Artists and Their Books / Books and Their Artists Marcia Reed 2018-07-10 This stunning volume illuminates the current moment of artists' engagement with books, revealing them as an essential medium in contemporary art. Ever innovative and predictably diverse in their physical formats, artists' books occupy a creative space between the familiar four-cornered object and challenging works of art that effectively question every

preconception of what a book can be. Many artists specialize in producing self-contained art projects in the form of books, like Ken Campbell and Susan King, or they establish small presses, like Simon Cutts and Erica Van Horn's Coracle Press or Harry and Sandra Reese's Turkey Press. Countless others who are primarily known as sculptors, painters, or performance artists carry on a parallel practice in artists' books, including Anselm Kiefer, Annette Messenger, Ed Ruscha, and Richard Tuttle.

Artists and Their Books / Books and Their Artists includes over one hundred important examples selected from the Getty Research Institute's Special Collections of more than six thousand editions and unique artists' books. This volume also presents precursors to the artist's book, such as Joris Hoefnagel's sixteenth-century calligraphy masterpiece; single-sheet episodes from Albrecht Dürer's Life of Mary, designed to be either broadsides or a book; early illustrated scientific works; and avant-garde publications. Twentieth-century works reveal the impact of artists' books on Pop Art, Fluxus, Conceptualism, feminist art, and postmodernism. The selection of books by an international range of artists who have chosen to work with texts and images on paper provokes new inquiry into the nature of art and books in contemporary culture.

**Spiral to the Stars** Laura Harjo 2019-06-25 All communities are teeming with energy, spirit, and knowledge, and *Spiral to the Stars* taps into and activates this dynamism to discuss Indigenous community planning from a Mvskoke perspective. This book poses questions about what community is, how to reclaim

community, and how to embark on the process of envisioning what and where the community can be. Geographer Laura Harjo demonstrates that Mvskoke communities have what they need to dream, imagine, speculate, and activate the wishes of ancestors, contemporary kin, and future relatives—all in a present temporality—which is Indigenous futurity. Organized around four methodologies—radical sovereignty, community knowledge, collective power, and emergence geographies—*Spiral to the Stars* provides a path that departs from traditional community-making strategies, which are often extensions of the settler state. Readers are provided a set of methodologies to build genuine community relationships, knowledge, power, and spaces for themselves. Communities don't have to wait on experts because this book helps them activate their own possibilities and expertise. A detailed final chapter provides participatory tools that can be used in workshop settings or one on one. This book offers a critical and concrete map for community making that leverages Indigenous way-finding tools. Mvskoke narratives thread throughout the text, vividly demonstrating that theories come from lived and felt experiences. This is a must-have book for community organizers, radical pedagogists, and anyone wishing to empower and advocate for their community.

*The Plagiarist* Christopher Nosnibor 2008-07 Ben is struggling to find his way in postmodern society; lost

in a blizzard of information, his very identity is fading. As he struggles to find his way THE PLAGIARIST - a mysterious, soluble character, half-real, half-imaginary, ever constant but never the same - acts as a guide who shows Ben to the edge of the precipice. But can he be trusted? This curious anti-novel may have all the answers...A riot of experimentation, THE PLAGIARIST is an example of contemporary theory in practice, melding Bloom's theories on influence to a series of unreliable or schizophrenic narrators against a backdrop created by Frederic Jameson. With a narrative fabricated from the effluvia of the now, which continues the work started by Burroughs and developed by contemporaries like Kenji Siratori, this book demonstrates how postmodern society can cause the individual to lose themselves and the plot.

**Modern Paper Crafts** Margaret Van Sicklen 2011-04-01 In Modern Paper Crafts, well-known origami guru Margaret Van Sicklen blows the dust off traditional origami and paper crafting, presenting more than 20 projects that rely on classic paper craft techniques, but are suited to 21st-century style and aesthetics. The suite of contemporary projects in Modern Paper Crafts ranges from gift wrap, holiday ornaments, and note cards to frames, boxes, bowls, silhouettes, wall art, mobiles, and even a folding screen. Projects are divided into five chapters: folding, cutting, scoring and sculpting, pleating, and recycling. Each chapter begins with an overview and step-by-step photo tutorials of basic techniques, and each project includes step-by-step instructions and illustrations. A variety of papers are used for the projects, from standard cardstock and scrapbooking paper to art papers and recycled corrugated cardboard. All of the projects are accessible to the novice paper crafter

but will also appeal to the more advanced crafter. *Thomas Register of American Manufacturers and Thomas Register Catalog File 2002 Vols. for 1970-71* includes manufacturers' catalogs.

