Proceedings on the New York University Forty Third Annual National Conference Labor New York University Staff 1995-12-31

Networking for Digital Preservation Ingeborg Verheul 2006-01-01 Libraries all over the world have to deal with fast growing numbers of digital materials that need to be safeguarded. Publications in digital form, online or on CD, digitised images, and born-digital objects need to be preserved and kept accessible. Safeguarding digital heritage is a major issue, especially for national libraries, because of their legal task of preserving the national heritage of a country. This volume describes the state of the art of digital repositories, preservation strategies and current projects in the national libraries of Australia, Austria, Canada, China, Denmark, France, Germany, Japan, Netherlands, New Zealand, Portugal, Sweden, Switzerland, the UK and the USA.

Free Software, Free Society Richard Stallman 2002 Essay Collection covering the point where software, law and social justice meet.

Chemical Warfare Secrets Almost Forgotten James S. Ketchum 2006-01-01

The Body Electric Robert Becker 1998-07-22 The Body Electric tells the fascinating story of our bioelectric selves. Robert O. Becker, a pioneer in the filed of regeneration and its relationship to electrical currents in living things, challenges the established mechanistic understanding of the body. He found clues to the healing process in the long-discarded theory that electricity is vital to life. But as exciting as Becker's discoveries are, pointing to the day when human limbs, spinal cords, and organs may be regenerated after they have been damaged, equally fascinating is the story of Becker's struggle to do such original work. The Body Electric explores new pathways in our understanding of evolution, acupuncture, psychic phenomena, and healing.

The Quest for Artificial Intelligence Nils J. Nilsson 2009-10-30 Artificial intelligence (AI) is a field within computer science that is attempting to build enhanced intelligence into computer systems. This book traces the history of the subject, from the early dreams of eighteenth-century (and earlier) pioneers to the more successful work of today's AI engineers. AI is becoming more and more a part of everyone's life. The technology is already embedded in face-recognizing cameras, speech-recognition software, Internet search engines, and health-care robots, among other applications. The book's many diagrams and easy-to-understand descriptions of AI programs will help the casual reader gain an understanding of how these and other AI systems actually work. Its thorough (but unobtrusive) end-of-chapter notes containing citations to important source materials will be of great use to AI scholars and researchers. This book promises to be the definitive history of a field that has captivated the imaginations of scientists, philosophers, and writers for centuries.

The Lie of Global Prosperity Seth Donnelly 2019-08-27 A deconstruction of the neoliberal placcations about global capitalism, exposing the inequalities of global poverty “We’re making headway on global poverty,” trills Bill Gates. “Decline of Global Extreme Poverty Continues,” reports the World Bank. “How did the global poverty rate halve in 20 years?” inquires The Economist. Seth Donnelly answers: “It didn’t!” In fact, according to Donnelly, virtually nothing about these glad tidings proclaiming plummeting global poverty rates is true. It’s just that trend-setting neoliberal experts and institutions need us to believe that global capitalism, now unfettered in the wake of the Cold War and bolstered by Information Technology, has ushered in a new phase of international human prosperity. This short book deconstructs the assumption that global poverty has fallen dramatically, and lays bare the spurious methods of poverty measurement and data on which the dominant prosperity narrative depends. Here is carefully researched documentation that global poverty—and the inequalities and misery that flourish within it—remains massive, afflicting the majority of the world’s population. Donnelly goes further to analyze just how global poverty, rather than being reduced, is actually reproduced by the imperatives of capital accumulation on a global scale. Just as the global, environmental catastrophe cannot be resolved within capitalism, rooted as it is in contemporary mechanisms of exploitation and plunder, neither can human poverty be effectively eliminated by neoliberal “advances.”

The Power of the Periphery Peder Anker 2020-05-28 Examines how Norway has positioned itself as an alternative, environmentally-sound nation in a world filled with tension and instability.

The Last Utopia Samuel Moyn 2012-03-05 Human rights offer a vision of international justice that today’s idealistic millions hold dear. Yet the very concept on which the movement is based became familiar only a few decades ago when it profoundly reshaped our hopes for an improved humanity. In this pioneering book, Samuel Moyn elevates that extraordinary transformation to center stage and asks what it reveals about the ideal’s troubled present and uncertain future.

