**State Schooling and the Reproduction of Social Inequalities** Sharon Jones

2022-12-30 This book critically explores the role of state schooling in the reproduction of social class inequalities in the United Kingdom. By uniquely combining critical ethnographic methods with participatory and visual research, it foregrounds the experiences and recollections of working-class adults in relation to their past schooling. Drawing upon her own lived experiences, Jones theorises the experiences of her participants using an analysis of Marxist, Bordieuan, and Freirean frameworks to uncover relations of power and illustrate how schooling has reduced individual agency and sustained lived inequalities. By creating space for a Visual Intervention within Critical Ethnography (VICE) alongside her analysis of class and society, Jones successfully illuminates that working class struggles are not permanent, and that agency can be activated. The book also addresses an important need by centering research from the lived educational experiences of the working-class, and in particular, working-class adults. Making a unique theoretical and methodological contribution using an innovative combined methodology approach, the text ultimately highlights the potential of empowering disadvantaged individuals by raising critical consciousness. Though it is focused on the experiences of adults, this book has important understandings for all sectors of education and will be of interest to academics, researchers, and students interested in the sociology of education, research methods in education, social inequality, social class, and education politics.

*Decolonising African University Knowledges, Volume 1* Amasa P. Ndofirepi 2022-10-14 This timely work investigates the possibility of unyoking and decolonising African university knowledges from colonial relics. It claims that academics from socially, politically, and geographically underprivileged communities in the South need to have their voices heard outside of the global power structure. The book argues that African universities need a relevant curriculum that is related to the cultural and environmental experiences of diverse African learners in order to empower themselves and transform the world. It is written by African scholars and is based on theoretical and practical debates on the epistemological complexities affecting and afflicting diversity in higher education in Africa. It examines who are the primary custodians of African university knowledges, as well as how this relates to forms of exclusion affecting women, the differently abled, the rural poor, and ethnic minorities, as well as the significance of the Fourth Industrial Revolution in the future of African universities. The book takes an epistemological approach to university teaching and learning, addressing issues such as decolonization and identity, social closure and diversity disputes, and the obstacles that come with the neoliberal paradigm. The book will be necessary reading for academics, scholars, and postgraduate students in the fields of Sociology of Education, decolonising education, Inclusive Education, and Philosophy of Education, as it resonates with existing discourses.

**Beyond the Digital Divide** Petr Lupač 2018-09-24 This book advances the understanding of the relationship between social inequality and Internet use by

bringing forth a new, contextual approach. It encourages a rethinking of the information society theory, information policies, and the role of social science in the process of informatization.

*Key Issues in Health and Social Care* Adam Barnard 2010-10-04 Key Themes in Health and Social Care is a learning resource for students in health and social care. It provides an overview of foundational issues and core themes in the field and introduces key areas of debate, moving from an introductory level to in-depth discussion as the book progresses. Divided into three parts: the first part sets the scene, addressing introductory psychology and sociology, social policy, equality and diversity, skills for practice, and working with people the second part considers key themes such as the contribution of philosophy and politics; criminal justice; management of services; the relationship between place and wellbeing; research in health and social care; theories of counselling; housing and the built environment the third part looks at discrete areas of practice such as mental health; substance abuse, protection work; health promotion; disability studies; working with men; child welfare and public responsibility. Each chapter begins with an outline of the content and learning outcomes and includes reflective exercises to allow students to reflect on what they have read, review their learning and consolidate their understanding. Time-pressed readers wanting to 'dip into' the book for relevant areas can do so but, read from cover to cover, the book provides a comprehensive introduction to the key areas of contemporary health and social care practice. It will be particularly helpful for students undertaking health and social care undergraduate and foundation degrees.

**Reframing Prostitution** N. Persak 2014-07-07 Prostitution has always fascinated the public and bewildered policy makers. Reframing Prostitution explores several aspects of this multidimensional phenomenon, examining different ways in which prostitution is and was being practised in different places and different times, best practices in the regulation of prostitution as well as wider social and psychological issues, such as the construction of prostitution as incivility or of prostitutes as a socially problematic group or as victimised individuals. The book also addresses normative questions with respect to policy making, unmasking the purposes behind certain societal reactions towards prostitution as well as proposing innovative solutions that could reconcile societal fears of exploitation and abuse while meeting the rights and needs of individuals voluntarily involved in prostitution. With contributions across social science disciplines, this international collection presents a valuable discussion on the importance of empirical studies in various segments of prostitution, highlights social contexts around it and challenges regulatory responses that frame our thinking about prostitution, promoting fresh debate about future policy directions in this area.

