Major Todd Balf 2008 At the turn of the 20th century, hundreds of handsome, lightning-fast racers won the hearts and minds of a bicycling-crazed public. Scientists studied them, newspapers glorified them, and millions of dollars in purse money was awarded to them. Major Taylor aimed to be the fastest of them all. A prominent black man at a time when such a thing was deemed scandalous, his mounting victories, high moral virtue, and bulletlike riding style made him a target for ridicule from the press and sabotage by the white riders who shared the track with him. This is the account of a fierce rivalry that would become an

archetypal tale of white versus black in the 20th century. But it is also the tale of our nation's first black sports celebrity--a man who transcended the handicaps of race at the turn of the century to reach the stratosphere of fame.--From publisher description.

Fred Barton and the Warlordsäó» Horses of China Larry Weirather

2015-11-25 In the years before World War I, Montana cowboy Fred Barton was employed by Czar Nicholas II to help establish a horse ranch--the largest in the world--in Siberia to supply the Russian military. Barton later assembled a group of American rodeo

stars and drove horses across Mongolia for the war-lords of northern China, creating a 250,000 acre ranch in Shanxi Province. Along the way, Barton became part of an unofficial U.S. intelligence network in the Far East, bred a new type of horse from Russian, Mongolian and American stock and promoted the lifestyle of the open range cowboy. Returning to America, he married one of the wealthiest widows in the Southwest and hobnobbed with Western film stars at a time when Hollywood was constructing the modern myth of the Old West, just as open range cowboy life was disappearing.

Race of the Century Julie M. Fenster
2005-06-14 On the morning of February 12, 1908, six cars from four different countries lined up in the swirling snow of Times Square, surrounded by a frenzied crowd of 250,000. The seventeen men who started the New York to Paris auto race were an international roster of personalities: a charismatic Norwegian outdoorsman, a witty French count, a pair of Italian sophisticates, an aristocratic German army officer, and a cranky mechanic from Buffalo, New York. President Theodore Roosevelt congratulated them by saying, "I like people who do something, not the good safe man who stays at home." These men were doing something no man had ever done before, and their journey would take them very far from home. Their course was calculated at more than 21,000 miles, across three continents and six countries. It would cross over mountain ranges—some as high as 10,000 feet—and through Arctic freeze and desert heat, from drifting snow to blowing sand. Bridgeless rivers and seas of mud blocked the way, while wolves, bears, and bandits stalked vast, lonely expanses of the route. And there were no gas stations, no garages, and no

replacement parts available. The automobile, after all, had been sold commercially for only fifteen years. Many people along the route had never even seen one. Among the heroes of the race were two men who ultimately transcended the others in tenacity, skill, and leadership. Ober-lieutenant Hans Koeppen, a rising officer in the Prussian army, led the German team in their canvas-topped 40-horsepower Protos. His amiable personality belied a core of sheer determination, and by the race's end, he had won the respect of even his toughest critics. His counterpart on the U.S. team was George Schuster, a blue-collar mechanic and son of German immigrants, who led the Americans in their lightweight 60-horsepower Thomas Flyer. A born competitor, Schuster joined the U.S. team as an undistinguished workman, but he would battle Koeppen until the very end. Ultimately the German and the American would be left alone in the race, fighting the elements, exhaustion, and each other until the winning car's glorious entrance into Paris, on July 30, 1908. Lincoln's Birthday, February 12, 1908 . . . The crowds gathering on Broadway all morning were not out to honor Abe Lincoln, either. They were on the avenue to catch sight of the start of the New York-to-Paris Automobile Race. There would only be one—one race round the world, one start, and one particular way that, for the people who lived through it, the world would never be the same. The automobile was about to take it all on: not just Broadway, but the farthest reaches to which it could lead. On that absurdity, the auto was about to come of age. "By ten o'clock," reported the Tribune, "Broadway up to the northernmost reaches of Harlem looked as though everybody was expecting the circus to come to town." The excitement was

generated by the potential of the auto to overcome the three challenges most frustrating to the twentieth century: distance, nature, and technology. First, distance: in the form of twenty-two thousand miles of the Northern Hemisphere, from New York west to Paris. Second, nature: in seasons at their most unyielding. And third, the very machinery itself, which would be pressed hard by the race to defeat itself. Barely twenty years old as a contraption and only ten as a practical conveyance, the automobile couldn't reasonably be expected to be ready to take on the world. But there were men who were ready and that was what mattered.

