Dao of Chinese Medicine Donald E. Kendall 2002 Explores the ancient system of physiological medicine in China, and the system's applications in the field of modern medicine.

Handbook Of Traditional Chinese Medicine (In 3 Volumes) Xutian Stevenson 2014-09-19 For over two thousand years, Traditional Chinese Medicine (TCM) has made many significant contributions to China's growth and prosperity. This textbook, based on the unique characteristics of TCM, discusses its principle theories and presents a comprehensive daily practice guide for health maintenance and disease treatment. The book provides clinical practitioners with a fundamental understanding of the essence of TCM.We highly recommend this book for students interested in TCM, Chinese medicine doctors and other healthcare professionals, biomedical researchers, and interested individuals. Readers will benefit from the inspirational viewpoints discussed in the book.

Na-ion Batteries 2021-05-11 This book covers both the fundamental and applied aspects of advanced Na-ion batteries (NIB) which have proven to be a potential challenger to Li-ion batteries. Both the chemistry and design of positive and negative electrode materials are examined. In NIB, the electrolyte is also a crucial part of the batteries and the recent research, showing a possible alternative to classical electrolytes - with the development of ionic liquid-based electrolytes - is also explored. Cycling performance in NIB is also strongly associated with the quality of the electrode-electrolyte interface, where electrolyte degradation takes place; thus, Na-ion Batteries details the recent achievements in furthering knowledge of this interface. Finally, as the ultimate goal is commercialization of this new electrical storage technology, the last chapters are dedicated to the industrial point of view, given by two startup companies, who developed two different NIB chemistries for complementary applications and markets.

Proceedings of 3rd International Conference on Advanced Computing, Networking and Informatics Atulya Nagar 2015-09-03 Advanced Computing, Networking and Informatics are three distinct and mutually exclusive disciplines of knowledge with no apparent sharing/overlap among them. However, their convergence is observed in many real world applications, including cyber-security, internet banking, healthcare, sensor networks, cognitive radio, pervasive computing amidst many others. This two volume proceedings explore the combined use of Advanced Computing and Informatics in the next generation wireless networks and security, signal and image processing, ontology and human-computer interfaces (HCI). The two volumes together include 132 scholarly articles, which have been accepted for presentation from over 550 submissions in the Third International Conference on Advanced Computing, Networking and Informatics, 2015, held in Bhubaneswar, India during June 23–25, 2015.

Logistics 4.0 Turan Paksoy 2020-12-18 Industrial revolutions have impacted both, manufacturing and service. From the steam engine to digital automated production, the industrial revolutions have conduded significant changes in operations and supply chain management (SCM) processes. Swift changes in manufacturing and service systems have led to phenomenal improvements in productivity. The fast-paced environment brings new challenges and opportunities for the companies that are associated with the adaptation to the new concepts such as Internet of Things (IoT) and Cyber Physical Systems, artificial intelligence (AI), robotics, cyber security, data analytics, block chain and cloud technology. These emerging technologies facilitated and expedited the birth of Logistics 4.0. Industrial Revolution 4.0 initiatives in SCM has attracted stakeholders' attentions due to it is ability to empower using a set of technologies together that helps to execute more efficient production and distribution systems. This initiative has been called Logistics 4.0 of the fourth Industrial Revolution in SCM due to its high potential. Connecting entities, machines, physical items and enterprise resources to each other by using sensors, devices and the internet along the supply chains are the main attributes of Logistics 4.0. IoT enables customers to make more suitable and valuable decisions due to the data-driven structure of the Industry 4.0 paradigm. Besides that, the system's ability of gathering and analyzing information about the environment at any given time and adapting itself to the rapid changes add significant value to the SCM processes. In this peer-reviewed book, experts from all over the world, in the field present a conceptual framework for Logistics 4.0 and provide examples for usage of Industry 4.0 tools in SCM. This book is a work that will be beneficial for both practitioners and students and academicians, as it covers the theoretical framework, on the one hand, and includes examples of practice and real world.

