Manufacturing Processes for Design Professionals Rob Thompson 2007-11-30 An encyclopaedic guide to production techniques and materials for product and industrial designers, engineers, and architects. Today's product designers are presented with a myriad of choices when creating their work and preparing it for manufacture. They have to be knowledgeable about a vast repertoire of processes, ranging from what used to be known as traditional "crafts" to the latest technology, to enable their designs to be manufactured effectively and efficiently. Information on the internet about such processes is often unreliable, and search engines do not usefully organize material for designers. This fundamental new resource explores innovative production techniques and materials that are having an impact on the design industry worldwide. Organized into four easily referenced parts—Forming, Cutting, Joining, and Finishing—over seventy manufacturing processes are explained in depth with full technical descriptions; analyses of the typical applications, design opportunities, and considerations each process offers; and information on cost, speed, and environmental impact. The accompanying step-by-step case studies look at a product or component being manufactured at a leading international supplier. A directory of more than fifty materials includes a detailed technical profile, images of typical applications and finishes, and an overview of each material's design characteristics. With some 1,200 color photographs and technical illustrations, specially commissioned for this book, this is the definitive reference for product designers, 3D designers, engineers, and architects who need a convenient, highly accessible, and practical reference.
Second Language Pronunciation Assessment Talia Isaacs 2016-12-22 This book is open access under a CC BY licence. It spans the areas of assessment, second language acquisition (SLA) and pronunciation and examines topical issues and challenges that relate to formal and informal assessments of second language (L2) speech in classroom, research and real-world contexts. It showcases insights from assessing other skills (e.g. listening and writing) and highlights perspectives from research in speech sciences, SLA, psycholinguistics and sociolinguistics, including lingua franca communication, with concrete implications for pronunciation assessment. This collection will help to establish commonalities across research areas and facilitate greater consensus about key issues, terminology and best practice in L2 pronunciation research and assessment. Due to its interdisciplinary nature, this book will appeal to a mixed audience of researchers, graduate students, teacher-educators and exam board staff with varying levels of expertise in pronunciation and assessment and wide-ranging interests in applied linguistics.
What is a Superhero? Robin S. Rosenberg PhD 2013-07-01 It's easy to name a superhero—Superman, Batman, Thor, Spiderman, the Green Lantern, Buffy the Vampire Slayer, Rorschach, Wolverine—but it's not so easy to define what a superhero is. Buffy has superpowers, but she doesn't have a costume. Batman has a costume, but doesn't have superpowers. What is the role of power and superpower? And what are supervillains and why do we need them? In *What is a Superhero?*, psychologist Robin Rosenberg and comics scholar Peter Coogan explore this question from a variety of viewpoints, bringing together contributions from nineteen comic book experts—including both scholars in such fields as cultural studies, art, and psychology as well as leading comic book writers and editors. What emerges is a kaleidoscopic portrait of this most popular of pop-culture figures. Writer Jeph Loeb, for instance, sees the desire to make the world a better place as the driving force of the superhero. Jennifer K. Stuller argues that the female superhero inspires women to stand up, be strong, support others, and most important, to believe in themselves. More darkly, A. David Lewis sees the indestructible superhero as the ultimate embodiment of the American "denial of death," while writer Danny Fingeroth sees superheroes as embodying the best aspects of humankind, acting with a nobility of purpose that inspires us. Interestingly, Fingeroth also expands the definition of superhero so that it would include characters like John McClane of the Die Hard movies: "Once they dodge ridiculous quantities of machine gun bullets they're superheroes, cape or no cape." From summer blockbusters to best-selling graphic novels, the superhero is an integral part of our culture. What is a Superhero? not only illuminates this pop-culture figure, but also sheds much light on the fantasies and beliefs of the American people.

