World War II was not a city. It was an American suburb. In this innovative and timely history, Andrew Friedman chronicles how the CIA and other national security institutions created a U.S. imperial home front in the suburbs of Northern Virginia. In this covert capital, the suburban landscape provided a cover for the workings of U.S. imperial power, which shaped domestic suburban life. The Pentagon and the CIA built two of the largest office buildings in the country there during and after the war that anchored a new imperial culture and social world. As the U.S. expanded its power abroad by developing roads, embassies, and villages, its subjects also arrived in the covert capital as real estate agents, homeowners, builders, and landscapers who constructed spaces and living monuments that both nurtured and critiqued postwar U.S. foreign policy. Tracing the relationships among American agents and the migrants from Vietnam, El Salvador, Iran, and

upload Betty q Robertson

southwestern suburbs of D.C., Friedman tells the story of a place that recasts ideas about U.S. immigration, citizenship, nationalism, global interconnection, and ethical responsibility from the post-WW2 period to the present. Opening a new window onto the intertwined history of the American suburbs and U.S. foreign policy, *Covert Capital* will also give readers a broad interdisciplinary and often surprising understanding of how U.S. domestic and global histories intersect in many contexts and at many scales. *American Crossroads, 37 Folks, This Ain't Normal* Joel Salatin 2011-10-10 From farmer Joel Salatin's point of view, life in the 21st century just ain't normal. In *FOLKS, THIS AIN'T NORMAL*, he discusses how far removed we are from the simple, sustainable joy that comes from living close to the land and the people we love. Salatin has many thoughts on what normal is and shares practical and philosophical ideas for changing our lives.

ways that have big impact. Salatin, hailed by the New York Times as "Virginia's most multifaceted agrarian since Thomas Jefferson [and] the high priest of the pasture" and profiled in the Academy Award nominated documentary Food, Inc. and the bestselling book The Omnivore's Dilemma, understands what food should be: Wholesome, seasonal, raised naturally, procured locally, prepared lovingly, and eaten with a profound reverence for the circle of life. And his message doesn't stop there. From child-rearing, to creating quality family time, to respecting the environment, Salatin writes with a wicked sense of humor and true storyteller's knack for the revealing anecdote. Salatin's crucial message and distinctive voice--practical, provocative, scientific, and down-home philosophical in equal measure--make FOLKS, THIS AIN'T NORMAL a must-read book.

Meat Market Erik Marcus 2005 Meat Market elevates the debate over animal agriculture. **Every Twelve Seconds** **And The Politics Of Sight** Timothy Pachirat Pdf Pdf upload Betty q Robertson

away the exaggerated claims and counterclaims put forth by the meat industry and its opponents. In the process, Marcus presents a thorough examination of animal agricultures cruelties and its far-reaching social costs. Marcus then considers the discouraging progress made by the animal protection movement. He evaluates where the movement has gone wrong, and how its shortcomings could best be remedied.

Animal Resistance in the Global Capitalist Era Sarat Colling 2020-12-01

The concept of animal resistance is now reaching a wide audience across the social media landscape. Animal Resistance in the Global Capitalist Era offers an overview of how animals resist human orderings in the context of capitalism, domestication, and colonization. Exploring this understudied phenomenon, this book is attentive to both the standpoints of animal resisters and the ways they are represented in human society. Together, these

Downloaded from [via.ramtech.uri.edu](http://www.via.ramtech.uri.edu) on September 22, 2023 by Betty q Robertson

insight into how animals' resistance disrupts the dominant paradigm of human exceptionalism and the distancing strategies of enterprises that exploit animals for profit. Animals have been relegated to the margins by human spatial and ideological orderings, but they are also the subjects of their own struggle, located at the center of their liberation movement. Well-researched and accessible, with over fifty images that aid in understanding both the experiences of and responses to animals who resist, *Animal Resistance in the Global Capitalist Era* is an important contribution to scholarship on animals and society. The text will appeal to a broad audience interested in the relationships between humans and the other animals with whom we share this planet.

Speak Freely Keith E.

