Selling Forest Environmental Services 2012-04-27 Joshua Bishop The risks posed by forest destruction throughout the world are highly significant for all. Not only are forests a critical source of timber and non-timber forest products, but they provide environmental services that are the basis of life on Earth. However, only rarely do beneficiaries pay for the goods and services they experience, and there are severe consequences as a result for the poor and for the forests themselves. It has proved difficult to translate the theory of market-based approaches into practice. Based on extensive research and case studies of biodiversity conservation, watershed protected and carbon sequestration, this book demonstrates how payment systems can be established in practice, their effectiveness and their implications for the poor.

Post-Consumer Waste Recycling and Optimal Production 2012-05-23 Enri Damanhuri This book deals with several aspects of waste material recycling. It is divided into three sections. The first section explains the roles of stakeholders, both informal and formal sectors, in post-consumer waste activities. It also discusses waste collection programs for recycling. The second section discusses the analysis tools for recycling system. The third section focuses on the recycling process and optimal production. I hope that this book will convey both the need and means for recycling and resource conservation activities to a wide readership, at both academician and professional level, and contribute to the creation of a sound material-cycle society.

Valuing the Future 1998 G. M. Heal With issues like global warming and the loss of biodiversity becoming increasingly important to policymakers and scientists worldwide, the issue of sustainability cannot be ignored as we move toward the twenty-first century. Not surprisingly, the sustainable management of the biosphere has in recent years been the subject of much attention among ecologists, environmental engineers, and other members of the scientific community. Yet although these issues are clearly rooted in economic behavior and organization, the question of sustainability is not one that has been addressed directly by economists. Now, with *Valuing the Future*, economist Geoffrey Heal presents a coherent framework for understanding the earth's future from an economic perspective. Heal's model begins with a reconciliation of the economists' and environmentalists' time horizon: in economics, discussions of "the long run" generally refer to a much shorter timeline than do those of the earth sciences. The book shows the benefits of viewing the environment as an economic asset that should be understood as a part of a nation's income and explains how this approach can lead to more conservative patterns of resource use. Stepping beyond merely theoretical generalities, *Valuing the Future* offers a dynamic new blueprint for comprehending sustainability. Chapters provide complete mathematical templates for the valuation of a depletable stock and of renewable resources, the proper calculation of national income, and the conduct of cost-benefit analysis. It will be of great value to economic theorists, environmental economists and policymakers, providing a powerful new model for scientists concerned with environmental sustainability.

Strategic Marketing Communications 1999 Paul Russell Smith Imagine this... You have a marketing strategy, an advertising strategy, and, if you're organised, a sales promotion strategy, a direct mail strategy and an exhibitions strategy... but you have no overall communication strategy which drives all of these communications tools in the same direction. *Strategic Marketing Communications* tackles this problem as an issue of growing importance for all marketing professionals. Not just an ordinary book... This is not just an ordinary textbook: it is an interactive learning tool packed with practical examples, short cases, model documents and checklists to help you build communications plans and strategies simply and easily. The planning system, SOSTAC, brings it all together by showing you how to write the perfect plan within minutes. All in all, if you are faced with the task of creating a communications strategy, it will enable you to develop new ways of achieving competitive advantage. After reading this book you will know... • how to generate marketing communications strategies; • how to integrate all of the communications tools; • how to write better marketing communications plans; • how to exploit the Internet opportunity; • much more about communications and how they can work more effectively. This book is the latest in the series of books, CDs and audiotapes on marketing and marketing communications from Smith, Berry and Pulford. In addition to this book on integrated communications strategy, you will need to read about all the individual communications tools in Paul Smith's best-selling *Marketing Communications - An Integrated Approach*, now in its second edition. This revised edition comes complete with an attached planning disk, giving you a template for writing marketing communications strategies and a full marketing communications plan.

