Becoming Modern Alex Inkeles 1974 This is a valuable and fascinating book valuable because of the findings it presents, fascinating because of the way it presents them. The subject of *Becoming Modern* is the modernization process in six developing nations (Argentina, Chile, India, Israel, Nigeria, and Bangladesh). The method is to survey about a thousand men, aged 20-30, in each of these lands. The goal is to demonstrate that a modern man, identifiable by his attitudes toward different aspects of life, does indeed

Salud familiar y enfermería Patricia Casasa García 2016-08-31 Dentro del proyecto PAPIME se propuso la elaboración de un libro que reuniera los diversos enfoques y temas que debe abordar el profesional de enfermería para el estudio de la salud familiar, de esta manera se comenzó la búsqueda de material idóneo que sirviera para la producción de diversos capítulos. La insuficiente definición actual del papel de la enfermera en atención primaria y salud familiar queda patente ante la inexistencia de protocolos clínicos específicos e indicadores derivados de ellos que le permitan planificar, gestionar y evaluar de forma adecuada a las familias. Por eso, el desarrollo de la formación de enfermeras en atención primaria, salud familiar y comunitaria juega un papel fundamental ahora y en los próximos años. La salud familiar se considera como un enfoque conceptual y

metodológico que posibilita la transformación de servicios, desarrollo de equipos de salud y aumento de la atención integral efectiva a los usuarios y sus familias. El reto de los profesionales, como la enfermera, es el compromiso con la innovación y el cambio en la prestación de servicios de salud en cobertura y calidad de atención. La atención familiar y comunitaria es aquella que presta un conjunto de servicios profesionales que, desde una situación de proximidad a la población, enfoca su actuación desde una triple perspectiva: personal, familiar y colectiva, con una orientación estratégica hacia la mejora de la salud a través del abordaje de los problemas y necesidades existentes. La atención familiar y comunitaria se desarrolla de manera principal en la atención primaria a la salud (APS) y constituye su elemento nuclear de intervención.

Sociologies in Dialogue Sari Hanafi 2020-07-21
Sociologies in Dialogue brings together expert contributions from international scholars, who reflect on the importance of collaboration between diverse sociological perspectives to enhance our understanding of the role of sociology as an academic discipline, and as a vehicle for social change. By exploring the distinctive practices and research of a range of sociologists, the book shows how an open dialogue between sociologists is critical to addressing major sociological issues across the globe such as inequality and ethnocentrism, and challenging the hierarchies of knowledge production and circulation. Contributors also discuss novel strands in theory and methodology such as multicultural sociology, cosmopolitanism, and multiple modernities. An important contribution for researchers and students interested in global sociology, sociological theories and methodologies.

in American Intellectual History The story of liberal religion in the twentieth century, Matthew S. Hedstrom contends, is a story of cultural ascendancy. This may come as a surprise-most scholarship in American religious history, after all, equates the numerical decline of the Protestant mainline with the failure of religious liberalism. Yet a look beyond the pews, into the wider culture, reveals a more complex and fascinating story, one Hedstrom tells in *The Rise of Liberal Religion*. Hedstrom attends especially to the critically important yet little-studied arena of religious book culture-particularly the religious middlebrow of mid-century-as the site where religious liberalism was most effectively popularized. By looking at book weeks, book clubs, public libraries, new publishing enterprises, key authors and bestsellers, wartime reading programs, and fan mail, among other sources, Hedstrom is able to provide a rich, on-the-ground account of the men, women, and organizations that drove religious liberalism's

cultural rise in the 1920s, 1930s, and 1940s. Critically, by the post-WWII period the religious middlebrow had expanded beyond its Protestant roots, using mystical and psychological spirituality as a platform for interreligious exchange. This compelling history of religion and book culture not only shows how reading and book buying were critical twentieth-century religious practices, but also provides a model for thinking about the relationship of religion to consumer culture more broadly. In this way, *The Rise of Liberal Religion* offers both innovative cultural history and new ways of seeing the imprint of liberal religion in our own times.

