**Image Mosaicing and Super-resolution** David Capel 2012-12-06 This book investigates sets of images consisting of many overlapping viewsofa scene, and how the information contained within them may be combined to produce single images of superior quality. The generic name for such techniques is frame fusion. Using frame fusion, it is possible to extend the fieldof view beyond that ofany single image, to reduce noise, to restore high-frequency content, and even to increase spatial resolution and dynamic range. The aim in this book is to develop efficient, robust and automated frame fusion algorithms which may be applied to real image sequences. An essential step required to enable frame fusion is image registration: computing the point-to-point mapping between images in their overlapping region. This sub problem is considered in detail, and a robust and efficient solution is proposed and its accuracy evaluated. Two forms of frame fusion are then considered: image mosaic ing and super-resolution. Image mosaicing is the alignment of multiple images into a large composition which represents part of a 3D scene. Super-resolution is a more sophisticated technique which aims to restore poor-quality video sequences by mod elling and removing the degradations inherent in the imaging process, such as noise, blur and spatial-sampling. A key element in this book is the assumption of a completely uncalibrated cam era. No prior knowledge of the camera parameters, its motion, optics or photometric characteristics is assumed. The power of the methods is illustrated with many real image sequence examples.

*A Passion for Justice* Tinsley E. Yarbrough 1987-11-19 Yarbrough examines the life and career of Judge J. Waties Waring, a southern segregationist who in 1945 turned civil rights advocate, and assesses the controversy and motivating forces behind this seminal figure in the civil rights movement.

*Preventing Money Laundering and Terrorist Financing* 2009 "Money laundering and terrorist financing are serious crimes that affect not only those persons directly involved, but the economy as a whole. According to international standards, every bank has the obligation to know its customers and to report suspicious transactions. Although these obligations sound straightforward, they have proved challenging to implement. What information precisely has to be gathered? How should it be recorded? If and when does one have to file a suspicious transaction report? It is here that a supervisor can play a crucial role in helping supervised institutions; first, in understanding the full extent of the obligations of Customer Due Diligence and Suspicious Transaction Reports (STR) and, second, in ensuring that those obligations are not just words on paper but are applied in practice. Effective supervision is key to the success of a country's AML/CFT system. In this regard, field work in both developed and developing countries has shown an overall low compliance in the area of supervision of banks and other financial institutions; supervisory compliance is indeed generally lower than the average level of compliance with all Financial Action Task Force recommendations. As a result, by providing examples of good practices, this book aims to help countries better conform to international standards. In this regard, this handbook is specifically designed for bank supervisors.

**Contingent Liabilities from Banks** Mr.Serkan Arslanalp 2015-12-09 In this paper, we develop a methodology to assess potential losses to the government that could arise from bank failures. The approach is intended to be simple, parsimonious, and used in real time. It generates an index that we call the banking sector contingent liability index (BCLI), based on the banking sector's size, concentration, diversification, leverage, and riskiness of assets. The index is illustrated for 32 advanced and emerging market economies from 2006 to 2013, as well as a group of banks including global systemically important banks (G-SIBs).

**ASEAN 2030** ADBI 2016-03-08 This book investigates long-term development issues for members of the Association of Southeast Asian Nations (ASEAN). It finds that with the proper policy mix—including domestic structural reforms and bold initiatives for regional integration—ASEAN has the potential to reach by 2030 the average quality of life enjoyed today in advanced economies and to fulfill its aspirations to become a resilient, inclusive, competitive, and harmonious (RICH) region. Key challenges moving forward are to enhance macroeconomic and financial stability, support equitable growth, promote competitiveness and innovation, and protect the environment. Overcoming these challenges to build a truly borderless economic region implies eliminating remaining barriers to the flow of goods, services, and production factors; strengthening competitiveness and the institutional framework; and updating some governing principles. But ASEAN should not merely copy the European Union. It must maintain its flexibility and pragmatism without creating a bloated regional bureaucracy. The study’s main message is that through closer integration, ASEAN can form a partnership for achieving shared prosperity in the region and around the globe.