**Introduction to Sociology** Anthony Giddens 2018 Authoritative coverage, award-winning media, unbeatable price

**Fantasy, Online Misogyny and the Manosphere** Jacob Johanssen 2021-10-22 This book presents the first in-depth study of online misogyny and the manosphere from a psychoanalytic perspective. The author argues that the men of the manosphere

present contradictory thoughts, desires and fantasies about women which include but also go beyond misogyny. They are in a state of dis/inhibition: torn between (un)conscious forces and fantasies which erupt and are defended against. Dis/inhibition shows itself in self-victimization and defensive apathy as well as toxic agency and symbolic power and expresses itself in desire for and hatred of other bodies. The text draws on the psychoanalytic thinkers Klaus Theweleit, Elisabeth Young-Bruehl, Jessica Benjamin and Wilhelm Reich to present detailed analyses of the communities within the so-called manosphere, including incels, Men Going Their Own Way (MGTOW), alt-right YouTubers and NoFap users. Drawing on wider discussions about the status of sexuality in contemporary neoliberal technoculture since the sexual revolution of the late 1960s, it illuminates how sexuality, racism and images of the white male body shape the fantasies and affects of many men on the internet and beyond. Integrating a unique theoretical framework to help understand how today's increase in online misogyny relates to the alt-right and fascism, *Online Misogyny and the Manosphere* is an important resource for academics in a variety of fields including psychoanalysis, media and communication studies, internet studies, masculinity research and more.

*Understanding Vulnerability* Vanessa Heaslip 2013-07-29 The notion of vulnerability is critical to person-centred and high-quality nursing and healthcare practice, and underpins all nursing education. *Understanding Vulnerability: a Nursing and Healthcare Approach* focuses on vulnerability experienced every day by patients and clients in healthcare, and provides clear and supportive guidance to nurses and other healthcare practitioners on protecting and caring for vulnerable patients. Taking a fresh, critical and reflective perspective that reflects current trends towards the promotion of equality and acknowledges everyone's vulnerability, this book is essential reading for all nursing and healthcare students, as well as healthcare practitioners who are committed to providing person-centred care.

Special features: •One of the first books to address the issue of vulnerability from a nursing and healthcare perspective •Written by a group of experienced professionals, academics and educationalists with both educational and research expertise in the exploration of vulnerability •Includes narratives, perspectives and case studies, illustrating and bringing to life the issues within the book

In this edition of *Counselling and Therapy* the following contents were covered: Definitions of counselling and therapy Counselling principles and theories Gender-based violence Self-efficacy and self-esteem Basic counselling communication skills

*The Sociology of Disability and Inclusive Education* Madeleine Arnot 2013-09-13 Len Barton's intellectual and practical contribution to the sociology of disability and education is highly significant and widely known. The leading scholars in this collection, including his long term collaborators, offer both a celebration and a reassessment of this contribution, addressing the challenge that the social model of disability has presented to dominant medicalised concepts, categories and practices, and their power to define the identity and the lives of others. At the same time the authors build upon some of the key themes that are woven through Len Barton's work, such as his call for a 'politics of hope'. This collection explores a wide range of topics, including: difference as a field of political struggle the relationship of disability studies, disabled people and their struggle for

inclusion radical activism: organic intellectuals and the disability movement discrimination, exclusion and effective change inclusive education the 'politics of hope', resilience and transformative actions universal pedagogy, human rights and citizenship debates. The *Sociology of Disability and Inclusive Education* highlights Len Barton's humane vision of academic work, of the nature of an inclusive and non-discriminatory society, of the role of an education system which addresses the rights, and potential of all participants. It indicates how such a society could be achieved through the principles of social inclusion, human rights, equity and social justice. This book was originally published as a special issue of the *British Journal of Sociology of Education*.

