*A 150 anni dall'unificazione amministrativa italiana. La coesione politico-territoriale*  
Leonardo Ferrara 2017-01-09  
Nel 1865 furono emanate le leggi di unificazione amministrativa del Regno d'Italia. In occasione del centocinquantesimo anniversario, il Dipartimento di Scienze Giuridiche dell'Università di Firenze ha organizzato un progetto di studi sulle trasformazioni che nell'ultimo cinquantennio hanno interessato gli apparati e le attività dell'amministrazione della Repubblica, vista nel suo articolato governo locale e nella sua appartenenza all'Unione europea. Le ricerche hanno coinvolto, nell'arco di quasi due anni, più di centocinquanta studiosi di Università italiane. I

risultati sono stati presentati il 15 e 16 ottobre del 2015 a Firenze, la città che centocinquantesimo anni prima era stata Capitale d'Italia e che nel 1965 aveva ospitato il convegno celebrativo del centenario delle stesse leggi di unificazione amministrativa. Gli studi condotti sono ora pubblicati in forma definitiva e organizzati in otto volumi.

### **Restructuring the European State** Paolo Dardanelli

2017-12-12 Since 1950, devolution reforms have been widespread across Western Europe, leading to constitutional transformation in Belgium, Italy, Spain, and the United Kingdom, as well as the potential for state breakup, as witnessed by independence referendums in Scotland and Catalonia. Over the same

period, European integration has transferred power upwards to what is now the European Union. The simultaneous occurrence of these seemingly contradictory trends raises fundamental questions. Is state restructuring a uniform process? Has it been fuelled by European integration and, if so, how? Restructuring the European State uses a comparative analysis to present a systematic investigation of the connections between European integration and state restructuring. Paolo Dardanelli argues that there are two distinct dynamics of state restructuring: "bottom up," where one or more regions demand self-government; and "top down," where the central government decides to devolve power. Through quantitative analyses of thirteen key phases of state restructuring in Belgium, Denmark, France, Italy, Spain, and the United Kingdom he shows that European integration has a powerful influence only in bottom up cases. Dardanelli points to a striking paradox of

integration, whereby an ethos of Europe growing ever closer to union has become associated with fragmentation, divergence, and increased complexity, rather than a seamless system of multilevel governance. Innovative and rigorously researched, Restructuring the European State marks a major advance in our understanding of contemporary European politics.

### **Encounters with the Real in Contemporary Italian Literature and Cinema**

Loredana Di Martino

2017-01-06 This volume

explores the Italian contribution to the current global phenomenon of a "return to reality" by examining the country's rich cultural production in literature and cinema. The focus is particularly on works from the period spanning the Nineties to the present day which offer alternatives to notions of reality as manufactured by the collusion between the neo-liberal state and the media. The book also discusses

relationship with its own cultural past by investigating how Italian authors deal with the return of the specter of Neorealism as it haunts the modern artistic imagination in this new epoch of crisis. Furthermore, the volume engages in dialogue with previous works of criticism on contemporary Italian realism, while going beyond them in devoting equal attention to cinema and literature. The resulting interactions will aid the reader in understanding how the critical arts respond to the triumph of hyperrealism in the current era of the virtual spectacle as they seek new ways to promote cognitive transformations and foster ethical interventions.

**The Politics of Italy** James L. Newell 2010-01-28 This innovative text offers a completely fresh approach to Italian politics by placing it in its historical, institutional, social and international contexts. Students will get to grips with the theories and concepts of comparative politics and how they apply specifically to Italy,

while gaining real insight into more controversial topics such as the Mafia, corruption and the striking success of Berlusconi. The textbook uses clear and simple language to critically analyze Italy's institutions, its political culture, parties and interest groups, public policy, and its place in the international system. Often regarded as an anomaly, Italy is frequently described in terms of 'crisis', 'instability' and 'alienation'. Sceptical of these conventional accounts, Newell argues that, if understood in its own terms, the Italian political system is just as effective as other established democracies. With features including text boxes and further reading suggestions, this is an unbeatable introduction to the politics of Italy.

**Philology and Performing Arts** Mattia Cavagna 2014-10-30 This volume invites to bridge the traditional gap between the author and the scribes, which means between the "original text" and the "copies" in order deal with more complex situations.

### Handbook of Research on Complexities, Management, and Governance in Healthcare

Comite, Ubaldo 2022-10-14 Over the years, the complexity of health systems has grown due to the continuous and constant introduction of new technologies—process, production, and organizational—which have increased the number of stakeholders involved, creating new relationships and new channels through which the various subjects interact. It is necessary to highlight the critical issues and opportunities relating to the innovation of the organization and governance of health services as well as the complementarity of management and leadership.

