Good and Cheap 2015-07-14 Leanne Brown A perfect and irresistible idea: A cookbook filled with delicious, healthful recipes created for everyone on a tight budget. While studying food policy as a master's candidate at NYU, Leanne Brown asked a simple yet critical question: How well can a person eat on the \$4 a day given by SNAP, the U.S. government's Supplemental Nutrition Assistance Program informally known as food stamps? The answer is surprisingly well: Broiled Tilapia with Lime, Spicy Pulled Pork, Green Chile and Cheddar Quesadillas, Vegetable Jambalaya, Beet and Chickpea Salad—even desserts like Coconut Chocolate Cookies and Peach Coffee Cake. In addition to creating nutritious recipes that maximize every ingredient and use economical cooking methods, Ms. Brown gives tips on shopping; on creating pantry basics; on mastering certain staples—pizza dough, flour tortillas—and saucy extras that make everything taste better, like spice oil and tzatziki; and how to make fundamentally smart, healthful food choices. The idea for Good and Cheap is already proving itself. The author launched a Kickstarter campaign to self-publish and fund the buy one/give one model. Hundreds of thousands of viewers watched her video and donated \$145,000, and national media are paying attention. Even high-profile chefs and food writers have taken note—like Mark Bittman, who retweeted the link to the campaign; Francis Lam, who called it “Terrific!”; and Michael Pollan, who cited it as a “cool kickstarter.” In the same way that TOMS turned inexpensive, stylish shoes into a larger do-good movement, Good and Cheap is poised to become a cookbook that every food lover with a conscience will embrace.

On the Chocolate Trail 2013 Deborah Prinz The next time you pick up a piece of chocolate, consider that you are partaking in an aspect of Jewish history. Explore the surprising Jewish connections to chocolate in this historical and gastronomic adventure through cultures, countries, centuries and religions. Rabbi Deborah Prinz draws from her world travels on the trail of chocolate to enchant chocolate lovers of all backgrounds as she unwraps tales of Jews in the early chocolate trade to how Jewish values infuse chocolate today. She shows the intersections of Jews, pre-Columbians, Catholics and Protestants along the chocolate trail and the lasting rituals involving chocolate that the world’s faith traditions still share. Tasty tidbits include: ¿ Chocolate making in seventeenth-century Amsterdam, home to the largest and wealthiest Jewish community of its time, was known as a special Jewish industry. ¿ Bayonne chocolate makers today advertise that Jews brought chocolate making to France. ¿ Chocolate Hanukkah gelt may have developed from St. Nicholas customs. ¿ Jews pioneered chocolate in North America as successful and well-known American colonial Jewish merchants such as Abraham Lopez and Nathan Simson traded cacao and manufactured chocolate. ¿ A born-again Christian businessman in the Midwest marketed his caramel chocolate bar as a ¿Noshy,¿ after the Yiddish word for ¿snack.¿ ¿ Jewish values of caring for the needy, pursuing economic justice, protecting the environment and promoting sustainability feed into the organic and fair trade chocolate businesses of today.

