Widespread Idioms in Europe and Beyond Elisabeth Piirainen 2012 This groundbreaking book in theoretical and empirical phraseology research looks at Europe's linguistic situation as a whole, including 74 European and 17 non-European languages. The occurrence of idioms that actually share the same lexical and semantic structure across a large number of languages has never been demonstrated so clearly before *Widespread Idioms in Europe and Beyond*. This book answers significant questions regarding hitherto vague ideas about the phraseological similarities between European languages and their cultural foundation, ranging from intertextuality, aspects of European mental, material, and social culture, to culturally based perception of natural phenomena. This inventory, which analyzes 190 out of a total of 380 widespread idioms and includes maps, is valuable for academic teaching and further research in the fields of phraseology and figurative language, areal and contact linguistics, and European cultural studies.

Bar Balto Faïza Guène 2012 Joel, aka 'The Rink' (because his bald patch is shiny enough to skate on), the unpopular owner of the only bar in town has been murdered. There are so many suspects, it's not so much a question of who did kill him as who didn't. There's Magalie, the temperamental teenager obsessed with Paris Hilton; her troublemaker boyfriend, Tani; Tani's mother, Madame Levi; her unemployed, daytime-TV addicted husband; Yeznig, their younger son, who has learning difficulties but perfect memory recall; and newcomers Ali and Nadia, the Muslim twins struggling to fit in. As the tension mounts and we're still none the wiser, the ending is as tragic as it is unexpected.

Minimalist Parsing Robert C. Berwick 2019-09-22 This book is the first dedicated to linguistic parsing - the processing of natural language according to the rules of a formal grammar - in the Minimalist Program. While Minimalism has been at the forefront of generative grammar for several decades, it often remains inaccessible to computer scientists and others in adjacent fields. This volume makes connections with standard computational architectures, provides efficient implementations of some fundamental minimalist accounts of syntax, explores implementations of recent theoretical proposals, and explores correlations between posited structures and measures of neural activity during human language comprehension. These studies will appeal to graduate students and researchers in formal syntax, computational linguistics, psycholinguistics, and computer science.

Greek Medical Papyri Nicola Reggiani 2019-09-23 The volume collects papers presented at the International Conference "Greek Medical Papyri - Text, Context, Hypertext" held at the University of Parma on November 2-4, 2016, as the final event of the ERC project DIGMEDTEXT, aimed primarily at creating an online textual database of the Greek papyri dealing with medicine. The contributions, authored by outstanding papyrologists and historians of the ancient medicine, deal with a variety of topics focused on the papyrological evidence of ancient medical texts and contexts. The first part, devoted to "medical texts", contains some new reflections on important sources such as the Anonymus Londinensis and the Hippocratic corpus, as well as on specific themes like the pharmacological vocabulary, the official medical reports, the medical care in the Roman army. The second part collects papers about the "doctors' context", providing highlights from broader viewpoints like the analysis of the writing supports, the study of the ostraka from the Eastern Desert, the evidence of inscriptions and philosophical texts. The third part is entirely focused on the DIGMEDTEXT project itself: the team members present some relevant key issues raised by the digitisation of the medical papyri.

Contrastive Phraseology Paola Cotta Ramusino 2020 This volume is addressed to researchers in the field of phraseology, and to teachers, translators and lexicographers. It is a collection of essays offering a comprehensive, modern analysis of phrasemes, embracing a wide range of subjects and themes, from linguistic, both applied and theoretical, to cultural aspects. The contrastive approach underlying this variety of themes allows the divergences and analogies between phraseological units in two or more languages to be outlined. The languages compared here are both major and minor, European and non-European, and the text includes contrastive analyses of the most commonly investigated languages (French-German, English-Spanish, Russian-German), as well as some less frequently investigated languages (like Ukrainian, Romanian, Georgian and Thai), which are not as well-represented in phraseological description, despite their scientific interest.

Translation and Transmission Jaakko Hameen-Anttila 2018-12-31 This collection of papers originates with a workshop held 24-25 September 2015 in Villa Lante al Gianicolo, Rome. The workshop brought together a number of scholars working in the fields Arabic Studies, Greek and Latin Studies, Septuaginta Studies, and Iranian Studies. The workshop concentrated on the transmission of texts and ideas across language barriers in the Eastern Mediterranean. The main focus was on literary and historical texts, but also scientific, pseudoscientific, and religious texts were discussed. The workshop and the resulting collection of articles shows clearly that there is still much to do in the field of translation studies in the Long Late Antiquity and the Middle Ages. The various cultures around the Mediterranean have always lived in close contact with each other, and translation of texts has played a central role in the intellectual interaction of these cultures. While parts of this interaction have received scholarly attention, others have been almost neglected. The aim of this volume is to direct attention to the manifold and vivid culture of translation around the Mediterranean.