Zahren 2023-07-01 There are heroes who walk among us: the clam digger who rescues a man from a burning retirement home; the dancer who prevents a robber from shooting two policemen at a nightclub; the former Marine, blinded during the Korean War, who saves two women from drowning in a river. What they have in common—besides the willingness to risk their own lives to save that of a friend or a stranger—is an

unwillingness to brag about their actions. In 1904, moved by the stories of two men who died trying to rescue others in the devastating Harwick Mine Disaster that killed all but one of 180 men, Andrew Carnegie conceived of a fund to reward selfless acts of bravery and courage. Since its creation 120 years ago, the Carnegie Hero Fund Commission has awarded more than 10,000 medals and distributed more than \$44 million in awards, grants, tuition, and other assistance. Published under the auspices of the Carnegie Hero Fund Commission, the original edition of *A Century of Heroes* received an award of excellence in 2005 from Communication Arts and, along with its accompanying video, remains a part of the awarding materials given to each Carnegie hero. Updated and expanded, *A New Century of Heroes* profiles more than 200 medal recipients: ordinary men, women, and children who undertook extraordinary acts to save the lives of others. It also reveals the tireless efforts of investigators who roamed the United States and Canada, collecting data on the hundreds of nominations received each year for consideration and conducting thousands of interviews with rescuers, witnesses, and individuals whose lives were saved. Their maps, diagrams, and marked-up photographs, many of which are included in this volume, illustrate the high standards and strict requirements imposed by the Commission to ensure that a Carnegie Medal recipient truly deserves the appellation "hero." Only about one in ten nominees is selected for recognition. The heroes featured in this book offer a cross-section of the thousands of honorees who have received the award. They represent only a few of the inspiring stories that uphold the Carnegie Hero Fund's legacy, reminding us that true heroes

are found, not on television or in comic strips, but in the uncommon strength that lives inside all of us.

2012-05-22 One hundred years ago, 40 cars lined up for the first Indianapolis 500. We are still waiting to find out who won. The Indy 500 was created to showcase the controversial new sport of automobile racing, which was sweeping the country. Daring young men were driving automobiles at the astonishing speed of 75 miles per hour, testing themselves and their vehicles. With no seat belts, hard helmets or roll bars, the dangers were enormous. When the Indianapolis Motor Speedway opened in 1909, seven people were killed, some of them spectators. Oil-slicked surfaces, clouds of smoke, exploding tires, and flying grit all made driving extremely hazardous, especially with the open-cockpit, windshield-less vehicles. Bookmakers offered bets not only on who might win but who might survive. But this book is about more than a race--it is the story of America at the dawn of the automobile age, a country in love with speed, danger, and spectacle.--From publisher description.

The Consideration of Manhood and Heroism in James Fenimore Cooper's "The Last of the Mohicans" Michelle Klein 2016-08-08 Seminar paper from the year 2015 in the subject English Language and Literature Studies - Literature, grade: 2,3, University of Koblenz-Landau (Anglistik), course: 19th Century Frontier Novels: Gender, Race, and Class on the American Frontier, language: English, abstract: The frame story of the novel *The Last of the Mohicans* written by James Fenimore Cooper in 1826, deals with two young British *Race Of The Century The Heroic True Story Of The 1908 New York To Paris Auto Race Pdf Pdf upload Betty a Boyle*