World of the Jezebel Files 2023-11-14 Deborah Wilde Love, danger, and magic collide in this action-packed urban fantasy featuring witty banter, a shifter romance, and a clever Red Riding Hood retelling. Dr. Raisa Montefiore has based her life on science, but at the moment, only three facts are relevant: A) werewolves don't exist, B) she may have created the one standing in front of her, C) revisit fact A. She’s a magic scientist with a mission to heal, but when her passion project is twisted to create the world’s first wolf shifter and her entire world comes crashing down, she’s thrown from the lab and onto a path filled with changing—and dangerous—unknowns. With her life’s research on the line, she’s forced to work with the wolf, an infuriating man who was bossy enough before he went furry. Worse still is their cover story: fake dating. Their deadly pursuers are looking pretty good in comparison. She’s trusting the Big Bad Wolf to protect her from the perils of the forest, while hoping he’s not the biggest danger of them all. Or that she won't give in to the urge to throw his corpse in a vat of strong acid, leaving no trace of his remains. Either way, Raisa is redeeming her life’s work and no man—or wolf—is going to stop her. If you like KF Breene, Annabel Chase, and Heather G Harris, you’ll burn through this clever, fast-paced duology! ~ I raised my eyes to Inspector Stern with all the fury of a stellar explosion. “What you’re doing right now is directly interfering with this lab’s ability to function.” He narrowed his eyes behind his tortoiseshell glasses, compressing his lips into a flat line and crossing his arms. Officers were scurrying around literally dismantling the place, while Stern loomed over me like a puffer fish, his jacket falling aside to show the badge hooked to his belt. I pulled myself up to my full five-foot-five self, which did little against the six inches he had on me, but screw him if he hoped to make me cower. I had no time for cops on a perpetual power trip, using their status to intimidate people. “Well?” “All clerical files are now part of our investigation. Unfortunately, it seems I’ll be disturbing your work.” With that, he pivoted for the door to reception. Sexist asshat. I hurried after him, my Doc Martens thudding on the tiles. “My work is in the labs, but it’s good to see how quickly you pigeonholed me.” He cut a sideways glance at me, pulling his frames off to clean the lenses. “Apologies, Miz...” He was handing me the best gift of this entire wretched evening. “Doctor,” I corrected and blinked my lashes fetchingly. “Donatella.” Most guys got all hot and bothered by images of Italian vixens when I purred that name, making it easy for me to go in for the kill. Not Inspector Stern. Sadly, he lived up to his name, his metaphoric jugular intact and his jaw set in a hard line as he put his glasses back on. “Dr. Donatella what?” I blinked. Well, no backing out now. I’d already committed. “Mutant-Ninjaturtle. It’s hyphenated.” He studied me for a moment, then squatted down next to a glass-fronted bookcase that had been unlocked and read the spines on a row of fat binders containing archived projects. Like I was less interesting than paper. I curled my fingers into my palms so I didn't snap them to get his attention back. We weren’t done until I learned whether his team was moving on to the labs after they took everything from the offices—like a crew of Grinches. Just as I opened my mouth to ask, the inspector spoke up. “As a spur-of-the-moment tactic,” he said, “I give your Mutant-Ninjaturtle jibe a solid seven.” “Spur of the moment?” I flicked a hand in dismissal. “Like Mendeleev just conjured up the periodic table over breakfast? Please. Dr. Mutant-Ninjaturtle is a richly drawn persona.” The inspector selected a half dozen binders. “You heard me.” I remained close on his heels. No way was I letting this insane man go anywhere farther without answers. “Was your sweep of our facility a spur-of-the-moment thing? I give it a solid negative a billion.” “Listen, Dr. Mutant-Ninjaturtle,” Stern said, rebalancing the binders. I bit the inside of my cheek. “With all due respect, I don’t have to tell you anything,”

he said. "But since you are clearly distraught enough to follow me around, I will say yes, we are coming for the labs. We're coming for everything. I have a legal right to every piece of information in this building. If you're going to be upset, then you can go back and sit on the bench with the other staff and be upset together." The door to reception hit my shoulder and I didn't even feel it. "How-how assumptive!" I spluttered. "What else do you think I can't handle besides my own emotions? Math? Jar lids?" I was saying words, but a dead weight in the center of my chest was tethered to my research in my lab. He was coming for it. I had to get it out of here, had to save it, had to— "Let me guess," Stern said drolly. "You tend to overthink things." An instrumental cover of "All Out of Love" by Air Supply came on. I was all out of air thanks to this guy's arrogance sucking the oxygen out of the room. Did that count? "Your aspersion of a total stranger aside," I said, "I think them through. And as a police officer with that tie, you might want to do the same." He glanced down at it like he'd forgotten it was there. "What's wrong with it?" I grabbed the binders away and plunked them down on the reception desk, keeping my hand—and all my weight—on them. "Really? Riddle me this. What could possibly be wrong with pink donuts on a cop's tie?" "They're circles." He tried to retrieve the binders, but I sat on them. As for the tie... I shot him a flat stare. "Aw, crap," he muttered, grimacing. "I thought they were circles." ~ Includes the titles: Howl at the Moon Lost in the Woods Join the hunt now.