Whittington 2018-04-10 Why free speech is the lifeblood of colleges and universities Free speech is under attack at colleges and universities today, *Every Twelve Seconds*

With Striving Struggle And The Politics Of Sight Timothy Pachirat Pdf Pdf upload Betty q Robertson

challenging the value of open inquiry and freewheeling intellectual debate. Too often speakers are shouted down, professors are threatened, and classes are disrupted. In *Speak Freely*, Keith Whittington argues that universities must protect and encourage free speech because vigorous free speech is the lifeblood of the university. Without free speech, a university cannot fulfill its most basic, fundamental, and essential purposes, including fostering freedom of thought, ideological diversity, and tolerance. Examining such hot-button issues as trigger warnings, safe spaces, hate speech, disruptive protests, speaker disinvitations, the use of social media by faculty, and academic politics, *Speak Freely* describes the dangers of empowering campus censors to limit speech and enforce orthodoxy. It explains why free speech and civil discourse are at the heart of the university's mission of creating and nurturing an open and diverse community dedicated to learning. Downloaded from www.vla.ramtech.uri.edu on September 22, 2023 by Betty q Robertson

why universities must make space for voices from both the left and right. And it points out how better understanding why the university lives or dies by free speech can help guide everyone—including students, faculty, administrators, and alumni—when faced with difficult challenges such as unpopular, hateful, or dangerous speech. Timely and vitally important, *Speak Freely* demonstrates why universities can succeed only by fostering more free speech, more free thought—and a greater tolerance for both.

Every Twelve Seconds

Timothy Pachirat 2011-11-08

This is an account of industrialized killing from a participant's point of view. The author, political scientist Timothy Pachirat, was employed undercover for five months in a Great Plains slaughterhouse where 2,500 cattle were killed per day—one every twelve seconds. Working in the cooler as a liver hanger, in the chutes as a cattle driver, and on the kill floor as a food-

*Every Twelve Seconds
Industrialized Slaughter
And The Politics Of Sight
Timothy Pachirat Pdf Pdf
upload Betty q Robertson*

Pachirat experienced firsthand the realities of the work of killing in modern society. He uses those experiences to explore not only the slaughter industry but also how, as a society, we facilitate violent labor and hide away that which is too repugnant to contemplate. Through his vivid narrative and ethnographic approach, Pachirat brings to life massive, routine killing from the perspective of those who take part in it. He shows how surveillance and sequestration operate within the slaughterhouse and in its interactions with the community at large. He also considers how society is organized to distance and hide uncomfortable realities from view. With much to say about issues ranging from the sociology of violence and modern food production to animal rights and welfare, *Every Twelve Seconds* is an important and disturbing work. *Every Twelve Seconds* Timothy Pachirat 2013

Summoned by an anonymous Prosecutor, ten contemporary ethnographers gather in an aging barn to hold a trial of Alice Goffman's controversial ethnography, *On the Run*. But before the trial can get underway, a one-eyed wolfdog arrives with a mysterious liquid potion capable of rendering the ethnographers invisible in their fieldsites. Presented as a play that unfolds in seven acts, the ensuing drama provides readers with both a practical guide for how to conduct immersive participant-observation research and a sophisticated theoretical engagement with the relationship between ethnography as a research method and the operation of power. By interpolating "how-to" aspects of ethnographic research with deeper questions about ethnography's relationship to power, this book presents a compelling introduction for those new to ethnography and rich theoretical insights for more seasoned ethnographic

social sciences. Just as ethnography as a research method depends crucially on serendipity, surprise, and an openness to ambiguity, the book's dramatic and dialogic format encourages novices and experts alike to approach the study of power in ways that resist linear programs and dogmatic prescriptions. The result is a playful yet provocative invitation to rekindle those foundational senses of wonder and generative uncertainty that are all too often excluded from conversations about the methodologies and methods we bring to the study of the social world.

