Nevada 30-Hour Applied Real Estate Practices Course
2021-10-15 Stephen Mettling The content of this course covers essential contract law, both national and Nevada-specific, and the laws of agency, likewise both national and specific to Nevada. In addition, and along related lines, the program presents a terse review of the issues defining and impacting the broker – sales associate relationship. The program ends with a comprehensive survey of risk management and how to manage risk minimization in your brokerage practice, particularly in contexts that impact contracts, agency, and activities within the brokerage. As a format preview, this course is comprised of seven chapters. Each chapter begins with an informative text narrative summarizing key points of required content. Subsequently, participants will be given quiz questions following each chapter. Following Chapter 3 and Chapter 7, students will engage in a skills workshop focusing on conveyance contracts and brokerage agreements, respectively. Students will be required to participate by answering problem-solving questions and situations. The intent of these chapters, and the program as a whole, is to give students an interactive opportunity to focus on the day-to-day skills of contracting, working with clients, and managing one’s practice so that such practice can be delivered in a professional manner and in full compliance with Nevada’s many underlying laws and regulations.

The Law of Environmental Justice

2008 Michael Gerrard Environmental justice is the concept that minority and low-income individuals, communities and populations should not be disproportionately exposed to environmental hazards, and that they should share fully in making the decisions that affect their environment. This volume examines the sources of environmental justice law and how evolving regulations and court decisions impact projects around the country.

<i>Toxic Mold Litigation</i>
2008 Raymund C. King This book is intended as a practical reference for lawyers and others who deal with the impact of mold on commercial and residential real estate, whether from the vantage point of insurance, construction, or ownership, and who want to gain a commonsense understanding of the current legal issues affecting mold litigation. The book is not intended to be an exhaustive legal treatise on mold litigation, but rather a practical road map for those who have limited experience in handling mold claims. Forms, checklists, and copies of actual petitions and orders from recent mold cases in the US are included. This edition adds a new chapter on floods and hurricanes, and updates on the science behind mold litigation and on government regulations. King has a medical degree from the U. of Texas and a law degree from the Oklahoma City U. School of Law.
