[Developing Habits of Noticing in Literacy and Language Classrooms](#) Alyson Simpson 2019-08-15 Noticing is an essential aspect of professional expertise in teaching – a skill that draws on deep professional knowledge in ways that affect how teachers are aware of, respond to and meet the needs of their students. Being a ‘noticing teacher’ in the language and literacy classroom can make a real difference to students’ progress as readers and writers, to their literacy attainment and to their engagement with learning. This international, research-informed book is unique in its focus on literacy and language. The authors explore models and methods to embed both noticing and the development of teacher agency and grounded knowledge into teacher education programs and school practices. To further the professional knowledge and agency of ‘noticing teachers’, the authors argue that research, policy and the professional community need to understand how noticing skills can be woven into the policy and practice contexts of the literacy teacher’s work. [Developing Habits of Noticing in Literacy and Language Classrooms: Research and Practice across Professional Cultures](#) is designed to help teachers, researchers and school leaders think in new ways about how ‘noticing’ operates in the context of the literacy classroom and how it can be supported. Each chapter provides a valuable insight into how teachers learn from their students, in the course of teaching activities, to be responsive, analytical and inspirational.

**Engineering geology of the Sydney Region** P.J.N. Pells 2018-02-06 This book brings together in one place as much factual data as possible relating to the engineering geology of the Sydney Region, A huge amount of information resides in the files of various consulting and government organizations from the innumerable site investigations and construction projects in Sydney. This information brought together provides a data source that is the first point of reference for future investigations and construction projects. With the above object in mind subject headings were established based on the stratigraphic sequence of the Sydney Basin. Invitations were extended to potential authors with expertise and experience in these subjects and after some two years, the papers in this volume were produced. Engineering Geology of the Sydney Region is produced by a committee. As such it has the advantage of canvassing a broad range of opinion and experience. A data source has been produced for geotechnical engineers and engineering geologists working in or having a particular interest in the Sydney Region.

[Sexual Violence in Australia, 1970s-1980s](#) Lisa Featherstone 2021-07-28 This book explores sexual violence and crime in Australia in the 1970s and 1980s, a period of intense social and legal change. Driven by the sexual revolutions, second wave feminism, and ideas of the rights of the child, there was a new public interest in the sexual assault of women and children. Sexual abuse was studied, surveyed and discussed more than ever before in Australian society. Yet, despite this, there remained substantial inaction, by

government, from community and on the part of individuals. This book examines several difficult questions of our recent history: why did Australia not act more firmly to eradicate rape and child sexual abuse? What prevented our culture from looking seriously at trauma? How did we fail to protect victim-survivors? Rich in social and legal history, this study takes readers into the world of victims of sexual crime, and into the wider community that had to deal with sexual violence. At the core of this book is the question that resonates deeply right now: why does sexual violence appear seemingly insurmountable, despite significant change?

[International Perspectives on the Teaching of Literature in Schools](#) Andrew Goodwyn 2017-08-31 Literature teaching remains central to the teaching of English around the world. This edited text brings together expert global figures under the banner of the International Federation for the Teaching of English (IFTE). The book captures a state-of-the-art snapshot of leading trends in current literature teaching, as well as detailing predicted trends for the future. The expert scholar and leading teacher contributors, coming from a wide range of countries with fascinatingly diverse approaches to literature teaching, cover a range of central and fundamental topics: literature and diversity; digital literatures; pedagogy and reader response; mother tongues; the business of reading; publishers, adolescent fiction and censorship; assessing responses to literature; the changing definitions of literature and multimodal texts. The collection reviews the consistently important place of literature in the education of young people and provides international evidence of its enduring value and contribution to education, resisting the functionalist and narrowly nationalist perspectives of misguided government authorities. [International Perspectives on the Teaching of Literature in Schools](#) will be of value to researchers, PhD students, literature scholars, practitioners, teacher educators, teachers and all those in the extensive academic community interested in English and literacy around the world.

[International Encyclopedia of Education](#) 2009-04-17 The field of education has experienced extraordinary technological, societal, and institutional change in recent years, making it one of the most fascinating yet complex fields of study in social science. Unequaled in its combination of authoritative scholarship and comprehensive coverage, [International Encyclopedia of Education](#), Third Edition succeeds two highly successful previous editions (1985, 1994) in aiming to encapsulate research in this vibrant field for the twenty-first century reader. Under development for five years, this work encompasses over 1,000 articles across 24 individual areas of coverage, and is expected to become the dominant resource in the field. Education is a multidisciplinary and international field drawing on a wide range of social sciences and

humanities disciplines, and this new edition comprehensively matches this diversity. The diverse background and multidisciplinary subject coverage of the Editorial Board ensure a balanced and objective academic framework, with 1,500 contributors representing over 100 countries, capturing a complete portrait of this evolving field. A totally new work, revamped with a wholly new editorial board, structure and brand-new list of meta-sections and articles Developed by an international panel of editors and authors drawn from senior academia Web-enhanced with supplementary multimedia audio and video files, hotlinked to relevant references and sources for further study Incorporates ca. 1,350 articles, with timely coverage of such topics as technology and learning, demography and social change, globalization, and adult learning, to name a few Offers two content delivery options - print and online - the latter of which provides anytime, anywhere access for multiple users and superior search functionality via ScienceDirect, as well as multimedia content, including audio and video files