River of Love in an Age of Pollution David Haberman
2023-09-01 Celebrated as an aquatic form of divinity for thousands of years, the Yamuna is one of India's most sacred rivers. A prominent feature of north Indian culture, the Yamuna is conceptualized as a goddess flowing with liquid love—yet today it is severely polluted, the victim of fast-paced industrial

development. This fascinating and beautifully written book investigates the stories, theology, and religious practices connected with this river goddess collected from texts written over several millennia, as well as from talks with pilgrims, priests, and worshippers who frequent the pilgrimage sites and temples located on her banks. David L. Haberman offers a detailed analysis of the environmental condition of the river and examines how religious practices are affected by its current pollution. He introduces Indian river environmentalism, a form of activism that is different in many ways from its western counterpart. *River of Love in an Age of Pollution* concludes with a consideration of the broader implications of the Yamuna's plight and its effect on worldwide efforts to preserve our environment.

Before the Law Cary Wolfe
2013 Animal studies and biopolitics are two of the most dynamic areas of
Every Twelve Seconds

but until now, they have had little to say to each other. Bringing these two emergent areas of thought into direct conversation in *Before the Law*, Cary Wolfe fosters a new discussion about the status of nonhuman animals and the shared plight of humans and animals under biopolitics. Wolfe argues that the human-animal distinction must be supplemented with the central distinction of biopolitics: the difference between those animals that are members of a community and those that are deemed killable but not murderable. From this understanding, we can begin to make sense of the fact that this distinction prevails within both the human and animal domains and address such difficult issues as why we afford some animals unprecedented levels of care and recognition while subjecting others to unparalleled forms of brutality and exploitation. Engaging with many major figures in biopolitical thought—from Heidegger, Arendt, and Foucault to Agamben, Derrida,

and Derrida—Wolfe explores how biopolitics can help us understand both the ethical and political dimensions of the current questions surrounding the rights of animals.

Children and Cross-

Examination J R Spencer

2012-06-01 In 2009, Stephen Barker was convicted of rape on the evidence of a little girl who was four-and-a-half years old at the trial, and about three-and-a-half when first interviewed by the police. The high point of the proceedings was the child's appearance as a live witness in order for Barker's counsel to attempt a cross-examination. This case focused attention on the need, imposed by current English law, for even tiny children to come to court for a live cross-examination. In 1989, the Pigot Committee proposed a scheme under which the whole of a young child's evidence, including cross-examination, would be obtained out of court and in advance of trial. In 1999 a provision designed to give effect to this was included in

*Every Twelve Seconds

Evidence Act, but it has not yet been brought into force. The full Pigot proposal was implemented, however, in Western Australia, and similar schemes operate in a number of European jurisdictions. This book of essays examines a number of these schemes, and argues the case for further reforms in the UK.

offices to artificial insemination barns and bone-rendering facilities. He outlines the deep human-hog relationships and intimacies that emerge through intensified industrialization, showing how even the most mundane human action, such as a wayward touch, could have serious physical consequences for animals. Corporations' pursuit of a perfectly uniform, standardized pig—one that can yield materials for over 1000 products—creates social and environmental instabilities that transform human lives and livelihoods. Throughout Porkopolis, which includes dozens of images by award-winning photographer Sean Sprague, Blanchette uses factory farming to rethink the fraught state of industrial capitalism in the United States today.

“compulsively readable parable for the 21st century” (Vanity Fair). When Mae Holland is hired to work for the Circle, the world’s most powerful internet company, she feels she’s been given the opportunity of a lifetime. The Circle, run out of a sprawling California campus, links users’ personal emails, social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the company’s modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the CEO. Mae can’t believe her luck, her great fortune to work for the most influential company in the world.

life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public. What begins as the captivating story of one woman's ambition and idealism soon becomes a heart-racing novel of suspense, raising questions about memory, history, privacy, democracy, and the limits of human knowledge.