A Theory of Craft Howard Risatti 2009-12 What is craft? How is it different from fine art or design? In *A Theory of Craft*, Howard Risatti examines these issues by comparing handmade ceramics, glass, metalwork, weaving, and furniture to painting, sculpture, photography, and machine-made design from Bauhaus to the Memphis Group. He describes craft's unique qualities as functionality combined with an ability to express human values that transcend temporal, spatial, and social boundaries. Modern design today has taken over from craft the making of functional objects of daily use by employing machines to do work once done by hand. Understanding the aesthetic and social implications of this transformation forces us to see craft as well as design and fine art in a new perspective, Risatti argues. Without a way of understanding and valuing craft on its own terms, the field languishes aesthetically, being judged by fine art criteria that automatically deny art status to craft objects. Craft must articulate a role for itself in contemporary society, says Risatti; otherwise it will be absorbed by fine art or design and its singular approach to understanding the world will be lost. *A Theory of Craft* is a signal contribution to establishing a craft theory that recognizes, defines, and celebrates the unique blend of function and human aesthetic values embodied in the craft object.

The Translator as Writer Susan Bassnett 2007-11-15 Over the last two decades, interest in translation around the world has increased beyond any predictions. International bestseller lists now contain large numbers of translated works, and writers from Latin America, Africa, India and China have joined the lists

of eminent, bestselling European writers and those from the global English-speaking world. Despite this, translators tend to be invisible, as are the processes they follow and the strategies they employ when translating. The Translator as Writer bridges the divide between those who study translation and those who produce translations, through essays written by well-known translators talking about their own work as distinctive creative literary practice. The book emphasises this creativity, arguing that translators are effectively writers, or rewriters who produce works that can be read and enjoyed by an entirely new audience. The aim of the book is to give a proper prominence to the role of translators and in so doing to move attention back to the act of translating, away from more abstract speculation about what translation might involve.

Using Italian J. J. Kinder 2004-07 This 2002 book is a guide to Italian usage for students who have already acquired the basics of the language and wish to extend their knowledge. Unlike conventional grammars, it gives special attention to those areas of vocabulary and grammar which cause most difficulty to English-speakers. Careful consideration is given throughout to questions of style, register, and politeness which are essential to achieving an appropriate level of formality or informality in writing and speech. It surveys the contemporary linguistic scene in Italy and gives ample space to the new varieties of Italian that are emerging in modern Italy. The influence of the dialects in shaping the development of Italian is also acknowledged. Clear, readable and easy to consult via its two indexes, this is an essential reference for learners seeking access to the finer nuances of the Italian language.

Advances in Sociophonetics Chiara Celata 2014-06-15 Sociophonetics is a privileged domain for the investigation of language variation and change. By combining theoretical reflections and sophisticated techniques of analysis – both phonetic and statistical – it is possible to extrapolate the role of individual factors (socio-cultural, physiological, communicative-interactional, etc.) in the multidimensional space of speech variation. This book investigates the fundamental relationship between speech variation and the social background of speakers from articulatory, acoustic, dialectological, and conversational perspectives, thus breaking new ground with respect to classical variationist and dialectological studies. Specialists from a broad range of disciplines – including phonetics, phonology, sociolinguistics, psycholinguistics, and cognitive linguistics – will find innovative suggestions for multiple approaches to language variation. Although presuming some basic knowledge of experimental phonetics and sociolinguistics, the book is addressed to all readers with an interest in speech and language variation mechanisms in social interaction.

Systematic Lexicography I[rii Derenikovich Apresi[a]n 2000 Juri Apresjan unites theoretical linguistics and lexicography to produce a series of dazzling insights into lexical analysis. It will be of interest to lexicologists, lexicographers, students of linguistic pragmatics, and teachers of semantics at all university levels.

A Frequency Dictionary of Dutch Carole Tiberius 2013-12-17 A Frequency Dictionary of Dutch is a valuable tool for all learners of Dutch, providing a list of the 5,000 most frequently used words in the language. Based on a 290 million word corpus which includes both written and spoken material from a wide range of sources, this dictionary presents Dutch core vocabulary in a detailed and clearly arranged manner: each of the 5,000 entries includes English equivalents and a sample sentence showing language in use. Users can access the top 5,000 words either through the main frequency listings or an alphabetical index. Throughout the frequency listings there are thematically organized lists featuring the top words from a variety of key topics such as animals, food and other areas of daily and cultural life. Words specific to Dutch in Belgium (Belgian Dutch) are also included. An engaging and efficient resource, A Frequency Dictionary of Dutch will enable students of all levels to get the most out of their study. This book was prepared in association with the Instituut voor Nederlandse Lexicologie (INL, Institute of Dutch Lexicology). A CD version is available to purchase separately. Designed for use by corpus and computational linguists, it provides the full text in a format that researchers can process and turn into suitable lists for their own research purposes.

