest growing areas within dermatological science, nanoscience and nanotechnology in dermatology. Recently, great progress has been made in the research and development of nanotechnologies and nanomaterials related to various applications in medicine and, in general, the life sciences. There is increasing enthusiasm for nanotechnology applications in dermatology (drug delivery, diagnostics, therapeutics, imaging, sensors, etc.) for understanding skin biology, improving early detection and treatment of skin diseases, and in the design and optimization of cosmetics. Light sensitive nanoparticles have recently been explored, opening a new era for the combined applications of light with nanotechnology, also called photonanodermatology. However, concerns have been raised regarding the adverse effects of intentional and unintentional nanoparticle exposure and their toxicity. Written by experts working in these exciting fields, this book extensively covers nanotechnology applications, together with the fundamentals and toxicity aspects. It not only addresses current applications of nanotechnology, but also discusses future trends of these ever-growing and rapidly changing fields, providing scientists and dermatologists with a clear understanding of the advantages and challenges of nanotechnology in skin medicine. Provides knowledge of current and future applications of nanoscience and nanotechnology in dermatology Outlines the fundamentals, methods, toxicity aspects, and other relevant aspects for nanotechnology based applications in dermatology Coherently structured book written by experts working in the fields covered

Women and Children as Victims and Offenders: Background, Prevention, Reintegration 2016-07-01 Helmut Kury This work compiles experiences and lessons learned in meeting the unique needs of women and children regarding crime prevention and criminal justice, in particular the treatment and social reintegration of offenders and serves as a cross-disciplinary work for academic and policy-making analyses and follow-up in developing and developed countries. Furthermore, it argues for a more humane and effective approach to countering delinquency and crime among future generations. In a world where development positively depends on the rule of law and the related investment security, two global trends may chart the course of development: urbanization and education. Urbanization will globalize the concepts of "justice" and "fairness"; education will be dominated by the urban mindset and digital service economy, just as a culture of lawfulness will. This work looks at crime prevention education as an investment in the sustainable quality of life of succeeding generations, and at those who pursue such crime prevention as the providers of much-needed skills in the educational portfolio. Adopting a reformist approach, this work collects articles with findings and recommendations that may be relevant to domestic and international policymaking, including the United Nations Studies and their educational value for the welfare of coming generations. The books address the relevant United Nations ideas by combining them with academic approaches. Guided by the Editors' respective fields of expertise, and in full recognition of academic freedom and "organized scepticism", it includes contributions by lawyers, criminologists, sociologists and other eminent experts seeking to bridge the gap between academic and policy perspectives, as appropriate, against the international background, including the United Nations developments. The second volume opens with Part IV, which presents articles on different kinds of crime

prevention. The effectiveness of punishment and, in particular, imprisonment is examined by contrasting it with alternative sanctions and the following questions are raised: Does harsh punishment have a crime preventive effect? What are the side effects of imprisonment on the offenders and their families? Are alternatives, such as restorative justice or mediation, more effective and cheaper? Part V outlines proactive strategies of crime prevention, e.g. for potential sex offenders or in the domain of internet crime. Part VI envisions a more peaceful and inclusive society, which would be realized by improving the protection of women and children in their everyday life, and easing the reintegration of those who have become offenders. The importance of the role played by the UN in formulating these goals is underlined. The volume concludes with an epilogue of the 70th President of the United Nations Economic and Social Council, Martin Sajdik, and a post scriptum of the editors. p>