The Confucian Four Books for Women 2018-04-02 This volume presents the first English translation of the Confucian classics, Four Books for Women, with extensive commentary by the compiler, Wang Xiang, and introductions and annotations by translator Ann A. Pang-White. Written by women for women's education, the Confucian Four Books for Women spanned the 1st to the 16th centuries, and encompass Ban Zhao's Lessons for Women, Song Ruoxin's and Song Ruozhao's Analects for Women, Empress Renxiaowen's Teachings for the Inner Court, and Madame Liu's (Chaste Widow Wang's) Short Records of Models for Women. A female counterpart to the famous Sishu (Four Books) compiled by Zhu Xi, Wang Xiang's Nü sishu provides an invaluable look at the long-standing history and evolution of Chinese women's writing, education, identity, and philosophical discourse, along with their struggles and triumphs, across the millennia and numerous Chinese dynasties. Pang-White's new translation brings the authors of the Four Books for Women to life as real, living people, and illustrates why they wrote and how their work empowered women.

Antimicrobial Textiles Gang Sun 2016-04-11 Antimicrobial textiles have attracted a great deal of interest in recent years due to their potential for reducing the transmission of infection in medical and healthcare environments. Antimicrobial properties can also improve the performance and lifespan of consumer products, and so these fabrics are increasingly finding applications in the wider textile and apparel industry. This book provides systematic coverage of the technologies and materials required for developing these important textiles. In Part One, chapters address key issues and technologies in the creation of antimicrobial textile products. Topics covered include testing and regulation, microencapsulation, sol-gel coating and plasma technologies, nanotechnology and life cycle assessment. Part Two then reviews key antimicrobial agents, such as N-halamines, plant based compounds and photo-active chemicals. Finally, the chapters of Part Three offer detailed reviews of antimicrobial textiles for particular important applications, including medical devices, protective clothing and products with improved durability and longevity. Reviews key issues and technologies in the creation of antimicrobial textile products Offered a detailed overview of by antimicrobial agents and a wide range of important applications Produced by an experienced editor and a distinguished and international team of contributors

arising from topological spin textures as well as topologically non-trivial electronic structures. In particular, it focuses on a unique topological spin texture, i.e., spin hedgehog lattice, emerging in a chiral magnet and explore its novel properties which are distinct from the conventional skyrmion lattice, and discusses the possibility of realizing high-temperature quantum anomalous Hall effect through quantum confinement effect in topological semimetal. This book benefits students and researchers working in the field of condensed matter physics, through providing comprehensive understanding of the current status and the outlook in the field of topological magnets.

Genetic and Evolutionary Computing Thi Thi Zin 2015-09-03 This volume of Advances in Intelligent Systems and Computing contains accepted papers presented at ICGEC 2015, the 9th International Conference on Genetic and Evolutionary Computing. The conference this year was technically co-sponsored by Ministry of Science and Technology, Myanmar, University of Computer Studies, Yangon, University of Miyazaki in Japan, Kaohsiung University of Applied Science in Taiwan, Fujian University of Technology in China and VSB-Technical University of Ostrava. ICGEC 2015 is held from 26-28, August, 2015 in Yangon, Myanmar. Yangon, the most multiethnic and cosmopolitan city in Myanmar, is the main gateway to the country. Despite being the commercial capital of Myanmar, Yangon is a city engulfed by its rich history and culture, an integration of ancient traditions and spiritual heritage. The stunning SHWEDAGON Pagoda is the center piece of Yangon city, which itself is famous for the best British colonial era architecture. Of particular interest in many shops of Bogyoke Aung San Market, and of world renown, are Myanmar's precious stones-rubies, sapphires and jade. At night time, Chinatown comes alive with its pungent aromas and delicious street food. The conference is intended as an international forum for the researchers and professionals in all areas of genetic and evolutionary computing.

Bureaucracy, Economy, and Leadership in China David Bachman 1991-04-26 This study examines the origins of the Great Leap Forward (GLF), a programme of economic reform that must be considered one of the great tragedies of Communist China. While standard accounts interpret the GLF as chiefly the brainchild of Mao Zedong and as a radical rejection of more moderate reform proposals, Bachman proposes a provocative reinterpretation stressing the role of bureaucracy.

Abrupt Climate Change National Research Council 2002-04-23 The climate record for the past 100,000 years clearly indicates that the climate system has undergone periodic-and often extreme-shifts, sometimes in as little as a decade or less. The causes of abrupt climate changes have not been clearly established, but the triggering of events is likely to be the result of multiple natural processes. Abrupt climate changes of the magnitude seen in the past would have far-reaching implications for human society and ecosystems, including major impacts on energy consumption and water supply demands. Could such a change happen again? Are human activities exacerbating the likelihood of abrupt climate change? What are the potential societal consequences of such a change? Abrupt Climate Change: Inevitable Surprises looks at the current scientific evidence and theoretical understanding to describe what is currently known about abrupt climate change, including patterns and magnitudes, mechanisms, and probability of occurrence. It identifies critical knowledge gaps concerning the potential for future abrupt changes, including those aspects of change most important to society and economies, and outlines a research strategy to close those gaps. Based on the best and most current research available, this book surveys the history of climate change and makes a series of specific recommendations for the future.

