[Guide to the Software Engineering Body of Knowledge \(Swebok\(r\)\)](#) IEEE Computer Society 2014 In the Guide to the Software Engineering Body of Knowledge (SWEBOK(R) Guide), the IEEE Computer Society establishes a baseline for the body of knowledge for the field of software engineering, and the work supports the Society's responsibility to promote the advancement of both theory and practice in this field. It should be noted that the Guide does not purport to define the body of knowledge but rather to serve as a compendium and guide to the knowledge that has been developing and evolving over the past four decades. Now in Version 3.0, the Guide's 15 knowledge areas summarize generally accepted topics and list references for detailed information. The editors for Version 3.0 of the SWEBOK(R) Guide are Pierre Bourque (Ecole de technologie superieure (ETS), Universite du Quebec) and Richard E. (Dick) Fairley (Software and Systems Engineering Associates (S2EA)).

Digital Economies at Global Margins Mark Graham 2019-02-12 Investigations of what increasing digital connectivity and the digitalization of the economy mean for people and places at the world's economic margins. Within the last decade, more than one billion people became new Internet users. Once, digital connectivity was confined to economically prosperous parts of the world; now Internet users make up a majority of the world's population. In this book, contributors from a range of disciplines and locations investigate the impact of increased digital connectivity on people and places at the world's economic margins. Does the advent of a digitalized economy mean that those in economic peripheries can transcend spatial, organizational, social, and political constraints—or do digital tools and techniques tend to reinforce existing inequalities? The contributors present a diverse set of case studies, reporting on digitalization in countries ranging from Chile to Kenya to the Philippines, and develop a broad range of theoretical positions. They consider, among other things, data-driven disintermediation, women's economic empowerment and gendered power relations, digital humanitarianism and philanthropic capitalism, the spread of innovation hubs, and two cases of the reversal of core and periphery in digital innovation. Contributors Niels Beerepoot, Ryan Burns, Jenna Burrell, Julie Yujie Chen, Peter Dannenberg, Uwe Deichmann, Jonathan Donner, Christopher Foster, Mark Graham, Nicolas Friederici,

The Age of Discontinuity Peter F. Drucker 2011-12-31 The closing decades of the twentieth century have been characterized as a period of disruption and discontinuity in which the structure and meaning of economy, polity, and society have been radically altered. In this volume Peter Drucker focuses with great clarity and perception on the forces of change that are transforming the economic landscape and creating tomorrow's society. Drucker discerns four major areas of discontinuity underlying contemporary social and cultural reality. These are: (1) the explosion of new technologies resulting in major new industries; (2) the change from an international to a world economy—an economy that presently lacks policy, theory, and institutions; (3) a new sociopolitical reality of pluralistic institutions that poses drastic political, philosophical, and spiritual challenges; and (4) the new universe of knowledge based on mass education and its implications in work, leisure, and leadership. Peter Drucker brings to this work an intimate knowledge and objective view of the particular and general. The Age of Discontinuity is a fascinating and important blueprint for shaping a future already very much with us.

Excel macro 2016 Edimatica 2015-11-18T00:00:00+01:00 Questo manuale insegna l'utilizzo del linguaggio VBA per la creazione di macro, potenzialità generalmente poco sfruttata che permette di automatizzare, personalizzare e ottenere il massimo da un foglio di calcolo Excel.

Passo dopo passo il lettore è guidato nella costruzione di macro, partendo dalla semplice registrazione di una serie di operazioni, fino alla scrittura e personalizzazione del codice VBA attraverso il Visual Basic Editor. Il testo è aggiornato alla versione 2016 di Excel, ma i fondamenti della scrittura di macro sono validi anche per le versioni precedenti.

Through-Life Management Great Britain. National Audit Office 2003 Developed under the Strategic Defence Review, and a key element in the Smart Acquisition reforms policy, the Through-Life Management approach to defence acquisition has been adopted by the Ministry of Defence in order to deliver a faster, and cheaper set of processes and systems for developing an efficient military capability. This report examines whether that capability has been delivered. Among a number of observations and recommendations, the NAO found that Through-Life had yet to become firmly established in the Department, and so yield its' benefits; that despite strong management support, no clear, consolidated strategy existed across the Department itself and that a plan had now been developed to push through the changes needed to implement the Through-Life Management approach more effectively in the Department.

Adult Learning in Italy OECD 2019 While Italy has made major progress in the past decade to up-skill its population and workers, further efforts are needed to improve access to good quality adult learning opportunities. Training funds represent one important tool through which Italy could face the pressures brought about by the mega-trends, and equip adults and workers with the skills needed to thrive in the labour market and society. This report analyses how training funds are designed, used, and monitored, and provides actionable policy recommendations to ensure that they are put to their most effective use.

