The Fantastic Undersea Life of Jacques

Cousteau Dan Yaccarino 2012-05-08 Jacques Cousteau was the world's ambassador of the oceans. His popular TV series brought whales, otters, and dolphins right into people's living rooms. Now, in this exciting picturebook biography, Dan Yaccarino introduces young readers to the man behind the snorkel. From the first moment he got a glimpse of what lived under the ocean's waves, Cousteau was hooked. And so he set sail aboard the Calypso to see the sea. He and his team of scientists invented diving equipment and waterproof cameras. They made films and television shows and wrote books so they could share what they learned. The oceans were a vast unexplored world, and Cousteau became our guide. And when he saw that pollution was taking its toll on the seas, Cousteau became our guide in how to protect the oceans as well.

B is for Battle Cry Patricia Bauer 2011-03-04 B is for Battle Cry: A Civil War Alphabet takes readers on a journey into one of the most important chapters of our nation's past. The Civil War was one of the bloodiest, most divisive events to take place in America's history, and most certainly ever on American soil. For four years our young country's sense of self and citizenry was shaken to the core as North and South battled each other. B is for Battle Cry brings to life historic battles (Antietam and Gettysburg), renowned leaders (Abraham Lincoln and Robert E. Lee), inventions (ironclad ship and Gatling gun), and inspiring events and documents (the Gettysburg Address and the Emancipation Proclamation). From the first shot fired at Fort Sumter to Lee's surrender at Appomattox Court House, B is for Battle Cry brings this nation-defining time period to vivid life. Patricia Bauer believes that stories bring history alive. She uses poetry, music, picture books, costumes, and literature to engage her middle school students in the study of American history. B is for Battle Cry is Pat's first children's book. She lives in Minneapolis with her artist husband, David Geister. David Geister's deep appreciation for the drama of American history and the desire to tell those stories is what inspires his artwork. He is a popular visitor at schools with his costumed portrayals of historic

characters. He lives in Minneapolis with his author wife, Patricia Bauer. This is David's fifth book with Sleeping Bear.

[Attack from the Sea](#) William F. Trimble 2016-07-01 "An award-winning aviation historian chronicles the Navy's efforts to develop a powerful sea-based strike force through the use of long-range attack seaplanes supported by

surface ships and submarines. William Trimble traces the concept back to the early 1930s when American strategic planners sought ways to mount an assault across the Pacific with minimum air support. But it was not until 1950, when the Navy was threatened with losing its big carriers and long-range aircraft, that the idea of a Seaplane Striking Force was resurrected. Lured by breakthroughs in seaplane performance and the promise of the turbojet-powered Convair Sea Dart fighter and the Martin Sea Master attack flying boat, the Navy believed it could challenge the Air Force in the strategic role, the author explains, but found that the technology did not live up to expectations. This book investigates the difficulties of weapon system procurement within the context of strategic realities, interservice rivalry, and constrained defense budgets. It also looks at an alternative weapon system that the Navy saw as a means of extending its conventional reach and as a complement to the carrier and land-based bomber used for nuclear deterrence. That weapon, however, proved unsuccessful in the end. The author helps the reader understand that while conceptual and operational flaws kept the Seaplane Striking Force from achieving the goals set for it, the idea of a mobile weapon system capable of long-range attacks from the sea remains valid. Other books touch briefly on the subject, but this is the first to examine the concept in depth."

Daniel Deronda George Eliot 1876 George Eliot's final novel, *Daniel Deronda*, was also her most controversial. Few had a problem, upon its publication in 1876, with its portrayal of yearning and repression in the English upper class. But as Eliot's lover, George Henry Lewes, had predicted: "The Jewish element seems to me likely to satisfy nobody." *Deronda* was the first of Eliot's novels to be set in her own period, the late 19th century, and in it she took on what was a highly unusual contemporary theme: the position of Jews in British and European society and their likely prospects. The eponymous hero is an idealistic young aristocrat who comes to the rescue of a young Jewish woman and in his attempts to help her find her family is drawn steadily deeper into the Jewish community and the ferment of early Zionist politics.

The Origin of Consciousness in the Breakdown of the Bicameral Mind Julian Jaynes 2000-08-15 National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century."—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only

three thousand years ago and is still developing.

The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, *The New Yorker* "He is as startling as Freud was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior."—*American Journal of Psychiatry*
