Jorge Otero-Pailos Eva Ebersberger 2009 "Estoy interesado en cómo hacemos la transición como personas de una fase de la vida a otra, y como culturas de un período histórico a otro. Las transiciones son a menudo difíciles, tal vez incluso atemorizantes." Con esta presentación, podemos imaginar que el trabajo del arquitecto artista Jorge Otero-Pailos será diferente, especialmente respecto a cómo entendemos el paso del tiempo de la arquitectura en la historia. "The Ethics of Dust" evidencia la limpieza del polvo y los residuos de contaminación de reconocidos edificios y monumentos históricos. Haciendo visible lo invisible.

Cities of Childhood Stefano De Martino 1988

Europe Before History Kristian Kristiansen 2000 The societies of the European Bronze Age produced elaborate artifacts and were drawn into a wide trade network extending over the whole of Europe, even though they were economically and politically undiversified. Kristian Kristansen

attempts to explain this paradox using a world-systems analysis, and in particular tries to account for the absence of state formation. He presents his case with a powerful marshalling of the evidence across the whole of Europe and over two millennia. The result is the most coherent overview of this period of European prehistory since the writings of Gordon Childe and Christopher Hawkes. A great strength of this book is the broad European perspective, which allows the author to address some of the larger questions that have been raised in the study of the Bronze Age. It captures the complexity of a prehistorical world at different levels of integration and interaction from local to global.

The Architecture of Pica Ciamarra Associati Antonietta Iolanda Lima 2019-04 Since 1970, based in an isolated building situated on the peninsula of Posillipo, Pica Ciamarra Associati (www.pcaint.eu) has acted as a laboratory of architectural and urban design which has gradually incorporated new members and new energies over the time: using a

multidisciplinary approach, the roots of the architectural practice lie in the intensive theoretical and practical work begun in the early 1960s by Massimo Pica Ciamarra. Since then the practice has been marked by a continuous relationship with Le Carré Bleu Feuille internationale d'architecture and leading members of the cultural milieu of Team 10: this has led to constant attention to everything that lies beyond form, to the relationship with contexts that also include non-spatial contexts, and to high levels of integration and dialectical discussion. According to Pica Ciamarra Associati, a design transcends the approaches of a single sector, providing simultaneous solutions to contradictory requirements, combining utopia and practicality. The poetics of the fragment: it mediates between architecture and the urban dimension; some designs also have the aim of becoming absorbed within a context as 'informed fragments'. This monograph is the result of an intensive period of work and consists of two interacting parts. It stems from research into the archive of the studio Pica Ciamarra and conversation with the members of the architectural practice. Organised diachronically, the book tells the long story, unfolding over a period of over fifty years of a team of Neapolitan architects and designers, who have maintained the lively spirit of the practice which is still geared towards the future. The textual and iconographic account tells a story and offers an interpretation that highlight the vibrant atmosphere of

the studio, based on a consistency of thought and action, and fuelled by an interest in many different forms of knowledge. The contextualisation of the events related to the studio, as they unfolded over time, is wide-ranging, coherent and connotative. Antonietta Iolanda Lima, professor of history of architecture at the University of Palermo, has always tried, through theory, teaching and design, to disseminate the importance of history which can embracing innovation and tradition to an equal degree, forming a new architectural language. According to her view of architecture, history and design are closely connected, a 'single entity' as is reflected by her career. Since the 1980s, her academic work has gained increasing importance, a way of avoiding narrow sectoral approaches in the training of future architects, offering a holistic stance of the history of architecture and an architecture that contributes to shaping critical thought and a thriving cultural life.

Letters 1941-1985 Italo Calvino 2014-06-05 The extraordinary letters of Italo Calvino, one of the great writers of the twentieth century, translated into English for the first time by Martin McLaughlin, with an introduction by Michael Wood. Italo Calvino, novelist, literary critic and editor, was also a masterful letter writer whose correspondents included Umberto Eco, Primo Levi, Gore Vidal and Pier Paolo Pasolini. This collection of his extraordinary letters, the first in English, gives an illuminating insight into