**Sociology** David M. Newman 2009-12-08 The Eighth edition of David Newman's *Sociology: Exploring the Architecture of Everyday Life* once again invites students into the world of sociological thought. Sociology encourages students to think less about the next test and more about how the subject applies to their everyday lives. In addition to updated coverage and fresh examples, this edition features revamped Micro-Macro Connections that have been even further honed to help students understand the link between individual lives and the structure of society.

*Social and Community Development* John Eversley 2018-11-02 *Social and Community Development* is an essential introduction to the subject for students, potential practitioners, and activists interested in community action and emancipatory social change. It reflects on the underlying principles of development: what development is, why it is promoted and the implications for practice, indicating potential strategies and goals.

**Sociology, Work and Industry** Tony Watson 2002-09-11 First published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.

*Discourses of Globalisation and Education Reforms* Joseph Zajda 2022-05-17 This book focuses on discourses of effective learning environments globally for reducing discrimination in schools. It offers innovative ideas concerning the future directions that education and policy reforms could take, in order to promote equality, social justice, and access to quality of education for all. The chapters offer a timely analysis of current issues affecting schooling and strategies for creating effective learning environments globally for overcoming discriminations in schools. It is argued that that one of the most significant variables in creating effective learning environments for reducing classroom discrimination is the student's cultural identity, the self-concept and self-esteem. The next variables influencing students' learning environment are motivational strategies, self-regulated learning, and students' active engagement in constructivist learning. This book contributes in a very scholarly way, to a more holistic understanding of the nexus between globalisation, comparative education research and education reforms for reducing discrimination. It will be beneficial for a broad spectrum of users, including policy-makers, academics, graduate students, education policy researchers, administrators, and practitioners.

*The Palgrave Encyclopedia of Urban and Regional Futures* Robert C. Brears 2023-01-13 While urban settlements are the drivers of the global economy and centres of learning, culture, and innovation and nations rely on competitive dynamic regions for their economic, social, and environmental objectives, urban centres and regions face a myriad of challenges that impact the ways in which people live and work, create wealth, and interact and connect with places. Rapid urbanisation is resulting in urban sprawl, rising emissions, urban poverty and

high unemployment rates, housing affordability issues, lack of urban investment, low urban financial and governance capacities, rising inequality and urban crimes, environmental degradation, increasing vulnerability to natural disasters and so forth. At the regional level, low employment, low wage growth, scarce financial resources, climate change, waste and pollution, and rising urban peri-urban competition etc. are impacting the ability of regions to meet socio-economic development goals while protecting biodiversity. The response to these challenges has typically been the application of inadequate or piecemeal solutions, often as a result of fragmented decision-making and competing priorities, with numerous economic, environmental, and social consequences. In response, there is a growing movement towards viewing cities and regions as complex and sociotechnical in nature with people and communities interacting with one another and with objects, such as roads, buildings, transport links etc., within a range of urban and regional settings or contexts. This comprehensive MRW will provide readers with expert interdisciplinary knowledge on how urban centres and regions in locations of varying climates, lifestyles, income levels, and stages development are creating synergies and reducing trade-offs in the development of resilient, resource-efficient, environmentally friendly, liveable, socially equitable, integrated, and technology-enabled centres and regions.

*Sport in a Changing World* Howard L. Nixon 2015-11-30 In a stressful, turbulent world, sport can be an escape from reality. Yet sport actually mirrors the issues and problems of our world today, bearing the imprint of powerful forces of social change. This book offers a sociological perspective for seeing and understanding the place of sport in society and how it is affected by big business and by demographic, cultural, organization, economic, political, and technological change. Nixon writes vividly of the making and unmaking of heroes and celebrities. Throughout he shows how the combined influence of networks of major sports organizations, media corporations, and corporate sponsors is shaping sport around the world.

African Perspectives on Religion and Climate Change Ezra Chitando 2022-05-13 This book interrogates the contributions that religious traditions have made to climate change discussions within Africa, whether positive or negative. Drawing on a range of African contexts and religious traditions, the book provides concrete suggestions on how individuals and communities of faith must act in order to address the challenge of climate change. Despite the fact that Africa has contributed relatively little to historic carbon emissions, the continent will be affected disproportionately by the increasing impact of anthropogenic climate change. Contributors to this book provide a range of rich case studies to investigate how religious traditions such as Christianity, Hinduism, Islam, and indigenous faiths influence the worldviews and actions of their adherents. The chapters also interrogate how the moral authority and leadership provided by religion can be used to respond and adapt to the challenges posed by climate change. Topics covered include risk reduction and resilience, youth movements, indigenous knowledge systems, environmental degradation, gender perspectives, ecological theories, and climate change financing. This book will be of interest to scholars in diverse fields, including religious studies, sociology, political science, climate change and environmental humanities. It may also benefit practitioners involved in solving community challenges related to climate change.

