Class Action Dilemmas Deborah R. Hensler 2000-08-02 Class action lawsuits--allowing one or a few plaintiffs to represent many who seek redress--have long been controversial. The current controversy, centered on lawsuits for money damages, is characterized by sharp disagreement among stakeholders about the kinds of suits being filed, whether plaintiffs' claims are meritorious, and whether resolutions to class actions are fair or socially desirable. Ultimately, these concerns lead many to wonder, Are class actions worth their costs to society and to business? Do they do more harm than good? To describe the landscape of current damage class action litigation, elucidate problems, and identify solutions, the RAND Institute for Civil Justice conducted a study using qualitative and quantitative research methods. The researchers concluded that the controversy over damage class actions has proven intractable because it implicates deeply held but sharply contested ideological views among stakeholders. Nevertheless, many of

the political antagonists agree that class action practices merit improvement. The authors argue that both practices and outcomes could be substantially improved if more judges would supervise class action litigation more actively and scrutinize proposed settlements and fee awards more carefully. Educating and empowering judges to take more responsibility for case outcomes--and ensuring that they have the resources to do so--can help the civil justice system achieve a better balance between the public goals of class actions and the private interests that drive them.

Life Insurance in Europe Marta Borda 2020-10-21 This book examines the challenges for the life insurance sector in Europe arising from new technologies, socio-cultural and demographic trends, and the financial crisis. It presents theoretical and applied research in all areas related to life insurance products and markets, and explores future determinants of the insurance industry's development by highlighting novel solutions in insurance supervision and trends in consumer protection. Drawing on their academic and practical expertise, the contributors identify problems relating to risk analysis and evaluation, demographic challenges, consumer protection, product distribution, mortality risk modeling, applications of life insurance in contemporary pension systems, financial stability and solvency of life insurers. They also examine the impact of population aging on life insurance markets and the role of digitalization. Lastly, based on an analysis of early experiences with the implementation of the Solvency II system, the book provides policy recommendations for the development of life insurance in Europe.

Politics of the Everyday Ezio Manzini 2019-02-07 Each of us develops and enacts strategies for living our everyday lives. These may confirm the general tendency towards new forms of connected solitude, in which we work, travel and live alone, yet feel sociable mainly by means of technology. Alternatively, they may help to create flexible communities that are open and inclusive, and therefore resilient and socially sustainable. In *Politics of the Everyday*, Ezio Manzini discusses examples of social innovation that show how, even in these difficult times, a better kind of society is possible. By bringing autonomy and collaboration together, it is possible to develop new forms of design intelligence, for our own good, for the good of the communities we are part of, and for society as a whole.

Corruption, Governmental Activities, and Markets Mr.Vito Tanzi 1994-09-01 Paper discusses the factors that contribute to the spread of corruption as well as the implications of corruption for markets and for public sector activities. Digital New Deal Riccardo Genghini 2021-11-15 Digital New Deal analyses the origins of law and its relationship to language and economics and identifies 12 symptoms that point to an authoritarian involution of our democracies. It refuses to indulge in pro-forma techno-optimism. Neither does it pessimistically predict inescapable doom. A bright future is still possible, if we correctly understand the digital equivalents of categories such as identity, persona, home, document, signature, freedom and the close relationship between our fundamental rights and their digital equivalents. Riccardo Genghini's research on a natural law for a digital society has been influenced in particular by Galgano, Popper, Sebeok, Rawls, Ong, Irti, Searle and Ferraris. As professor at the Università Cattolica del Sacro Cuore in Milano, his lessons (2007-2017) on commercial law focussed on comparing the law merchant of the Middle Ages with the commercial practices of IT companies as Microsoft, eBay, Amazon, Apple, Google, Facebook and Microsoft. First with CEN, now with ETSI, he steers the European standardisation on PKI and trust services since 1999.

Mass Torts in a World of Settlement Richard A. Nagareda 2008-09-15 The traditional definition of torts involves bizarre, idiosyncratic events where a single plaintiff with a physical impairment sues the specific defendant he believes to have wrongfully caused that malady. Yet public attention has focused increasingly on mass personal-injury lawsuits over asbestos, cigarettes, guns, the diet drug fen-phen, breast implants, and, most recently, Vioxx. Richard A. Nagareda's *Mass Torts in a World of Settlement* is the first attempt to analyze the lawyer's role in this world of high-stakes, multibillion-dollar litigation. These mass settlements, Nagareda argues, have transformed the legal system so acutely that rival teams of lawyers operate as sophisticated governing powers rather than litigators. His controversial solution is the replacement of the existing tort system with a private administrative framework to address both current and future claims. This book is a must-read for concerned citizens, policymakers, lawyers, investors, and executives grappling with the changing face of mass torts.