Works in Progress Jenny Leigh Smith 2014-10-28 This book is the first to investigate the gap between the plans and the reality of the Soviet Union's mid-twentieth-century project to industrialize and modernize its agricultural system. Historians agree that the project failed badly: agriculture was inefficient, unpredictable, and environmentally devastating for the entire Soviet period. Yet assigning the blame exclusively to Soviet planners would be off the mark. The real story is much more complicated and interesting. Jenny Leigh Smith

European colonization. In *Whose Ruins* tells another story: winding through the US landscape, from Native American earthworks in West Virginia to the Manhattan Project in New Mexico, this history is a tour of sites that were mined for an empire's power. Showing the hidden costs of ruthless economic growth, particularly to Indigenous people and ways of understanding, this book illuminates the myth-making intimately tied to place. From the ground up, the project of settlement, expansion, and extraction became entwined with the spiritual values of those who hoped to gain from it. Every nation tells some stories and suppresses others, and *In Whose Ruins* illustrates the way American myths have been inscribed on the earth itself, overwriting Indigenous histories and binding us into an unsustainable future. In these pages, historian Alicia Puglionesi illuminates the story of the Grave Creek Stone, "discovered" in an ancient

used to promote the theory that a lost white race predated Native people in North America--part of a wider effort to justify European conquest with alternative histories. When oil was discovered in the corner of western Pennsylvania soon known as Petrolia, prospectors framed that treasure, too, as a birthright passed to them, through Native guides, from a lost race. Puglionesi traces the fate of ancient petroglyphs that once adorned rock faces on the Susquehanna River, dynamited into pieces to make way for a hydroelectric dam. This act foreshadowed the flooding of Native lands around the country; over the course of the 20th century, almost every major river was dammed for economic purposes. And she explores the effects of the US nuclear program in the Southwest, which contaminated vast regions in the name of eternal wealth and security through atomic power. This promise rang hollow for the surrounding Native, Hispanic, and white

communities that were harmed, and even for some scientists. It also inspired nationwide resistance, uniting diverse groups behind a different vision of the future--one not driven by greed and haunted by ruin. This deeply researched work of narrative history traces the roots of American fantasies and fears in a national tradition of selective forgetting. Connecting the power of myths with the extraction of power from the land itself reveals the truths that have been left out and is an invaluable torch in the search for a way forward.

Animals, Work, and the Promise of Interspecies Solidarity

Kendra Coulter
2016-04-29 In this thought-provoking and innovative book, Kendra Coulter examines the diversity of work done with, by, and for animals. Interweaving human-animal studies, labor theories and research, and feminist political economy, Coulter develops a unique analysis of the accomplishments, complexities,

concept applies to all settings where health care is permanently or occasionally performed, such as home care by birth attendants. Definitions of health-care settings are proposed in Appendix 1. These Guidelines and the associated WHO Multimodal Hand Hygiene Improvement Strategy and an Implementation Toolkit (<http://www.who.int/gpsc/en/>) are designed to offer health-care facilities in Member States a conceptual framework and practical tools for the application of recommendations in practice at the bedside. While ensuring consistency with the Guidelines recommendations, individual adaptation according to local regulations, settings, needs, and resources is desirable. This extensive review includes in one document sufficient technical information to support training materials and help plan implementation strategies. The document comprises six parts.

production and processing. This important collection provides an authoritative review of the key issues affecting poultry meat quality in production and processing. The book begins by establishing consumer requirements for meat quality, before examining the influence of breeding and husbandry, and techniques for stunning and slaughter of poultry. Chapters 5 and 6 look at primary and secondary processing and Chapters 7, 8 and 9 discuss packaging, refrigeration and other preservation techniques. There are also chapters on microbial hazards and chemical residues in poultry. Quality management issues are reviewed in the final group of chapters, including shelf-life and spoilage, measuring quality parameters and ways of maintaining safety and maximising quality. Poultry meat processing and quality is an essential reference book for technical managers in the Poultry Industry and anyone engaged in teaching or

presents an account of an intellectual breakthrough in the study of rural society and agriculture. Its ten chapters, selected for their originality and synthesis from the colloquia of the Program in Agrarian Studies at Yale University, encompass various disciplines, diverse historical periods, and several regions of the world. The contributors' fresh analyses will broaden the perspectives of readers with interests as wide-ranging as rural sociology, environmentalism, political science, history, anthropology, economics, and art history. The ten studies recast and expand what is known about rural society and agrarian issues, examining such topics as poverty, subsistence, cultivation, ecology, justice, art, custom, law, ritual life, cooperation, and state action. Each contribution provides a point of departure for new study, encouraging deeper thinking across disciplinary boundaries and frontiers.

