Politics and Leadership in North Korea Adrian Buzo 2017-09-08 Politics and Leadership in North Korea, now fully updated in this second edition, presents an accessible and comprehensive account of North Korea's political, economic and foreign policies since its creation in 1945. Moving away from media representations of North Korea as dangerously erratic and dysfunctional, Adrian Buzo provides a thorough analysis of Kim Il Sung's vision for the DPRK and demonstrates the consistency of the successive leaderships' approach to politics, economics and international affairs. This second edition has been fully revised and takes into account all the important events of the last fifteen years in North Korea, such

As such, it will continue to be an essential resource for students of North Korea, East Asian Politics and International Politics.

Rethinking Governance in Europe and Northeast Asia Uwe Wissenbach 2019-11-11 This book explores how nationalism and multilateralism transform international society and global governance. It does so by comparing the governance model of the EU – a constitutionalised and increasingly polycentric form of

multilateralism – with Northeast Asia. These nationalist administrations have resisted multilateral commitments and are locked into rivalries instead of pursuing a regional project. Both Europe and Northeast Asia can be seen as success stories of the late 20th/early 21st centuries, but by having followed different approaches to international governance. The book traces these two trajectories through critical junctures in history to how both regions have dealt with the contemporary challenges of the financial crisis and climate change. During the financial crisis, Europe's multilateral economic and monetary architecture revealed profound weaknesses whilst national policies allowed much of Northeast Asia to escape the worst of it. On climate

change the European Union (EU) has developed effort-sharing governance models to reduce emissions, while Northeast Asian countries are relying on greening national industrial policy. The book argues that global governance has to find the balance between multilateralism and nationalism in order to find collaborative approaches to global challenges. This book provides a fresh take on the EU and on Northeast Asia and develops innovative concepts of international society and polycentric governance. Thus, it will be of considerable interest to researchers and students of global governance, international relations, EU and Asia Studies.

embarrassing superstition, the theatrical religious performances of Korean shamans—who communicate with the dead, divine the future, and become possessed—are going mainstream. Attitudes toward Korean shamanism are changing as shamanic traditions appear in staged rituals, museums, films, and television programs, as well as on the internet. Contemporary Korean Shamanism explores this vernacular religion and practice, which includes sensory rituals using laden altars, ecstatic dance, and animal sacrifice, within South Korea's hypertechnologized society, where over 200,000 shamans are listed in professional organizations. Liora Sarfati reveals how representations of shamanism in national, commercialized, and screen-mediated settings have transformed

opinions of these religious practitioners and their rituals. Applying ethnography and folklore research, Contemporary Korean Shamanism maps this shift in perception about shamanism—from a sign of a backward, undeveloped Korea to a valuable, indigenous cultural asset.

Dog Days Ivan Franceschini 2019-04-05 According to the Chinese zodiac, 2018 was the year of the 'earthly dog'. In the middle of the long, hot, and feverish dog days of the summer of

2018, some workers at Shenzhen Jasic Technology took their chances and attempted to form an independent union. While this action was met by the harshest repression, it also led to extraordinary demonstrations of solidarity from small groups of radical students from all over the country, which in turn were immediately and severely suppressed. China's year of the dog was also imbued with the spirit of another canine, Cerberus—the three-headed hound of Hades—with the ravenous advance of the surveillance state and the increasing securitisation of Chinese society, starting from the northwestern region of Xinjiang. This Yearbook traces these latest developments in Chinese society through a collection of 50 original essays on labour, civil society, and

human rights in China and beyond, penned by leading scholars and practitioners from around the world. (Dys-)Functionalities of Corruption
Tobias Debiel 2013-12-16 Corruption is usually understood as hampering political development, economic growth and democratic participation of citizens, but comparing the effects of corruption for different political regimes presents astonishingly complex findings. The ongoing persistence of corruption underlines that it is not only dysfunctional, but can be highly functional as well. This special issue brings together contributions from comparative politics, political science and economics which precisely focus on these (dys) functionalities of corruption in political regimes across various world regions. The

question of methodological pluralism is especially important for studying corruption comparatively. While on an international level a trend towards an increased use of quantitative methods in political science as well as in economics can be observed, the special issue underlines the importance of having a pluralistic approach for grasping the complex and multi-layered effects of the phenomenon. Of similar importance is the adoption of a comparative perspective that includes different world regions in order to understand the different roles of corruption in developing, transforming and developed countries alike. Dr. Tobias Debiel is Director of the Centre for Global Cooperation Research and of the Institute for Development and Peace (INEF). Since 2006, he is also