Talking to Our Selves John Michael Doris 2015 Do we know what we're doing, and why? Psychological research seems to suggest not: reflection and self-awareness are surprisingly uncommon and inaccurate. John M. Doris presents a new account of agency and responsibility, which reconciles our understanding of ourselves as moral agents with empirical work on the unconscious mind.

Echilibriul pietei valutare versus hazardul moral Dr. Teodor-Adrian Morar-Triandafil

Handbook of Empirical Research on Islam and Economic Life M. Kabir Hassan 2016-12-30 In Islamic jurisprudence, a comprehensive ethic has been formulated governing how business and commerce should be run, how accountability to God and the community is to be achieved, and how banking and finance is to be arranged. This Handbook examines how well these values are translated into actual performance. It explores whether those holding true to the system are hindered and put at a disadvantage or whether the Islamic institutions have been able to demonstrate that faith-based activities can be rewarding, both economically and spiritually. *Leave Society* Tao Lin 2021-08-03 From the acclaimed author of Taipei, a bold portrait of a writer working to balance all his lives—artist, son, loner—as he spins the ordinary into something monumental. An engrossing, hopeful novel about life, fiction, and where the two blur together. In 2014, a novelist named Li leaves Manhattan to visit his parents in Taipei for ten weeks. He doesn't know it yet, but his life will begin to deepen and complexify on this trip. As he flies between these two worlds--year by year, over four years--he will fit in and out of optimism, despair, loneliness, sanity, bouts of chronic pain, and drafts of a new book. He will incite and temper arguments, uncover secrets about nature and history, and try to understand how to live a meaningful life as an artist and a son. But how to fit these pieces of his life together? Where to begin? Or should he leave society altogether? Exploring everyday events and scenes--waiting rooms, dog walks, family meals--while investigatively venturing to the edges of society, where culture dissolves into mystery, Lin shows what it is to write a novel in real time.

Illuminating and deeply felt, as it builds toward a stunning, if unexpected, romance, *Leave Society* is a masterly story about life and art at the end of history. A VINTAGE ORIGINAL

Dezentralisierung und ethnische Konflikte Leyla Ferman 2014

Management Information Systems Kenneth C. Laudon 2004 Management Information Systems provides comprehensive and integrative coverage of essential new technologies, information system applications, and their impact on business models and managerial decision-making in an exciting and interactive manner. The twelfth edition focuses on the major changes that have been made in information technology over the past two years, and includes new opening, closing, and Interactive Session cases.

How I Became a Quant Richard R. Lindsey 2011-01-11 Praise for How I Became a Quant "Led by two top-notch quants, Richard R. Lindsey and Barry Schachter, How I Became a Quant details the quirky world of quantitative analysis through stories told by some of today's most successful quants. For anyone who might have thought otherwise, there are engaging personalities behind all that number crunching!" --Ira Kawaller, Kawaller & Co. and the Kawaller Fund "A fun and fascinating read. This book tells the story of how academics, physicists, mathematicians, and other scientists became professional investors managing billions." --David A. Krell, President and CEO, International Securities Exchange "How I Became a Quant should be must reading for all students with a quantitative aptitude. It provides fascinating examples of the dynamic career opportunities potentially open to anyone with the skills and passion for quantitative analysis." --Roy D. Henriksson, Chief Investment Officer, Advanced Portfolio Management "Quants"--those who design and implement mathematical models for the pricing of derivatives, assessment of risk, or prediction of market movements--are the backbone of today's investment industry. As the greater volatility of current financial markets has driven investors to seek shelter from increasing uncertainty, the quant revolution has given people the opportunity to avoid unwanted financial risk by literally trading it away, or more specifically, paying someone else to take on the unwanted risk. How I Became a Quant reveals the faces behind the quant revolution, offering you?the?chance to learn firsthand what it's like to be a quant today. In this fascinating collection of Wall Street war stories, more than two dozen quants detail their roots,

Munich Personal Repec Archive Nyu Pdf Pdf upload Donald x Williamson

roles, and contributions, explaining what they do and how they do it, as well as outlining the sometimes unexpected paths they have followed from the halls of academia to the front lines of an investment revolution.