The new health needs require a Copernican revolution in the organization of services: not only offering individual services but also effective permanent care of the patient within institutional and professional assistance networks and effective, efficient, and appropriate pathways. This requires that on an organizational and managerial level, the internal relationships between the branches of the healthcare companies must be reviewed and closer relationships built with the managing bodies of the social and welfare services. The Handbook of Research on Complexities, Management, and Governance in Healthcare proceeds with a reasoned reconstruction of healthcare issues through the problems connected to the complexities, management, and governance in healthcare in light of the recent COVID-19 pandemic. It discusses both the ethical side of health and the economic, organizational, and legal content. Covering topics such as healthcare innovation

2018-11-30T00:00:00+01:00 Le migrazioni internazionali sono il tema che domina animatamente il dibattito e l'agenda politica in Italia e in Europa. Partiti e movimenti definiscono le proprie identità a partire dalle risposte da dare a questa sfida e su di essa accrescono o perdono il proprio consenso elettorale: principi e valori di destra e sinistra sono messi alla prova su questo stesso tema. In Europa si consumano strappi e si accentuano differenze; le

società cambiano profondamente e la vita di tutti noi è attraversata dagli effetti delle migrazioni, che creano opportunità, rischi e tensioni. Al contempo, molto poco si sa e si dice di quello che le migrazioni sono come fenomeno globale, a partire dai paesi di origine dei flussi. Questo volume - il primo della serie degli «Annuari europei» realizzati dal CeSPI - è un tentativo di rispondere in modo organico e con analisi dettagliate a un simile deficit di conoscenze. I saggi, scritti da studiosi italiani e africani, di diversa formazione intellettuale, affrontano il tema da una prospettiva non a tesi, evitando immagini stereotipate, riunendo voci fra loro anche eterogenee, ma accomunate dall'intento di raccontare il volto attuale delle migrazioni, tanto in Europa quanto in Africa. Sono analizzate le ragioni dei migranti e dei richiedenti asilo. Sono discussi i profili linguistici, sociali e culturali dei soggetti in arrivo, nonché la loro evoluzione negli ultimi anni. Sono studiati i dati internazionali più recenti degli

Uno sguardo è poi rivolto alle politiche in materia di questi ultimi anni (europee, africane ed euro-africane), per concludere con una riflessione ampia sulle sfide politiche future a cui il fenomeno migratorio rimanda in chiave nazionale ed europea.

Fractional Artificial Intelligence of Different Complex Systems addresses different uncertain processes inherent in the complex systems, attempting to provide global and robust optimized solutions distinctively through multifarious methods, technical analyses, modeling, optimization processes, numerical simulations, case studies as well as applications including theoretical aspects of complexity. Foregrounding Multi-chaos, Fractal and Multi-fractional in the era of Artificial Intelligence (AI), the edited book deals with multi- chaos, fractal, multifractional, fractional calculus, fractional operators, quantum, wavelet, entropy-based applications, artificial intelligence, mathematics-informed and data driven processes aside from the means of modelling, and simulations for the solution of multifaceted problems characterized by nonlinearity, non-regularity and self-similarity, frequently encountered in different complex systems. ### **Meritocracy, Growth, and Lessons from Italy's**

**Economic Decline** Lorenzo Codogno 2022-09-05 This book draws lessons on the importance of meritocracy for economic growth by analysing Italy's economic decline in the past few decades. Connections, rather than merit, are a long-standing feature of the Italian elites, even in the corporate sector. This became a significant problem when Italy's economy could no longer grow due to imitation, devaluation, and public debt, and faced the challenges of becoming a frontier knowledge-based open economy. This book uses international comparisons on social capital, governance, the role of the public sector, efficiency of the judiciary

education, gender and social inequality, social mobility, corporate standards, financial structures, and more to evaluate Italy's economic performance. It argues that the arrogance of mediocracy is more damaging than that of meritocracy. Italy experienced an economic miracle after the Second World War, and it is still an advanced economy and a member of the G7. Until the 1960s it seemed destined to catch up with the best-performing countries. Then the growth engine stopped, its debt skyrocketed, and Italy became a weaker member of the Eurozone. Many other countries in the world have heavy historical legacies and low social capital, and many others have to make the jump from imitation led growth to endogenous growth. The lessons drawn from studying Italy's case can therefore have important international applications.