SAS Data Analytic Development 2016-09-19 Troy Martin Hughes Design quality SAS software and evaluate SAS software quality SAS Data Analytic Development is the developer's compendium for writing better-performing software and the manager's guide to building comprehensive software performance requirements. The text introduces and parallels the International Organization for Standardization (ISO) software product quality model, demonstrating 15 performance requirements that represent dimensions of software quality, including: reliability, recoverability, robustness, execution efficiency (i.e., speed), efficiency, scalability, portability, security, automation, maintainability, modularity, readability, testability, stability, and reusability. The text is intended to be read cover-to-cover or used as a reference tool to instruct, inspire, deliver, and evaluate software quality. A common fault in many software development environments is a focus on functional requirements—the what and how—to the detriment of performance requirements, which specify instead how well software should function (assessed through software execution) or how easily software should be maintained (assessed through code inspection). Without the definition and communication of performance requirements, developers risk either building software that lacks intended quality or wasting time delivering software that exceeds performance objectives—thus, either underperforming or gold-plating, both of which are undesirable. Managers, customers, and other decision makers should also understand the dimensions of software quality both to define performance requirements at project outset as well as to evaluate whether those objectives were met at software completion. As data analytic software, SAS transforms data into information and ultimately knowledge and data-driven decisions. Not surprisingly, data quality is a central focus and theme of SAS literature; however, code quality is far less commonly described and too often references only the speed or efficiency with which software should execute, omitting other critical dimensions of software quality. SAS® software project definitions and technical requirements often fall victim to this paradox, in which rigorous quality requirements exist for data and data products yet not for the software that undergirds them. By demonstrating the cost and benefits of software quality inclusion and the risk of software quality exclusion, stakeholders learn to value, prioritize, implement, and evaluate dimensions of software quality within risk management and project management frameworks of the software development life cycle (SDLC). Thus, SAS Data Analytic Development recalibrates business value, placing code quality on par with data quality, and performance requirements on par with functional requirements.

Josef Stalin blockaded all ground routes coming in and out of Berlin to cut off West Berliners from all food and essential supplies. Without outside help, over 2.2 million people would die. As one of the American pilots participating in the Airlift mission, Lt. Gail S. Halvorsen helped to provide not only nourishment to the children but also gave them a reason to hope for a better world. From one thoughtful, generous act came a lifelong relationship between Lt. Gail and the children of Berlin. This is the true story of a seven-year-old girl named Mercedes who lived in West Berlin during the Airlift and of the American who came to be known as the Chocolate Pilot. Artist Gijsbert van Frankenhuyzen's evocative paintings illuminate Margot Theis Raven's powerful story of hope, friendship and remembrance. A West African Model to Address Human Trafficking 2022-02-02 Paul V.I. Sidlawinde Karenga This book describes the nature of trafficking in persons in West Africa, focusing on labor and sexual exploitation in the region, and recommends tailor-made solutions established by the Catholic Church in light of governmental authorities' failure to effectively combat this scourge of humanity. While states' efforts to fulfill their international obligations in developing anti-trafficking legislations are recognized, their failure to carry out prosecutions of offenders and ensure protection of the victims reveals that law alone is not a sufficient instrument for realizing human rights and improving people's lives. Faced with the sobering background of less than successful efforts by governmental entities to end the trade in humans, this research study recommends adopting essential elements of Catholic social teaching, which rests on the inherent dignity of human beings allowing the development of political, socio-cultural, and religious reforms that will increase the effectiveness of existing legislation designed to combat trafficking. This faith-based approach highlights the role that religion may play in fulfilling the discretionary provisions of the Palermo Protocol by promoting the welfare and protecting the life and dignity of the victims. Additionally, religion is composed of sound moral ethics that determine people's behavior to refrain from the sinful conduct of trafficking. It also creates a sense of ethical responsibility that promotes supply chain transparency and ethical purchasing as well as advocating social reforms and anti-trafficking legislations initiatives. This book offers a comprehensive look at how an exotic food grew to play such a central role in our lives. No food in the world can offer as storied a history as chocolate. Chocolate: A Cultural Encyclopedia