Book Republication Program [announcement]. United States Alien Property Custodian Office 1944

Hitler's American Model James Q. Whitman 2017-02-14 How American race law provided a blueprint for Nazi Germany Nazism triumphed in Germany during the high era of Jim Crow laws in the United States. Did the American regime of racial oppression in any way inspire the Nazis? The unsettling answer is yes. In Hitler's American Model, James Whitman presents a detailed investigation of the American impact on the notorious Nuremberg Laws, the centerpiece anti-Jewish legislation of the Nazi regime. Contrary to those who have insisted that there was no meaningful connection between American and German racial repression, Whitman demonstrates that the Nazis took a real, sustained, significant, and revealing interest in American race policies. As Whitman shows, the Nuremberg Laws were crafted in an atmosphere of considerable attention to the precedents American race laws had to offer. German praise for American practices, already found in Hitler's Mein Kampf, was continuous throughout the early 1930s, and the most radical Nazi lawyers were eager advocates of the use of American models. But while Jim Crow segregation was one aspect of American law that appealed to Nazi radicals, it was not the most consequential one. Rather, both American citizenship and antimiscegenation laws proved directly relevant to the two principal Nuremberg Laws—the Citizenship Law and the Blood Law. Whitman looks at the ultimate, ugly irony that when Nazis rejected American practices, it was sometimes not because they found them too enlightened, but too harsh. Indelibly linking American race laws to the shaping of Nazi policies in Germany, Hitler's American Model upends understandings of America's influence on racist practices in the wider world.

Geminos's Introduction to the Phenomena James Evans 2018-06-05 This is the first complete English translation of Geminos's Introduction to the Phenomena—one of the most important and interesting astronomical works of its type to have survived from Greek antiquity. Gracefully and charmingly written, Geminos's first-century BC textbook for beginning students of astronomy can now be read straight through with understanding and enjoyment by a wider audience than ever before. James Evans and Lennart Berggren's accurate and readable translation is accompanied by a thorough introduction and commentary that set Geminos's work in its historical, scientific, and philosophical context. This book is generously illustrated with diagrams from medieval manuscripts of Geminos's text, as well as drawings and photographs of ancient astronomical instruments. It will be of great interest to students of the history of science, to classicists, and to professional and amateur astronomers who seek to learn more about the origins of their science. Geminos provides a clear view of Greek astronomy in the period between Hipparchos and Ptolemy, treating such subjects as the zodiac, the constellations, the theory of the celestial sphere, lunar cycles, and eclipses. Most significantly, Geminos gives us the earliest detailed discussion of Babylonian astronomy by a Greek writer, thus offering valuable insight into the cross-cultural transmission of astronomical knowledge in antiquity.

Columbia Business School Brian Thomas 2016-11-22 Featuring interviews with topflight scholars discussing their work and that of their colleagues, this retrospective of the first hundred years of Columbia Business School recounts the role of the preeminent institution in transforming education, industry, and global society. From its early years as the birthplace of value investing to its seminal influence on Warren Buffett and Benjamin Graham, the school has been a profound incubator of ideas and talent, determining the direction of American business. In ten chapters, each representing a single subject of the school's research, senior faculty members recount the collaborative efforts and innovative approaches that led to revolutionary business methods in fields like finance, economics, and accounting. They describe the pioneering work that helped create new quantitative and stochastic tools to enhance corporate decision making, and they revisit the groundbreaking twentieth-century marketing and management paradigms that continue to affect the fundamentals of global business. The volume profiles several prominent centers and programs that have helped the school adapt to recent advancements in international business, entrepreneurship, and social enterprise. Columbia Business School has long offered its diverse students access to the best leaders and thinkers in the industry. This book not only reflects on these relationships but also imagines what might be accomplished in the next hundred years.

On The Economics Of Marriage Shoshana Grossbard-schectman 2019-07-11 Marriage is an institution that plays a central role in most societies. As it affects decisions regarding labor supply, consumption, reproduction, and other important decisions, marriage receives considerable attention in academic circles. Much research has been done about marriage, principally by sociologists, psychologists, and anthropologists.

Liquidity and Asset Prices Yakov Amihud 2006 Liquidity and Asset Prices reviews the literature that studies the relationship between liquidity and asset prices. The authors review the theoretical literature that predicts how liquidity affects a security's required return and discuss the empirical connection between the two. Liquidity and Asset Prices surveys the theory of liquidity-based asset pricing followed by the empirical evidence. The theory section proceeds from basic models with exogenous holding periods to those that incorporate additional elements of risk and endogenous holding periods. The empirical section reviews the evidence on the liquidity premium for stocks, bonds, and other financial assets.