**Sociology** Anthony Giddens 2006 This updated edition provides an ideal teaching text for first-year university and college courses.

**Sociology and Social Work** Jo Cunningham 2008-03-17 Sociological perspectives and

their application to social work are an inherent part of the QAA benchmark statements in the social work degree. In addition, graduates must understand how sociological perspectives can be used to dissect societal and structural influences on human behaviour at individual, group and community levels. This title answers the need for a clear, core text which integrates the areas of sociology and social work. Carefully constructed to be accessible to beginners in the discipline, it links sociological concepts, debates and theories to subject benchmarks, social work occupational standards and codes of practice.

**Tourism, Tourists and Society** Richard Sharpley 2018-05-01 *Tourism, Tourists and Society* provides a broad introduction to the inter-relationship between tourism and society, making complex sociological concepts and themes accessible to readers from a non-sociological academic background. It provides a thorough exploration of how society influences or shapes the behaviours, motivations, attitudes and consumption of tourists, as well as the tourism impacts on destination societies. The fifth edition has been fully revised and updated to reflect recent data, concepts and academic debates: • New content on: mobilities paradigm and the emotional dimension of tourist experiences. • New chapter: *Tourism and the Digital Revolution*, looking at the ways in which the Internet and mobile technology transform both tourist behaviour and the tourist experience. • New end-of-chapter further reading and discussion topics. Accessible yet critical in style, this book offers students an invaluable introduction to tourism, tourists and society.

*Essentials of Sociology* Anthony Giddens 2017 With a combination of up-to-the-minute examples, cutting-edge research, and the latest available data, *Essentials of Sociology* gets students thinking sociologically about what they're seeing in the news and on their screens. Highlighting the macro social forces at work in our everyday lives, the authors move students beyond their individual experiences and cultivate their sociological imaginations. Innovative pedagogy promotes active reading and helps students master core sociological concepts. This strong in-text pedagogical program is now supported by InQuizitive, Norton's new formative, adaptive learning tool.

*Leadership for Intellectual Disability Service* Elizabeth A. Curtis 2019-04-11 Intellectual disability (ID), once called mental retardation, is characterized by below-average intelligence or mental ability and a lack of skills necessary for day-to-day living. People with intellectual disabilities can and do learn new skills, but they learn them slowly. The proposed book argues for alternative and innovative approaches to leadership in intellectual disability service provision. It does this in the light of service scandals including Winterborne View (UK), Oswald D. Heck (USA), Aras Attracta (Ireland) and many others. The book will explore the failed leadership issues underpinning such debacles and then examine how the context for intellectual disability service provision has changed. It will then propose alternative models for service leadership that are contiguous with the changed landscape, ending with exemplary vignettes outlining situations where such innovative change is happening.

*The Sociology of Higher Education* Miriam David 2013-09-13 *The Sociology of Higher Education: Reproduction, Transformation and Change in a Global Era* provides an exciting and conceptually rich approach to the sociology of higher education. It offers innovative perspectives on the future of universities within the new and emerging research sub-field of the sociology of global higher education. The twenty-first century has witnessed wide-ranging structural and ideological transformations in higher education which have created both a sense of opportunity, as well as crisis and loss in the urgent debates around the

legitimate roles of the university in the 21st century. The chapters represent a diverse and vibrant field, illustrating a sociological imagination and a dynamic engagement with the key challenges facing higher education, and confirming continuing inequalities through internationalisation. This book is comprised of a broad selection of articles originally published in the British Journal of Sociology of Education.

*Sociology* Anthony Giddens 2009 This edition incorporates many new materials.