A Recipe for Gentrification Alison Hope Alkon
2020-07-14 How gentrification uproots the urban food landscape, and what activists are doing to resist it From hipster coffee shops to upscale restaurants, a bustling local food scene is perhaps the most commonly recognized harbinger of gentrification. *A Recipe for Gentrification* explores this widespread phenomenon, showing the ways in which food and gentrification are deeply—and, at times, controversially—intertwined. Contributors provide an inside look at gentrification in different cities, from major hubs like New York and Los Angeles to smaller cities like Cleveland and Durham. They examine a wide range of food enterprises—including grocery stores, restaurants, community gardens, and farmers' markets—to provide up-to-date perspectives on why gentrification takes place, and how communities use food to push back against displacement. Ultimately, they unpack the

Rationality and Relativism Martin Hollis
1982-11-15 Are there absolute truths that can be gradually approached over time through rational processes? Or are all modes and systems of thought equally valid if viewed from within their own internally consistent frames of reference? Are there universal forms of reasoning and understanding that enable us to distinguish between rational beliefs and those that are demonstrably false, or is everything relative? These central questions are addressed and debated by the distinguished contributors to this lively book. Some of them—Hollis, Lukes, Robin Horton, and Ernest Gellner—discuss new directions in their thinking since their earlier articles appeared in 1970 in the seminal volume

Rationality (edited by Bryan Wilson). They are now joined in the debate by Ian Hacking, W. Newton-Smith, Charles Taylor, Jon Elster, Dan Sperber, and, in the jointly authored lead article, by Barry Barnes and David Bloor. Emerging from the debate are a variety of supportable interpretations and conclusions rather than a single, distinct "truth." The contributors represent the complete spectrum of positions between a relativism that challenges the very concept of a single world and the idea that there are ascertainable, objective universals.

Politics of Temporalization Nadia R. Altschul
2020-05-22 A postcolonial study of the conceptualization of nineteenth- and twentieth-century Latin America as medieval and oriental. If Spain and Portugal were perceived as backward in the nineteenth century—still tainted, in the minds of European writers and thinkers, by more than a whiff of the medieval and Moorish—Ibero-America lagged even further behind. Originally colonized in the late fifteenth century, Chile,

Argentina, and Brazil were characterized by European travelers and South American elites alike as both feudal and oriental, as if they retained an oriental-Moorish character due to the centuries-long presence of Islam in the Iberian Peninsula. So, Nadia R. Altschul observes, the Scottish metropolitan writer Maria Graham (1785-1842) depicted the Chile in which she found herself stranded after the death of her sea captain husband as a premodern, precapitalist, and orientalized place that could only benefit from the free trade imperialism of the British. Domingo F. Sarmiento (1811-1888), the most influential Latin American writer and statesman of his day, conceived of his own Euro-American creole class as medieval in such works as *Civilization and Barbarism: The Life of Juan Facundo Quiroga* (1845) and *Recollections of a Provincial Past* (1850), and wrote of the inherited Moorish character of Spanish America in his 1883 *Conflict and Harmony of the Races in America*. Moving forward into the first half of the twentieth

century, Altschul explores the oriental character that Gilberto Freyre assigned to Portuguese colonization in his *The Masters and the Slaves* (1933), in which he postulated the "Mozarabic" essence of Brazil. In *Politics of Temporalization*, Altschul examines the case of South America to ask more broadly what is at stake—what is harmed, what is excused—when the present is temporalized, when elements of "the now" are characterized as belonging to, and consequently imposed upon, a constructed and othered "past."

