The 100 Greatest Bands of All Time [2 volumes] David V. Moskowitz 2015-11-10 This one-of-a-kind reference investigates the music and the musicians that set the popular trends of the last half century in America. Many rock fans have, at one time or another, ranked their favorite artists in order of talent, charisma, and musical influence on the world as they see it. In this same spirit, author and music historian David V. Moskowitz expands on the concept of "top ten" lists to provide a lineup of the best 100 musical groups from the past 60 years. Since the chosen bands are based on the author's personal taste, this two-volume set provokes discussion of which performers are included and why, offering insights into the surprising influences behind them. From the Everly Brothers, to the Ramones, to Public Enemy, the work covers a wide variety of styles and genres, clearly illustrating the connections between them. Entries focus on the group's history, touring, membership, major releases, selected discography, bibliography, and influence. Contributions from leading scholars in popular music shed light on derivative artists and underscore the overall impact of the performers on the music industry.

Refiguring American Film Genres Nick Browne 1998-04-22 This collection of essays by leading American film scholars charts a whole new territory in genre film criticism. Rather than assuming that genres are self-evident

categories, the contributors offer innovative ways to think about types of films, and patterns within films, in a historical context. Challenging familiar attitudes, the essays offer new conceptual frameworks and a fresh look at how popular culture functions in American society. The range of essays is exceptional, from David J. Russell's insights into the horror genre to Carol J. Clover's provocative take on "trial films" to Leo Braudy's argument for the subject of nature as a genre. Also included are essays on melodrama, race, film noir, and the industrial context of genre production. The contributors confront the poststructuralist critique of genre head-on; together they are certain to shape future debates concerning the viability and vitality of genre in studying American cinema.

From #BlackLivesMatter to Black Liberation Keeanga-Yamahtta Taylor 2016-02-01 The author of *Race for Profit* carries out "[a] searching examination of the social, political and economic dimensions of the prevailing racial order" (Michelle Alexander, author of *The New Jim Crow*). In this winner of the Lannan Cultural Freedom Prize for an Especially Notable Book, Keeanga-Yamahtta Taylor "not only exposes the canard of color-blindness but reveals how structural racism and class oppression are joined at the hip" (Robin D. G. Kelley, author of *Freedom Dreams*). The eruption of mass protests in the wake of the police murders of Michael Brown in Ferguson, Missouri, and Eric Garner in New York City have challenged the impunity with which officers of the law carry out violence against black people and punctured the illusion of a post-racial America. The Black Lives Matter movement has awakened a new generation of activists. In this stirring and insightful analysis, activist and scholar Keeanga-Yamahtta Taylor surveys the historical and contemporary ravages of racism and the persistence of structural inequality, such as mass incarceration and black unemployment. In this context, she argues that this new struggle against police violence holds the potential to reignite a broader push for black liberation. "This brilliant book is the best analysis we have of the #BlackLivesMatter moment of the long struggle for freedom in America. Keeanga-Yamahtta Taylor has emerged as the most sophisticated and courageous radical intellectual of her generation." —Dr. Cornel West, author of *Race Matters* "A must read for everyone who is serious about the ongoing praxis of freedom." —Barbara Ransby, author of *Ella Baker and the Black Freedom Movement* "[A] penetrating, vital analysis of race and class at this critical moment in America's racial history." —Gary Younge, author of *The Speech: The Story Behind Dr. Martin Luther King Jr.'s Dream*

Rethinking Insecurity, War and Violence Damian Grenfell 2008-07-25 Rethinking Insecurity, War and Violence: Beyond Savage Globalization? is a collection of essays by scholars intent on rethinking the mainstream security paradigms. Overall, this collection is intended to provide a broad and systematic analysis of the long-term sources of political, military and cultural insecurity from the local to the global. The book provides a stronger basis for understanding the causes of conflict and violence in the world today, one that adds a different dimension to the dominant focus on finding proximate causes and making quick responses Too often the arenas of violence have been represented as if they have been triggered by reassertions of traditional and tribal forms of identity, primordial and irrational assertions of politics. Such ideas about the sources of insecurity have become entrenched in a wide variety of media sources, and have framed both government policies and academic arguments. Rather than treating the sources of insecurity as a retreat from modernity, this book complicates the patterns of global insecurity to a degree that takes the debates simply beyond assumptions that we are witnessing a savage return to a bloody and tribalized world. It will be of particular interest to students and scholars of international relations, security studies, gender studies and globalization studies.

Erwin Bulte 2018-10-10 This book argues that development strategies have thus far failed in Western Africa because the many challenges afflicting the area have yet to be explored and understood from the perspective of institutional elements of Africa. With a particular focus on three countries on the bend of the Pangean West African coast – Guinea, Liberia and Sierra Leone – this book offers a theory to account for the nature of these institutional elements, to test deductions against evidence, and finally to propose a reset for rural development policy to make fuller use of local institutional resources. Based on quantitative analysis and eight years of multidisciplinary field research, this volume features several large-scale RCTs in the domain of rural development, local governance, and nature conservation. The authors address one of the biggest topics in agricultural and development economics today: the structural transformation of poor, agrarian economies, and they do so through the important and unique lens of institutions.

The Etymologies of Isidore of Seville 2006-06-08 This work is a complete English translation of the Latin Etymologies of Isidore, Bishop of Seville (c.560–636). Isidore compiled the work between c.615 and the early 630s and it takes the form of an encyclopedia, arranged by subject matter. It contains much lore of the late classical world beginning with the Seven Liberal Arts, including Rhetoric, and touches on thousands of topics ranging from the names of God, the terminology of the Law, the technologies of fabrics, ships and agriculture to the names of cities and rivers, the theatrical arts, and cooking utensils. Isidore provides etymologies for most of the terms he explains, finding in the causes of words the underlying key to their meaning. This book offers a highly readable translation of the twenty books of the Etymologies, one of the most widely known texts for a thousand years from Isidore's time.

The Psychology of Modern Conflict K. Payne 2015-06-09 What does modern warfare, as fought by liberal societies, have in common with our human evolution?
