[Experiences in Translation](#) Umberto Eco 2008-01-01 In this book Umberto Eco argues that translation is not about comparing two languages, but about the interpretation of a text in two different languages, thus involving a shift between cultures. An author whose works have appeared in many languages, Eco is also the translator of Gérard de Nerval's *Sylvie* and Raymond Queneau's *Exercices de style* from French into Italian. In

Experiences in Translation he draws on his substantial practical experience to identify and discuss some central problems of translation. As he convincingly demonstrates, a translation can express an evident deep sense of a text even when violating both lexical and referential faithfulness. Depicting translation as a semiotic task, he uses a wide range of source materials as illustration: the translations of his own and other novels, translations of the dialogue of American films into Italian,

and various versions of the Bible. In the second part of his study he deals with translation theories proposed by Jakobson, Steiner, Peirce, and others. Overall, Eco identifies the different types of interpretive acts that count as translation. An enticing new typology emerges, based on his insistence on a common-sense approach and the necessity of taking a critical stance.

Morphology by Itself Mark Aronoff 1993-12-02 Most recent research in generative morphology has avoided the treatment of purely morphological phenomena and has focused instead on interface questions, such as the relation between morphology and syntax or between morphology and phonology. In this monograph Mark Aronoff argues that linguists must consider morphology by itself, not merely as an appendage of syntax and phonology, and that linguistic theory must allow for a separate and autonomous morphological component. Following a general introductory chapter, Aronoff examines two narrow classes of morphological phenomena to make his case: stems and inflectional classes. Concentrating first on Latin verb morphology, he argues that morphological stems are neither syntactic nor phonological units. Next, using data from a number of languages, he underscores the traditional point that the inflectional class of a word is not reducible to its syntactic gender. He then explores in detail the phonologically motivated nominal inflectional class system of two languages of Papua New Guinea (Arapeshand Yimas) and the precise nature of the relation between this system and the corresponding gender system. Finally, drawing on a number of Semitic languages, Aronoff argues that the verb classes of these languages are purely inflectional although they are partly motivated by derivational and syntactic considerations.