Handbook of Social Movements across Latin America Paul Almeida 2016-08-12 This handbook covers social movement activities in Latin American countries that have had profound consequences on the political culture of the region. It examines the developments of the past twenty years, such as a renewed upswing in popular mobilization, the ending of violent conflicts and military governments, new struggles and a relatively more democratic climate. It shows that, from southern Chiapas to Argentina, social movements in the 1990s and especially in the 2000s, have reached new heights of popular participation. There is a lack of research on the politics of this region in the contemporary era of globalization, this volume partially fills the void and offers a rich resource to students, scholars and the general public in terms of understanding the politics of mass mobilization in the early twenty-first century. contributors each address social movement activity in their own nation and together they present a multidisciplinary perspective on the topic. Each chapter uses a case study design to bring out the most prominent attributes of the particular social struggle(s), for instance the main protagonists in the campaigns, the grievances of the population and the outcomes of the struggles. This Handbook is divided into seven substantive themes, providing overall coherence to a broad range of social conflicts across countries, issues and social groups. These themes include: 1) theory of Latin American social movements; 2) neoliberalism; 3) indigenous struggles; 4) women's movements; 5) movements and the State; 6) environmental movements; and 7) transnational mobilizations.

remarkable emergence of innovations and technological advances that are generating promising changes and opportunities for sustainable agriculture, yet at the same time the agricultural sector worldwide faces numerous daunting challenges. Not only is the agricultural sector expected to produce adequate food, fiber, and feed, and contribute to biofuels to meet the needs of a rising global population, it is expected to do so under increasingly scarce natural resources and climate change. Growing awareness of the unintended impacts associated with some agricultural production practices has led to heightened societal expectations for improved environmental, community, labor, and animal welfare standards in agriculture. *Toward Sustainable Agricultural Systems in the 21st Century* assesses the scientific evidence for the strengths and weaknesses of different production, marketing, and policy approaches for improving and reducing the costs and unintended consequences of agricultural production. Social Organization; a Study of the Larger Mind Charles Horton Cooley 1909

A Theory of Political Obligation Margaret Gilbert 2006-05-11 Margaret Gilbert offers an incisive new approach to a classic problem of political philosophy: when and why should I do what the laws of my country tell me to do? particular, the author argues that in central, standard senses of the relevant terms membership in a political society in and of itself obligates one to support that society's political institutions. The obligations in question are not moral requirements derived from general moral principles, as is often supposed, but a matter of one's participation in a special kind of commitment: joint commitment. An agreement is sufficient but not necessary to generate such a commitment. Gilbert uses the phrase 'plural subject' to refer to all of those who are jointly committed in some way. She therefore labels the theory offered in this book the plural subject theory of political obligation. The author concentrates on the exposition of this theory, carefully explaining how and in what sense joint commitments obligate. She also explores a classic theory of political obligation --- actual contract theory --- according to which one is obligated to conform to the laws of one's country because one agreed to do so. She offers a new

interpretation of this theory in light of a theory of plural subject theory of agreements. She argues that actual contract theory has more merit than has been thought, though the more general plural subject theory is to be preferred. She compares and contrasts plural subject theory with identification theory, relationship theory, and the theory of fair play. She brings it to bear on some classic situations of crisis, and, in the concluding chapter, suggests a number of avenues for related empirical and moral inquiry. Clearly and compellingly written, *A Theory of Political Obligation* will be essential reading for political philosophers and theorists.

This “remarkable, comprehensive” study of neoliberal agribusiness and the obesity epidemic “is critical reading for food studies scholars” (Contemporary Sociology). Obesity rates are rising across the United States and beyond. While some claim that people simply eat too much “energy-dense” food while exercising too little, The Neoliberal Diet argues that the issue is larger than individual lifestyle choices. Since the 1980s,

the shift toward neoliberal regulation has enabled agribusiness multinationals to thrive by selling a combination of meat and highly processed foods loaded with refined flour and sugars—a diet that originated in the United States. Drawing on extensive empirical data, Gerardo Otero identifies the socioeconomic and political forces that created this diet, which has been exported around the globe at the expense of people's health. Otero shows how state-level actions, particularly subsidies for big farms and agribusiness, have ensured the dominance of processed foods and made fresh foods inaccessible to many. Comparing agrifood performance across several nations, including the NAFTA region, and correlating food access to class inequality, he convincingly demonstrates the structural character of food production and

the effect of inequality on individual food choices. Resolving the global obesity crisis, Otero concludes, lies not in blaming individuals but in creating state-level programs to reduce inequality and make healthier food accessible to all.