Marine Ecotourism 2003-01-03 Brian Garrod Marine ecotourism is a major growth area within ecotourism, itself a rapidly expanding area within tourism as a whole. The activity has been attracting increasing attention, both from the popular media and from professionals and academics with an interest in tourism's potential to contribute to sustainable development. However, there is a growing consensus that far too often the term has been used merely as a tool for capitalising on the good intentions of tourists, without the industry itself having to make fundamental changes to their products or to the way they go about their operations. This has often been to the detriment of local environments, economies and host communities. Yet the ideal of ecotourism, as it is properly understood, is to present local communities with a sustainable development alternative – one that works to the benefit of local ecosystems, local economies and local people. The purpose of the first section of this book is therefore to introduce the concept of marine ecotourism and to draw out some of the key issues involved in ensuring that marine ecotourism is developed in a genuinely sustainable manner. The second section then discusses some practical experiences of planning and managing marine ecotourism from around the world, identifying common problems and discussing what might constitute good practice in addressing those problems.

Sustainable Food Waste Management 2021-01-04 Monika Thakur This book discusses one of the biggest challenges of the food industry, which is waste management. Food industries generate high amounts of waste, both solid and liquid, resulting from the production, processing and consumption of food. Stringent environmental legislators have made the task of waste management more challenging. Through the three sections of this book, the readers are introduced to the different types of wastes generated, utilization of waste through food processing industry and sustainable waste management technologies. The different chapters describe how the biomass and the valuable nutrients from food industry wastes could be used to develop value-added products. The book reiterates that food wastes and their by-products are an excellent source of sugars, minerals, dietary fiber, organic acids, bio active compounds such as polyphenols, carotenoids and phytochemicals etc. This book is an excellent resource for industry experts, researchers and students in the field of food science, food processing and food waste management.

The Diversity of Life 1999 Edward O. Wilson This classic by the distinguished Harvard entomologist tells how life on earth evolved and became diverse, and now, how diversity and life are endangered by us, truly. While Wilson contributed a great deal to environmental ethics by calling for the preservation of whole ecosystems rather than individual species, his environmentalism appears too anthropocentric: "We should judge every scrap of biodiversity as priceless while we learn to use it and come to understand what it means to humanity." And: "Signals abound that the loss of life's diversity endangers not just the body but the spirit." This reprint of the 1992 Belknap Press publication contains a new foreword. Development Theory and the Three Worlds 1995 Björn Hettne Provides a stimulating and substantive intellectual history of social science and development theories, helping towards an understanding of development theory and development problems in the three worlds. Describes early, primarily European, theories on development and how they were enriched, challenged and transformed in response to Third World realities. It moves on to discuss how this body of theory, Marxist and non-Marxist, has become increasingly relevant for understanding structural development problems, which are occurring in the rich world, and the relationships between development theory and the mainstream social sciences.

Principles and Methods in Landscape Ecology 2022-05-26 Almo Farina This third, thoroughly updated edition of a well received book, presents the most complete collection of theories, paradigms and methods utilized by the landscape sciences. With the introduction of new ecosystemic concepts and innovative managing procedures, it offers a broad list of ecological, ecosystemical and cultural tools to investigate, interpret and manage the environmental complexity according to a species-specific individual-based approach. Readers will discover the importance of a landscape perspective to create strategic bridges between science and humanities favored by the holistic sight of sensorial (visual, acoustic, olfactory, tactile, and thermal) "scapes". Distributed in 10 chapters, the content covers many aspects of the landscape sciences ranging from the description of fundamental theories, principles and models originated by ecological approaches like source-sink models, island biogeography, hierarchical theory and scale. The ecosystemical approaches like the eco-field model, the ecoscape paradigm, and the general theory of resources are widely described and discussed. A cultural approach to landscape is utilized to focus on the heritage values of territories and their environmental identity. This book, written in an accessible and didactic style, is particularly dedicated to undergraduate and graduate students but also scholars in ecology, agroforestry, urban planning, nature design, conservation and remediation. Land practitioners, farmers and policymakers can use this book as an authoritative guide to better understand the function and role of environmental systems according to a social-economic integrated perspective.

Gregory Building on the extremely successful and popular Russell's *Soil Conditions and Plant Growth*, Wiley-Blackwell is pleased to publish this completely revised and updated edition of the soil science classic. Covering all aspects of the interactions between plant and soil, Peter Gregory and Stephen Nortcliff, along with their team of internationally-known and respected authors, provide essential reading for all students and professionals studying and working in agriculture and soil science. Subject areas covered range from crop science and genetics; soil fertility and organic matter; nitrogen and phosphorus cycles and their management; properties and management of plant nutrients; water and the soil physical environment and its management; plants and change processes in soils; management of the soil/plant system; and new challenges including food, energy and water security in a changing environment. Providing a very timely account on how better to understand and manage the many interactions that occur between soils and plants, *Soil Conditions and Plant Growth* is sure to become the book of choice - as a recommended text for students and as an invaluable reference for those working or entering into the industry. An essential purchase for all universities and research establishments where agricultural, soil, and environmental sciences are studied and taught.

