Communities and Households in the Greater American Southwest Robert J. Stokes 2019-07-01 Communities and Households in the Greater American Southwest presents new research on human organization in the American Southwest, examining families, households, and communities in the Ancestral Puebloan, Mogollon, and Hohokam major cultural areas, as well as the Fremont, Jornada Mogollon, and Lipan Apache areas, from the time of earliest habitation to the twenty-first century. Using historical data, dialectic approaches, problem-oriented and data-driven analysis, and ethnographic and gender studies methodologies, the contributors offer diverse interpretations of what constitutes a site, village, and community; how families and households organized their domestic space; and how this organization has influenced researchers' interpretations of spatially derived archaeological data. Today's archaeologists and anthropologists understand that communities operate as a multi-level, -organizational, -contextual, and -referential human creation, which informs their understanding of how people actively negotiate their way through and around community constraints. The chapters in this book creatively examine these interactions, revealing the dynamic nature of ancient and modern groups in the American Southwest. The book has two broad complementary themes: one focusing on household decision-making, identity, and structural relations with the

greater community; the other concerned with community organization and integration, household roles within the community, and changes in community organization—violence and destabilization, coalescence and cooperation—over time. Communities and Households in the Greater American Southwest weaves a rich tapestry of ancient and modern life through innovative approaches that will be of interest not only to Southwestern archaeologists but to all researchers and students interested in social organization at the household and community levels. Perspectives on Rural Tourism Geographies Rhonda L. Koster 2019-03-14 This book examines rural tourism across three different contexts, acknowledging the complexity of rural places. It applies a systematic comparative framework across nine case studies from Australia, Canada and Sweden. The case studies address the uniqueness of different rural spaces, while the framework incorporates many theoretical aspects from human geography including spatial, historic, institutional, demographic, socio-economic and network perspectives. In the course of applying this comparative case study framework, the book identifies numerous implications for planning and policy in rural settings. These contributions from international, expert authors help to identify the opportunities and challenges that affect rural regions, from places at the urban fringe to exotic remote spaces and taking in the 'boring bits in between.' Both the analysis and the framework used will be of value to scholars and students of rurality, tourism, regional development, rural policy, geography, and destination management. Readers will gain a deeper understanding of the rural context in developed countries and a robust conceptualization of rural tourism geographies.

Solving the Climate Crisis through Social Change Gar W. Lipow 2012-03-12 This book presents an accessible and easy-to-follow argument that the climate crisis is a side effect of inequality and injustice, and demonstrates how strategies such as large-scale social investment will prove far more effective in reducing greenhouse gas pollution than cap-and-trade or other forms of free-market environmentalism. *Solving the Climate Crisis through Social Change: Public Investment in Social Prosperity to Cool a Fevered Planet* offers a new approach to battling the climate crisis, arguing that the massive waste that caused the current environmental crisis resulted not only from fundamental structural flaws in markets but also from social inequality, lack of democracy, and a deeply flawed foreign policy. Rather than providing the typical doomsday perspective, it offers realistic optimism about the expanding climate crisis, highlighting the convergence between the necessary steps to save the planet and what needs to be done to improve the lives of Americans. The author's discussion of the United States's role in the climate crisis spans subjects as varied as the 17th-century forests of New England, the evolution of housework over 200 years, the American addiction to the automobile, the lettuce fields of California in the 1970s, and the Guano wars in 19th-century Bolivia, Chile, and Peru. This book will appeal to a wide range of readers, from the interested general public to students, academics, professionals, and other experts. The main section presents a clear and accessible survey of the economic, social, and political causes of the climate crisis, accompanied by potential solutions, while extensive appendixes offer in-depth and technical

discussions.

The Merger Mystery Geoff Meeks 2022-06-23 Statistical studies over the last forty-five years show that, although there are success stories, very many mergers and acquisitions do not result in the increased operating profits that economics textbooks would lead one to expect. As consultancy McKinsey have put it, 'Anyone who has researched merger success rates knows that roughly 70% fail'.

Yet—mysteriously—M&A activity has boomed across the globe, with a forty-fold increase in deals done each year now compared with four decades ago, in spite of the adverse general evidence. How can it be that talented, energetic, highly skilled, law-abiding, income-maximising participants in the M&A market will often promote mergers that lead to no operating gains, frequently with adverse effects on the wider economy too? Drawing on findings from a wealth of statistical analyses and case evidence from many businesses, the book presents answers to this merger mystery. In a synthesis of ideas from several disciplines, solutions are detected in misaligned incentives, distorted financial engineering and information asymmetry. By revealing how weaknesses at multiple points can interact and cumulate to produce inefficient outcomes, the discussion serves as a corrective to the overwhelmingly positive tone of most commentary on M&A, whilst also advocating changes in participants' contracts, in taxation, and in regulation which could significantly reduce the number of mergers that fail. Designed to be accessible to a wide readership, the book will be of interest to investors, to M&A practitioners and commentators, to researchers and students of economics, political economy, finance, management and accounting, and—importantly—to policy makers working in

these areas.