*Pier Paolo Pasolini, Framed and Unframed* Luca Peretti  
2018-12-13 This cross-disciplinary volume, Pier Paolo Pasolini, Framed and Unframed, explores and complicates our understanding of Pasolini today, probing notions of otherness in his works, his media image, and his legacy. Over 40 years after his death Pier Paolo Pasolini continues to challenge and interest us, both in academic circles and in popular discourses. Today his films stand as lampposts of Italian cinematic production, his cinematic theories resonate broadly through academic circles, and his philosophical, essayistic, and journalistic writings-albeit relatively sparsely translated into other languages-are still widely influential. Pasolini has also become an image, a mascot, a face on tote bags, a graffiti image on walls, an adjective (pasolinian). The collected essays push us to consider and reconsider Pasolini, a thinker for the twenty-first century.

**Contesting Race and Citizenship** Camilla Hawthorne

2022-07-15 Contesting Race

and Citizenship is an original

study of Black politics and

varieties of political

mobilization in Italy. Although

there is extensive research on

first-generation immigrants and

refugees who traveled from

Africa to Italy, there is little

scholarship about the

experiences of Black people

who were born and raised in

Italy. Camilla Hawthorne

focuses on the ways Italians of

African descent have become

entangled with processes of

redefining the legal, racial,

cultural, and economic

boundaries of Italy and by

extension, of Europe itself.

Contesting Race and

Citizenship opens discussions of

the so-called migrant "crisis" by

focusing on a generation of

Black people who, although

born or raised in Italy, have

been thrust into the same

racist, xenophobic political

climate as the immigrants and

refugees who are arriving in

Europe from the African

continent. Hawthorne traces

not only mobilizations for

national citizenship but also the

more capacious, transnational

Black diasporic possibilities that

emerge when activists confront

the ethical and political limits of

citizenship as a means for

securing meaningful, lasting

racial justice—possibilities that

are based on shared critiques

of the racial state and shared

histories of racial capitalism

and colonialism.

Volume 2, Bringing Order to

Chaos: Combined Arms

Maneuver in Large Scale

Combat Operations, opens a

dialogue with the Army. Are we

ready for the significantly

increased casualties inherent to

intensive combat between large

formations, the constant

paralyzing stress

contact with a peer enemy, and the difficult nature of command and control while attempting division and corps combined arms maneuver to destroy that enemy? The chapters in this volume answer these questions for combat operations while spanning military history from 1917 through 2003. These accounts tell the challenges of intense combat, the drain of heavy casualties, the difficulty of commanding and controlling huge formations in contact, the effective use of direct and indirect fires, the need for high quality leadership, thoughtful application of sound doctrine, and logistical sustainment up to the task. No large scale combat engagement, battle, or campaign of the last one hundred years has been successful without being better than the enemy in these critical capabilities. What can we learn from the past to help us make the transition to ready to fight tonight?

## **Italian Literature since 1900 in English Translation**

Robin Healey 2019-03-14 Providing the most complete record possible of texts by Italian writers active after 1900, this annotated bibliography covers over 4,800 distinct editions of writings by some 1,700 Italian authors. Many entries are accompanied by useful notes that provide information on the authors, works, translators, and the reception of the translations. This book includes the works of Pirandello, Calvino, Eco, and more recently, Andrea Camilleri and Valerio Manfredi. Together with Robin Healey's *Italian Literature before 1900 in English Translation*, also published by University of Toronto Press in 2011, this volume makes comprehensive information on translations from Italian accessible for schools, libraries, and those interested in comparative literature.

Have you ever prepared a discourse by heart and then found out that, when the moment arrives, surprise and uniqueness of hic et nunc are inevitable? No matter how much you prepare a text, it will need improvisation to be used on a stage or in the street. But, what is the limit between improvisation and technique, experience and training? Can we scientifically measure the improvisation of a text? This work aims to investigate in which dimension art meets science and how it happens. Artists need to discover new conceptual instruments that contribute to the probing of the laws of matter, social existence, and the human mind. The rigorous and fascinating trip that Anna Grazia Cafaro proposes to capture the sense, function, and nature of the actor's improvisation is a splendid and a unique example of a "new alliance" between art and science, predicted forty years ago by the scientist Ilya Prigogine and the philosopher Isabelle Stengers. Thanks to the application of Chaos Theory to

the theatrical processes, attempted here for the first time, the actor and the performance are analyzed as "complex dynamic systems" like a cell, in which, paradoxically, chaos and order coexist and maintain the system in balance; the continuous passages from chaos to order, create the necessary tension and energy that allows the spectator to build his own meaning. Despite the complex theoretical concepts this book is written in an accessible language and includes clear examples that make it comprehensible to a wide audience. It is perfect for students of theater, practitioners, scholars, and anyone who is curious about communicative mechanisms. It can be used in theater, science, comparative literature, and philosophy departments.