Towards a Language of Linguistics Igor' Aleksandrovič Mel'čuk 1982

The Bilingual Text Jan Walsh Hokenson 2014-06-03 Bilingual texts have been left outside the mainstream of both translation theory and literary history. Yet the tradition of the bilingual writer, moving between different sign systems and audiences to create a text in two languages, is a rich and venerable one, going

back at least to the Middle Ages. The self-translated, bilingual text was commonplace in the multilingual world of medieval and early modern Europe, frequently bridging Latin and the vernaculars. While self-translation persisted among cultured elites, it diminished during the consolidation of the nation-states, in the long era of nationalistic monolingualism, only to resurge in the postcolonial era. The Bilingual Text makes a first step toward providing the fields of translation studies and comparative literature with a comprehensive account of literary self-translation in the West. It tracks the shifting paradigms of bilinguality across the centuries and addresses the urgent questions that the bilingual text raises for translation theorists today: Is each part of the bilingual text a separate, original creation or is each incomplete without the other? Is self-translation a unique genre? Can either version be split off into a single language or literary tradition? How can two linguistic versions of a text be fitted into standard models of foreign and domestic texts and cultures? Because such texts defeat standard categories of analysis, The Bilingual Text reverses the usual critical gaze, highlighting not dissimilarities but continuities across versions, allowing for dissimilarities within orders of correspondence, and englobing the literary as well as linguistic and cultural dimensions of the text. Emphasizing the arcs of historical change in concepts of language and translation that inform each case study, The Bilingual Text examines the perdurance of this phenomenon in Western societies and literatures.

Word Order in Old Italian Cecilia Poletto 2014-02 This book offers an integrated description of all aspects of word order in Old Italian, looking at the left periphery not only of the sentence, but also of the verbal phrase and determiner phrase. It makes important contributions to the study of medieval Italian, Romance historical linguistics, and diachronic syntactic change more generally.

Language in the Digital Era. Challenges and Perspectives Daniel Dejica 2016-06-20 This collected volume brings together the contributions of several humanities scholars who focus on the evolution of language in the digital era. The first part of the volume explores general aspects of humanities and linguistics in the digital environment. The second part focuses on language and translation and includes topics that discuss the digital translation policy, new technologies and specialised translation, online resources for terminology management, translation of online advertising, or subtitling. The last part of the book focuses on language teaching and learning and addresses the changes, challenges and perspectives of didactics in the age of technology. Each contribution is divided into several sections that present the state of the art and the methodology used, and discuss the results and perspectives of the authors. The book is recommended to scholars, professionals, students and anyone interested in the changes within the humanities in conjunction with technological innovation or in the ways language is adapting to the challenges of today's digitized world.

Architectural Composition and Building Typology Gianfranco Caniggia 2001

Art, Mobility, and Exchange in Early Modern Tuscany and Eurasia Francesco Freddolini 2020-07-23 This book explores how the Medici Grand Dukes pursued ways to expand their political, commercial, and cultural networks beyond Europe, cultivating complex relations with the Ottoman Empire and other Islamicate regions, and looking further east to India, China, and Japan. The chapters in this volume discuss how casting a global, cross-cultural net was part and parcel of the Medicean political vision. Diplomatic gifts, items of commercial exchange, objects looted at war, maritime connections, and political plots were an inherent part of how the Medici projected their state on the global arena. The eleven chapters of this volume demonstrate that the mobility of objects, people, and knowledge that generated the global interactions analyzed here was not unidirectional—rather, it went both to and from Tuscany. In addition, by exploring evidence of objects produced in Tuscany for Asian markets, this book reveals hitherto neglected histories of how Western cultures projected themselves eastwards.

Grammaticalization - Theory and Data Sylvie Hancil 2014-09-15 Since the 1980s theories and studies of grammaticalization have provided a major source of inspiration for the description and explanation of language change, giving rise to many publications and conferences. This collection presents original, empirical studies that explore various facets of grammaticalization research of both formal and functional orientation. The papers of this selection deal with general issues and specific empirical domains, such as personal pronouns; indefinite pronouns; final particles; tense and aspect markers; comitative markers and coordinating conjunctions. The languages covered include English, German, dialects of Italian, Japanese,

Polish, and Walman (Papuan). The book will be of great interest to linguists working on language change in a wide variety of languages.