Systemic Functional Linguistics J. R. Martin 2015 Systemic Functional Linguistics is a functional model of language inspired by the work of Saussure, Hjelmslev, Whorf, and Firth. SFL was developed by Michael Halliday and his colleagues in the 1960s and has grown into a widely studied and research field, with growing interest in China, Latin America, and North America. This new five-volume collection from Routledge focuses on the foundational papers underlying SFL theory and practice and illustrative papers that have inspired succeeding work.
Intermediate Language Teaching Wilga M. Rivers 1987-02-27 In this collection of essays, a distinguished group of innovative teachers and writers describe the approaches and techniques they have incorporated into their own teaching. The articles are designed to help classroom teachers make language classes more participatory and communication oriented. Successive articles deal with the structure of interaction in large and small groups: imaginative activities for listening, speaking, reading, writing, and testing; the use of poetry, song, and drama; how to perform grammar rules rather than recite them; the special contribution of authentic materials; using audio and video as well as computer software to enhance learning, tapping the community as a resource; learning to interact in different cultural styles; and preparing the student for real-life professional use of language. Teachers of any language and teachers in training will find in this volume a wealth of original and practical ideas for the classroom.
Fog and Other Stories Bill Lowe 1993 This popular series of readers has now been completely revised and updated, using a new syllabus and new word structure lists. Readability has been ensured by means of specially designed computer software. Words that are above level but essential to the story are explained within the text, illustrated, and then reused for maximum reinforcement.

The Politics of English in Hong Kong Jette G. Hansen Edwards 2018-11-14 The focus of this book is on the impact of politics on language and identity in Hong Kong. The book is the first study to track real time language attitude changes against a divisive political landscape. It is also the most comprehensive study of language attitudes in Hong Kong to date, taking place over four years with over 1600 participants. Through both survey and interview data, a multifaceted portrait of language change in progress is presented, providing a more nuanced and complex view of language and identity than has previously been presented. The book examines the status of Hong Kong English in the light of attitudes towards Cantonese, English, and Putinghua, providing a deeper analysis of the linguistic complexity of Hong Kong; it can be argued that one cannot understand attitudes towards Hong Kong English without fully understanding the status and use of English in Hong Kong today. The book also presents a complex examination of language attitudes in Hong Kong by focusing not only on the what of language attitudes, but also the question of for whom, through an analysis of language attitudes by gender, age, identity, and speaking HKE.

The Multilingual Lexicon Jassone Cenoz 2007-05-28 This book is unique because it explores the multilingual lexicon by providing insights from research studies conducted in psycholinguistics, applied linguistics and neurolinguistics. It goes beyond the use of two languages and thus concentrates on a new and developing area in linguistic research. The different perspectives provide a link to the mainstream work on the lexicon and vocabulary acquisition and will stimulate further debate in these areas and in the study of multilingualism.

Newspaper Articles to Get Teenagers Talking Peter Dainty 2006-01-01 "This rich resource provides a collection of authentic newspaper articles from a variety of British newspapers. The stimulating articles encourage students to contextualise the topic and then engage in lively discussion. The articles cover the following areas: Lifestyle, Moral Issues, Work and Education, Food and Health and World Issues. Vocabulary and comprehension activities accompany each article and these highlight the key language items needed for the ensuing discussion. An answer key is included. The introduction provides suggestions on managing successful discussions, as well as background information on the British press."--Cover.

Language Across the Curriculum & CLIL in English as an Additional Language (EAL) Contexts Angel M.Y. Lin 2016-09-15 This book will be of interest to a broad readership, regardless of whether they have a background in sociolinguistics, functional linguistics or genre theories. It presents an accessible "meta-language" (i.e. a language for talking about language) that is workable and usable for teachers and researchers from both language and content backgrounds, thus facilitating collaboration across content and language subject panels. Chapters 1 to 3 lay the theoretical foundation of this common meta-language by critically reviewing, systematically presenting and integrating key theoretical resources for teachers and researchers in this field. In turn, Chapters 4 to 7 focus on issues in pedagogy and assessment, and on school-based approaches to LAC and CLIL, drawing on both research studies and the experiences of front-line teachers and school administrators. Chapter 8 provides a critical and reflexive angle on the field by asking difficult questions regarding how LAC and CLIL are often situated in contexts characterized by inequality of access to the linguistic and cultural capitals, where the local languages of the students are usually neglected or viewed unfavourably in relation to the L2 in mainstream society, and where teachers are usually positioned as recipients of knowledge rather than makers of knowledge. In closing, Chapter 9 reviews the state of the art in the field and proposes directions for future inquiry.