**New Directions in the Sociology of Human Rights** Patricia Hynes 2016-03-23 New Directions in the Sociology of Human Rights is a contribution to both sociology and to human rights research, particularly where these are directed towards challenging power relations and inequalities in contemporary societies. It expands and develops the sociology of human rights as a sub-field of sociology and interdisciplinary human rights scholarship. The volume suggests new directions for the use of social and sociological theories in the analysis of issues such as torture and genocide and addresses a number of themes which have not previously been a sustained focus in the sociology of human rights literature. These range from climate change and the human rights of soldiers, to corporate social responsibility and children's rights in relation to residential care. The collection is thus multi-dimensional, examining a range of specific empirical contexts, and also considering relationships between sociological analysis and human rights scholarship and activism. Hence in a variety of ways it points the way for future analyses, and also for human rights activism and practices. It is intended to widen our field of vision in the sociology of human rights, and to spark both new ideas and new forms of political engagement. This book was published as a special issue of The International Journal of Human Rights.

**Introduction to Sociology 2e** Heather Griffiths 2017-12-31 Introduction to Sociology 2e adheres to the scope and sequence of a typical, one-semester introductory sociology course. It offers comprehensive coverage of core concepts, foundational scholars, and emerging theories, which are supported by a wealth of engaging learning materials. The textbook presents detailed section reviews with rich questions, discussions that help students apply their knowledge, and features that draw learners into the discipline in meaningful ways. The second edition retains the book's conceptual organization, aligning to most courses, and has been significantly updated to reflect the latest research and provide examples most relevant to today's students. In order to help instructors transition to the revised version, the 2e changes are described within the preface. The images in this textbook are grayscale. Authors include: Heather Griffiths, Nathan Keirns, Eric Strayer, Susan Cody-Rydzewski, Gail Scaramuzzo, Tommy Sadler, Sally Vyain, Jeff Bry, Faye Jones

**Socialising Tourism** Freya Higgins-Desbiolles 2021-07-29 Once touted as the world's largest industry and also a tool for fostering peace and global understanding, tourism has certainly been a major force shaping our world. The recent COVID-19 crisis has led to calls to transform tourism and reset it along more ethical and sustainable lines. It was in this context that calls to "socialise tourism" emerged (Higgins-Desbiolles, 2020). This edited volume builds on this work by employing the term Socialising Tourism as a broad conceptual focal point and guiding term for industry, activists and academics to rethink tourism for social and ecological justice. Socialising Tourism means reorienting travel and tourism based on the rights, interests, and safeguarding of traditional ecological and cultural knowledges of local peoples, communities and living landscapes. This means making tourism work for the public good and taking seriously the idea of

putting the social and ecological before profit and growth as the world re-emerges from the COVID-19 pandemic. This is an essential first step for tourism to be made accountable to the limits of the planet. Concepts discussed include Indigenous culture, toxic tourism, a "theory of care", dismantling whiteness, decolonial tourism and animal oppression, among others, all in the context of a post-COVID-19 world. This will be essential reading for all upper-level students, academics and policymakers in the field of tourism. The Introduction of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license available at <http://www.taylorfrancis.com/books/9781003164616>

**Urban Eco-Communities in Australia** Liam Cooper 2018-06-28 This book offers one of the first detailed anthropological studies of emergent ecotopianism in urban contexts. Engaging directly with debates on urbanisation, sustainability and utopia, it presents two detailed ethnographic case studies of inner urban Australian eco-communities in Adelaide and Melbourne. These novel responses to the ecological crisis – real social laboratories that attempt to manifest a vision of the 'eco-city' in microcosm – offer substantial new insights into the concept and creation of sustainable urban communities, their attempts to cultivate ways of living that are socially and ecologically nourishing, and their often fraught relationship to the capitalist city beyond. These studies also suggest the opportunities and limitations of moving beyond demonstration projects towards wider urban transformation, as well as exposing the problems of accessibility and affordability that thwart further urban eco-interventions and the ways that existing projects can exacerbate issues of gentrification and privilege in a socially polarised city. Amidst the challenges of the capitalist city, climate change and ecological crisis, this book offers vital lessons on the potential of urban sustainability in future cities.

