Finding PROPER reading material that they can handle...which is precisely the reason we've written this book! Teachers love giving out tough, expert-level literature to their students, books that present many new problems to the reader and force them to search for words in a dictionary every five minutes – it's not

entertaining, useful or motivating for the student at all, and many soon give up on learning at all! In this book we have compiled 20 easy-to-read, compelling and fun stories that will allow you to expand your vocabulary and give you the tools to improve your grasp of the wonderful Italian tongue. How Italian Short Stories for Beginners works: Each story will involve an important lesson of the tools in the Italian language (Verbs, Adjectives, Past Tense, Giving Directions, and more), involving an interesting and entertaining story with realistic dialogues and day-to-day situations. The summaries follow a synopsis in Italian and in English of what you just read, both to review the lesson and for you to see if you understood what the tale was about. At the end of those summaries, you'll be provided with a list of the most relevant vocabulary involved in the lesson, as well as slang and sayings that you may not have understood at first glance! **Interculturality in Institutions** Marilena Fatigante 2022-11-24 This book provides qualitative analyses of intercultural sense making in a variety of institutional contexts. It relies on the assumption that in an increasingly culturally diverse world, individuals often enter contexts that have communal, historically determined and stable sets of values, norms and expected identities, with little cultural compass to find their bearings in them. The book goes beyond interpreting differences in people's ethnic or linguistic roots and discusses instead people's interpretive efforts to navigate different sociocultural situations. The contributors examine such situations in educational, organizational, medical and community settings and look at how participants with different levels of sociocultural competences (such as, migrant patients, migrant adult learners, children) try to cope with

institutional constraints and expectations, how they understand symbols, practices and identities in institutional contexts, and how their creative adjustments come to light. This book provides insights from the fields of psychology, education, anthropology and linguistics, and is for a wide readership interested in cultural meaning-making.