ladies, Alice and Cora, on their journey to their father Colonel Munro. The story is set in North America in 1759 during the war between the French and British colonists who fight for their territories. The two women are escorted by Major Duncan Heyward, a confidant of Colonel Munro, by Hawkeye, a white man who is allied with the Mohicans, and his Mohican friends Uncas and his father Chingachgook. On their journey they encounter various dangers which are largely due to the Hurons, an Indian tribe that is allied with the French. Therefore, the male characters have to show their abilities in fighting and protecting themselves, as well as the females, throughout the story. Cooper approaches several topics in the narrative like racism, colonialism, heroism and masculinity but, I will only refer to the latter two. This paper reveals the differences and similarities between the characters Hawkeye, Uncas and Heyward by analysing their outer appearance and behaviour in order to review their heroism and manhood. All those three protagonists possess abilities which could allow them to be the novel's hero. But only Major Duncan Heyward goes through an outstanding personal development and therefore, meets the requested characteristics of a hero by the end of the story best. The first character that undergoes analysis is Hawkeye. I will have a closer look at his hybrid identity as he is a white man who lives in the 'wilderness'. Furthermore, his role in the narrative is discussed to classify his importance for the story. The character that is argued next is the Indian warrior Uncas. Considering his fate to be the last of the Mohicans and his secret love to Cora, his heroic position gets explained. Heyward, analysed lastly, is

presented before and after living in the woods. It is demonstrated why he can be seen as the story's hero. Finally, the conclusion contains the comparison of the three characters and makes clear why Duncan unites all required features to obtain the status of the hero.

Ingenious Jason Fagone 2013-11-05 An epic tale of invention, in which ordinary people's lives are changed forever by their quest to engineer a radically new kind of car In 2007, the X Prize Foundation announced that it would give \$10 million to anyone who could build a safe, mass-producible car that could travel 100 miles on the energy equivalent of a gallon of gas. The challenge attracted more than one hundred teams from all over the world, including dozens of amateurs. Many designed their cars entirely from scratch, rejecting decades of thinking about what a car should look like. Jason Fagone follows four of those teams from the build stage to the final race and beyond—into a world in which destiny hangs on a low drag coefficient and a lug nut can be a beautiful talisman. The result is a gripping story of crazy collaboration, absurd risks, colossal hopes, and poignant losses. In an old pole barn in central Illinois, childhood sweethearts hack together an electric-powered dreamboat, using scavenged parts, forging their own steel, and burning through their life savings. In Virginia, an impassioned entrepreneur and his hand-picked squad of speed freaks pool their imaginations and build a car so light that you can push it across the floor with your thumb. In West Philly, a group of disaffected high school students come into their own as they create a hybrid car with the engine of a Harley motorcycle. And in Southern California, the early favorite—a start-up backed by

millions in venture capital—designs a car that looks like an alien egg. Ingenious is a joyride. Fagone takes us into the garages and the minds of the inventors, capturing the fractious yet beautiful process of engineering a bespoke machine. Suspenseful and bighearted, this is the story of ordinary people risking failure, economic ruin, and ridicule to create something vital that Detroit had never pulled off. As the Illinois team wrote in chalk on the wall of their barn, "SOMEBODY HAS TO DO SOMETHING. THAT SOMEBODY IS US."

Beneath a Ruthless Sun Gilbert King 2019-04-23 "Exposes the sinister complexity of American racism... King tells this... story with grace and sensitivity, and his narrative never flags." --Jeffrey Toobin, New York Times Book Review From the author of the Pulitzer Prize-winning bestseller Devil in the Grove comes the story of a small town with a big secret. In December 1957, the wife of a Florida citrus baron is raped in her home while her husband is away. She claims a "husky Negro" did it, and the sheriff, the infamous racist Willis McCall, does not hesitate to round up a herd of suspects. But within days, McCall turns his sights on Jesse Daniels, a gentle, mentally impaired white nineteen-year-old. Soon Jesse is railroaded up to the state hospital for the insane, and locked away without trial. But crusading journalist Mabel Norris Reese cannot stop fretting over the case and its baffling outcome. Who was protecting whom, or what? She pursues the story for years, chasing down leads, hitting dead ends, winning unlikely allies. Bit by bit, the unspeakable truths behind a conspiracy that shocked a community into silence begin to surface. Beneath a Ruthless Sun tells a powerful, page-turning story rooted in the fears that

rippled through the South as integration began to take hold, sparking a surge of virulent racism that savaged the vulnerable, debased the powerful, and roils our own times still.