A Brief History of Korea Michael J. Seth 2019-11-12 Exploring Korean history from its ancient roots to the present day, A Brief History of Korea is the story of a people with a rich and united culture that has become

two Koreas in modern times--one isolated and secretive and the other among the world's most successful economies. Korean culture developed on a 600-mile-long peninsula, bordered on the north by mountains and three sides by the sea, set apart from the Asian mainland. Korea was one of the last countries in Asia to be visited by Westerners and its borders have remained largely unchanged since it was unified in the seventh century. Though it is one of the world's oldest and most ethnically homogeneous states, Korea was not born in a vacuum.

Geographically isolated, the country was heavily influenced by powerful China and was often used as a bridge to the mainland by Japan. Calling themselves as "a shrimp among whales," Koreans borrowed elements of

government, culture and religion all the while fiercely fighting to maintain independence from powerful neighbors. This fascinating book tells the story of Korean domestic dynasties, empires and states, as well as foreign conquest, occupation and division. Today, the two Koreas are starkly different--North Korea a nation closed to the world and South Korea an economic powerhouse and center of Asian democracy. Chronicling significant events right up through 2018's Singapore Summit, author Michael J. Seth presents a relevant, interesting and important history of Korea within a larger global context. Korea's history is a turbulent one, but ultimately the story of a resistant and resourceful people in search of lasting peace.

Public Administration in East Asia
Evan M. Berman 2017-09-25 Written by leading experts, Public Administration in East Asia: Mainland China, Japan, South Korea, Taiwan examines the inner workings of governments in East Asia, in

particular its public administration and related public policy processes. It focuses on the apparatus of government – the agencies, their values, context, and policies within which they operate. Organized in parallel sections, the book covers the history, public policy processes, organization, HRM, ethics, corruption, intergovernmental relations, performance management, and e-government. It discusses each of these topics separately for Mainland China, Japan, South Korea, and Taiwan, providing an unusual and important comparative perspective. The book includes essential knowledge and facts, discussions of emerging issues, and useful resources for further reading. It addresses questions such as: What is the history of public administration in

East Asia? How are decisions made? What is the role of Confucianism in shaping public administration? How does the developmental path affect public administration? Why is performance management emphasized? What is the state of citizen participation? How are ethical underpinnings of the civil service different from the West? Why are intergovernmental relations an essential issue in East Asia? What are the politics behind world-class achievements in IT? What is the nature of civil service reform? What is the nature of efforts to combat government corruption? You can find many books on trade policy and politics that sometimes give good insight into the operation of government agencies. You can also find a few edited books that contain

single chapters on countries in the Asia-Pacific region. What is missing, however, is a single resource that provides an overview with depth on matters solely about public administration. This state-of-the-art resource brings together the fragments of existing knowledge on East Asian economies, filling the need for a comprehensive compendium that showcases the public administration practices in the region and East Asia's innovative approaches to governance and its many challenges.