Prosodic Detail in Neapolitan Italian Francesco Cangemi 2014-09-17 Recent findings on phonetic detail have been taken as supporting exemplar-based approaches to prosody. Through four experiments on both production and perception of both melodic and temporal detail in Neapolitan Italian, we show that prosodic detail is not incompatible with abstractionist approaches either. Specifically, we suggest that the exploration of prosodic detail leads to a refined understanding of the relationships between the richly specified and continuous varying phonetic information on one side, and coarse phonologically structured contrasts on the other, thus offering insights on how pragmatic information is conveyed by prosody.

Coordinating Participation in Dialogue Interpreting Claudio Baraldi 2012 Dialogue interpreting, which takes place in institutional settings such as legal proceedings, healthcare contexts, work meetings or media talk, has attracted increasing attention in translation, language and communication studies. Drawing on transcribed sequences of authentic talk, this volume raises questions about aspects of interpreting that have been taken for granted, challenging preconceived notions about differences between professional and non-professional interpreting and pointing in new directions for future research. Collecting contributions from major scholars in the field of dialogue interpreting and interaction studies, the volume offers new insights into the relationship between interpreting and mediating. It addresses a wide readership, including students and scholars in translation and interpreting studies, mediation and negotiation studies, linguistics, sociology, communication studies, conversation analysis, discourse analysis.

A Comparative Grammar of Borgomanerese Christina Tortora 2014 This book treats the morphosyntax of Borgomanerese, a Northern Italian dialect. The rich description of the many unusual features of this dialect, some of which have not been previously reported in the literature, gives rise to a number novel theoretical analyses, advancing our understanding of syntax and syntactic theory.

Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition Dina Di Giacomo 2019-03-01 Recently, technology and aging have been key research areas in human cognition. The Research Topic "Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition" investigated technology's impact on cognitive and intellectual processes, highlighting how intensively technology can change and/or enhance the cognitive functioning throughout one's lifespan. The aim of this Research Topic was to provide an outlook through multidisciplinary research and development while addressing the dynamic intersection of cognition, mind, and technology. Our scope was 1) to favor the cognitive technology debate, 2) to overcome the dichotomies of technology and psychology, 3) to emphasize the advances in knowledge and well-being. This Research Topic comprises review studies and original articles, focused on digital skills that enhance human potential. Transversal approaches and cross-sectorial analysis were encouraged, leading to investigation areas related to cognitive and mental processing—in educational, rehabilitation, clinical settings—across aging. Articles of high relevance to the Research Topic were submitted on the subjects of a) research in human performance and human factors, b) new research and technologies addressing the needs of a growing populace, and c) cognitive aging and cognitive rehabilitation research.

English Dictionaries for Foreign Learners Anthony Paul Cowie 2002 This is the first history of dictionaries of English for foreign learners from their origins in Japan and East Asia in the 1920s, to the computerized compilations of the present. commercial forces almost unequalled in book publishing. As the author shows, the early history of EFL dictionaries was research-driven, arising directly from research in linguistic theory and language pedagogy; now it is user-driven, determined by what users require or are thought to require. The pioneering dictionaries were the work of individuals. Current dictionaries are the products of huge databases manipulated by sophisticated processing, as publishers strive to share an immense and ever growing global market. The book has both a thematic and a chronological structure. Three chapters describe the historical sequence over a period of some sixty years. These alternate with chapters dealing with phraseology, computers and corpus linguistics, and research into dictionary users and uses -- three subjects central to the development of ELT dictionaries over the last thirty years. Anthony Cowie examines the way in which availability of massive computing power has transformed the recording and analysis of current speech, and shows how the growth of research into the users and uses of dictionaries has led to developments both in ELT lexicography and method. This readable and non-technical account is directed at professionals in applied linguistics and English language teaching, and at lexicographers, but it will fascinate everyone concerned with the analysis of English and faced with the challenge of recording the subtleties of its grammar and meaning.

