WebRevolution. Then, natural resources were abundant and labor was the limiting factor of production. But now, there's a surplus of people, while natural capital—natural resources and the ecological systems that provide vital life-support services—is in decline and relatively expensive.

worldbank.orghttps://web.worldbank.org/archive/website00521/WEB/PDF/EM2002NA.PDF

WebThe second key principle of natural capitalism is to redesign production on biological lines (<>), with closed loops, no waste, and no toxicity. This reduces pres-sure on natural systems, turns wasted materials into inputs for composting or profitable remanufacturing, and often yields superior products at lower costs.

jstor.orghttps://www.jstor.org/stable/24357805

Web1. Resource productivity aims to decrease the destructive and wasteful flow of natural resources. Changes in both production design and technology will allow companies to increase the efficiency with which they utilize resources, helping to avoid depletion and pollution. Such efforts, the authors argue, will save time and money. 2.