Hero-Myths Legends, of the British Race M. I. Ebbutt 2015-06-14 Excerpt from Hero-Myths Legends, of the British Race In refashioning, for the pleasure of readers of the twentieth century, these versions of ancient tales which have given pleasure to story-lovers of all centuries from the eight onward, I feel that some explanation of my choice is necessary. Men's conceptions of the heroic change with changing years, and vary with each individual mind; hence it often happens that one person sees in a legend only the central heroism, while another sees only the inartistic details of mediæval life which tend to disguise and warp the heroic quality. It may be that to some people the heroes I have chosen do not seem heroic, but there is no doubt that to the age and generation which wrote or sang of them they appeared real heroes, worthy of remembrance and celebration, and it has been my object to come as close as possible to the mediæval mind, with its elementary conceptions of honour, loyalty, devotion, and duty. I have therefore altered the tales as little as I could, and have tried to put them as fairly as possible before modern readers, bearing in mind the altered conditions of things and of intellects to-day. In the work of selecting and retelling these stories I have to acknowledge with most hearty thanks the help and advice of Mr. F. E. Bumby, B.A., of the University College, Nottingham, who has been throughout a most kind and candid censor or critic. His help has been in every way invaluable. I have also to acknowledge the generous

Eden and the Individual: Christianity for the 21st Century Emil Mihelich 2006-07-05 Even more than we might realize, the Garden of Eden story has supplied the foundation for Western civilization ever since the Roman Emperor Theodosius the Great granted the orthodox version of Christianity imperial support in the fourth century AD. Faced with the scientific and economic challenges of the 21st century, however, it's time to revisit our traditional understanding of our Christian heritage. St. Augustine's monumental work, "The City of God," built on his original sin interpretation of the Garden of Eden story, traditionally defined the role of the responsible individual living within the resulting, orthodox structure. But what is the role of such an individual living in an era that has witnessed the waning of the

power and influence of that institutional authority—the authority built on Augustine's persuasive interpretation of the events described in the Garden of Eden story? Without throwing the baby out with the bath water, and by paying homage to Augustinian sacrifice and commitment to belief, Eden and the Individual: Christianity for the 21st Century explores that question. In the process it offers creative conclusions directed toward enhancing the meaning, and value, of individual lives. Given a fresh sense of purpose, every individual can then work toward creating, and preserving, the order and structure that have governed collective Western life. The Great Race Levi Tillemann
2016-01-19 The Great Race recounts the exciting story of a century-long battle among automakers for market share, profit, and technological dominance—and the thrilling race to build the car of the future. The world's great manufacturing juggernaut—the \$3 trillion automotive industry—is in the throes of a revolution. Its future will include cars Henry Ford and Karl Benz could scarcely imagine. They will drive themselves, won't consume oil, and will come in radical shapes and sizes. But the path to that future is fraught. The top contenders are two traditional manufacturing giants, the US and Japan, and a newcomer, China. Team America has a powerful and little-known weapon in its arsenal: a small group of technology buffs and regulators from California. The story of why and how these men and women could shape the future—how you move,

how you work, how you live on Earth—is an unexpected tale filled with unforgettable characters: a scorned chemistry professor, a South African visionary who went for broke, an ambitious Chinese ex-pat, a quixotic Japanese nuclear engineer, and a string of billion-dollar wagers by governments and corporations. "To explain the scramble for the next-generation auto—and the roles played in that race by governments, auto makers, venture capitalists, environmentalists, and private inventors—comes Levi Tillemann's *The Great Race*...Mr. Tillemann seems ideally cast to guide us through the big ideas percolating in the world's far-flung workshops and labs" (The Wall Street Journal). His account is incisive and riveting, explaining how America bounced back in this global contest and what it will take to command the industrial future.

A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner. Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.

(Scholastic Focus) Neal Bascomb
2022-04-05 Highly acclaimed author Neal Bascomb brings his peerless research and fast-paced narrative style to a young adult adaptation of one of his most successful adult books of all time, *The Perfect Mile*, an inspiring and moving story of three men racing to achieve the impossible -- the perfect four-minute mile. There was a time when running the mile in four minutes was believed to be beyond the limits of human foot speed. In 1952, after suffering defeat at the Helsinki Olympics, three world-class runners each set out to break this barrier: Roger Bannister was a young English medical student who epitomized the ideal of the amateur; John Landy the privileged son of a genteel Australian family; and Wes Santee the swaggering American, a Kansas farm boy and natural athlete. True Heroism in a World of Celebrity Counterfeits Dick Keyes 1995 The growth of mass communication and adversary journalism have helped to create a culture in which the heroic is trivialized and celebrity is commonly mistaken for heroism. In this book, Keyes explains the foundations of heroism, demonstrates clearly where the confusion lies, and offers practical ways to get to the sense of true heroism and pass it on to our culture and our kids.

