75 Hard Andy Frisella 2020-04 Do you lack confidence, grit, endurance, fortitude, self-esteem and all the other things that don't just make someone great, but successful in everything they do?What if you could completely transform yourself into someone who could do anything? I'm not talking about the change that happens for a week or a month or a year...but for your whole life? What would that legitimately and realistically be worth to you?Everybody tries to tell themselves that they are "special" or "great"...but it's just talk. It's not reality.This book tells you how to do that. It doesn't cost anything to execute this program...but it ain't free.I guarantee if you do exactly as I tell you to do it with no compromises and zero substitutions...you and your life will never be the same.-Andy Frisella

Marine Corps Band Manual Department of the Navy 2013-09-21 Military history has established that musical units are an integral part of the Marine Corps (Appendix A). Assessment of Surface Ship Maintenance Requirements Robert Button 2015 The Department of Defense is likely to face years of declining resources as the U.S. government grapples with fiscal challenges. These challenges affect every account, including those associated with surface ship maintenance and operations. At the same time, there has been widespread concern that surface ship materiel readiness is declining due to a high pace of operations and a sense that there have been many instances of deferred maintenance. The need to balance fiscal reality and a continued need for ready ships is likely to be an ongoing challenge. At the request of the Assessment Division of the Office of the Chief of Naval Operations, this report: (1) determines the impact on long-term fleet readiness, Operational Availability (Ao), and Expected Service Life (ESL) caused by near-term reductions in Operations and Maintenance (O&M) accounts; (2) recommends potential strategies to minimize negative impacts to Ao and ESL and maintain the largest, most capable fleet possible; (3) develops a maintenance requirement concept, per ship class, that supports ESL, but allows for some risk within the maintenance strategy; and (4) defines the risks to Ao and ESL resulting from the new requirement. The methodology could be applicable to multiple ship classes.

Modp 1-3 Tactics Department of Defense 2017-05-22 This publication is about winning in combat. Winning requires many things: excellence in techniques, an appreciation of the enemy, exemplary leadership, battlefield judgment, and focused combat power. Yet these factors by themselves do not ensure success in battle. Many armies, both winners and losers, have possessed many or all of these attributes. When we examine closely the differences between victor and vanquished, we draw one conclusion. Success went to the armies whose leaders, senior and junior, could best focus their efforts-their skills and their resources-toward a decisive end. Their success arose not merely from excellence in techniques, procedures, and material but from their leaders' abilities to uniquely and effectively combine them. Winning in combat depends upon tactical leaders who can think creatively and act decisively.
