Cultural Anthropology Raymond Scupin
2019-12-10 *Cultural Anthropology: A Global Perspective* delves into both classic and current research in the field, reflecting a commitment to anthropology's holistic and integrative approach. This text illuminates how the four subfields of anthropology—biological anthropology, archaeology, linguistics, and cultural anthropology—together yield a comprehensive understanding of humanity.

A Companion to Psychological Anthropology Conerly Casey 2007-10-15
This Companion provides the first

definitive overview of psychocultural anthropology: a subject that focuses on cultural, psychological, and social interrelations across cultures. Brings together original essays by leading scholars in the field Offers an in-depth exploration of the concepts and topics that have emerged through contemporary ethnographic work and the processes of global change Key issues range from studies of consciousness and time, emotion, cognition, dreaming, and memory, to the lingering effects of racism and ethnocentrism, violence, identity and subjectivity
Cross-Cultural Research Methods Carol

R. Ember 2009-07-16 Without ethnography, cross-cultural comparison would not be possible. But without cross-cultural comparison, we would know nothing of what may be universal or variable across human cultures, or why variation exists. Cross-Cultural Research Methods is an introductory teaching tool that shows students and potential researchers how to describe, compare, and analyze patterns that occur in different cultures, that is, how to form and test anthropological, sociological, psychological, medical, or political hypotheses about cultural variation. **Ethics and Governance** Timothy L. Fort 2001 "Ethics and Governance is very multidisciplinary. In analyzing traditional business ethics and legal theory, it draws heavily from philosophy. In addition to this, it

integrates biological anthropology, theological naturalism, and legal theory. The book does not reject contemporary business ethics, but instead seeks to strengthen each contemporary theory by providing additional reasons for their efficacy, albeit in a modified form."--BOOK JACKET.

The Art of Being Human Michael Wesch 2018-08-07 Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit

yourself, body and mind. Susan Sontag called anthropology a "heroic profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to

anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

Pirates, Terrorists, and Warlords

Jeffrey H. Norwitz 2009-07 A serious look at the enemies we face in the twenty-first century.

Fieldnotes Roger Sanjek 1990 Thirteen distinguished anthropologists describe how they create and use the unique forms of writing they produce in the field. They also discuss the fieldnotes of seminal figures--Frank Cushing, Franz Boas, W. H. R. Rivers, Bronislaw Malinowski, and Margaret Mead--and analyze field writings in relation to other types of texts, especially ethnographies. Unique in conception, this volume contributes

importantly to current debates on writing, texts, and reflexivity in anthropology.

The Anthropology Graduate's Guide

Carol J. Ellick 2016-09-17 Mom will ask, "What can you do with a degree in anthropology?" If you want the answer, then you need this book. Applied anthropologists Carol Ellick and Joe Watkins present a set of practical steps that will assist you through the transition from your career as a student into a career in a wide range of professions that an anthropology degree can be used. The stories, scenarios, and activities presented in this book are intended to assist you in learning how to plan for the next five years, write your letter of introduction, construct your resume, and best present the knowledge, skills, and abilities

learned in class to prospective employers. Ellick and Watkins' step-by-step approach helps you create a portfolio that you will use time and time again as you build your career. **Humanity: An Introduction to Cultural Anthropology** James Peoples 2017-02-21 HUMANITY: AN INTRODUCTION TO CULTURAL ANTHROPOLOGY, Eleventh Edition, offers a solid framework centered on globalization and culture change. The text's engaging narrative provides new ways of looking at many of the challenges facing the world in this century, as students examine ethnic conflicts, globalization of culture and language, recent debates about gay marriage, increasing inequalities, population growth, hunger, and the survival of indigenous cultures. Throughout this highly acclaimed work, Peoples and

Bailey explore the diversity of humanity and clearly demonstrate why an appreciation and tolerance of cultural differences is critical today. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Handbook of Methods in Cultural Anthropology H. Russell Bernard

2014-07-08 The Handbook of Methods in Cultural Anthropology, now in its second edition, maintains a strong benchmark for understanding the scope of contemporary anthropological field methods. Avoiding divisive debates over science and humanism, the contributors draw upon both traditions to explore fieldwork in practice. The second edition also reflects major developments of the

past decade, including: the rising prominence of mixed methods, the emergence of new technologies, and evolving views on ethnographic writing. Spanning the chain of research, from designing a project through methods of data collection and interpretive analysis, the Handbook features new chapters on ethnography of online communities, social survey research, and network and geospatial analysis. Considered discussion of ethics, epistemology, and the presentation of research results to diverse audiences round out the volume. The result is an essential guide for all scholars, professionals, and advanced students who employ fieldwork.