Islamic Monetary Economics 2020-12-11 Taha Eliri The existence of fiat currencies has long been cited as one of the major contributing factors to the challenges facing contemporary economies, and the current monetary system is not only a key source of exorable increases in interest rates but also a principal cause of inflation and decline in the value of money in many countries. The editors argue that an Islamic monetary system, with its specific money concepts, interest-free financial institutions, and monetary policy embedded in real growth, provides a solution to this conundrum. Contributions from many world-renowned experts consider a wide array of topics, ranging from the theoretical concepts of money and banking in conventional and Islamic economics to the historical journey of money from precious metals to plastic money and digital currency today. The book outlines the problems that sprout from interest-based banking and multiple debt structures. It then mirrors the Islamic concepts of money as well as idiosyncrasies of its monetary policy. Supported with meticulous research and empirical evidence, the book demonstrates the efficacy of Islamic monetary system in delivering real growth along with equitable distribution of wealth and prosperity in the economy. It additionally acquaints the readers with juristic debates about money and monetary policy. This is essential reading for both students and researchers in Islamic economics, banking, and finance, expertly promoting a fair and just economic system that emerges as a result of interest-free banking and monetary policy based on Islamic principles.

The Half-Empty Heart 2007-04-01 Alan Downs, Ph.D. Finally, a book of insightful and practical advice for the millions of people suffering from low-grade depression, also known as dysthymia or chronic discontent Frustrated. Stressed. Irritable. Discouraged. Cynical. Fed up. These are among the feelings experienced by millions of people. Whether they realize it or not, their feelings are not caused by a negative attitude, a lack of gratitude, or laziness. Rather, these feelings are among the symptoms of a condition called dysthymia, also known as chronic discontent or low-grade depression. It blocks feelings of happiness, contentment, and passion, leaving emptiness, a lack of meaning, and despair. This powerful and practical book explains how this condition takes hold—and presents simple yet profound ways to overcome it once and for all. Using anecdotes from his private practice as well as insightful questions and exercises, psychotherapist Alan Downs, Ph.D., shines light into the dark corners of this isolating and debilitating condition and includes a five-week program to help you feel good again. Not a superficial, magic-bullet approach, *The Half-Empty Heart* is a probing, honest book that offers a path to meaningful change. The path begins here.

Tourism and Development in the Developing World 2015-12-14 David J. Telfer Tourism is widely considered to be an important factor in socio-economic development, particularly in less developed countries. However, despite almost universal recognition of tourism's development potential, the extent to which economic and social progress is linked to the growth of a country's tourism sector remains the subject of intense debate. *Tourism and Development in the Developing World* offers a thorough overview of the tourism-development relationship. Focusing specifically on the less developed world and drawing on contemporary case studies, this updated second edition questions widely-held assumptions on the role of tourism in development and seeks to highlight the challenges faced by destinations seeking to achieve development through tourism. The introductory chapter establishes the foundation for the book, exploring the meaning and objectives of development, reviewing theoretical perspectives on the developmental process, and assessing the reasons why less developed countries are attracted to tourism as a development option. The concept of sustainable development, as the most widely adopted contemporary model of development, is then introduced and its links with tourism critically assessed. Subsequent chapters explore the key issues associated with tourism and development, including the rise of globalization; the tourism planning and development process; the relationship between tourism and communities within which it is developed; the management implications of trends in the demand for and uptake of tourism; and an analysis of the consequences of tourism development for destination environments, economies and societies. A new chapter considers the challenges of climate change, sustainability of resource supply (oil, water and food), global economic instability, political instability and changing demographics. Finally, the issues raised throughout the book are drawn together in a concluding chapter that assesses the tourism and development 'dilemma'. Combining an overview of essential concepts, theories and knowledge with an analysis of contemporary issues and debates in tourism and development, this new edition will be an invaluable resource for those investigating tourism issues in developing countries. The book will be of interest to students of tourism, development, geography and area studies, international relations and politics, and sociology.

