Understanding the Bible Dr. John R.W. Stott 2011-05-24 Understanding the Bible will provide you with a foundational knowledge of the entirety of Scripture with a focus on broadening your vision of Jesus Christ. This book answers foundational questions: Who wrote the Bible? What is its message? Why is it thought to be a "holy" book? How does one read and interpret it? By delving into the geographical, religious, and historical concerns that shaped the world of biblical times, you'll see Jesus as never before: both as a man of his times and culture, and as the culmination of a divine providence that prepared the way for the ministry of the Messiah. Written by renowned preacher, writer, and apologist John Stott, this new, expanded edition includes: Questions at the beginning of each chapter to help you focus. New, up-to-date maps for the chapters on history and geography. An index to help you speedily access areas of interest.

Volcanic Unrest Joachim Gottsmann 2018-12-18 This open access book summarizes the findings of the VUELCO project, a multi-disciplinary and cross-boundary research funded by the European Commission's 7th framework program. It comprises four broad topics: 1. The global significance of volcanic unrest 2. Geophysical and geochemical fingerprints of unrest and precursory activity 3. Magma dynamics leading to unrest phenomena 4. Bridging the gap between science and decision-making Volcanic unrest is a complex multi-hazard phenomenon. The fact that unrest may, or may not lead to an imminent eruption contributes significant uncertainty to short-term volcanic hazard and risk assessment. Although it is reasonable to assume that all eruptions are associated with precursory activity of some sort,

the understanding of the causative links between subsurface processes, resulting unrest signals and imminent eruption is incomplete. When a volcano evolves from dormancy into a phase of unrest, important scientific, political and social questions need to be addressed. This book is aimed at graduate students, researchers of volcanic phenomena, professionals in volcanic hazard and risk assessment, observatory personnel, as well as emergency managers who wish to learn about the complex nature of volcanic unrest and how to utilize new findings to deal with unrest phenomena at scientific and emergency managing levels. This book is open access under a CC BY license.

[Spanish-English Contrasts](#) Melvin Stanley Whitley 2002 An invaluable text in language and linguistics because it has a unique scope: a one-volume description of the Spanish language and its differences from English, and ranges from pronunciation and grammar to word meaning, language use, and social and dialectical variation. Designed for survey courses in Spanish linguistics with technical concepts explained in context for beginners in the field, Spanish/English Contrasts brings out the ways in which insights into the two languages have evolved as scholars have built on the work and research of others in the field. A bilingual glossary of linguistic terms is provided to facilitate discussion in either language. This second edition is thoroughly updated to incorporate insights and issues that have come to the fore from the explosion of research in the past twenty-five years in all of the areas covered by the book. It

includes an expanded bibliography and index, and adds new exercises for student application and class discussion. Its approach remains broadly based however, in order to accommodate a range of areas and data rather than focusing narrowly on one single theory or research area, and it continues to emphasize implications for language teaching, translation, and other practical applications.

Contributions to Statistical Analysis Rafael Hernandez-Nieto 2002-07 In this work, two new coefficients have been proposed: the Coefficient of Proportional Variance (Cpv) and the Coefficient of Content Validity (Ccv). The Coefficient of Proportional Variance proposes a solution to the problem of measuring and evaluating the relative variability of a given distribution, obviating the problems of subjective interpretation and value judgments. The mathematical relationship derived from the Cpv allows for a more precise and more scientific interpretation of relative variability of data. The Coefficient of Content Validity permits the calculation of the content validity for each item, as well as the total content validity, of any data collection instrument that has been subjected to the evaluation of several judges (Panel of Experts Technique). Until now, according to the psychometric and statistical literature, a quantitative estimator of the content validity of a measuring instrument had not been achieved.

Poetry in Pieces Michelle Clayton 2011-01-10 Set against the cultural and political backdrop of interwar Europe and the Americas, *Poetry in Pieces* is the first major study of the Peruvian poet César Vallejo (1892–1938) to appear in English in more than thirty years. Vallejo lived and wrote in two distinct settings—Peru and Paris—which were continually crisscrossed by new developments in aesthetics, politics, and practices of everyday life; his poetry and prose therefore need to be read in connection with modernity in all its forms and spaces. Michelle Clayton combines close readings of Vallejo's writings with cultural, historical, and theoretical analysis, connecting Vallejo—and Latin American poetry—to the broader panorama of international modernism and the avant-garde, and to writers and artists such as Rainer Maria Rilke, James Joyce, Georges Bataille, and Charlie Chaplin. *Poetry in Pieces* sheds new light on one of the key figures in twentieth-century Latin American literature, while exploring ways of rethinking the parameters of international lyric modernity.