Korea's Grievous War Su-kyoung Hwang
2016-08-30 In 1948, two years before Cold War tensions resulted in the invasion of South Korea by North Korea that started the Korean War, the first major political confrontation between leftists and

rightists occurred on the South Korean island of Cheju, where communist activists disrupted United Nations-sanctioned elections and military personnel were deployed. What began as a counterinsurgency operation targeting 350 local rebels resulted in the deaths of roughly 30,000 uninvolved civilians, 10 percent of the island's population. Su-kyoung Hwang's *Korea's Grievous War* recounts the civilian experience of anticommunist violence, beginning with the Cheju Uprising in 1948 and continuing through the Korean War until 1953. Wartime declarations of emergency by both the U.S. and Korean governments were issued to contain communism, but a major consequence of their actions was to contribute to the loss of more than two million civilian lives. Hwang inventories the

persecutions of left-leaning intellectuals under the South Korean regime of Syngman Rhee and the executions of political prisoners and innocent civilians to "prevent" their collaboration with North Korea. She highlights the role of the United States in observing, documenting, and yet failing to intervene in the massacres and of the U.S. Air Force's three-year firebombing campaign in North and South Korea. Hwang draws on archival research and personally conducted interviews to recount vividly the acts of anticommunist violence at the human level and illuminate the sufferings of civilian victims. Korea's Grievous War presents the historical background, political motivations, legal bases, and social consequences of anticommunist violence, tracing the

Governments, NGOs and Anti-Corruption

Luís de Sousa 2012-08-21 The purpose of this book is to understand the rise, future and implications of two important new kinds of "integrity warriors" - official anti-corruption agencies (ACAs) and anti-corruption NGOs – and to locate them in a wider context and history of anti-corruption activity. Key issues of corruption and anti-corruption are discussed in an integrated and innovative way; through a number of

country studies including Taiwan and South Korea, South East Europe, Fiji, Russia and the Baltic States. Some of the questions, used to examine the development of new anti-corruption actors, include: In what context were these born? How do they operate in pursuing their mission and mandate? How successful have they been in relation to expected results? To what extent are governmental and non governmental actors aware of each other and how far do they cooperate towards the common goal of fighting corruption? What explains the shift in emphasis after the end of the cold war, from national to international action? Governments, NGOs and Anti-Corruption will be of interest to students and scholars of corruption, public policy, political science, developmental studies and law. Luís

de Sousa is an Associate Researcher at CIES-ISCTE, Portugal and Calouste Gulbenkian Fellow at the European University Institute, Italy. Barry Hindess is Emeritus Professor of Political Science at the Australian National University, Australia. Establishing a Pluralist Society in Medieval Korea, 918-1170 Remco E.

Breuker 2010 Recognizing the uniquely codified pluralist orientation of early Kory society (918-1170), this book presents a radical re-evaluation of Kory identities and self-perceptions, which entails far-reaching consequences for the understanding of Kory history and of its place in East Asian history. Uncovering the Codes Yöl-gyu Kim 2005 Uncovering the Codes: Fifteen Keywords in Korean Culture is a cultural guide to what is unique about Koreans and their way of life. The questions raised in this book range from the mundane to the spiritual, each touching on the essence of Korea's 5,000-year-old culture: Why is a Korean spoon flat and round, not oval? Why do Korean women pray to a bowl of water? Why do Koreans eat dog meat? Kim Yol-kyu, a

renowned scholar of Korean folklore and literature, carefully digs up the answers embedded deep in centuries-old customs. Quoting from a wide scope of references, from ancient mythology to Merleau-Ponty and Levi-Strauss, Kim unearths the fascinating connections between the past and the present. Kim is Dignified Professor of Korean Studies at Keimyung University in Daegu, Korea, where he also directs the Academia Koreana. **South Korea's Webtooniverse and the Digital Comic Revolution** Brian Yecies 2021-04-09 This book investigates the meteoric rise of mobile webtoons – also known as webcomics – and the dynamic relationships between serialised content, artists, agencies, platforms and applications, as well as the global readership associated with them. It offers an

engaging discussion of webtoons themselves, and what makes this new media form so compelling and attractive to millions upon millions of readers. Why have webtoons taken off, and how do users interact with them? Each of the case studies we explore raises interesting questions for both general readers and scholars of new media about how webtoons have become a modern form of popular culture. The book also addresses larger questions about East Asia's contributions to global popular culture and Asian society in general, as well as South Korea's rapid social and cultural transformation since the 1990s. This is a significant – and understudied – aspect of the new screen ecologies and their role in a new wave of media globalisation as we approach the end of the second decade