**Computational Studies of Human Motion** David Forsyth 2006 Computational Studies of Human Motion: Part 1, Tracking and Motion Synthesis reviews methods for kinematic tracking of the human body in video. The review confines itself to the earlier stages of motion, focusing on tracking and motion synthesis. There is an extensive discussion of open issues. The authors identify some puzzling phenomena associated with the choice of human motion representation --- joint angles vs. joint positions. The review concludes with a quick guide to resources and an extensive bibliography of over 400 references. Computational Studies of Human Motion: Part 1, Tracking and Motion Synthesis is an invaluable reference for those engaged in computational geometry, computer graphics, image processing, imaging in general, and robotic.

*Enhancing Board Effectiveness* Franklin N. Ngwu 2019-03-07 Enhancing Board Effectiveness seeks to examine the conceptualization and role of the board in a variety of contexts and articulate solutions for improving the effectiveness of the board, especially in developing and emerging markets. Enhancing Board Effectiveness with therefore address the following central questions: To what extent is the concept and role of the board evolving? What rights, powers, responsibilities and other contemporary and historical experiences can enhance the effectiveness of the board, especially in the particular contexts of developing and emerging markets? What socio-economic, political, regulatory and institutional factors/actors influence the effectiveness of the board and how can the policies and practices of such actors exert such influences? In what ways can a reconstructed concept of the board serve as a tool for theoretical, analytical, regulatory and pragmatic assessment of its effectiveness? In examining this issues, Enhancing Board Effectiveness will investigate theoretical, socio-economic, historical, empirical, regulatory, comparative and inter-disciplinary approaches. Academics in the relevant fields of accounting, behavioural psychology/economics, development studies, financial regulation, law and management/organizational studies, political economy and, public administration will find this book of high interest.

**Great Companies Deserve Great Boards** Beverly Behan 2011-05-15 Despite the many changes in governance regulation over the past decade, few boards function as a true corporate asset to the companies they oversee. In this book, Behan offers practical advice that a CEO, Chairman or board member can introduce at the very next meeting. Boardrooms are filled with intelligent, accomplished people—yet seldom achieve their full potential and add the kind of value for the CEO, executive team and company shareholders that many boards are actually capable of. Beverly Behan draws on her experience working with more than 100 boards over the past 14 years—from major Fortune 500s to recent IPOs—offering no-nonsense insights that can take any board from mediocrity to the top of its game including establishing a constructive working relationship with your board; addressing some of the dysfunction that may lie within the board you’ve inherited, and making your board a significant asset to you, your company, and your executive team. Working with the Board of Directors is one of the most important components of any CEO’s job—and most will admit it is something they wish they knew more about. Nearly all CEOs want to change at least something about their board, yet many are unsure how to go about this in the right way. This book not only alerts the reader to common pitfalls that CEO's can make with their boards, it provides workable approaches to a tackle a variety of boardroom issues from getting new talent into the boardroom to engaging effectively with the board on strategy and succession planning.

*Islamic Fintech* Sara Sánchez Fernández 2021-03-29 The implementation of new technologies is expected to boost the development of Islamic Finance by increasing accessibility to banking and other financial services in Islamic communities and democratizing access to investment opportunities. At the same time, new technologies will increase financing opportunities and facilitate asset management for Sharia-compliant businesses. This collection of essays from selected experts in the field comprise some of the most topical issues on Islamic Fintech, combining a business focus with legal insights. The book takes as a point of departure the role that Islamic Fintech can play in promoting sustainability. The social vision of welfare improvement and justice is already embedded in Sharia’s economic rules, which makes Islamic Finance particularly well suited to bridge the gap between sustainability and funding. Although it is not without challenges for the industry, technology will help unleash its potential. With a holistic approach to Islamic Fintech, the contributing authors address the application of new technologies to Islamic Finance, including robo-advisory, crowdfunding and digital ledger technology (both in the issuance of bitcoin and the registration of securities in tokenized form) and in certain sectors such as takaful (takaful-tech) and health (e-health). Finally, they explore the challenges posed by anti-money laundering (‘AML’) in the specific realm of Islamic Fintech. The book combines theoretical analysis with a practical focus, both through case studies and directly through the experiences of leading entrepreneurs. In addition, it provides insights on legal and regulatory aspects, which are key in a field that is still in its infancy and needs support from lawmakers and regulators. It is, thus, a reference for academics, legal practitioners, policymakers, entrepreneurs and the Islamic Finance community.