us make man in our image, after our likeness; and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth." -- Genesis 1:24-26 In this crucial passage from the Old Testament, God grants mankind power over animals. But with this privilege comes the grave responsibility to respect life, to treat animals with simple dignity and compassion. Somewhere along the way, something has gone wrong. In *Dominion*, we witness the annual convention of Safari Club International, an organization whose wealthier members will pay up to \$20,000 to hunt an elephant, a lion or another animal, either abroad or in American "safari ranches," where the animals are fenced in pens. We attend the annual International Whaling Commission conference, where the skewed politics of the whaling industry come to light, and the focus is on developing more whaling from

not more merciful, methods of harvesting "living marine resources." And we visit a gargantuan American "factory farm," where animals are treated as mere product and raised in conditions of mass confinement, bred for passivity and bulk, inseminated and fed with machines, kept in tightly confined stalls for the entirety of their lives, and slaughtered in a way that maximizes profits and minimizes decency.

Throughout *Dominion*, Scully counters the hypocritical arguments that attempt to excuse animal abuse: from those who argue that the Bible's message permits mankind to use animals as it pleases, to the hunter's argument that through hunting animal populations are controlled, to the popular and "scientifically proven" notions that animals cannot feel pain, experience no emotions, and are not conscious of their own lives. The result is eye opening, painful and infuriating, insightful and rewarding.

Dominion is a plea for human mercy, a

scathing attack on those who would dismiss animal activists as mere sentimentalists, and a demand for reform from the government down to the individual. Matthew Scully has created a groundbreaking work, a book of lasting power and importance for all of us.

Political Theory and Architecture Duncan Bell
2020-02-20 What can political theory teach us about architecture, and what can it learn from paying closer attention to architecture? The essays assembled in this volume begin from a common postulate: that architecture is not merely a backdrop to political life but a political force in its own right. Each in their own way, they aim to give countenance to that claim, and to show how our thinking about politics can be enriched by reflecting on the built environment. The collection advances four lines of inquiry, probing the connection between architecture and political regimes; examining how architecture can be constitutive of the political and

political realm; uncovering how architecture is enmeshed in logics of governmentality and in the political economy of the city; and asking to what extent we can think of architecture-tributary as it is to the flows of capital-as a partially autonomous social force. Taken together, the essays demonstrate the salience of a range of political theoretical approaches for the analysis of architecture, and show that architecture deserves a place as an object of study in political theory, alongside institutions, laws, norms, practices, imaginaries, and discourses.

Slaughterhouse Gail A.

Eisnitz 2009-09-25

Slaughterhouse is the first book of its kind to explore the impact that unprecedented changes in the meatpacking industry over the last twenty-five years — particularly industry consolidation, increased line speeds, and deregulation — have had on workers, animals, and consumers. It is also the first time ever that workers have

really taking place behind the closed doors of America's slaughterhouses. In this new paperback edition, author Gail A. Eisnitz brings the story up to date since the book's original publication. She describes the ongoing efforts by the Humane Farming Association to improve conditions in the meatpacking industry, media exposés that have prompted reforms resulting in multimillion dollar appropriations by Congress to try to enforce federal inspection laws, and a favorable decision by the Supreme Court to block construction of what was slated to be one of the largest hog factory farms in the country. Nonetheless, Eisnitz makes it clear that abuses continue and much work still needs to be done.