of the 21st century.
Asian Migration and Education Cultures in the Anglosphere Megan Watkins 2019-03-27 Asian migration and mobilities are transforming education cultures in the Anglosphere, prompting mounting debates about 'tiger mothers' and 'dragon children', and competition and segregation in Anglosphere schools. This book challenges the cultural essentialism which prevails in much academic and popular discussion of 'Asian success' and in relation to Asian education mobilities. As anxiety and aspiration within these spaces are increasingly ethnicised, the children of Asian migrants are both admired and resented for their educational success. This book explores popular perceptions of Asian migrant families

through in-depth empirically informed accounts on the broader economic, social, historical and geo-political contexts within which education cultures are produced. This includes contributions from academics on global markets and national policies around migration and education, classed trajectories and articulations, local formations of 'ethnic capital', and transnational assemblages that produce education and mobility as means for social advancement. At a time when our schooling systems and communities are undergoing rapid transformations as a result of increasing global mobility, this book is a unique and important contribution to an issue of pressing significance. This book was originally published as a special issue of the Journal of Ethnic and

Migration Studies.

Rules of the House offers a dynamic revisionist account of the Japanese colonial rule of Korea (1910–1945) by examining the roles of women in the civil courts. Moreover, women were not passive victims; instead, they proactively struggled to expand their rights by participating in the Japanese colonial legal system. In turn, the Japanese doctrine of promoting progressive legal rights would prove advantageous to them. Following female plaintiffs and their civil disputes from the precolonial Choson dynasty through colonial times and into postcolonial reforms, this book presents a new and groundbreaking story about Korean women's legal struggles, revealing their surprising collaborative relationship with the colonial state.

Education, Curriculum and Nation-Building Daniel Tröhler 2023-04-07
Contributing to interdisciplinary discussions on nationalism, the book explores how educational systems and

practices contribute to the phenomena of nationalism and nation-building. Using nine comparative case studies from four continents, the book elaborates a theoretical understanding of nationalism from the perspectives of comparative education research. It integrates the theme of nation, nation-building and nationalism and its involvement with issues of education. It explores the theoretical scope of concepts such as national identities, national literacies, or "doing" nation. The book revives the idea that nation should be the starting point of comparative research and contributes to the theoretically reflective integration of nationalism research into education research. This timely book will be highly relevant for researchers, academics, and

postgraduate students in the fields of comparative education, international education, education policy, and curriculum studies.

Famine in North Korea Stephan Haggard
2009-06-22 In the mid-1990s, as many as one million North Koreans died in one of the worst famines of the twentieth century. Stephan Haggard and Marcus Noland present the most comprehensive and penetrating account of the famine to date, examining not only the origins and aftermath of the crisis but also the regime's response to outside aid and the effect of its current policies on the country's economic future. North Korea's famine exemplified the depredations that can arise from tyrannical rule and the dilemmas such regimes pose for the humanitarian community. To reveal the state's culpability is a vital project of historical recovery,

especially in light of our current engagement with the "North Korean question."

North Korea's Juche Myth B. R. Myers
2015-10-01 For decades the North Korean regime has preached a virulent race-nationalism to its own people. At the same time, however, it has succeeded in making outsiders believe

that it is guided by a solipsistic, inward-directed ideology of self-reliant communism. This in turn has nurtured the wishful assumption that the regime no longer has serious designs on South Korea. In this book, his follow-up to *The Cleanest Race* (2009), B.R. Myers shows that although the myth of Juche has done great service for the regime at home and abroad, the ideology's content has never played a significant role in policy-making or domestic propaganda. The North Korean nuclear program must be grasped in the

context of the regime's true ideological commitment, which is not to self-reliance, but to "final victory" over the rival state. *Constructing "Korean" Origins* Hyung Il Pai 2000 Hyung Il Pai examines how archaeological finds from Northeast Asia have been used in Korea to construct a myth of state formation emphasizing the ancient development of a pure Korean race that created a civilization rivaling those of China and Japan. He shows that the Korean state was formed far later with influences from throughout Northern Asia.
