this groundbreaking study of Mexican public opinion and elections, Jorge Dominguez and James McCann examine the attitudes and behaviors of Mexican voters from the 1950s to the 1990s and find evidence of both support for and increasing independence from the nation's ruling party. They make extensive use of polls conducted during the 1988, 1991, and 1994 national elections and draw from in-depth interviews with leading political figures, including major presidential candidates. Although the 1994 presidential election showed that Mexican citizens are making their opinions known and felt at the polls, Dominguez and McCann argue that Mexico cannot be considered a democracy as long as party elites fail to ensure truly free and fair elections. Democratizing Mexico makes it clear, however, that Mexican citizens are ready for democratic politics.

A Market-oriented Strategy for Small and Medium Scale Enterprises Kristin Hallberg 2000-01-01

This paper investigates the economic rationale for intervention in support of small and medium scale enterprises, on both theoretical and empirical grounds. It argues that the justification for SME interventions lies in market and institutional failures that bias the size distribution of firms, rather than on any inherent economic benefits provided by small firms. The role of the state is mainly to provide an enabling business environment that opens access to markets and

reduces policy-induced biases against small firms. Governments can accelerate the development of markets for financial and non-financial services suited to SMEs by promoting innovation in products and delivery mechanisms, and by building institutional capacity. Improving the development impact of SME strategies will require much more attention to the monitoring and evaluation of intervention outcomes.

**Notes from the Gallows** Julius Fucik

2017-07-19 On 24 April 1942, Czechoslovak journalist and active CPC member Julius Fucik was detained in Pankrác Prison in Prague, where he was subsequently interrogated and tortured, before being sent to Germany to stand trial for high treason. It was during this time that Fucik's Notes from the Gallows (Czech: Reportáž psaná na oprátce, literally Reports Written Under the Noose) arose—written on pieces of cigarette paper and smuggled out by two sympathetic prison warders named Kolinsky and Hora. The

notes were treated as great literary works after his death in 1943 and translated into many languages worldwide, resulting in this book, which was first published in English in 1948. It describes events in the prison since Fucik's arrest and is filled with hope for a better, Communist future.

licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Sovereign Debt Diplomacies aims to revisit the meaning of sovereign debt in relation to colonial history and postcolonial developments. It offers three main contributions. The first contribution is historical. The volume historicises a research field that has so far focused primarily on the post-1980 years. A focus on colonial debt from the 19th century building of colonial empires to the decolonisation era in the 1960s-70s fills an important gap in recent debt historiographies. Economic historians have engaged with colonialism only reluctantly or en passant, giving credence to the idea that colonialism is not a development that deserves to be treated on its own. This has led to suboptimal developments in recent scholarship. The second contribution adds a 'law and society' dimension to studies of debt. The analytical payoff of the exercise is to capture the current developments and functional limits of

debt contracting and adjudication in relation to the long-term political and sociological dynamics of sovereignty. Finally, Sovereign Debt Diplomacies imports insights from, and contributes to the body of research currently developed in the Humanities under the label 'colonial and postcolonial studies'. The emphasis on 'history from below' and focus on 'subaltern agency' usefully complement the traditional elite-perspective on financial imperialism favoured by the British school of empire history.

Los juegos artesanos de la educación social Núñez Pérez, Violeta 2016-12-31 Este libro recoge algunas cuestiones con las que Violeta Núñez ha ido tramando sus recorridos docentes: teorías pedagógicas y experiencias como enseñante. El texto postula que inventar es

transgredir, y recurre al bricolaje para que cada cual ensamble fragmentos y objetos culturales y a la postproducción como actividad resultante de esa apropiación de elementos de la cultura plural. Dada la movilidad de los sujetos de la era digital y su atención dispersa en diversas fuentes simultáneas, se trata de incorporar esas modalidades a los espacios de educación, posibilitando que la atención dispersa se transforme en atención flotante. Desde esta perspectiva se plantea visitar, en clave contemporánea, viejas teorías y experiencias pedagógicas: desarchivarlas.