Motivational Interviewing in Diabetes Care Marc P. Steinberg 2015-08-14 People with diabetes often struggle to make healthy choices and stay on top of managing their illness. Filling a vital need, this is the first book to focus on the use of motivational interviewing (MI) in diabetes care. The uniquely qualified authors–physician Marc P. Steinberg has devoted much of his career to diabetes care, and renowned clinical psychologist William R. Miller is the codeveloper of MI–present proven counseling techniques that can make any conversation with a patient more efficacious and motivating. Numerous sample dialogues illustrate specific ways to elicit patients' strengths and help them overcome barriers to change in such areas as eating habits, physical activity, medication use, insulin treatment, substance abuse, psychological issues, and more. This book is in the Applications of Motivational Interviewing series, edited by Stephen Rollnick, William R. Miller, and Theresa B. Moyers. Winner (First Place)–American Journal of Nursing Book of the Year Award, Adult Primary Care Category

Scars, Marks & Tattoos Jacqueline Caruso 2021-03-31 I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died I was able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

Chinese Visions of Family and State, 1915-1953 Susan L. Glosser 2003-02-12 At the dawn of the twentieth century, China's sovereignty was fragile at best. In the face of international pressure and domestic upheaval, young urban radicals—desperate for reforms that would save their nation—clamored for change, championing Western-inspired family reform and promoting free marriage choice and economic and emotional independence. But what came to be known as the New Culture Movement had the unwitting effect of fostering totalitarianism. In this wide-reaching, engrossing book, Susan Glosser examines how the link between family order and national salvation affected state-building and explores its lasting consequences. Glosser effectively argues that the replacement of the authoritarian, patriarchal, extended family structure with an egalitarian, conjugal family was a way for the nation to preserve crucial elements of its traditional culture. Her comprehensive research shows that in the end, family reform paved the way for the Chinese Communist Party to establish a deeply intrusive state that undermined the legitimacy of individual rights.

Learning from Imbalanced Data Sets Alberto Fernández 2018-10-22 This book provides a general and comprehensible overview of imbalanced learning. It contains a formal description of a problem, and focuses on its main features, and the most relevant proposed solutions. Additionally, it considers the different scenarios in Data Science for which the imbalanced classification can create a real challenge. This book stresses the gap with standard classification tasks by reviewing the case studies and ad-hoc performance metrics that are applied in this area. It also covers the different approaches that have been traditionally applied to address the binary skewed class distribution. Specifically, it reviews cost-sensitive learning, data-level preprocessing methods and algorithm-level solutions, taking also into account those ensemble-learning solutions that embed any of the former alternatives. Furthermore, it focuses on the extension of the problem for multi-class problems, where the former classical methods are no longer to be applied in a straightforward way. This book also focuses on the data intrinsic characteristics that are the main causes which, added to the uneven class distribution, truly hinders the performance of classification algorithms in this scenario. Then, some notes on data reduction are provided in order to understand the advantages related to the use of this type of approaches. Finally this book introduces some novel areas of study that are gathering a deeper attention on the imbalanced data issue. Specifically, it considers the classification of data streams, non-classical classification problems, and the scalability related to Big Data. Examples of software libraries and modules to address imbalanced classification are provided. This book is highly suitable for technical professionals, senior undergraduate and graduate students in the areas of data science, computer science and engineering. It will also be useful for scientists and researchers to gain insight on the current developments in this area of study, as well as future research directions.

The Teachings and Practices of the Early Quanzhen Taoist Masters Stephen Eskildsen 2012-02-01 Explores the religion developed by the Quanzhen Taoists, who sought to cultivate the mind not only through seated meditation, but also throughout the daily activities of life.

WorldMinds Donald G. Janelle 2004-03-31 WorldMinds provides broad exposure to a geography that is engaged with discovery, interpretation, and problem solving. Its 100 succinct chapters demonstrate the theories, methods, and data used by geographers, and address the challenges posed by issues such as globalization, regional and ethnic conflict, environmental hazards, terrorism, poverty, and sustainable development. Through its theoretical and practical applications, we are reminded that the study of Geography informs policy making.