Drug Wars Curtis Marez 2004
Inaugurated in 1984, America's "War on Drugs" is just the most recent skirmish in a standoff between global drug trafficking and state power. From Britain's nineteenth-century Opium

of Colombia's drug cartels and their suppression by U.S.-backed military forces today, conflicts over narcotics have justified imperial expansion, global capitalism, and state violence, even as they have also fueled the movement of goods and labor around the world. In *Drug Wars*, cultural critic Curtis Marez examines two hundred years of writings, graphic works, films, and music that both demonize and celebrate the commerce in cocaine, marijuana, and opium, providing a bold interdisciplinary exploration of drugs in the popular imagination. Ranging from the writings of Sigmund Freud to pro-drug lord Mexican popular music, gangsta rap, and Brian De Palma's 1983 epic *Scarface*, *Drug Wars* moves from the representations and realities of the Opium Wars to the long history of drug and immigration enforcement on the U.S.-Mexican border, and to cocaine use and interdiction in South America, Middle Europe, and among American Indians.

juxtaposes official drug policy and propaganda with subversive images that challenge and sometimes even taunt government and legal efforts. As Marez shows, despite the state's best efforts to use the media to obscure the hypocrisies and failures of its drug policies-be they lurid descriptions of Chinese opium dens in the English popular press or Nancy Reagan's "Just Say No" campaign-marginalized groups have consistently opposed the expansion of state power that drug traffic has historically supported. Curtis Marez is assistant professor of critical studies at the University of Southern California School of Cinema-Television.

Healthy Eating, Healthy World J. Morris Hicks

2011-10-04 Imagine that the New York Times tomorrow released some amazing news. A health treatment has been discovered that literally cures most forms of heart disease. But not just that. This treatment has a dramatic impact on most of the world.

Westerners face, including cancer, obesity, autoimmune diseases, diabetes, osteoporosis, Alzheimer's, and many many others. And this treatment is so inexpensive to administer that two-thirds of the medical establishment can be shut down as no longer serving any useful function. It's really too much to believe, isn't it? But there's more. This treatment has miraculous implications for the environment. By applying this treatment, we can eliminate the largest source of global warming, and dramatically reduce the waste that is polluting our water supply. We'll also dramatically improve the health and animal population of our oceans and seas. And there's more. By applying this treatment, we'll dramatically increase the supply of arable land, lowering the cost food and allowing us to feed everyone on this planet. Starvation can become a thing of the past. And one last thing. This treatment also has enormous moral implications, almost

all of the pain and suffering we are inflicting on the animals, most of which is hidden away from view, but is morally repulsive to anyone exposed to this suffering. Now what if I told you that we don't have to wait for tomorrow's New York Times, that this treatment has been found, and that the amount of scientific data supporting the claims I just made is overwhelming. The "miracle" treatment is simple. It's eating a whole grain, plant-based diet. Skeptical? I'm not surprised. But by the end of this book you'll be exposed to the overwhelming amount of evidence that supports every claim made above. You'll also get to hear the counterarguments made by skeptics and you'll get to decide for yourself whether these claims are true. It's my hope that by the end of this book you'll be convinced and join our movement. You may just save your life and the planet in the bargain. This revolutionary book is *Healthy Eating -- Healthy World: Unleashing the Power of Plants*

based Nutrition by J. Morris Hicks, and it is the book that finally tackles all compelling reasons for adopting a plant-based diet -- from the environment to solving the world's hunger crisis. Additionally, T. Colin Campbell, acclaimed author of the bestselling book *The China Study*, provides a riveting foreword to *Healthy Eating -- Healthy World*. After reading this book, it'll be nearly impossible to ignore the truth: people were not meant to eat animals or animal products, and the time has come to stop. Chicken Steve Striffler 2007-06-01 From inside the chicken factory, a report on the real cost of chicken for farmers, workers, and consumers *Fully Automated Luxury Communism* Aaron Bastani 2020-06-16 A different kind of politics for a new kind of society--beyond work, scarcity and capitalism In the twenty-first century, new technologies should liberate us from work. on full employment, is instead the path to a world of liberty, luxury and happiness—for everyone. Technological advance will reduce the value of commodities—food, healthcare and housing—towards zero. Improvements in renewable energies will make fossil fuels a thing of the past. Asteroids will be mined for essential minerals. Genetic editing and synthetic biology will prolong life, virtually eliminate disease and provide meat without animals. New horizons beckon. In *Fully Automated Luxury Communism*, Aaron Bastani conjures a vision of extraordinary hope, showing how we move to energy abundance, feed a world of 9 billion, overcome work, transcend the limits of biology, and establish meaningful freedom for everyone. Rather than a final destination, such a society merely heralds the real beginning of history. The impact of disasters and crises on agriculture and food security: 2021 Food and Agriculture Organization of the United Nations <https://www.iafrr.org/> [via.ramtech.uri.edu](https://www.via.ramtech.uri.edu) on September 22, 2023 by Betty q Robertson