Teacherpreneurs 2013-08-12 Barnett Berry We need a bold new brand of teacher leadership that will create opportunities for teachers to practice, share, and grow their knowledge and expertise. This book is about "teacherpreneurs"—highly accomplished classroom teachers who blur the lines of distinction between those who teach in schools and those who lead them. These teacherpreneurs embody the concept that teachers can teach as well as lead the transformation of teaching and learning. It's about empowering expert teachers who can buoy the image of teaching and enforce standards among their ranks while all along making sure that their colleagues as well as education policymakers and the public know what works best for students. The book follows a small group of teacherpreneurs in their first year. We join their journey toward becoming teacher leaders whose work is not defined by administrative fiat, but by their knowledge of students and drive to influence policies that allow them and their colleagues to teach more effectively. The authors trace the teacherpreneurs' steps—and their own—in the effort to determine what it means to define and execute the concept of "teacherpreneurism" in the face of tough demands and resistant organizational structures.

Rural Tourism and Recreation 2001-01-01 Lesley Roberts This book reviews the theory and practice of tourism and recreation in rural areas in Europe. the development debate; the different levels of policy influencing recreation and tourism development, and emphasizing the connectedness between local and global processes; the role and influence of the local community in recreation and tourism; changing patterns of tourism consumption; the changing nature of tourism supply; and the processes relating to the convergence of supply and demand.

Islamic Monetary Economics and Institutions 2019-10-01 Muhamed Zulkhibri This edited volume explores theoretical and empirical issues related to monetary economics and policy in the Islamic financial system. Derived from the Conference on Islamic Monetary Economics and Institutions: Theory and Practice 2017 held in Malé, Maldives, the enclosed papers highlights several option for authorities and regulatory bodies regarding monetary policy and regulation, as well as discussing how Islamic monetary policy effects growth, financial stability and resilience to shocks in practice. The inter-linkage between Islamic monetary policy and other markets are also explored. The subject of Islamic economics has gained considerable attention in the last four decades with the emergence of Islamic financial institutions around the world. This phenomenon has motivated economists to develop a comprehensive theoretical framework of modern monetary economics for Islamic economic system. An important characteristic of the Islamic economic system is the abolition of interest from the financial system. Islamic monetary economics is distinguished from conventional monetary economics due to the absence of interest. Therefore, under the Islamic economic system, monetary policy has to depend on other tools. In the early theoretical literature on Islamic monetary economics, many have discussed the role of money in Islamic economics system, while the number of empirical studies on Islamic monetary economics is a relatively new phenomenon. According to Islamic scholars, there are three main goals of Islamic monetary policy: a) economic well-being with full employment and optimum rate of economic growth; b) socioeconomic justice and equitable distribution of income and wealth and c) stability in the value of money. Hence, the Islamic monetary policy has several socioeconomic and ethical implications. Featuring regional case studies, this book serves as a valuable resource for academics, scholars, practitioners and policy makers in the areas of Islamic economics and finance.

The Original Dream 2017 Nukila Amal For Maya, history is like a dream, and her dreams are like a history of her life and how it relates to others. Effortlessly defying and calling into question time and space, Maya inhabits fantastical realities filled with shamans, romantic longing, a daughter's struggles, and a flying dragon. Lyrically flowing between Maya's multiple realities, The Original Dream is the story of a young independent Indonesian woman trying to break free from cultural and social conventions while also searching for her place among family and friends. With guidance from her parents, coworkers, and sister, along with a newborn filled with the wisdom of elders, Maya navigates her perceptions, looking for answers to unknown questions. Whether soaring through the nighttime sky, caring for her nephew, or tending to guests at the hotel where she works, she tries to delineate the difference between dreams and reality and if such a difference even matters.

Sutasoma 2008 Tantular (Mpu.) The 14th century Javanese epic poem, Sutasoma, relates the life of a prince, born an incarnation of the Jina-Buddha Wairocana. It follows his spiritual journey to enlightenment and his temporal journey through marriage, kingship and eventual victory over the mighty, world-threatening demon, Porusada. Kate O Brien s new translation delivers to the reader a highly approachable and lively rendition of this Buddhist epic, comparable in both complexity and scale to that of the Ramayana, yet significantly less known or understood.