Prehistoric Warfare and Violence Andrea Dolfini 2018-07-20 This is the first book to explore prehistoric warfare and violence by integrating qualitative research methods with quantitative, scientific techniques of analysis such as paleopathology, morphometry, wear analysis, and experimental archaeology. It investigates early warfare and violence from the standpoint of four broad interdisciplinary themes: skeletal markers of violence and weapon training; conflict in prehistoric rock-art; the material culture of conflict; and intergroup violence in archaeological discourse. The book has a wide-ranging chronological and geographic scope, from early Neolithic to late Iron Age and from Western Europe to East Asia. It includes world-renowned sites and artefact collections such as the Tollense Valley Bronze Age battlefield (Germany), the UNESCO World Heritage Site at Tanum (Sweden), and the British Museum collection of bronze weaponry from the late Shang period (China). Original case studies are presented in each section by a diverse international authorship. The study of warfare and violence in prehistoric and pre-literate societies has been at the forefront of archaeological debate since the publication of Keeley's provocative monograph 'War Before Civilization' (Oxford 1996). The problem has been approached from a number of standpoints including anthropological and behavioural studies of interpersonal violence, osteological examinations of sharp lesions and blunt-force traumas, wear analysis of ancient weaponry, and field experiments with replica weapons and armour. This research, however, is often confined within the boundaries of the various disciplines and specialist fields. In particular, a gap can often be detected between the research approaches grounded in the humanities and social sciences and those based on the archaeological sciences. The consequence is that, to this day, the subject is dominated by a number of undemonstrated assumptions regarding the nature of warfare, combat, and violence in non-literate societies. Moreover, important methodological questions remain unanswered: can we securely distinguish between violence-related and accidental trauma on skeletal remains? To what extent can wear analysis shed light on long-forgotten fighting styles? Can we design meaningful combat tests based on historic martial arts? And can the study of rock-art unlock the social realities of prehistoric warfare? By breaking the mould of entrenched subject boundaries, this edited volume promotes interdisciplinary debate in the study of prehistoric warfare and violence by presenting a number of innovative approaches that integrate qualitative and quantitative methods of research and analysis.

The Global Environment of Business Frederick Guy 2009-03-26 Frederick Guy's The Global Environment of Business offers a multi-dimensional analysis of the environment in which international business operates. International: How do multi-national corporations, nation states, regional trade blocs, markets, and global institutions interact to shape the international economic system? Who wins and who loses when the economy internationalizes? Is internationalization leading to a global world, or a regional one? How will efforts to curtail and adapt to climate change affect international business? Technological and historical: How has the business environment been shaped by production systems, new methods of business organization, information and communication technology, transport, and the process of technological change itself? Comparative: How do institutional differences affect national specialization and economic performance? How do the business systems of Europe differ from that of the United States, or those of East Asia from those of Latin America? Why do location and face-to-face contact matter in an age of high-speed communication and cheap long-distance transportation? Why have some countries grown so fast while others remain poor? The Global Environment of Business draws on extensive research by economists, political scientists, sociologists, geographers, and business historians. There is more theory and academic debate here than in most books on the subject, but it is presented and explained clearly, and illustrated with lots of examples.

Eserciziario di Excel Alberto Clerici 2015-02-27T00:00:00+01:00 Excel è il software di produttività più diffuso e più utilizzato in tutti gli ambienti professionali, ed è un compagno insostituibile nel lavoro quotidiano come nell'analisi di grandi quantità di dati complessi. Ciò nonostante la maggior parte degli utenti ne conosce e utilizza solo un numero molto limitato di funzionalità, spesso in maniera elementare. Questo eserciziario mostra in pratica l'uso di una grande varietà di formule, funzioni e strumenti (come le tabelle pivot, le macro o il componente aggiuntivo Risolutore) che permettono di lavorare in maniera efficace e professionale con Excel. L'eserciziario parte dalle basi e arriva in maniera progressiva a trattare casi molto complessi. È un valido supporto per studenti universitari, professionisti e manager che vogliono imparare dalle basi o migliorare nella conoscenza di Excel fino a un livello avanzato. Nello spazio web dedicato sono disponibili tutti i file iniziali e risolti per svolgere gli esercizi e verificare le soluzioni. Oltre 40 esercizi sono commentati, in modo da chiarire i concetti fondamentali e i punti più complessi. Gli autori sono tutti docenti nel corso di Informatica per l'economia presso l'Università Bocconi di Milano: Massimo Ballerini, Alberto Clerici, Chiara Debernardi, Davide Del Corno, Maurizio De Pra, Gianluca Salviootti e Marco Sampietro.

Making Cities Resilient Vishwa Raj Sharma 2019-02-08 As the world has transformed, so have cities. Today, cities are home to 54 percent of the world's population, and by the middle of this century that figure will likely rise to 66 percent. According to the United Nations (UN) Habitat I (1972), Habitat II (1996) and Habitat III (2016) summits, cities are facing many serious challenges, including growing inequality, security concerns and the worsening impacts of climate change. Uncontrolled urbanization has led to many problems (haphazard growth of areas, emergence of slums, inadequate water and power supply, poor sanitation, shortage of transport and other civic amenities, shrinking green spaces, pollution, crime, and urban disaster risks such as fire, flood, road and industrial accidents, etc.). Worldwide, communities at the international, national and local level are continuously working to improve human habitats. In order to make our planet more sustainable, the UN has moved from the Millennium Development Goals (MDG) to the Sustainable Development Goals (SDG). Among the latter, the aim of SDG 11 is to "...make cities and human settlements inclusive, safe, resilient and sustainable." In light of these challenges, various terms have emerged to help understand urban issues. Visualizing the problem, the United Nations program "Making Cities Resilient" is focused on mitigating the disaster risk in urban areas. This book analyzes terms such as: sustainable, resilient, livable, inclusive, smart and world class city, which have emerged in the process of combating urban challenges in today's world. The book addresses emerging concepts for cities, challenges and potentials, urban environments, health and planning/policies. Covering 14 large cities in India, as well as case studies from Japan, Singapore, Thailand, Malaysia, Poland and Sweden, it provides a regional dimension to and micro-level perspective on urban issues.