Growing Out of the Plan Barry Naughton 1995 This is a comprehensive study of China’s economic reforms, from their beginnings at the end of 1978 through the completion of many of the initial reform measures during 1993. The features of Chinese reform that differ from the former USSR are highlighted.

Chinese Marriage and Social Change Max WL Wong 2020-02-10 This book provides a comparative account of the abolition of concubinage in East Asia, offering a new perspective and revised analysis of the factors leading to – and the debates surrounding – the introduction of a new Marriage Reform Ordinance in Hong Kong in 1971. It uses this law as a platform to examine how the existence of concubinage – long preserved in the name of protecting Chinese traditions and customs — crucially influenced family law reforms, which were in response to a perceived need to create a ‘modern’ marriage system within Hong Kong’s Chinese community after the Second World War. This was, by and large, the result of continued pressure from within Hong Kong and from Britain to bring Hong Kong’s marriage system in line with international marriage treaties. It represented one of the last significant intrusions of colonial law into the private sphere of Hong Kong social life, eliminating Chinese customs which had been previously recognised by the colonial legal system’s family law. This book contextualizes the Hong Kong situation by examining judicial cases interpreting Chinese customs and the Great Qing Code, offering a comprehensive understanding of the Hong Kong situation in relation to the status of concubines in Republican China and other East Asian jurisdictions. It will be of particular interest to teachers and students of law, as well as researchers in gender studies, post-colonialism, sociology and cultural studies.

Computing with Social Trust Jennifer Golbeck 2008-11-16 This book has evolved out of roughly ve years of working on computing with social trust. In the beginning, getting people to accept that social networks and the relationships in them could be the basis for interesting, relevant, and exciting c- puter science was a struggle. Today, social networking and social computing have become hot topics, and those of us doing research in this space are nally nding a wealth of opportunities to share our work and to collaborate with others. This book is a collection of chapters that cover all the major areas of research in this space. I hope it will serve as a guide to students and researchers who want a strong introduction to work in the eld, and as encouragement and direction for those who are considering bringing their own techniques to bear on some of these problems. It has been an honor and privilege to work with these authors for whom I have so much respect and admiration. Thanks to all of them for their outstanding work, which speaks for itself, and for patiently enduringall my emails. Thanks, as always, to Jim Hendler for his constant support. Cai Ziegler has been particularly helpful, both as a collaborator, and in the early stages of development for this book. My appreciation also goes to Beverley Ford, Rebecca Mowat and everyone at Springer who helped with publication of this work.

Dogen's Extensive Record Eihei Dogen 2010-03-16 Eihei Dogen, the 13th-century Zen master who founded the Japanese Soto School of Zen, is renowned as one of the world’s most remarkable religious thinkers. As Shakespeare did with English, Dogen utterly transformed the language of Zen, using it in novel and extraordinarily beautiful ways to point to everything important in religious life. "Dogen’s Extensive Record" is the first-ever complete and scholarly translation of this monumental work into English. This edition contains extensive and detailed research and annotation by scholar, translator, and Zen teacher Taigen Dan Leighton, as well as forewords by the 18th-century poet-monk Ryokan and Tenshin Reb Anderson, former abbot of the San Francisco Zen Center -- plus introductory essays from Dogen scholar Steven Heine and the prominent American Zen master John Daido Loori.

David Vizard's How to Port and Flow Test Cylinder Heads David Vizard 2012 Porting heads is an art and science. It takes a craftsman’s touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.

An Intellectual History of China, Volume Two Zhaoguang Ge 2018-06-01 A history of traditional Chinese knowledge, thought and belief from the seventh through the nineteenth centuries with a new approach that offers a

new perspective. It appropriates a wide range of source materials and emphasizes the necessity of understanding ideas and thought in their proper historical contexts. Its analytical narrative focuses on the dialectical interaction between historical background and intellectual thought. While discussing the complex dynamics of interaction among the intellectual thought of elite Chinese scholars, their historical conditions, their canonical texts and the “worlds of general knowledge, thought and belief," it also illuminates the significance of key issues such as the formation of the Chinese world order and its underlying value system, the origins of Chinese cultural identity, foreign influences, and the collapse of the Chinese world order in the 19th century leading toward the revolutionary events of the 20th century.

Understanding China’s School Leadership Daming Feng 2019-01-01 This open access book outlines key terms of China’s school leadership in Chinese political and legal, financial, administrative, and cultural contexts. It reveals and interprets the real meaning of these practical terms based on existing laws, government documents, school policy texts as well as the latest empirical findings from school leaders and teachers’ surveys and interviews in China. Providing a holistic picture of China’s school leadership through the unique meanings of these terms, the book offers researchers and graduate students insights into school leadership practice and its context in China. Thus, it would likely intensify readers’ knowledge base to analyse and interpret the phenomenon and research data regarding China’s school leadership.