**The Art of the Fold** Hedi Kyle 2018-10-02 "The influential artist Hedi Kyle and renowned architecture graduate Ulla Warchol shows you how to create their unique designs using folding techniques. From creating flag books and fishbones, to blizzards and nesting boxes, you'll gain an invaluable insight into the work of two skilled artists with this fun read! With the help of their thorough instructions and simple illustrations, you'll be on your way to becoming a pro paper crafter in no time at all" – Sew magazine "A wonderful insight into the work of a truly skilled artist" – PaperCrafter The renowned and influential book artist Hedi Kyle shows you step-by-step how to create her unique designs using folding techniques in *The Art of the Fold*. Bookbinding and paper craft projects include flag books, blizzard books, the fishbone fold, and nesting boxes. Written by the doyenne of artists' books, Hedi Kyle, *The Art of the Fold* is a wonderful insight into the work of a truly skilled artist. Hedi will show you how to bind a book and fold paper to create over 35 of her cut-fold book designs. The book is beautifully illustrated with Hedi's finished works of art. An excerpt from the book: 'I can still remember the thrill I experienced when my first folded book structure emerged from my fingers – how eager I was to explore its possibilities and to share it with whoever was interested. The Flag Book, as I now call it, is a simple accordion and has interlocking pages oriented in opposite directions. Little did I know that this simple structure would have legs and be the catalyst for the next forty-plus years of thinking about

and making books. The common perception of the book today is fairly straightforward: a series of pages organized around a spine and protected on either side by two covers. This format allows for easy access, storage and retrieval of information. Yet what happens when the book is stripped away of centuries of preconceptions and is allowed to reveal something else: playfulness, utility, invention? Expanding the notion of the book is what the structures in the following chapters of *The Art of the Fold* attempt to do. Exploring its tactile, sculptural form, primarily through folding methods, the book as a structural object is celebrated while content is considered in a new and unconventional way. My range in this medium has always been broad. In part this is due to my introduction to the world of bookbinding and some chance encounters. In the 1970s in New York City, the art and craft of hand bookbinding and papermaking were experiencing an unprecedented revival. I was fortunate to arrive in the city at just this moment. With an art-school background and an impulse to make things, I was naturally drawn to pursue this new opportunity. The Center for Book Arts, the famous forerunner of so many centers yet to come, was located in a small storefront just down the street from where I lived on the Lower East Side of Manhattan. Under the direction of founder Richard Minsky, it had a radical mission: to push concept, materials, printing and making of artist books in a new direction. When Richard dared me to teach at the Center one evening a week, I was hooked. My career as a book conservator and a book artist has now spanned over 45 years. As head conservator at the American Philosophical Society in Philadelphia, I've had the opportunity to handle some of the rarest volumes and manuscripts in the world. I have

also dealt with decrepit books, torn maps and countless curiosities discovered in stacks and archives. All were endless sources for ideas and provided a springboard for a departure from tradition. Leading book-arts workshops around the world and a 25 year tenure teaching in the graduate program for Book Arts and Printmaking at the University of the Arts in Philadelphia have shown me, in retrospect, that the more I taught, t

*Strengthening Forensic Science in the United States*

National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration.

*Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as

a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

**Early Intervention** James Hughes 2015-05-01 Governments and social agencies tackle the toughest social problems their citizens face -- poverty, homelessness, mental and physical illness, violence, abuse, and more. Yet these problems persist in Canada -- in many cases, they are worsening -- and the costs of the social safety net continue to rise. New approaches have been developed by innovators frustrated by the failure of traditional programs and policies, in Canada and internationally. Many of the most promising new approaches use a strategy of early intervention -- identifying and tackling problems without delay. Regardless of the problem, innovative, well-designed programs based on early intervention have generated better results for the individuals involved and for society as a whole. Often, the associated costs to government have been reduced. In *Early Intervention* James Hughes showcases the best of these innovative approaches. He provides representative real-life case histories of Canadian beneficiaries of this new thinking and presents the findings of researchers who have compared the outcomes of new approaches with traditional ones. Putting the social safety net into place was one of Canada's great achievements in the 20th century. Revamping those programs so they make a greater contribution to the quality of life of all Canadians is the challenge for the early 21st century. In this book, James Hughes shows how this can be done. He provides the background information needed by anyone who wants to help reform and improve Canadian social policy.