Computational and Corpus-Based Phraseology Gloria Corpas Pastor 2019-08-30 This book constitutes the refereed proceedings of the Third International Conference on Computational and Corpus-Based Phraseology, EuroPhras 2019, held in Malaga, Spain, in September 2019. The 31 full papers presented in this book were carefully reviewed and selected from 116 submissions. The papers in this volume cover a number of topics including general corpus-based approaches to phraseology, phraseology in translation and cross-linguistic studies, phraseology in language teaching and learning, phraseology in specialized languages, phraseology in lexicography, cognitive approaches to phraseology, the computational treatment of multiword expressions, and the development, annotation, and exploitation of corpora for phraseological studies.

The New New Journalism Robert Boynton 2007-12-18 Forty years after Tom Wolfe, Hunter S. Thompson, and Gay Talese launched the New Journalism movement, Robert S.

Boynton sits down with nineteen practitioners of what he calls the New New Journalism to discuss their methods, writings and careers. The New New Journalists are first and foremost brilliant reporters who immerse themselves completely in their subjects. Jon Krakauer accompanies a mountaineering expedition to Everest. Ted Conover works for nearly a year as a prison guard. Susan Orlean follows orchid fanciers to reveal an obsessive subculture few knew existed. Adrian Nicole LeBlanc spends nearly a decade reporting on a family in the South Bronx. And like their muckraking early twentieth-century precursors, they are drawn to the most pressing issues of the day: Alex Kotlowitz, Leon Dash, and William Finnegan to race and class; Ron Rosenbaum to the problem of evil; Michael Lewis to boom-and-bust economies; Richard Ben Cramer to the nitty gritty of politics. How do they do it? In these interviews, they reveal the techniques and inspirations behind their acclaimed works, from their felt-tip pens, tape recorders, long car rides, and assumed identities; to their intimate understanding of the way a truly great story unfolds. Interviews with: Gay Talese Jane Kramer Calvin Trillin Richard Ben Cramer Ted Conover Alex Kotlowitz Richard Preston William Langewiesche Eric Schlosser Leon Dash William Finnegan Jonathan Harr Jon Krakauer Adrian Nicole LeBlanc Michael Lewis Susan Orlean Ron Rosenbaum Lawrence Weschler Lawrence Wright

Global Corruption from a Geographic Perspective Barney Warf 2018-12-26 This monograph explores the nature of corruption around the world from a geographic perspective. It focuses on historical context and cultural factors. Readers will learn that though corruption is pervasive, geography greatly shapes its character. This book will offer a better understanding of the level of corrupt activity in any given country. The book analyzes an array of countries and regions. Coverage ranges from democratic societies, where corruption is low due to high rates of literacy and a free press, to the most corrupt places, where centralized power structures and lack of a free media allow corruption to unfold unimpeded. Anti-corruption campaigns and their effectiveness are also reflected upon. In addition to data from Transparency International, the text examines relevant political events. In each case, the analysis focuses on the major actors and institutions involved; the cultural norms that often regard corruption as a normal part of doing business; and the attempts by foreign and domestic actors to minimize corruption. This book will help readers better understand the causes and consequences of corruption, as well as its type and severity varies widely across the planet. It will appeal to students, researchers, policy makers, and interested general readers.

Science and Application of High-Intensity Interval Training Laursen, Paul 2019 The popularity of high-intensity interval training (HIIT), which consists primarily of repeated bursts of high-intensity exercise, continues to soar because its effectiveness and efficiency have been proven in use by both elite athletes and general fitness enthusiasts. Surprisingly, few resources have attempted to explain both the science behind the HIIT movement and its sport-specific application to athlete training. That's why Science and Application of High-Intensity Interval Training is a must-have resource for sport coaches, strength and conditioning professionals, personal trainers, and exercise physiologists, as well as for researchers and sport scientists who study high-intensity interval training.

A Socialist Empire Louis Baudin 2011-08 2011 Reprint of 1961 Edition. Many social scientists have attempted to lump the unique Inca society into modern political and economic categories. Louis Baudin argued that Incan society was socialistic. He claimed that the ayllu system is what classified the Inca as a system of state socialism. Baudin defines state socialism as being based on the idea of the regulative action of a central power in social relations. According to Baudin, the idea of private property in Europe had been in existence for centuries, but no such idea existed at the times of the Incas. He claims, that society in Peru rested on a foundation of collective ownership which, to a certain extent, facilitated its establishment, because the effacement of the individual within a group prepared him to allow himself to be absorbed. Baudin argued that the higher ranking Incas tried, and succeeded to an extent, to force a degree of uniformity

on the common Inca. The Inca were forced to dress similarly, eat the same food, practice the same religion, and speak the same language, Quechua.