Studying Societies and Cultures

Lawrence A. Kuznar 2015-12-03 "A thought-provoking, stimulating volume on the past, present and future of cultural materialism that is both laudatory of Harris' research strategy and critical of it." Paul Shankman, University of Colorado One of the most important anthropologists of all time, Marvin Harris was influential worldwide as the founder of cultural materialism. This book accessibly analyzes Harris's theories and their important legacies today. The chapters explore cultural materialism's epistemology and its relation to rational choice theory, Darwinian social science, and population pressures. The authors

assess recent attempts to extend and reformulate cultural materialism and highlight cross-cultural, archaeological, and ethnographic applications of cultural materialism today.

Biomedical Entanglements Franziska A. Herbst 2016-10-01 Biomedical Entanglements is an ethnographic study of the Giri people of Papua New Guinea, focusing on the indigenous population's interaction with modern medicine. In her fieldwork, Franziska A. Herbst follows the Giri people as they circulate within and around ethnographic sites that include a rural health center and an urban hospital. The study bridges medical anthropology and global health, exploring how the 'biomedical' is imbued with social meaning and how biomedicine affects Giri ways of

life.

Physical Anthropology and Archaeology, Fourth Canadian Edition

Carol R. Ember 2017-03-15 Designed for the two-field course covering physical anthropology and archaeology, this clearly written, comprehensive and engaging text has risen to become a market leader. Its balanced coverage of physical anthropology and archaeology helps students understand what humans are and were like, and how they got to be that way. The new fourth edition has been updated with all-new Canadian and international research. A visual revitalization has been accomplished with more photos, new Dorling Kindersley maps, and a handy skeleton diagram inside the cover for quick

reference. This popular text will bring a unique perspective to the study of physical anthropology. The Craft of Research, Fourth Edition Wayne C. Booth 2016-10-07 With more than three-quarters of a million copies sold since its first publication, The Craft of Research has helped generations of researchers at every level—from first-year undergraduates to advanced graduate students to research reporters in business and government—learn how to conduct effective and meaningful research. Conceived by seasoned researchers and educators Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams, this fundamental work explains how to find and evaluate sources, anticipate and respond to reader reservations, and integrate these pieces into an argument that

stands up to reader critique. The fourth edition has been thoroughly but respectfully revised by Joseph Bizup and William T. FitzGerald. It retains the original five-part structure, as well as the sound advice of earlier editions, but reflects the way research and writing are taught and practiced today. Its chapters on finding and engaging sources now incorporate recent developments in library and Internet research, emphasizing new techniques made possible by online databases and search engines. Bizup and FitzGerald provide fresh examples and standardized terminology to clarify concepts like argument, warrant, and problem. Following the same guiding principle as earlier editions—that the skills of doing and reporting research are not just for elite

students but for everyone—this new edition retains the accessible voice and direct approach that have made *The Craft of Research* a leader in the field of research reference. With updated examples and information on evaluation and using contemporary sources, this beloved classic is ready for the next generation of researchers.

Encyclopedia of Medical Anthropology

Carol R. Ember 2003-12-31 Medical practitioners and the ordinary citizen are becoming more aware that we need to understand cultural variation in medical belief and practice. The more we know how health and disease are managed in different cultures, the more we can recognize what is "culture bound" in our own medical belief and practice. The *Encyclopedia of Medical Anthropology*

is unique because it is the first reference work to describe the cultural practices relevant to health in the world's cultures and to provide an overview of important topics in medical anthropology. No other single reference work comes close to matching the depth and breadth of information on the varying cultural background of health and illness around the world. More than 100 experts - anthropologists and other social scientists - have contributed their firsthand experience of medical cultures from around the world.