*Experimental Writings* Beppe Cavatorta 2019-08-19 Through a series of original analyses of experimental works that exist well outside of the established territory inhabited by the Italian literary canon, or which purposely position themselves at its margins, this volume proposes a new way to understand the goals of literary experimentation as a means to break the canon and give literature the same freedom that is easily granted to other arts. This serves to allow literature itself to intersect with those other art forms, while enhancing the powerful and positive outcomes of literary experimentation. Specifically, the volume explores a series of 20th- and 21st-century Italian works that are characterized by a non-normative approach to language or the act of writing itself. The contributors, while addressing diverse writers, and often even adopting different theoretical interpretations of experimentalism itself, all analyze the intersection between experimental literatures and other art forms,

as well as cross-disciplinary and non-traditional approaches to the theme of experimentation. The Vignelli Canon Massimo Vignelli 2010 An important manual for young designers from Italian modernist Massimo Vignelli The famous Italian designer Massimo Vignelli allows us a glimpse of his understanding of good design in this book, its rules and criteria. He uses numerous examples to convey applications in practice - from product design via signaletics and graphic design to Corporate Design. By doing this he is making an important manual available to young designers that in its clarity both in terms of subject matter and visually is entirely committed to Vignelli's modern design. Local Government and the COVID-19 Pandemic Carlos Nunes Silva 2022-05-03 The book provides a global perspective of local government response towards the COVID-19 pandemic through the analysis of a sample of countries in all continents. It examines the

responses of local government, as well as the responses local government developed in articulation with other tiers of government and with civil society organizations, and explores the social, economic and policy impacts of the pandemic. The book offers an innovative contribution on the role of local government during the pandemic and discusses lessons for the future. The COVID-19 pandemic had a global impact on public health, in the well-being of citizens, in the economy, on civic life, in the provision of public services, and in the governance of cities and other human settlements, although in an uneven form across countries, cities and local communities. Cities and local governments have been acting decisively to apply the policy measures defined at national level to the specific local conditions. COVID-19 has exposed the inadequacy of the crisis response infrastructures and policies at both national and local levels in these countries as well as in many others across the world. But it

also exposed much broader and deeper weaknesses that result from how societies are organized, namely the insecure life a substantial proportion of citizens have, as a result of economic and social policies followed in previous decades, which accentuated the impacts of the lockdown measures on employment, income, housing, among a myriad of other social dimensions. Besides the analysis of how governments, and local government, responded to the public health issues raised by the spread of the virus, the book deals also with the diversity of responses local governments have adopted and implemented in the countries, regions, cities and metropolitan areas. The analysis of these policy responses indicates that previously unthinkable policies can surprisingly be implemented at both national and local levels.

The EU, NATO and the Libya Conflict Stefano Marcuzzi

2021-12-24 This book explores the causes and implications of the Libyan crisis

Gaddafi uprisings of 2011 from the perspective of the EU and NATO. It asks the question of why those organizations failed to stabilize the country despite the serious challenges posed by the protracted crisis to European and transatlantic stakes in the region. This book argues that such failure originated in a twofold problem common to both organizations: their prioritization of legitimacy over strategy, and their path dependence – the insufficient degree of adaptation to meet the different needs of the crisis. Through a critical and integrated analysis of official sources and extensive interviews with EU, NATO, UN, and national government officials and militaries, as well as from NGO personnel, Libyan institutions and civil society, and media, the volume brings the perspective of both state and non-state actors to the fore. It reveals how wrong assumptions and centrifugal forces within the EU and NATO hampered initiatives, and how the inability to use hard power judiciously and effectively in an

increasingly complex and multifaceted scenario worsened the crisis. This allowed for unprecedented influence of regional and global competitors such as Egypt, the United Arab Emirates (UAE), Turkey and Russia in the richest African country. This book will be of key interest for scholars and students of Libya and North Africa, NATO, the European Union, security and conflict studies, Middle East studies, migration, terrorism, peacebuilding and, more broadly, international relations.