his work and life. They include correspondence with fellow authors, generous encouragement to young writers, responses to critics, thoughts on literary criticism and literature in general, as well as giving glimpses of Calvino's role in the antifascist Resistance, his disenchantment with Communism and his travels to America and Cuba. Together they reveal the searching intellect, clarity and passionate commitment of a great writer at work. 'This literally marvelous collection of letters shows him to have been gregarious, puckish, funny, combative, and, above all, wonderful company, and opens a new and fascinating perspective on one of the master writers of the twentieth century. Michael Wood and Martin McLaughlin have done Calvino, and us, a great and loving service.' John Banville 'A charming addition to the Planet Calvino - a place cluttered with sphinxes, chimeras, knights, spaceships and viscounts both cloven and whole' Guardian Italo Calvino, one of Italy's finest postwar writers, was born in Cuba in 1923 and grew up in San Remo, Italy. Best known for his experimental masterpieces, *Invisible Cities* and *If on a Winter's Night a Traveller*, he was also a brilliant exponent of allegorical fantasy in works such as *The Complete Cosmicomics*. He died in Siena in 1985.

Corporate Heritage Marketing Angelo Riviezzo 2021-05-30 Corporate Heritage Marketing introduces the reader to the design and implementation of a heritage marketing strategy. It aims to propose a new and integrated

reading of this marketing strategy, both from a theoretical and a managerial perspective. This book sets out to answer key questions, such as: how is it possible to engage all the company's stakeholders by exploiting corporate heritage? It also aims to discuss the basic principles for achieving a successful marriage between marketing and heritage. By highlighting the results of a research focused on 20 Italian companies, the book proposes a model for the development and implementation of a heritage marketing strategy. The nature of this book, being both theoretical and empirical, can contribute to increasing the curiosity and interest towards heritage marketing of both academics and practitioners.

La Fiera di Milano Luca Masia 2011 Il volume ripercorre la storia della Fiera Campionaria di Milano, un appuntamento nato nel 1920 - nel clima di operosità e di rinascita economica che si voleva respirare nella Milano del primo dopoguerra - e che ogni anno, per quindici giorni di primavera, trasformava la città nel centro del mondo, meta imperdibile tanto per i produttori quanto per i consumatori. La Fiera milanese si è mantenuta sempre a metà strada tra le Esposizioni Universali e le mostre di settore: un po' spettacolo, un po' commercio. Il più delle volte le due cose insieme: lo spettacolo del lavoro. Il volume, suddiviso in sette capitoli dedicati ciascuno a un decennio - dagli anni venti agli anni novanta del Novecento -, mette in luce il valore della manifestazione e il suo intimo legame con la città proprio attraverso le chiavi della comunicazione e del lavoro. Un ricco repertorio iconografico, costituito dalla presentazione di tutti i manifesti della Fiera, permetterà al lettore di percepire, se non di rivivere, gli anni trascorsi sotto le insegne della Campionaria, la cui atmosfera è fedelmente restituita dalla grafica delle immagini. Le testimonianze tratte dai materiali d'archivio della Fiera, contestualizzati nei saggi di apertura di ogni capitolo, consentono quindi di ricostruire la storia di ogni Fiera, specchio di una società in continuo cambiamento e di un'Italia che, attraverso gli anni della guerra, della ricostruzione e del boom economico, della crisi e della ripresa...

Birds of Passage Michael J. Piore 1979 *Birds of Passage* presents an unorthodox analysis of migration from rural to urban industrial societies from underdeveloped rural areas. It argues that such migrations are a continuing feature of industrial societies and that they are generated by forces inherent in the nature of industrial economies. It explains why conventional economic theory finds such migrations so difficult to comprehend, and challenges a set of older assumptions that supported the view that these migrations were beneficial to both sending and receiving societies. Professor Piore seriously questions whether migration actually relieves population pressure and rural unemployment, and whether it develops skills necessary for the emergence of an industrial labour force in the home country. Furthermore, he criticizes the notion that in the long run migrant labour complements native labour. On the basis of this critique, he develops an alternative theory of the nature of the migration process.