Playing Games in Nineteenth-Century Britain and America Ann R. Hawkins 2021-11-01 A vital part of daily life in the nineteenth century, games and play were so familiar and so ubiquitous that their presence over time became almost invisible. Technological advances during the century allowed for easier manufacturing and distribution of board games and books about games, and the changing economic conditions created a larger market for them as well as more time in which to play them. These changing conditions not only made games more profitable, but they also increased the influence of games on many facets of culture. *Playing Games in Nineteenth-Century Britain and America* focuses on the material and visual culture of both American and British games, examining how cultures of play intersect with evolving gender norms, economic structures, scientific discourses, social movements, and nationalist sentiments.

The Moors in Spain Stanley Lane-Poole 2020-09-28 THE history of Spain offers us a melancholy contrast. Twelve hundred years ago, Tarik the Moor added the land of the Visigoths to the long catalogue of kingdoms subdued by the Moslems. For nearly eight centuries, under her Mohammedan rulers, Spain set to all Europe a shining example of a civilized and enlightened State. Her fertile provinces, rendered doubly prolific by the industry and engineering skill of her conquerors, bore fruit an hundredfold. Cities innumerable sprang up in the rich valleys of the Guadalquivir and the Guadiana, whose names, and names only, still commemorate the vanished glories of their past. Art, literature, and science prospered, as they then prospered nowhere else in Europe. Students flocked from France and Germany and England to drink from the fountain of learning which flowed only in the cities of the Moors. The surgeons and doctors of Andalusia were in the van of science: women were encouraged to devote themselves to serious study, and the lady doctor was not unknown among the people of Cordova. Mathematics, astronomy and botany, history, philosophy and jurisprudence were to be mastered in Spain, and Spain alone. The practical work of the field, the scientific methods of irrigation, the arts of fortification and shipbuilding, the

highest and most elaborate products of the loom, the graver and the hammer, the potter's wheel and the mason's trowel, were brought to perfection by the Spanish Moors. In the practice of war no less than in the arts of peace they long stood supreme. Their fleets disputed the command of the Mediterranean with the Fatimites, while their armies carried fire and sword through the Christian marches. The Cid himself, the national hero, long fought on the Moorish side, and in all save education was more than half a Moor. Whatsoever makes a kingdom great and prosperous, whatsoever tends to refinement and civilization, was found in Moslem Spain.

Yearbook of Transnational History

Thomas Adam 2020-09-22 The Yearbook of Transnational History is dedicated to disseminating pioneering research in the field of transnational history. This third volume is dedicated to the transnational turn in urban history. It brings together articles that investigate the transnational and transatlantic exchanges of ideas and concepts for urban planning, architecture, and technology that served to modernize cities across East and Central Europe and the United States. This collection includes studies about regional fairs as centers of knowledge transfer in Eastern Europe, about the transfer of city planning among developing urban centers within the Austro-Hungarian Empire, about the introduction of the Bauhaus into American society, and about the movement for constructing paved roads to connect cities on a global scale. The volume concludes with a historiographical article that discusses the potential of the transnational perspective to urban

history. The articles in this volume highlight the movement of ideas and practices across various cultures and societies and explore the relations, connections, and spaces created by these movements. The articles show that modern cities across the European continent and North America emerged from intensive exchanges of ideas for almost every aspect of modern urban life.

The Myth of Race Robert Wald Sussman 2014-10-06 Although eugenics is now widely discredited, some groups and individuals claim a new scientific basis for old racist assumptions. Pondering the continuing influence of racist research and thought, despite all evidence to the contrary, Robert Sussman explains why—when it comes to race—too many people still mistake bigotry for science.
