Primary Education in Malawi Vaikalathur Ravishankar 2016-04-06 The objective of this report is to inform an improved understanding of expenditure allocations and processes, the quality of service delivery in terms of inputs and outputs, and educational outcomes associated with primary education in Malawi. The report will also assess the government's own diagnosis of challenges in the primary education sub-sector, and the reform program intended to address them. The findings of this report are intended to inform discussions as to how to strengthen the government program and associated financing mechanisms, to enhance the likelihood of success.

Heavy Metals in Soils Brian J. Alloway 2012-07-18 This third edition of the book has been completely re-written, providing a wider scope and enhanced coverage. It covers the general principles of the natural occurrence, pollution sources, chemical analysis, soil chemical behaviour and soil-plant-animal relationships of heavy metals and metalloids, followed by a detailed coverage of 21 individual elements, including: antimony, arsenic, barium, cadmium, chromium, cobalt, copper, gold, lead, manganese, mercury, molybdenum, nickel, selenium, silver, thallium, tin, tungsten, uranium, vanadium and zinc. The book is highly relevant for those involved in environmental science, soil science, geochemistry, agronomy, environmental health, and environmental engineering, including specialists responsible for the management and clean-up of contaminated land.

Introduction to Fungi John Webster 1980-06-19 "This new edition of the universally acclaimed and widely used textbook on fungal biology has been completely rewritten, drawing directly on the authors' research and teaching experience. The text takes account of the rapid and exciting progress that has been made in the taxonomy, cell and molecular biology, biochemistry, pathology and ecology of the fungi. Features of taxonomic significance are integrated with natural functions, including their relevance to human affairs."--BOOK JACKET.