Noun+Noun Compounds in Italian Radimský Jan 2015-12-28 This book investigates one concrete compounding pattern in present-day Italian within a larger overview of Italian compounding. Various accounts and classifications of Noun + Noun combinations in Italian are reviewed, with special focus on the status of the lexical integrity hypothesis. The author sets out to propose an integrated approach to the Noun + Noun compounding pattern, rigorously based on large representative data sets that were extracted from the Italian web corpus ItWaC as both automatically and manually post-processed frequency lists. On the basis of such data, it is aimed to show the behaviour of various subtypes of Noun + Noun compounds. Starting out with the Bisetto-Scalise classification, the author carefully examines the status of coordinate compounds, ATAP compounds (i.e., the group comprising attributive and appositive structures) and subordinate compounds (comprising verbal-nexus and grounding compounds), discussing both theoretical and empirical implications of this classification scheme. Moreover, the original Bisetto-Scalise model is supplemented with further classification levels in order to capture specific compounding types such as relational (i.e. inherently trinominal) compounds. A major merit of the present study lies in the quantitative dimension of the data it deals with. In light of this data, the author emphasizes the gradient nature of the traditional dichotomy between syntax and compounding. The book will thus appeal not only to the linguists interested specifically in Italian word-formation, but also to a larger community of scholars who seek a more general view of the word-formation phenomena.

Self-Translation Anthony Cordingley 2013-01-17 Self-Translation: Brokering originality in hybrid culture provides critical, historical and interdisciplinary analyses of self-translators and their works. It investigates the challenges which the bilingual oeuvre and the experience of the self-translator pose to conventional definitions of translation and the problematic dichotomies of "original" and "translation", "author" and "translator". Canonical self-translators, such as Samuel Beckett, Vladimir Nabokov and Rabindranath Tagore, are here discussed in the context of previously overlooked self-translators, from Japan to South Africa, from the Basque Country to Scotland. This book seeks therefore to offer a portrait of the diverse artistic and political objectives and priorities of self-translators by investigating different cosmopolitan, post-colonial and indigenous practices. Numerous contributions to this volume extend the scope of self-translation to include the composition of a work out of a multilingual consciousness or society. They demonstrate how production within hybrid contexts requires the negotiation of different languages within the self, generating powerful experiences, from crisis to liberation, and texts that offer key insights into our increasingly globalized culture.

Translating Humour in Audiovisual Texts Gian Luigi De Rosa 2014 This collection of essays introduces the reader to the specificities of humour in audiovisual products and presents a series of case studies in audiovisual translation, from films to video-games, exemplifying problems and solutions to audiovisual humour in the dubs and subs in a variety of language combinations.

The Middle Voice Suzanne Kemmer 1993-01-01 This book approaches the middle voice from the perspective of typology and language universals research. The principal aim is to provide a typologically

valid characterization of the category of middle voice in terms of which it can be incorporated in a cognitively-based theory of human language. The term "middle voice" has had a wide range of applications in the linguistic literature of this century. The main thesis in this volume is that there is a coherent, though complex, semantic category of middle voice in human language, which receives grammatical instantiation in many languages. The author claims there is a semantic property crucial to the nature of the middle, which she terms "relative elaboration of events", that serves as a parameter along which the reflexive and the middle can be situated as semantic categories intermediate in transitivity between one-participant and two-participant events, and which differentiates reflexive and middle from one another. In this area, most analyses deal with one language and/or are limited to Indo-European languages. This work deals with a subset of middle-marking languages that was chosen so as to observe the highest possible number of different middle systems showing significant independent diachronic development.

Frequency, Forms and Functions of Cleft Constructions in Romance and Germanic Anna-Maria De Cesare 2014-11-10 The volume describes the frequency, the forms and the functions of different cleft construction types across two language families: the Romance languages (with discussion of Italian, French and Spanish data) and the Germanic languages (with focus on English, German, Swiss German and Danish).

Proceedings of the Second Italian Conference on Computational Linguistics CLiC-it 2015 Cristina Bosco CLiC-it 2015 is held in Trento on December 3-4 2015, hosted and locally organized by Fondazione Bruno Kessler (FBK), one the most important Italian research centers for what concerns CL. The organization of the conference is the result of a fruitful conjoint effort of different research groups (Università di Torino, Università di Roma Tor Vergata and FBK) showing the nationwide spreading of CL in Italy. As in the first edition, the main aim of the event is at establishing a reference forum on CL, covering all the aspects needed to describe the multi-faceted and cross-disciplinary reality of the involved research topics and of the Italian community working in this area. Indeed the spirit of CLiC-it is inclusive, in order to build a scenario as much as possible comprehensive of the complexity of language phenomena and approaches to address them, bringing together researchers and scholars with different competences and skills and working on different aspects according to different perspectives. The large number of researchers that have decided to present their work at CLiC-it and the number of directions here investigated are proof of the maturity of our community and a promising indication of its vitality. We received a total of 64 paper submissions, out of which 52 have been accepted to appear in the Conference Proceedings, which are available online and on the OpenEdition platform. Overall, we collected 129 authors from 15 countries.