My Life as a Quant Emanuel Derman 2016-01-11 In My Life as a Quant, Emanuel Derman relives his exciting journey as one of the first high-energy particle physicists to migrate to Wall Street. Page by page, Derman details his adventures in this field—analyzing the incompatible personas of traders and quants, and discussing the dissimilar nature of knowledge in physics and finance. Throughout this tale, he also reflects on the appropriate way to apply the refined methods of physics to the hurly-burly world of markets.

Measuring Bullying Victimization, Perpetration, and Bystander Experiences Merle E. Hamburger 2014-05-12 Bullying, particularly among school-age children, is a major public health problem both domestically and internationally (Nansel, Craig, Overpeck, Saluja, & Ruan, 2004). Current estimates suggest that nearly 30% of American adolescents reported at least moderate bullying experiences as the bully, the victim, or both. Specifically, of a nationally representative sample of adolescents, 13% reported being a bully, 11% reported being a victim of bullying, and 6% reported being both a bully and a victim (Nansel et al., 2001). *The Miracle on Washington Square* Joan Marans Dim 2001 In this richly illustrated volume, Joan Marans Dim and Nancy Murphy Crizzo bring together a wide range of historical materials to craft a remarkable institutional history of New York University. The Miracle on Washington Square charts the parallel emergence of New York City and its namesake university into international prominence. Synthesizing an array of institutional and archival documentation with a unique visual history, the authors provide insight into the making of a university and the leadership required for its continued growth.

Human Rights in the Soviet Union Albert Szymanski 1984 A Note on Sources

Japan Frank Baldwin 2015-12-15 "A joint publication of the Social Science Research Council and New York University Press."

Private Affairs Phillip Brian Harper 1999-06 In Private Affairs, Phillip Brian Harper explores the social and cultural significance of the private, proposing that, far from a universal right, privacy is limited by one's racial-and sexual-minority status. Ranging across cinema, literature, sculpture, and lived encounters-from Rodin's The Kiss to Jenny Livingston's Paris is Burning-Private Affairs demonstrates how the very concept of privacy creates personal and sociopolitical hierarchies in contemporary America.

Plugged In Patti M. Valkenburg 2017-04-25 An illuminating study of the complex relationship between children and media in the digital age Now, as never before, young people are surrounded by media—thanks to the sophistication and portability of the technology that puts it literally in the palms of their hands. Drawing on data and empirical research that cross many fields and continents, authors Valkenburg and Piotrowski examine the role of media in the lives of children from birth through adolescence, addressing the complex issues of how media affect the young and what adults can do to encourage responsible use in an age of selfies, Twitter, Facebook, and Instagram. This important study looks at both the sunny and the dark side of media use by today's youth, including why and how their preferences change throughout childhood, whether digital gaming is harmful or helpful, the effects of placing tablets and smartphones in the hands of toddlers, the susceptibility of young people to online advertising, the legitimacy of parental concerns about media multitasking, and more.

Publications Relating to Campaign for Economic Justice at NYU Campaign for Economic Justice at NYU. 1998

Anti-Piketty Jean-Philippe Delsol 2017-03-01 Thomas Piketty's book Capital in the Twenty-First Century has enjoyed great success and provides a new theory about wealth and inequality. However, there have been major criticisms of his work. Anti-Piketty: Capital for the 21st Century collects key criticisms from 20 specialists—economists, historians, and tax experts—who provide rigorous arguments against Piketty's work while examining the notions of inequality, growth, wealth, and capital.