The Modernisation of EC Antitrust Law Rein Wesseling 2000-07 In light of criticism in recent years of the European Community's competition law, Amsterdam lawyer Wesseling tries to clarify the current challenges to the policy by examining the origins of the competition law system. He begins by tracing the policy's development from the European Economic Community, established in 1958, and the European Union of today. Then he addresses the pertinent objectives, the institutional framework, the division of jurisdiction between the Community and the Member States, the decentralized enforcement of Community law, and other issues. His conclusions differ considerably from the Commission's recent white paper.

Rogue Economics Loretta Napoleoni 2011-01-04 What do Eastern Europe's booming sex trade, America's subprime mortgage lending scandal, China's fake goods industry, and celebrity philanthropy in Africa have in common? With biopirates trolling the blood industry, fish-farming bandits ravaging the high seas, pornography developing virtually in Second Life, and games like World of Warcraft spawning online sweatshops, how are rogue industries transmuting into global empires? And will the entire system be transformed by the advent of sharia economics? With the precision of an economist and the narrative deftness of a storyteller, syndicated journalist Loretta Napoleoni examines how the world is being reshaped by dark economic forces, creating victims out of millions of ordinary people whose lives have become trapped inside a fantasy world of consumerism. Napoleoni reveals the architecture of our world, and in doing so provides fresh insight into many of the most insoluble problems of our era.

Politicians Don't Pander Lawrence R. Jacobs 2000-06-21 In this provocative and engagingly written book, the authors argue that politicians seldom tailor their policy decisions to "pander" to public opinion. In fact, they say that when not facing election, contemporary presidents and members of Congress routinely ignore the public's preferences and follow their own political philosophies. 37 graphs.

Letters to My Daughters Fawzia Koofi 2012-01-13 Now available in paperback, in this courageous memoir, Fawzia Koofi, Afghanistan's most popular female politician, gives us her first-hand account of Afghan history through the rule of the Mujahedeen and Taliban, her experiences of the Afghanistan War, and the effects of these events on the lives of women in Afghanistan. In writing Letters to My Daughters, Fawzia has created a fresh take on Afghan society and Islam, and a gripping account of a life lived under the most harrowing of circumstances. Fawzia is the nineteenth child of twenty-three in a family with seven wives. Her father was an incorruptible politician strongly attached to Afghan tradition. When he was murdered by the Mujahedeen, Fawzia's illiterate mother escaped with her children and decided to send the ten-year-old Fawzia to school. As the civil war raged, Fawzia dodged bullets and snipers to attend class, determined to be the first person in her family to receive an education. Fawzia went on to marry a man she loved, and they had two cherished daughters, Shohra and Shaharзад. Sadly, the arrival of the Taliban spelled an end to Fawzia's freedom. Outraged and deeply saddened by the injustice she saw around her, and by the tainting of her Islamic faith, she discovered politics for herself, following in her father's footsteps. Tragically, this choice has led to security threats to her life by Islamic extremists. Thus, Letters to My Daughters is not only a record of her life, but also acts as a literal letter through which Fawzia can

pass on her wisdom about justice and dignity to her daughters, not knowing for how long she will survive such attacks.

Principles of Financial Regulation John Armour 2016 The financial crisis of 2007-9 revealed serious failings in the regulation of financial institutions and markets, and prompted a fundamental reconsideration of the design of financial regulation. As the financial system has become ever-more complex and interconnected, the pace of evolution continues to accelerate. It is now clear that regulation must focus on the financial system as a whole, but this poses significant challenges for regulators. Principles of Financial Regulation describes how to address those challenges. Examining the subject from a holistic and multidisciplinary perspective, Principles of Financial Regulation considers the underlying policies and the objectives of regulation by drawing on economics, finance, and law methodologies. The volume examines regulation in a purposive and dynamic way by framing the book in terms of what the financial system does, rather than what financial regulation is. By analysing specific regulatory measures, the book provides readers to the opportunity to assess regulatory choices on specific policy issues and encourages critical reflection on the design of regulation.
