Sustainable Winter Road Operations Xianming Shi 2018-03-27 The first and only comprehensive guide to best practices in winter road operations Winter maintenance operations are essential to ensure the safety, mobility, and productivity of transportation systems, especially in cold-weather climates, and responsible agencies are continually challenged to provide a high level of service in a fiscally and environmentally responsible manner. Sustainable

Winter Road Operations bridges the knowledge gaps, providing the first up-to-date, authoritative, single-source overview and guide to best practices in winter road operations that considers the triple bottom line of sustainability.

With contributions from experts in the field from around the world, this book takes a holistic approach to the subject. The authors address the many negative impacts on regional economies and the environment of poorly planned

and inadequate winter road operations, and they make a strong case for the myriad benefits of environmentally sustainable concepts and practices. Best practice applications of materials, processes, equipment, and associated

technologies and how they can improve the effectiveness and efficiency of winter operations, optimize materials usage, and minimize cost, corrosion, and environmental impacts are all covered in depth. Provides the first up-to-date, authoritative and comprehensive overview of best practices in sustainable winter road operations currently in use around the world Covers materials, processes, equipment, and associated technologies for sustainable winter road

operations Brings together contributions by an international all-star team of experts with extensive experience in designing, implementing, and managing sustainable winter road operations Designed to bring professionals involved in transportation and highway maintenance and control up to speed with current best practice Sustainable Winter Road Operations is essential reading for maintenance professionals dealing with snow and ice control operations on

highways, motorways and local roads. It is a valuable source of information and guidance for decision makers, researchers, and engineers in transportation engineering involved in transportation and highway maintenance. And it is an ideal textbook for advanced-level courses in transportation engineering.

To Be A Water Protector Winona LaDuke 2020-12-01T00:00:00Z Winona LaDuke is a leader in cultural-based sustainable development strategies, renewable energy, sustainable food systems and Indigenous rights. Her new book,

To Be a Water Protector: Rise of the Windigoo Slayers, is an expansive, provocative engagement with issues that have been central to her many years of activism. LaDuke honours Mother Earth and her teachings while detailing global, Indigenous-led opposition to the enslavement and exploitation of the land and water. She discusses several elements of a New Green Economy and outlines the lessons we can take from activists outside the US and

Canada. In her unique way of storytelling, Winona LaDuke is inspiring, always a teacher and an utterly fearless activist, writer and speaker. Winona LaDuke is an Anishinaabekwe (Ojibwe) enrolled member of the Mississippi Band Anishinaabeg who lives and works on the White Earth Reservation in Northern Minnesota. She is executive director of Honor the Earth, a national Native advocacy and environmental organization. Her work at the White Earth Land

Recovery Project spans thirty years of legal, policy and community development work, including the creation of one of the first tribal land trusts in the country. LaDuke has testified at the United Nations, US Congress and state

hearings and is an expert witness on economics and the environment. She is the author of numerous acclaimed articles and books.

Guide to Performance-Based Road Maintenance Contracts Asian Development Bank 2018-04-01 Road asset management is one of the top priorities of the Central Asia Regional Economic Cooperation (CAREC) Transport and Trade Facilitation Strategy 2020. The implementation of performance-based road maintenance contracts (PBCs)—an essential element of road asset management—promotes effective and efficient maintenance of road networks.

Well-designed PBCs keep roads in predefined good condition at relatively low cost. This guide aims to help policy makers in CAREC member countries understand and implement PBCs. After a brief history of the development of PBCs, it discusses the various types of PBCs and their relative advantages and disadvantages. It highlights PBC implementation in selected developed, developing, and transitional countries, including CAREC member countries, to illustrate best practices.

Improving Disaster Resilience and Mitigation - IT Means and Tools Horia-Nicolai Teodorescu 2014-09-08 The focus of this volume is comprised of the fundamentals, models, and information technologies (IT) methods and tools for disaster prediction and mitigation. A more detailed list of topics includes mathematical and computational modeling of processes leading to or producing disasters, modeling of disaster effects, IT means for disaster mitigation, including data mining tools, knowledge-based and expert systems for use in disaster circumstances, GIS-based systems for disaster prevention and mitigation and equipment for disaster-prone areas. A specific type or class of disasters (natural or human-made), however will not be part of the main focus of this work. Instead, this book was conceived to offer a comprehensive, integrative view on disasters, seeking to determine what various disasters have in common. Because disaster resilience and mitigation involve humans, societies and cultures, not only technologies and economic models, special attention was paid in this volume to gain a comprehensive view on these issues, as a foundation of the IT tool design.

International Handbook on Public-Private Partnership Graeme A. Hodge 2010-11-30 Public Private Partnerships (PPPs) promise much and present an exciting policy option. Yet as this Handbook reveals there is still much debate about the meaning of partnership, and the degree to which potential advantages are in fact being delivered. In this timely Handbook, leading scholars from around the world explore the challenges presented by infrastructure PPPs, and contemplate what lies ahead as governments balance the need to provide innovative new infrastructure against the requirement for good public governance. This Handbook builds on a range of exciting theoretical lenses that span several disciplinary boundaries. It presents innovative insights and informed perspectives from an international base of empirical evidence. This essential Handbook will prove an invaluable reference work for academics, advanced post-graduate students and commentators of PPPs, as well as professionals, infrastructure regulators and government policy advisors.

Cinema Samuel Kaye 2020-12 Daniel Day Lewis, Tilda Swinton, Kate Winslet and Alan Rickman star in Cinema, a novel that explores the hitherto unrecognized relationships between acting, writing, performance, being, office politics, restructures, and corporate thinking about new ways of working. Nick Clement, former small-time circus impresario, is resigned to his existence in a valueless bureaucracy where he learns the new languages of activity-based working, collaborative spaces and cross-functional engagement. Clement and his new colleague, Claire, are tasked by the company with undertaking a whole-of-business analysis of where operational improvements can be made. In the face of this opportunity to demonstrate his executive potential, Clement's life takes a turn when he meets Claire's film director boyfriend, James McNeil. McNeil has written a screenplay of such overwhelming complexity and beauty it seems it could never be realized. The screenplay is picked up and financed by a well-established and ambitious English film producer, who is able, because of the ground-breaking nature of the work, to engage four of the finest actors of their generation to commit to the project. There is one role in the cast that is unable to be filled, that of Friedrich Engels, the great comrade of Daniel Day Lewis' Karl Marx. Nick Clement is, against his better judgment, thrown into a film production that will change the course of cinema forever. Cinema will take you to Sydney, London, the Sachsenwald Forest outside Hamburg, and Los Angeles as it explores the birth of Communism, Germanic-Gypsy history, and an invisible writing that foretold a great literature of the future. It will take you across the Atlantic in a medieval replica sailing boat hand-made by the the most admired actor of the last 40 years. In essence, Cinema outlines a never-ending performative process of being.

Gravel Roads Ken Skorseth 2000 The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road

maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.