Contemporary Strategy Analysis Robert M. Grant 2013-01-22 Robert M. Grant combines a highly accessible writing style with a concentration on the fundamentals of value creation and an emphasis on practicality in this leading strategy text. In this new edition, he includes an even greater focus on strategy implementation that reflects the needs of firms to reconcile scale economies with entrepreneurial flexibility, innovation with cost efficiency, and globalization with local responsiveness. This edition also incorporates some of the key strategic issues of today including: post-financial crisis adjustment, the continuing rise of China, India and Brazil, and the increased emphasis on ethics and sustainability. Coverage is also provided on strategy in not-for-profit organizations. Contemporary Strategy Analysis, Text and Cases 8th Edition combines the text with an updated collection of 20 case studies. It is suitable for both MBA and advanced undergraduate students. Additional teaching resources are also available for instructors, including an instructor’s manual, case teaching notes, test bank, teaching slides, case video clips and extra cases. All of these resources can be accessed via the companion website: www.contemporarystrategyanalysis.com

Haploidentical Transplantation Stefan O. Ciurea 2018-05-03 In this book, world-renowned experts in the field express well-reasoned opinions on a range of issues and controversies relating to haploidentical transplantation with the aim of providing practicing hematologists with clinically relevant and readily applicable information. Among the areas covered are graft manipulation and methods to control T-cell alloreactivity, the nature of the ideal graft and donor, haploidentical transplantation in pediatric and adult patients with malignant and nonmalignant diseases, immunologic reconstitution following transplantation, complications, and the prevention and treatment of relapse post transplantation. Attention is drawn to the implications of high-impact clinical trials whenever such trials are available. The readily intelligible text is complemented by numerous helpful tables, algorithms, and figures. The book will provide practical support for hematologists and transplant physicians as they attempt to provide optimal care in this exciting but increasingly complex medical specialty.

A Glossary of Words and Phrases in the Oral Performing and Dramatic Literatures of the Jin, Yuan, and Ming Dale Johnson 2020-08-06 For many years, the oral performing and dramatic literatures of China from 1200 to 1600 CE were considered some of the most difficult texts in the Chinese corpus. They included ballad medleys, comic farces, Yuan music dramas, Ming music dramas, and the novel Shuihu zhuan. The Japanese scholars who first dedicated themselves to study these works in the mid-twentieth century were considered daring. As late as 1981, no comprehensive dictionary or glossary for this literature existed in any language, Asian or Western. A Glossary of Words and Phrases fills this gap for Western readers, allowing even a relative novice who has resonable command of Chinese to read, translate, and appreciate this great body of literature with an ease undreamed of even two decades ago. The Glossary is organized into approximately 8,000 entries based on the reading notes and glosses found in various dictionaries, thesauruses, glossaries, and editions of works from the period. Main entries are listed alphabetically in the pinyin romanization system. In addition to glosses, entries include symbolic annotations, guides to pronunciation, and text citations. The result is a broadly useful glossary serving the needs of students of this literature as well as scholars researching Jin and Yuan language and its usage.

Modern Selfhood in Translation Limin Chi 2018-09-03 This book examines the development of Chinese translation practice in relation to the rise of ideas of modern selfhood in China from the 1890s to the 1920s. The key translations produced by late Qing and early Republican Chinese intellectuals over the three decades in question reflect a preoccupation with new personality ideals informed by foreign models and the healthy development of modern individuality, in the face of crises compounded by feelings of cultural inadequacy. The book clarifies how these translated works supplied the meanings for new terms and concepts that signify modern human experience, and sheds light on the ways in which they taught readers to internalize the idea of the modern as personal experience. Through their selection of source texts and their adoption of different translation strategies, the translators chosen as case studies championed a progressive view of the world: one that was open-minded and humanistic. The late Qing construction of modern Chinese identity, instigated under the imperative of national salvation in the aftermath of the First Sino-Japanese War, wielded a far-reaching influence on the New Culture discourse. This book argues that the New Culture translations, being largely explorations of modern self-consciousness, helped to produce an egalitarian cosmopolitan view of modern being. This was a view favoured by the majority of mainland intellectuals in the post-Maoist 1980s and which has since become an important topic in mainland scholarship.
