Award-winning director of *Free Solo* and National Geographic photographer presents the first collection of his iconic adventure photography, featuring some of the greatest moments of the most accomplished climbers and outdoor athletes in the world, and including more than 200 extraordinary photographs. “An extraordinary work of art.”—Jon Krakauer Filmmaker, photographer, and world-class mountaineer Jimmy Chin goes where few can follow to capture stunning images in death-defying situations. There and Back draws from his breathtaking portfolio of photographs, captured over

twenty years during cutting-edge expeditions on all seven continents—from skiing Mount Everest, to an unsupported traverse of Tibet’s Chang Tang Plateau on foot, to first ascents in Chad’s Ennedi Desert and Antarctica’s Queen Maud Land. Along the way, Chin shares behind-the-scenes details about how he captured such astounding images in impossible conditions, and tells the stories of the legendary adventurers and remarkable athletes he has photographed, including Alex Honnold, the star of his Academy Award-winning documentary film *Free Solo*; ski mountaineer Kit DesLauriers; snowboarder Travis Rice; and

mountaineers Conrad Anker and Yvon Chouinard. These larger-than-life images, coupled with stories of outsized drive and passion, of impossible goals with life or death stakes, of partnerships forged through incredible hardship, are sure to inspire wonder and awe.

written as an introduction to the fascinating world of photography. The book is intended for beginners and enthusiast contemplation the possibility of becoming professional photographers or pursuing the art in a serious manner. There are several schools that may list from five to 10 principles of photography. These schools combine principles of design, graphic arts, fine arts and even marketing. However the one element these all agree is the element of light, and if you observe any object or scene, where there is light, there are shadows. The disposition of light and shadows make

possible for us to see and identify objects. In photography the same disposition allows us to record an image in a photo-sensitive material. The manipulation of this light and the proper perspective give these images the artistic aspect. Based on this, over 35 years of photographic work and the study of the work of great photographers like Ansel Adams and Elliott Erwitt I have developed my own concept about principles of photography. My concept, one I like to share with you, has a minimalistic approach. Keep it simple, less may be more. I call this my 3+1 concept, Subject, Composition, and Illumination plus

ATTITUDE. Simple enough, won't you agree? You need a subject, one that is attractive, relevant and/or inspiring. As with any art form, you need to compose your work, make it understandable, captivate the audience. And to register the image you must have and manipulate illumination (light and shadows). The attitude part is entirely you. Do you have what it takes? Are you willing to do whatever it takes to get the shot?

2020-05-31 Finally, here is a photography textbook authored in the 21st century for 21st century audiences.

Photography: A 21st Century Practice speaks to the contemporary student who has come of age in the era of digital photography and social media, where every day we collectively take more than a billion photographs. How do aspiring photographers set themselves apart from the smartphone-toting masses? How can an emerging photographic artist push the medium to new ground? The answers provided here are innovative, inclusive, and boundary shattering, thanks to the authors' framework of the

"4Cs": Craft, Composition, Content and Concept. Each is explored in depth, and packaged into a toolbox the photographic student can immediately put into practice. With a firm base in digital imaging, the authors also shed new light on chemical-based photographic processes and address the ways in which new technology is rapidly expanding photographic possibilities. In addition, Photography: A 21st Century Practice features: • 12 case studies from professional practice, featuring established photographic artists and showcasing the techniques, concepts, modes of presentation, and other

professional concerns that shape their work. • Over 40 student assignments that transform theory into hands-on experience. • 800 full-color images and 200 illustrations, including photographs by some of the world's best-known and most exciting emerging photographic artists, and illustrations that make even complex processes and ideas simple to understand. • More than 50 guided inquiries into the nature of photographic art to jump start critical thinking and group discussions.