### **Popular High Culture in Italian Media, 1950-1970**

Emma Barron 2018-08-20

When Mona Lisa smiled enigmatically from the cover of the Italian magazine Epoca in 1957, she gazed out at more than three million readers. As Emma Barron argues, her appearance on the cover is emblematic of the distinctive ways that high culture was integrated into Italy's mass culture boom in the 1950s and 1960s, a period when popular appropriations of literature, fine art and music became a part of

the rapidly changing modern Italian identity. Popular magazines ran weekly illustrated adaptations of literary classics. Television brought opera from the opera house into the homes of millions. Readers wrote to intellectuals and artists such as Alberto Moravia, Thomas Mann and Salvatore Quasimodo by the thousands with questions about literature and self-education. Drawing upon new archival material on the demographics of television audiences and magazine readers, this book is an engaging account of how the Italian people took possession of high culture and transformed the modern Italian identity.

*States, Actors and Geopolitical Drivers in the Mediterranean*

Francesca Maria Corrao  
2021-09-20 Moving from a historical and cultural perspective, this book examines the geo-political and socio-economic changes involving the enlarged Mediterranean. Organised into two main sections, the first section (The new centrality of

the Mediterranean Basin: Trends and Dynamics) is devoted to the analysis of the most relevant drivers and interdisciplinary broader issues, and the second section (Hotspots of Crisis and Regional Interferences in the Mediterranean) assesses the situation in some areas interested by the waves of uprisings since 2011-12. The book aims to uncover this new, critical centrality of the Mediterranean in the global scenario through the analysis of the interactions and intertwining of those trends and dynamics offering a historical holistic broad view. What follows is an Italian perspective that is the result of the research of a group of scholars who have been working for years on the first-hand sources of the countries examined. A peculiar vision connected not only to its unique geographical position at the center of the basin, but also to its deep relations with the southern shore throughout its long history.

critical reflections relevant to  
re-igniting ideas for future  
envisioning of urban scenarios  
in which productive landscapes  
play fundamental  
transformative roles. The focus  
is on planning ideas and the  
roles of key individual planners,  
all of which have designed

agricultural strategies for the  
city at some point in their  
careers. It intends to help us  
today reimagine urban-rural  
relationships, and the  
transformation of under or mis-  
used urban open spaces, peri-  
urban areas, fringe conditions  
and in-between spaces.

*STELLE...CADENTI* ANTONIO  
GIANGRANDE 2020-07-30 E'  
comodo definirsi scrittori da  
parte di chi non ha arte né  
parte. I letterati, che non siano  
poeti, cioè scrittori stringati, si  
dividono in narratori e saggisti.  
E' facile scrivere "C'era una  
volta...." e parlare di cazzate  
con nomi di fantasia. In questo  
modo il successo è assicurato e  
non hai rompiballe che si  
sentono diffamati e che ti  
querelano e che, spesso, sono  
gli stessi che ti condannano.  
Meno facile è essere saggisti e  
scrivere "C'è adesso...." e  
parlare di cose reali con nomi e  
cognomi. Impossibile poi è  
essere saggisti e scrivere delle  
malefatte dei magistrati e del  
Potere in generale, che per  
logica ti perseguitano per farti  
cessare di scrivere. *Download from*

è farlo senza essere di sinistra. Quando si parla di veri scrittori ci si ricordi di Dante Alighieri e della fine che fece il primo saggista mondiale. Le vittime, vere o presunte, di soprusi, parlano solo di loro, inascoltati, pretendendo aiuto. Io da vittima non racconto di me e delle mie traversie. Ascoltato e seguito, parlo degli altri, vittime o carnefici, che l'aiuto cercato non lo concederanno mai. "Chi non conosce la verità è uno sciocco, ma chi, conoscendola, la chiama bugia, è un delinquente". Aforisma di Bertolt Brecht. Bene. Tante verità soggettive e tante omertà son tasselli che la mente corrompono. Io le cerco, le filtro e nei miei libri

compongo il puzzle, svelando l'immagine che dimostra la verità oggettiva censurata da interessi economici ed ideologie vetuste e criminali. Rappresentare con verità storica, anche scomoda ai potenti di turno, la realtà contemporanea, rapportandola al passato e proiettandola al futuro. Per non reiterare vecchi errori. Perché la massa dimentica o non conosce. Denuncio i difetti e caldeggio i pregi italici. Perché non abbiamo orgoglio e dignità per migliorarci e perché non sappiamo apprezzare, tutelare e promuovere quello che abbiamo ereditato dai nostri avi. Insomma, siamo bravi a farci del male e qualcuno deve pur essere diverso!