Sweets Tim Richardson 2008-12-05 In *Sweets*, Tim Richardson takes us on a magical confectionery tour, letting his personal passion fuel the narrative of candy's rich and unusual history. Beginning with a description of the biology of sweetness itself, Richardson navigates the ancient history of sweets, the incredible range and diversity of candies worldwide, the bizarre figures and practices of the confectionery industry, and the connection between food and sex. He goes on to explore the role of sweets in myth and folklore and, finally, offers a personal philosophy of continual sweet-eating based on the writings of Epicurus. "For anyone with a sweet tooth, *Sweets* is manna...This history of candy is full of delights."-New York Times Book Review "Sweets is an informative, entertaining grab-bag of personal opinion, anecdote and culinary history." -Los Angeles Times
A Guide to Language Testing Grant Henning 2013-03-31 This textbook is a practical guide to language test development for classroom use, educational program evaluation, placement at instructional levels, measurement and research. It has served for many years as a classic classroom textbook at both graduate and undergraduate university levels. This new edition makes it available once again at low cost for student use. It provides useful information about reliability and validity estimation and about test and questionnaire development for a variety of educational and evaluation purposes. It includes information useful for the development of both paper-and-pencil and computer-adaptive measurement instruments.

English Across the Curriculum Bruce Morrison 2021 Inspired by papers presented at the second international English Across the Curriculum (EAC) conference, this book provides a platform for those involved in the EAC movement to exchange insights, explore new strategies and directions, and share experiences. It speaks not only to EAC practitioners but also to scholars in a range of related fields, whether they are considering starting an EAC-like initiative or are already involved in an established EAC, Content and Language Integrated Learning (CLIL), or Writing Across the Curriculum (WAC) program. The chapters in the book testify to challenges faced, opportunities presented, and a passion displayed for embedding academic English literacy in courses in a range of disciplines at institutions around the world. They also highlight the persistence and determination of teachers in creating and shaping valuable learning experiences and ongoing support for their students.

Sweetness and Light Hattie Ellis 2010-04-28 Did you know that Abraham Lincoln and Muhammad Ali both consumed bee pollen to boost energy, or that beekeepers in nineteenth-century Europe viewed their bees as part of the family? Or that after man, the honeybee, *Apis mellifera*, is the most studied creature on the planet? And that throughout history, honey has been highly valued by the ancient Egyptians (the first known beekeepers), the Greeks, and European monarchs, as well as Winnie the Pooh? In *Sweetness and Light*, Hattie Ellis leads us into the hive, revealing the fascinating story of bees and honey from the Stone Age to the present, from Nepalese honey hunters to urban hives on the rooftops of New York City. Uncovering the secrets of the honeybee one by one, Ellis shows how this small insect, with a collective significance so much greater than its individual size, can carry us through past and present to tell us more about ourselves than any other living creature.

A Geek in Korea Daniel Tudor 2014-09-09 For every fan of K-Pop music, Korean Wave dramas and Kimchi—or anyone intrigued by Korea and Korean culture—A Geek in Korea is a hip, new guide to the land of the Samsung smartphone and Gangnam Style. Author Dan Tudor first arrived in Korea on the eve of the 2002 World Cup when South Korea played Italy in the finals. What he saw inspired him to return and work in Korea. He served as The Economist magazine's Korea correspondent for three years, and he writes regular columns for the national daily JoongAng Ilbo newspaper. Along the way, he has developed a great love and admiration for Korean culture and the Korean people. A Geek in Korea reinvents the culture guide for the Internet age. Packed with articles and photographs, it covers all the touchstones of Korean culture—from Buddhism and Confucianism to chapters on the traditional arts and disciplines like Taekwondo. There are chapters on cultural code words and norms; personal relationships; business and technology; and symbols and practices that are peculiarly Korean. A number of chapters are devoted to Korean pop culture, with attention to the stars, idols, and urban subcultures associated with them. For visitors to Korea, the author includes a mini-guide to his favorite neighborhoods in Seoul and other places of outstanding interest. Spotlighting the originality and creativity of the Koreans, debunking myths about them, and answering nagging questions like why they're so obsessed with education and success—Tudor has created the perfect book for the growing ranks of Koreaphiles in this inspired, insightful, and highly informative guide.