In 10 thematic chapters covering chocolate in society and culture, 80 shorter entries, recipes, and a comprehensive timeline, this new book takes a closer look at how chocolate has served as a medicine, an indulgence, a symbol of decadence, a door to romance, a tempting taboo, a means of survival, and a snack for children and adults alike. Why did popes and kings so fear their chocolate? Who invented milk chocolate, and why was its formula kept secret? Why did soldiers in World War II despise their chocolate rations? Who makes the most chocolate today? Find out the answers to these questions and more as this book tells you everything you wanted to know--and a lot you didn't even know existed--about the seed from the world's favorite fruit tree.

Couture Chocolate 2013-10-25 William Curley Couture Chocolate examines the origins of one of the world's most popular foods--explaining the method of creating chocolate, how its quality depends to a large extent on the variety of beans used, and the differences between plain, milk and white chocolates. It reveals how some of today's most popular flavors - such as vanilla and chilli - were those favored by the pioneering Aztec chocolatiers centuries ago. William shares his techniques and most mouth-watering recipes, starting with the basics: tempering and making a bar of chocolate; advice on how to add exotic flavors like rosemary or raspberry; and introducing different textures. Once those skills have been mastered, it's time to tackle some of the authors incredible creations.

The Case of the Chocolate Cream Killer 2016-06-30 Kaye Jones The true story of the seemingly respectable woman convicted of a murderous spree in Victorian-era Brighton, England. In 1871, when the news broke of a series of mysterious poisonings in the popular resort town of Brighton, shock and horror gripped the public. Even more disturbing was the revelation that the culprit was not a common criminal but a local "lady of fortune," Christiana Edmunds. Starting in March, Christiana had sent out dozens of poisoned chocolates and sweets to Brighton's residents. Her campaign resulted in the death of four-year-old vacationer Sidney Barker, and wounded countless others. Her arrest in August provoked such an emotional response from the local public that her trial was moved from Brighton to London's Old Bailey. The prosecution anticipated an easy victory. Christiana had not confessed, but witnesses confirmed she had purchased strychnine and their testimonies placed her at the scenes of the crimes. She had a motive too, argued the prosecution; she was a scorned woman. Despite the defense's best efforts, the jury took only one hour to convict her of the murder of Sidney Barker and the attempted murder of three others. This book tells the engrossing story of the crime, the trial, the darker underworld of Victorian Brighton, and the ultimate fate of Christiana Edmunds.

Haramacy 2022-05-26 Zahed Sultan 'A beautiful love letter to the diaspora, Haramacy is an essential collection of essays that push the conversation forward on issues to do with visibility, mental health, race and class' Nikesh Shukla 'A superbly crafted collection of essays. Often elegant, often visceral, always essential' Musa Okwonga Journalism in the UK is 94 per cent white and 55 per cent male, while only 0.4 per cent of journalists are Muslim and 0.2 per cent are Black. The publishing industry's statistics are equally dire. Many publications will use British Black, Indigenous People of Colour when it's convenient; typically, when the region the writer represents is topical and newsworthy. Otherwise, their voices are left muted. Haramacy amplifies under-represented voices. Tackling topics previously left unspoken, this anthology offers a space for writers to explore ideas that mainstream organisations overlook. Focusing on the experiences of twelve Middle Eastern and South Asian writers, the essays explore visibility, invisibility, love, strength and race, painting a picture of what it means to feel fractured - both in the UK and back home. Appreciating both heritage and adopted home, the anthology highlights the various shades that make up our society. The title, Haramacy, is an amalgamation of the Arabic word 'haram', meaning indecent or forbidden, and the English word 'pharmacy', implying a safe, trustworthy space that prescribes the antidote to ailments caused by intersectional, social issues. The book features contributions by novelists, journalists, and artists including Aina J. Khan, Ammar Kalia, Cyrine Sinti, Joe Zadeh, Kieran Yates, Nasri Atallah, Nouf Alhimiary, Saleem Haddad and Sanjana Varghese, as well as essays by editors Dhruva Balram, Tara Joshi and Zahed Sultan.