Michelangelo e il Novecento Pietro Ruschi 2014 Il volume, pubblicato nell'ambito delle celebrazioni per il 450° anniversario della morte di Michelangelo (Caprese Michelangelo, 1475 - Roma, 1564) offre un interessante percorso per comprendere l'influenza di Michelangelo nelle arti visive, nell'architettura e nel design nel corso del Novecento. Attraverso numerosi saggi critici, viene illustrato il progressivo abbandono della retorica fiorita attorno all'artista fino agli anni quaranta, improntata a

un eroico titanismo, sottolineando come il linguaggio di Michelangelo abbia assunto man mano un significato esistenziale, offrendosi anche come esempio formale per la politica della ricostruzione, fino a riacquistare lo status di un vero e proprio mito nazionale a ridosso dei festeggiamenti per il centenario dell'unificazione italiana. In questo contesto, il volume da conto delle celebrazioni che si svolsero nel 1964 e nel 1975 in occasione dei centenari michelangioli, e i dei restauri che portarono al rifiorire di Casa Buonarroti. Accanto a una scelta di disegni di Michelangelo, è presentata una ricca selezione di opere di artisti del Novecento e contemporanei. Completa il volume una bibliografia aggiornata.

Architourism Joan Ockman 2005 This sumptuously illustrated book looks at why the world's most interesting buildings are becoming the hottest destinations for today's travelers. In the last few decades architecture has become a major focus for travelers, rather than merely a part of a larger itinerary. Illustrated with nearly one hundred color photographs, this series of provocative essays and contributions by leading scholars, critics, architects, and artists explores the role of architecture in the contemporary tourist imagination. From Mont Saint Michel and the Taj Mahal to Bilbao's Guggenheim Museum and the Blur Building in Switzerland's Lake Neuchâtel, the authors focus on how certain iconic buildings have found their way into the cultural consciousness. At the same time they offer

insights as to why other buildings, such as Minnesota's Mall of America and the faux architecture of Las Vegas, have become integral to their regions' tourist economy-and postulate how this success will influence architecture of the future. ILLUSTRATIONS: 116 colour 25 b/w

The Moro Affair Leonardo Sciascia 2002 On March 16, 1978 Aldo Moro, former Italian Prime Minister, was ambushed in Rome. Within three minutes the gang killed all five members of his escort and bundled Moro into one of three getaway cars. An hour later the Red Brigades announced that Moro was in their hands; on March 18 they said he would be tried in a 'people's court of justice'. Seven weeks later Moro's body was discovered in the boot of a Renault parked in the crowded centre of Rome. In *The Moro Affair*, Leonardo Sciascia - a master of detective fiction - untangles the real-life events of these crucial weeks and provides a unique insight into the dangerous world of Italian politics in the 1970s.

History of the Italian Agricultural Landscape Emilio Sereni 2014-07-14

Emilio Sereni's classic work is now available in an English language edition. History of the Italian Agricultural Landscape is a synthesis of the agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this sweeping historical survey, he describes attempts by successive generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems. History of the Italian Agricultural Landscape first appeared in 1961. At the time of its publication it was a pathbreaking work, parallel in its importance for Italy to Marc Bloc's masterwork of 1931, The Original Characteristics of French Rural History. Sereni invented the concept of the historical "agricultural landscape": an interdisciplinary characterization of rural life involving economic and social history, linguistics, archeology, art

history, and ecological studies. Originally published in 1997. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Achtung-Panzer! Heinz Guderian 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his

Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Understanding Privacy Daniel J. Solove 2008 Privacy is one of the most important concepts of our time, yet it is also one of the most elusive. As rapidly changing technology makes information increasingly available, scholars, activists, and policymakers have struggled to define privacy, with many conceding that the task is virtually impossible. In this concise and lucid book, Daniel J. Solove offers a comprehensive overview of the

difficulties involved in discussions of privacy and ultimately provides a provocative resolution. He argues that no single definition can be workable, but rather that there are multiple forms of privacy, related to one another by family resemblances. His theory bridges cultural differences and addresses historical changes in views on privacy. Drawing on a broad array of interdisciplinary sources, Solove sets forth a framework for understanding privacy that provides clear, practical guidance for engaging with relevant issues. *Understanding Privacy* will be an essential introduction to long-standing debates and an invaluable resource for crafting laws and policies about surveillance, data mining, identity theft, state involvement in reproductive and marital decisions, and other pressing contemporary matters concerning privacy.

Mobile Lives Anthony Elliott 2010-06-10 How should we understand the personal and social impacts of complex mobility systems? Can lifestyles based around intensive travel, transport and tourism be maintained in the 21st century? What possibility post-carbon lifestyles? In this provocative study of "life on the move", Anthony Elliott and John Urry explore how complex mobility systems are transforming everyday, ordinary lives. The authors develop their arguments through an analysis of various sectors of mobile lives: networks, new digital technologies, consumerism, the

lifestyles of 'globals', and intimate relationships at-a-distance. Elliott and Urry introduce a range of new concepts – miniaturized mobilities, affect storage, network capital, meetingness, neighbourhood lives, portable personhood, ambient place, globals – to capture the specific ways in which mobility systems intersect with mobile lives. This book represents a novel approach in "post-carbon" social theory. It will be essential reading for advanced undergraduate students, postgraduates and teachers in sociology, social theory, politics, geography, international relations, cultural studies, and economics and business studies.