United Nations 2021-03-17 On top of a decade of exacerbated disaster loss, exceptional global heat, retreating ice and rising sea levels, humanity and our food security face a range of new and unprecedented hazards, such as megafires, extreme weather events, desert locust swarms of magnitudes previously unseen, and the COVID-19 pandemic.

Agriculture underpins the livelihoods of over 2.5 billion people - most of them in low-income developing countries - and remains a key driver of development. At no other point in history has agriculture been faced with such an array of familiar and unfamiliar risks, interacting in a hyperconnected world and a precipitously changing landscape. And agriculture continues to absorb a disproportionate share of the damage and loss wrought by disasters. Their growing frequency and intensity, along with the systemic nature of risk, are upending people's lives, devastating livelihoods,

food system. This report makes a powerful case for investing in resilience and disaster risk reduction - especially data gathering and analysis for evidence informed action - to ensure agriculture's crucial role in achieving the future we want.

Song of Kali Dan Simmons
2014-04-01 The World Fantasy Award winner by the author of the Hyperion Cantos and Carrion Comfort: An American finds himself encircled by horrors in Calcutta. Praised by Dean Koontz as "the best novel in the genre I can remember," Song of Kali follows an American magazine editor who journeys to the brutally bleak, poverty-stricken Indian city in search of a manuscript by a mysterious poet—but instead is drawn into an encounter with the cult of Kali, goddess of death. A chilling voyage into the squalor and violence of the human condition, this novel is considered by many to be the best work by the author of The Terror, who has been showered with accolades, including the Bram Stoker Award.

theory of general relativity. Few recognize how the Great War, the industrialized slaughter that bled Europe from 1914 to 1918, shaped Einstein's life and work. While Einstein never held a rifle, he formulated general relativity blockaded in Berlin, literally starving. He lost 50 pounds in three months, unable to communicate with his most important colleagues. Some of those colleagues fought against rabid nationalism; others were busy inventing chemical warfare—being a scientist trapped you in the power plays of empire. Meanwhile, Einstein struggled to craft relativity and persuade the world that it was correct. This was, after all, the first complete revision of our conception of the universe since Isaac Newton, and its victory was far from sure. Scientists seeking to confirm Einstein's ideas were arrested as spies. Technical journals were banned as enemy propaganda. Colleagues died in the trenches. Einstein was separated from his most crucial ally by barbed wire.

boats. This ally was the Quaker astronomer and Cambridge don A.S. Eddington who would go on to convince the world of the truth of relativity and the greatness of Einstein. In May of 1919, when Europe was still in chaos from the war, Eddington led a globe-spanning expedition to catch a fleeting solar eclipse for a rare opportunity to confirm Einstein's bold prediction that light has weight. It was the result of this expedition—the proof of relativity, as many saw it—that put Einstein on front pages around the world. Matthew Stanley's epic tale is a celebration of how bigotry and nationalism can be defeated, and of what science can offer when they are.

The Table Comes First Adam Gopnik 2011-10-25

Transplanted Canadian, New Yorker writer and author of *Paris to the Moon*, Gopnik is publishing this major new work of narrative non-fiction alongside his 2011 Massey Lecture. An illuminating, beguiling tour of the morals and manners of our present food manias, in search of eating's deeper truths, asking "Where do we go from here?" Never before have so many North Americans cared so much about food. But much of our attention to it tends towards grim calculation (what protein is best? how much?); social preening ("I can always score the last reservation at xxxxx"); or graphic machismo ("watch me eat this now"). Gopnik shows we are not the first food fetishists but we are losing sight of a timeless truth, "the table comes first": what goes on around the table matters as much to life as what we put on the table: families come together (or break apart) over the table, conversations from