The Story of NYU New York University 1952

Taking Shape Suheyyla Takesh 2020 "Taking Shape: Abstraction from the Arab World, 1950s-1980s explores the development of abstraction in the Arab world via paintings, sculpture, and works on paper dating from the 1950s through the 1980s. By looking critically at the history and historiography of mid-20th century abstraction, the exhibition considers art from North Africa and West Asia as integral to the discourse on global modernism. At its heart, the project raises a fundamental art historical question: How do we study abstraction across different contexts and what models of analysis do we use? Examining how and why artists investigated the expressive capacities of line, color, and texture, Taking Shape highlights a number of abstract movements that developed in the Middle East, North Africa, and West Asia, as well as the Arab diaspora."--Artsy website (accessed 18/2/20). **Perspectives in Sustainable Equity Investing** Guillaume Coqueret 2022-03-08 Sustainable investing has recently gained traction throughout the world. This trend has multiple sources, which span from genuine ethical concerns to hopes of performance boosting, and also encompass risk mitigation. The resulting appetite for green assets is impacting the decisions of many investors. Perspectives in Sustainable Equity Investing is an up-to-date review of the academic literature on sustainable equity investing. It covers more than 800 academic sources grouped into six thematic chapters. Designed for corporate sustainability and financial management professionals, this is an ideal reference for ESG-driven financiers (both retail and institutional). Students majoring in finance or economics with some background or interest in ESG concerns would also find this compact overview useful. Key Features: Introduces the reader to terms and nomenclature used in the field. Surveys the link between sustainability and performance (including risk). Details the integration of sustainable criteria in complex portfolio optimization. Reviews the financial liabilities induced by climate change.

African Dream Machines Anitra Nettleton 2007-01-01 African headrests are treated as art objects in this historical study African Dream Machines takes African headrests out of the category of functional objects and into the more rarefied category of "art" objects. Styles in African headrests are usually defined in terms of Western art and archaeological discourses, but this book interrogates these definitions and demonstrates the shortcomings of defining a single formal style model as exclusive to a single ethnic group. This book has been in the making for fifteen years, starting with research on the traditional woodcarving of the Shona-and Venda-speaking peoples of Zimbabwe and South Africa. Among the artifacts made by South African peoples, headrests were the best known and during a year spent in Europe in 1975 and 1976, Anitra Nettleton discovered museum stores full of unacknowledged masterpieces made by speakers of numerous Southern African languages. A Council Fellowship from the University of the Witwatersrand in 1990 enabled the writer to develop an archive in the form of notes, photographs, and sketches of each and every headrest she encountered. Many examples from South African collections were added from the early 1990s onwards, expanding the field vastly. Nettleton executed drawings of

each and every headrest encountered, and they became a major part of the project in their own right. African Dream Machines questions the assumed one-to-one relationship between formal styles and ethnic identities or classifications. Historical factors are used to demonstrate that "authenticity," in the form sought by collectors of antique African art, is largely a construct.

Designing Brand Identity Alina Wheeler 2012-10-11 A revised new edition of the bestselling toolkit for creating, building, and maintaining a strong brand From research and analysis through brand strategy, design development through application design, and identity standards through launch and governance, Designing Brand Identity, Fourth Edition offers brand managers, marketers, and designers a proven, universal five-phase process for creating and implementing effective brand identity. Enriched by new case studies showcasing successful world-class brands, this Fourth Edition brings readers up to date with a detailed look at the latest trends in branding, including social networks, mobile devices, global markets, apps, video, and virtual brands. Features more than 30 all-new case studies showing best practices and world-class Updated to include more than 35 percent new material Offers a proven, universal five-phase process and methodology for creating and implementing effective brand identity **Handbook of Micro Health Insurance in Africa** Hans Jürgen Rösner 2012 Micro health insurance is an emerging concept to reduce poverty and social exclusion and improve health care access. The Handbook of Micro Health Insurance in Africa gives an overview of the challenges and needs in the field of micro health insurance. Focusing on Sub-Saharan Africa, where universal social health protection still has a way to go, the Handbook provides an introduction to the relatively new and promising approach of micro insurance as a risk management tool for low-income households, between the market, self-help, and the state. This book is an output of the project Pro MHI Africa, which is funded by the European Union and directed by the University of Cologne in cooperation with the University of Botswana, the University of Ghana, and the University of Malawi. (Series: Social Protection in Health. Challenges, Needs and Solutions in International Health Care Financing - Vol. 1)

College and University Archives Christopher J. Prom 2008 The 13 essays in this volume offer provocative commentary and analysis in the ways archivists might better document college and university campuses and serve users. Three intertwined themes run throughout the reader: the opportunities and challenges posed by ever-changing technology, the importance of cooperation and collaboration beyond the walls of the archives, and the necessity of a proactive approach in undertaking the academic archival enterprise. As the essays gathered here demonstrate, archivists can and must play an active role in documenting the character and history of their institutions by applying their talents to the challenges in this new century. -- Provided by publisher.

Theory of Fun for Game Design Raph Koster 2005 Discusses the essential elements in creating a successful game, how playing games and learning are connected, and what makes a game boring or fun.