**Islamic Economy and Social Mobility: Cultural and Religious Considerations** Shahpari, Hasan 2016-01-12 In an era of globalization and cross-cultural awareness, an interest in the relationship between economics and religion, politics, and social behavior is alive and well. In particular, the Islamic economy has become a focal point of interest for economists and government leaders around the world interested in understanding the relationship between religion and economics among primarily Islamic regions. *Islamic Economy and Social Mobility: Cultural and Religious Considerations* analyzes the social, cultural, religious, and political implications of the Islamic economy at the global level. Highlighting the foundations upon which Islamic ideology is formed and how it impacts socio-cultural and economic systems both within and outside of primarily Islamic regions, this publication is an ideal reference source for economists, sociologists, international relations professionals, researchers, academics, and graduate-level students.

**Sociology** Robert Van Krieken 2013-09-12 Building upon the success of previous editions, this fully revised edition of *Sociology* lays the foundations for understanding sociology in Australia. The depth and breadth of the book ensures its value not only for first-year students, but for sociology majors requiring on-going reference to a range of theoretical perspectives and current debates. This fifth Australian edition continues to build on the book's reputation for coverage, clarity and content, drawing upon the work of leading Australian sociologists as well as engaging with global social trends and sociological developments.

**The Protestant Ethic and the Spirit of Capitalism** Max Weber 2012-04-19 Author's best-known and most controversial study relates the rise of a capitalist economy

to the Puritan belief that hard work and good deeds were outward signs of faith and salvation.

*Examining the Aging Workforce and Its Impact on Economic and Social Development* Lopes, Bruno de Sousa 2023-01-06 The phenomenon of aging results from the transition from a demographic model whose birth and mortality rates are exceptionally high to another model in which both demographic factors are increasingly lower. Today's organizations will encounter issues related to the aging of their workforce. It is necessary to consider and implement new strategies through age management that can contribute to society at various phases of life. *Examining the Aging Workforce and Its Impact on Economic and Social Development* builds on existing literature in the field of the aging workforce for the economic and social development of countries while providing additional research opportunities in this dynamic and growing field. This book reflects on this critical issue, increasing the understanding of the importance of the aging workforce in the context of the business and management area, and providing relevant academic work, empirical research findings, and an overview of this relevant field of study. Covering topics such as hiring practices, workplace age diversity, and retention practices, this premier reference source is an excellent resource for government officials, business leaders, human resource managers, sociologists, students and educators of higher education, librarians, researchers, and academicians.

*Oxford Textbook of Public Mental Health* Dinesh Bhugra 2018-09-25 Prevention of mental illness and mental health promotion have often been ignored in the past, both in undergraduate and postgraduate curricula. Recently, however, there has been a clear shift towards public mental health, as a result of increasing scientific evidence that both these actions have a serious potential to reduce the onset of illness and subsequent burden as a result of mental illness and related social, economic and political costs. A clear distinction between prevention of mental illness and mental health promotion is critical. Selective prevention, both at societal and individual level, is an important way forward. The *Oxford Textbook of Public Mental Health* brings together the increasing interest in public mental health and the growing emphasis on the prevention of mental ill health and promotion of well-being into a single comprehensive textbook. Comprising international experiences of mental health promotion and mental well-being, chapters are supplemented with practical examples and illustrations to provide the most relevant information succinctly. This book will serve as an essential resource for mental and public health professionals, as well as for commissioners of services, nurses and community health visitors.

*Sociology* Anthony Giddens 2010 Whilst particularly useful as a companion to the sixth edition of Giddens's *Sociology*, the reader is designed for use independently or alongside other textbooks.

*The Consequences of Modernity* Anthony Giddens 1990 In this major theoretical statement, the author offers a new and provocative interpretation of institutional transformations associated with modernity. What is modernity? The author suggests, "As a first approximation, let us simply say the following: 'modernity' refers to modes of social life or organization which emerged in Europe from about the seventeenth century onwards and which subsequently became more or less worldwide in their influence." We do not as yet, the author argues, live in a post-modern world. The distinctive characteristics of our major social institutions in the closing years of the twentieth century suggest that, rather than entering into a period of post-modernity, we are moving into a period of "high modernity" in which

the consequences of modernity are becoming more radicalized and universalized than before. A post-modern social universe may eventually come into being, but this as yet lies on the other side of the forms of social and cultural organization that currently dominate world history. In developing a fresh characterization of the nature of modernity, the author concentrates on the themes of security versus danger and trust versus risk. Modernity is a double-edged phenomenon. The development of modern social institutions has created vastly greater opportunities for human beings to enjoy a secure and rewarding existence than in any type of pre-modern system. But modernity also has a somber side that has become very important in the present century, such as the frequently degrading nature of modern industrial work, the growth of totalitarianism, the threat of environmental destruction, and the alarming development of military power and weaponry. The book builds upon the author's previous theoretical writings and will be of great interest to those who have followed his work through the years. However, this book covers issues the author has not previously analyzed and extends the scope of his work into areas of pressing practical concern.