The Art of Breaking Up hitRECORD 2020-05-05 Joseph Gordon-Levitt's creative collaborative community HITRECORD looks at love from both sides in this ingenious flippable book. So, you just got dumped, huh? Or did you just dump someone? Doesn't matter who ended it. Either way,

you're sleeping alone tonight. But don't worry, you're not really alone. HITRECORD's global community of over 750,000 active artists is here to help with *The Art of Breaking Up*, a new book designed to get you through this trying time. That's over 750,000 people who know the soul-crushing pain of a broken heart. But instead of wallowing forever in vats of unproductive (but delicious) cookie dough, they've channeled all that misery into an insightful, funny, and smart compendium of musings, photography, drawings, collages, puzzles, recipes, games, and more—designed to explore (and distract from) the mind-numbing agony of a romantic breakup. You'll laugh, you'll smile, and you'll probably cry. Everyone knows there are two sides to every break-up, so this book features a double-sided, flippable structure. One side eases the tortured consciences of the HEARTBREAKERS. Flip the book, and the other side considers the plight of the BROKEN-HEARTED. Both sides are organized chronologically with chapters that correspond to the emotional trajectory of both the HEARTBREAKER and BROKEN-HEARTED. Chapters include: Early Warning Signs, Exit Strategy, The Break Up, Acceptance, Depression, Bargaining, Anger, and Denial. Where the two sections meet in the middle there is a compelling, heart-wrenching moment where the HEARTBREAKER and BROKEN-HEARTED connect again, but we're not giving that away. Inside this book you'll find plenty of art, stories, comics,

and other amusements, such as a Post-Break-Up Relationship Survey, Denial Yoga, Candy Hearts for Assholes, Breakup Greeting Cards, Hex Your Ex Voodoo Doll, The Free Bird Word Search Game, and a playlist or two, including "Right Back at Ya," a collection of songs to stoke the burning rage in your heart. Everything you'll find in this book was made collaboratively by people from around the world on HITRECORD—an online creative platform for collaborative art and media projects founded and directed by Joseph Gordon-Levitt. With its universal, all-inclusive approach to the subject, *The Art of Breaking Up* is an acute observation of love and heartbreak in modern times, and maybe—just maybe—a salve for anyone with a broken heart.

Requiem for a Lightning Bolt Manuel Scorza 2000 The five novels of Manuel Scorza's *La guerra silenciosa* are self-contained, yet reading them in the order of their appearance enhances an appreciation of the saga's underlying thematic development. In this final volume, the Indian struggle, which began in the first book as a single-handed revolt against the despotism of Judge Montenegro, has evolved into a fully organized insurrection against the oppression by ruthless landowners and the powerful mining company of Cerro de Pasco. This novel also depicts the culmination of the gradual shift in the Indians' psyche from a mythical interpretation of events to a more realistic worldview.

The Urban Moment Robert A. Beauregard 1999-10-11 The modern city extends beyond its physical borders, pervading all aspects of our society. Celebrating 30 years of Sage's Urban Affairs Review, this book examines the state of the city as we enter the 21st century. From an interdisciplinary perspective, critical urban theorists explore a variety of discourses for representing the contemporary city. Considering the city's social and physical articulations, the prospects for continued democracy and civic engagement, and interpretations of a 'good city', these essays represent the cutting edge of urban studies. The Urban Moment is a provocative examination of urban theory, offering European, North American, and South American perspectives. An exciting and comprehensive addition to the series, this book is critical for Urban Studies scholars as well as those studying the city in sociological, political, or cultural disciplines.

