Financial Therapy Bradley T. Klontz 2014-09-10 Money-related stress dates as far back as concepts of money itself.

Formerly it may have waxed and waned in tune with the economy, but today more individuals are experiencing financial mental anguish and self-destructive behavior regardless of bull or bear markets, recessions or boom periods. From a fringe area of psychology, financial therapy has emerged to meet increasingly salient concerns. Financial Therapy is the first full-length guide to the field, bridging theory, practical methods, and a growing cross-disciplinary evidence base to create a framework for improving this crucial aspect of clients' lives. Its contributors identify money-based disorders such as compulsive buying, financial hoarding, and workaholism, and analyze typical early experiences and the resulting mental constructs ("money scripts") that drive toxic relationships with money. Clearly relating financial stability to larger therapeutic goals, therapists from varied perspectives offer practical tools for assessment and intervention, advise on cultural and ethical considerations, and provide instructive case studies. A diverse palette of research-based and practice-based models meets monetary mental health issues with well-known treatment approaches, among them: Cognitive-behavioral and solution-focused therapies. Collaborative relationship models. Experiential approaches. Psychodynamic financial therapy. Feminist and humanistic approaches. Stages of change and motivational interviewing in financial therapy. A text that serves to introduce and define the field as well as plan for its future, Financial Therapy is an important investment for professionals in psychotherapy and counseling, family therapy, financial planning, and social policy.

Transactional Analysis Approaches to Brief Therapy Keith Tudor 2002-02-05 Of all the approaches to therapy, Transactional Analysis (or TA) is arguably one of those most suited to time-limited work. At a time when short-term therapy is increasingly dominant as a form of practice, Transactional Analysis Approaches to Brief Therapy provides an insightful guide which both informs and challenges. Rather than a single theory, TA has developed as a group of four schools which share a common philosophy, but place different emphasis on what occurs during the therapeutic process. Written by therapists at the leading edge of developments in TA, the book presents and differentiates each of these four approaches. Through transcripts and commentaries, it shows how theory applies to practice, for example

Tom Type, Love at the Haven Stella Shaw 2022-05-04 It was never just about the bedroom. Life as an escort is Tom's kind of fun. His ambitions are simple: to enjoy himself, speak his mind, and finance his eccentric fashion habit. He's never found romance, security, or trust from anyone except his found family at the Haven Hotel, where the type of men he meets are passing strangers who hopefully tip well. Then on one hot, summer afternoon at the hotel, he has a steamy, delicious encounter with Mr Flash (aka Craig) and a whole new ambition opens up. Craig is a high-status banker, twice Tom's age, and infamous for his honest but blunt ways. The type of men he dates are socially acceptable, discreetly dressed, and well-behaved.. and Tom is none of that. But Craig knows what he wants, and that's more of the gorgeous, infuriating young man who gave him one of the most exciting hours of his life. The chemistry between them is hot and irresistible, and far more than a business transaction. But dating throws their lives into turmoil: a partnership between a fiercely independent street boy and a privately-educated businessman seems doomed from the start. When they attend a prestigious dinner together, Tom meets public disapproval and way too much formality, while Craig finds his whole career at risk from industrial espionage. They share core values, but is that enough? Two types of men, different everywhere except where it counts; in their hearts. Together they make their own rules.

Experimentation with Human Beings Jay Katz 1972-07-24 In recent years, increasing concern has been voiced about the nature and extent of human experimentation and its impact on the investigator, subject, science, and society. This casebook represents the first attempt to provide comprehensive materials for studying the human experimentation process. Through case studies from medicine, biology, psychology, sociology, and law—as well as evaluative materials from many other disciplines—Dr. Katz examines the problems raised by human experimentation from the vantage points of each of its major participants—investigator, subject, professions, and state. He analyzes what kinds of authority should be delegated to these participants in the formulation, administration, and review of the human experimentation process. Alternative proposals, from allowing investigators a completely free hand to imposing centralized governmental control, are examined from both theoretical and practical perspectives. The conceptual framework of Experimentation with Human Beings is designed to facilitate not only the analysis of such concepts as "harm," "benefit," and "informed consent," but also the exploration of the problems raised by man's quest for knowledge and mastery, his willingness to risk human life, and his readiness to delegate authority to professionals and rely on their judgment.

The New Good Life John Robbins 2010-05-25 How do you define the good life? For many, success is measured not by health and happiness but by financial wealth. But such a worldview overlooks the important things in life: personal contentment, family time, spirituality, and the health of the planet and those living on it. A preoccupation with money and possessions is not only unhealthy, it can also drain the true joy from life. In recent years, millions have watched their American Dreams go up in smoke. The international financial collapse, inflation, massive layoffs, and burgeoning consumer debt have left people in dire financial straits—including John Robbins, a crusader for planet-friendly food and lifestyle choices, who lost his entire savings in an investment scam. But Robbins soon realized that there was an upside to our collective financial downturn: Curtailed consumerism could lead us to reassess our lives and values. The New Good Life provides a philosophical and prescriptive path from conspicuous consumption to conscious consumption. Where the old view of success was measured by cash, stocks, and various luxuries, the new view will be guided by financial restraint and a new awareness of what truly matters. A passionate manifesto on finding meaning beyond money and status, this book delivers a sound blueprint for living well on less. Discover how to • create your own definition of success based on your deepest beliefs and life experience • alleviate depression, lower blood pressure, and stay fit with inexpensive alternatives for high-cost medications • develop a diet that promotes better health—and saves you money • plan for—and protect yourself from—future economic catastrophes • cut down on your housing and transportation costs • live frugally without deprivation • follow in the footsteps of real people who have effectively forged new financial identities The New Good Life provides much-needed hope and comfort in a time of fear and uncertainty. Here is everything you need to develop high-joy, low-cost solutions to life's challenges. Group Therapy for High-Conflict Divorce Margreet Visser 2021-03-30 The "No Kids in the Middle" (Kinderen uit de Knel) intervention programme addresses high-conflict divorce through a multi-family approach. This first English language edition contains descriptions of the therapeutic sessions, references to a homework book (van der Est et al.) for parents and their network, along with extra information about the theoretical foundations of the programme. The book starts with theoretical foundations and a summary of the scientific research behind the methodology before moving on to focus on the methodology of the intervention programme per session, with detailed descriptions of each therapeutic session. Through these session descriptions, the authors demonstrate how the theory of the methodology can be put into practice within a group setting. The methodology is also conveyed in such a way that the key pillars and themes are clear, with a best-practice framework clearly demonstrated. Yet at the same time, the authors leave room for customization depending on the actual clients and therapists, and for this framework to be built upon further. With this programme now practiced and studied throughout Europe, Group Therapy for High-Conflict Divorce and its methodology will act as a living framework to help continuously improve practice and research among professional therapists, while also appealing to social workers and legal professionals.