**Research Methods in Law** Dawn Watkins 2013-07-18 The aim of this book is to explain in clear terms some of the main methodological approaches in legal research. This is an edited collection, with each chapter written by specialists in their field, researching in a variety of jurisdictions. Each contributor addresses the topic of "lay decision makers in the legal system" from one particular methodological perspective, explaining how they would approach the issue and discussing why their particular method might, or might not, be suited to this topic. In asking all contributors to focus on the same topic, the editors have sought to provide a common link throughout the text, thereby providing the reader with an opportunity to draw comparisons between methods with relative ease. In light of the broad geographical range of its contributors, the book is aimed at an international readership. This book will be of particular interest to PhD students in law, but it will also be of use to undergraduate dissertation students in law, LL.M Research students as well as prospective PhD students and early year researchers.

**The Fiftieth Gate** Mark Raphael Baker 2017-07-03 What right did I possess, as a child of survivors, to recreate an account of the Holocaust as if I was there? In writing *The Fiftieth Gate*, Mark Baker describes a journey from despair and death towards hope and life; it is the story of a son who enters his parents' memories and, inside the darkness, finds light. In his evocative prose, Baker takes us to this place of horror, and then brings us back to reflect on these events and remember: 'Never again'. Across the silence of fifty years, Baker and his family travel from Poland and Germany to Jerusalem and Melbourne, as the author struggles to uncover the mystery of his parents' survival: his father Yossel was imprisoned in concentration

camps and his mother Genia was forced into hiding after the Jews of her village were murdered. Twenty years on from its first publication, *The Fiftieth Gate* remains an extraordinary book. It has become a classic and has now sold over 70,000 copies. In Baker's new introduction, he recalls his motivations for writing this important memoir, and highlights how the testimonial culture in Holocaust studies has spread to awareness of other genocides and our responsibility (and failure) to prevent them. As well as *The Fiftieth Gate*, A Journey Through Memory, a seminal book on his parents' experience during the Holocaust, Mark Raphael Baker has written a compelling memoir, *Thirty Days, A Journey to the End of Love*, about the recent death of his wife. He is Director of the Australian Centre for Jewish Civilisation and Associate Professor of Holocaust and Genocide Studies in the School at Monash University, Melbourne. 'Heartrending and beautiful...This simply written, subtly complex narrative is instantly recognisable as a masterpiece, and the reader is rewarded by the light it sheds.' Age 'Combining precise historical research and poetic eloquence, Mark Baker's *The Fiftieth Gate* remains the gold standard of second generation Holocaust memoirs on the occasion of its twentieth anniversary edition.' Christopher R. Browning 'Baker does with memory, what Rembrandt does with light. He uses it to model, to imagine, to illuminate, to astonish.' Philip Adams *English (Standard) Paper 2* 2014

**Knowledge-building** Karl Maton 2015-10-08 Education and knowledge have never been more important to society, yet research is segmented by approach, methodology or topic. Legitimation Code Theory or 'LCT' extends and integrates insights from Pierre Bourdieu and Basil Bernstein to offer a framework for research and practice that overcomes segmentalism. This book shows how LCT can be used to build knowledge about education and society. Comprising original papers by an international and multidisciplinary group of scholars, Knowledge-building offers the first primer in this fast-growing approach. Through case studies of major research projects, Part I provides practical insights into how LCT can be used to build knowledge by: - enabling dialogue between theory and data in qualitative research - bringing together quantitative and qualitative methodologies in mixed-methods research - relating theory and practice in praxis - conducting interdisciplinary studies with systemic functional linguistics Part II offers a series of studies of pressing issues facing knowledge-building in education and beyond, encompassing: - diverse subject areas, including physics, English, cultural studies, music, and design - educational sites: schooling, vocational education, and higher education - practices of research, curriculum, pedagogy and assessment - both education and informal learning contexts, such as museums and masonic lodges Carefully sequenced and interrelated, these chapters form a coherent collection that gives a unique insight into one of the most thought-provoking and innovative ways of building knowledge about knowledge-building in education and society to have emerged this century. This book is essential reading for all serious students and scholars of education, sociology and linguistics.