Shadow Education Mark Bray 2012-05-01 In all parts of Asia, households devote considerable expenditures to private supplementary tutoring. This tutoring may contribute to students' achievement, but it also maintains and exacerbates social inequalities, diverts resources from other uses, and can contribute to inefficiencies in education systems. Such tutoring is widely called shadow education, because it mimics school systems. As the curriculum in the school system changes, so does the shadow. This study documents the scale and nature of shadow education in different parts of the region. Shadow education has been a major phenomenon in East Asia and it has far-reaching economic and social implications.
Validating Technological Innovation David Coniam 2016-04-02 This book discusses Hong Kong's use of onscreen marking (OSM) in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen

from a recognised need to provide a comprehensive, coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high-stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

Korea: The Impossible Country Daniel Tudor 2012-11-10 South Korea's amazing rise from the ashes: the inside story of an economic, political, and cultural phenomenon Long overshadowed by Japan and China, South Korea is a small country that happens to be one of the great national success stories of the postwar period. From a failed state with no democratic tradition, ruined and partitioned by war, and sapped by a half-century of colonial rule, South Korea transformed itself in just fifty years into an economic powerhouse and a democracy that serves as a model for other countries. With no natural resources and a tradition of authoritarian rule, Korea managed to accomplish a second Asian miracle. Daniel Tudor is a journalist who has lived in and written about Korea for almost a decade. In *Korea: The Impossible Country*, Tudor examines Korea's cultural foundations; the Korean character; the public sphere in politics, business, and the workplace as well as the family, dating, and marriage. In doing so, he touches on topics as diverse as shamanism, clan-ism, the dilemma posed by North Korea, the myths about doing business in Korea, the Koreans' renowned hard-partying ethos, and why the infatuation with learning English is now causing massive social problems. South Korea has undergone two miracles at once: economic development and complete democratization. The question now is, will it become as some see Japan, a prosperous yet aging society, devoid of energy and momentum? Or will the dynamism of Korean society and its willingness to change—as well as the opportunity it has now to welcome outsiders into its fold—enable it to experience a third miracle that will propel it into the ranks of the world's leading nations regarding human culture, democracy, and wealth? More than just one journalist's account, *Korea: The Impossible Country* also draws on interviews with many of the people who made South Korea what it is today. These include: Choi Min-sik, the star of "Old Boy." Park Won-soon, Mayor of Seoul. Soyeon Yi, Korea's first astronaut Hong Myung-bo, legendary captain of Korea's 2002 FIFA World Cup team. Shin Joong-hyun, the 'Godfather of Korean Rock.' Ko Un, poet. Hong Seok-cheon, restaurateur, and the first Korean celebrity to 'come out.' And many more, including a former advisor to President Park Chung-hee; a Shaman priestess ('mudang'); the boss of Korea's largest matchmaking agency; a 'room salon' hostess; an architect; as well as chefs, musicians, academics, entrepreneurs, homemakers, and chaebol conglomerate employees.

English Language Education and Assessment David Coniam 2014-07-06 This volume gathers contributions in the closely linked fields of English language assessment and language education. The contributors from China and Hong Kong represent a mixture of established and new scholars. Areas covered in the language education section range across major developments in the redefining of Hong Kong's secondary and tertiary curricula, as well as the huge field of China's vocational education curriculum. Regarding assessment, the contributions reflect major changes in the marking of examinations in Hong Kong, whereby all examinations from 2012 onwards are marked onscreen, to quality control issues in the administration of China's College English Test, which is taken by over 10 million candidates every year.

The Ocean and Cryosphere in a Changing Climate Intergovernmental Panel on Climate Change (IPCC) 2022-04-30 The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.