*Teaching Sociology Successfully* Andrew B. Jones 2017-07-06 *Teaching Sociology Successfully* is a comprehensive guide to teaching, learning and delivering sociology, not only with success but with confidence. Carefully combining insightful anecdotes and practical ideas with key theoretical concepts on planning, learning styles and assessment, this book is an essential tool for both new and experienced teachers of sociology. Each chapter focuses on a particular aspect of the teaching and learning process – from preparing to teach the subject for the first time to measuring student progress over time – in an approachable yet rigorous way. This practical guide will help you to: improve your knowledge of specifications and syllabuses at GCSE and AS/A Level; provide the best pedagogic approaches for teaching sociology; think about learning styles, skills and capacities in relation to teaching sociology; gain practical ideas and activities for improving student's argumentation, evaluation and essay writing skills; apply strategies for teaching abstract sociological theories and concepts; make the teaching of research methods engaging and interesting; deal with practical issues such as planning and assessing learning; encourage students' independent learning and revision; connect ICT, social networking websites and the mass media to further students' sociological knowledge; tackle the thorny issues of politics and controversial topics. Drawing on the author's own experiences, *Teaching Sociology Successfully* helps readers to identify, unpack and negotiate challenges common to those teaching sociology. Complete with a variety of pedagogical resources, it provides tasks and further reading to support CPD and reflective practice. This book will be an invaluable tool for students on PGCE social science training courses, as well as School Direct candidates and undergraduates studying BEds in similar fields.

**Impact of Meat Consumption on Health and Environmental Sustainability** Raphaely, Talia 2015-10-19 Meat consumption impacts all aspects of human life and humanity's long-term survival prospects. Despite this knowledge, society continues to ignore the negative impact of consuming meat, which include excessively high contributions to global greenhouse gas emissions, land and water pollution and depletion, antimicrobial resistance, and negative impacts on human health. *Impact of Meat Consumption on Health and Environmental Sustainability* addresses the difficulties, challenges, and opportunities in reducing excessive meat consumption in order to mitigate human and environmental damage. Policymakers, academicians, researchers, advanced-level students, technology developers, and government

officials will find this text useful in furthering their research exposure to pertinent topics such as dietary recommendations for limiting meat consumption, trade and the meat industry, ethics of meat production and consumption, and the environmental impacts of meat consumption.

*Contemporary Issues in Australian Literacy Teaching* Jenny Johnston 2012 This book covers a range of topics, including: how literacy and English are linked to early childhood and to middle school education, special needs education, teaching literacy to Indigenous students, bilingualism and languages education, critical literacies and multi-literacies, literacy assessment, how to engage parents in their child's literacy and how quality literature can be used to support and enhance student's literacy development. The intended audience for this text is pre-service teachers working and studying in their early childhood and primary undergraduate degrees, as well as beginning teachers who are keen to improve their literacy teaching skills. **Traditional Counselling** Hector Chiboola 2019-07-12 Traditional counselling is an under-researched field, with inadequate scholarly documentation on the approaches, procedures and process outcomes that should motivate researchers, counselling psychologists and educationists to tap from the abundant unchartered waters. This book represents a major step towards narrowing these gaps. Its main contribution is the articulation of a theoretical framework of traditional counselling, the delineation of traditional counselling approaches and processes, and the clarification of the scope of problems apparent in the sphere of traditional counselling. Traditional counselling is rooted in traditional systems of knowledge and sociocultural values, customs and practices, is essentially community-based and multicultural in nature, and promotes a collective inclination to problem identification, resolution and management. This underscores the importance, relevance and usefulness of traditional counselling from an African perspective. The book is a thought-provoking investigation on counselling models.