Weather Warfare Jerry E. Smith 2011-08-07 In April 1997, United States Secretary of Defense William Cohen declared that there are terrorists at work who "... are engaging even in an eco-type of terrorism whereby they can alter the climate, set off earthquakes, volcanoes remotely through the use of electromagnetic waves..." Weather modification in the form of cloud seeding to increase snow packs in the Sierras or suppress hail over Kansas is now an everyday affair. Hundreds of environmental and weather

modifying technologies have been patented in the United States alone-and hundreds more are being developed in civilian, academic, military and quasi-military laboratories around the world at this moment! This book lays bare the grim facts of who is doing it and why. The earth and the sky have themselves been turned into weapons! Underground nuclear tests in Nevada have set off earthquakes. A Russian company has been offering to sell typhoons on demand since the 1990s. Scientists have been searching for ways to move hurricanes for over 50 years-the same timeframe that took us from the Wright Brothers to Neil Armstrong. In this book, Jerry E. Smith picks up where his 1998 book about the High-frequency Active Auroral Research Program (HAARP) left off. He reports on recent developments at HAARP, including its possible connection to the crash of the Space Shuttle Columbia and what role, if any, it played in certain "natural" disasters, like Hurricane Katrina. Tackling the chemtrail controversy, Smith examines claims that particles called aerosols are being deliberately injected into the atmosphere. Edward Teller, father of the hydrogen bomb, proposed putting up a "sun screen" of aerosols to save the earth from global warming-is someone actually doing it? Numerous ongoing military programs do inject aerosols at high altitude for communications and surveillance operations. Could these include mind control or population control applications? Smith puts these technologies

into context by examining the geopolitical conflicts that are driving their development from Globalization to the rise of Neo-Con Neo-Fascism.

Heritage Regimes and the State Bendix, Regina 2013-07-02 What happens when UNESCO heritage conventions are ratified by a state? How do UNESCO's global efforts interact with preexisting local, regional and state efforts to conserve or promote culture? What new institutions emerge to address the mandate? The contributors to this volume focus on the work of translation and interpretation that ensues once heritage conventions are ratified and implemented. With seventeen case studies from Europe, Africa, the Caribbean and China, the volume provides comparative evidence for the divergent heritage regimes generated in states that differ in history and political organization. The cases illustrate how UNESCO's aspiration to honor and celebrate cultural diversity diversifies itself. The very effort to adopt a global heritage regime forces myriad adaptations to particular state and interstate modalities of building and managing heritage.

Urban Theory and the Urban Experience Simon Parker 2003-11-06 For the first time *Urban Theory and the Urban Experience* brings together classic

and contemporary approaches to urban research in order to reveal the intellectual origins of urban studies, and the often unacknowledged debt that empirical and theoretical perspectives on the city owe to one another. Both students and urban scholars will appreciate the critical way in which classical and contemporary debates on the nature of the city are presented. Extensive use is made throughout of documentary, literary and cultural sources to bring the different theoretical perspectives to life. Discussion points introduce and explain key concepts and intellectual histories in a jargon free manner. End of chapter further readings have also been annotated to encourage additional study.

Worlds in Motion : Understanding International Migration at the End of the Millennium Douglas S. Massey 1999-01-28 At the end of the 20th century nearly all developed nations have become countries of immigration, absorbing growing numbers of immigrants not only from developed regions, but increasingly from developing nations of the Third World. Although international migration has come to play a central role in the social, economic, and demographic dynamics of both immigrant-sending and immigrant-receiving countries, social scientist have been slow to construct a comprehensive theory to explain it. Efforts at theoretical explanation have been fragmented by disciplinary, geographic, and methodological boundaries. *Worlds in Motion* seeks to overcome these

schisms to create a comprehensive theory of international migration for the next century. After explicating the various propositions and hypotheses of current theories, and identifying areas of complementarity and conflict, the authors review empirical research emanating from each of the world's principal international migration systems: North America, Western Europe, the Gulf, Asia and the Pacific, and the Southern Cone of South America. Using data from the 1980s, levels and patterns of migration within each system are described to define their structure and organization. Specific studies are then comprehensively surveyed to evaluate the fundamental propositions of neoclassical economics, the new economics of labour migration, segmented labour market theory, world systems theory, social

capital theory, and the theory of cumulative causation. The various theories are also tested by applying them to the relationship between international migration and economic development. Although certain theories seem to function more effectively in certain systems, all contain elements of truth supported by empirical research. The task of the theorist is thus to identify which theories are most effective in accounting for international migration in the world today, and what regional and national circumstances lead to a predominance of one theoretical mechanism over another. The book concludes by offering an empirically-grounded theoretical synthesis to serve as a guide for researchers and policy-makers in the 21st century.