An Anthropology of Biomedicine

Margaret M. Lock 2018-03-20 In this fully revised and updated second edition of An Anthropology of

Biomedicine, authors Lock and Nguyen introduce biomedicine from an anthropological perspective, exploring the entanglement of material bodies with history, environment, culture, and politics. Drawing on historical and ethnographic work, the book critiques the assumption made by the biological sciences of a universal human body that can be uniformly standardized. It focuses on the ways in which the application of biomedical technologies brings about radical changes to societies at large based on socioeconomic inequalities and ethical disputes, and develops and integrates the theory that the human body in health and illness is not an ontological given but a moveable, malleable entity. This second edition includes new chapters on:

microbiology and the microbiome; global health; and, the self as a socio-technical system. In addition, all chapters have been comprehensively revised to take account of developments from within this fast-paced field, in the intervening years between publications. References and figures have also been updated throughout. This highly-regarded and award-winning textbook (Winner of the 2010 Prose Award for Archaeology and Anthropology) retains the character and features of the previous edition. Its coverage remains broad, including discussion of: biomedical technologies in practice; anthropologies of medicine; biology and human experiments; infertility and assisted reproduction; genomics, epigenomics, and uncertain futures;

and molecularizing racial difference, ensuring it remains the essential text for students of anthropology, medical anthropology as well as public and global health.

Rethinking Ethnography in Central Europe Hana Cervinkova 2015-09-09 In eleven ethnographic chapters of *Rethinking Ethnography in Central Europe* examines how issues of global economic and cultural dependencies, mobilities, citizens activism, social movements, and socio-political aspects of post-socialist modernities articulate on the level of everyday discourse and practices.

A Manual for Writers of Research Papers, Theses, and Dissertations, Eighth Edition Kate L. Turabian 2013-04-09 A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines

to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her *Manual for Writers* continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, *A Manual for Writers of Research Papers, Theses, and Dissertations* has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and

revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of *The Chicago Manual of Style*. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of

critical resources available, A Manual for Writers remains the essential resource for students and their teachers.

Anthropology, 12/E Ember 2007-09

The Hillary Doctrine Valerie M. Hudson 2015-06-30 Hillary Rodham Clinton was the first Secretary of State to declare the subjugation of women worldwide a serious threat to U.S. national security. Known as the Hillary Doctrine, her stance was the impetus behind the 2010 Quadrennial Diplomatic and Development Review of U.S. foreign policy, formally committing America to the proposition that the empowerment of women is a stabilizing force for domestic and international peace. Blending history, fieldwork, theory, and policy analysis while incorporating perspectives from officials and

activists on the front lines of implementation, this book is the first to thoroughly investigate the Hillary Doctrine in principle and practice. Does the insecurity of women make nations less secure? How has the doctrine changed the foreign policy of the United States and altered its relationship with other countries such as China and Saudi Arabia? With studies focusing on Guatemala, Afghanistan, and Yemen, this invaluable policy text closes the gap between rhetoric and reality, confronting head-on what the future of fighting such an entrenched enemy entails. The research reports directly on the work being done by U.S. government agencies, including the Office of Global Women's Issues, established by Clinton during her tenure at the State Department, and

explores the complexity and pitfalls of attempting to improve the lives of women while safeguarding the national interest.

Leadership in Science and Technology: A Reference Handbook 2012 "This 2-volume set within the SAGE Reference Series on Leadership tackles issues relevant to leadership in the realm of science and technology. To encompass the key topics in this arena, this handbook features 100 topics arranged under eight headings. Volume 1 concentrates on general principles of science and technology leadership and includes sections on social-scientific perspectives on S&T leadership; key scientific concepts about leading and innovating in S&T; characteristics of S&T leaders and their environments; and strategies, tactics, and tools of S&T leadership.

Volume 2 provides case studies of leadership in S&T, with sections considering leadership in informal communities of scientists and engineers; leadership in government projects and research initiatives; leadership in industry research, development, and innovation; and finally, leadership in education and university-based research. By focusing on key topics within 100 brief chapters, this unprecedented reference resource offers students more detailed information and depth of discussion than typically found in an encyclopedia entry but not as much jargon, detail or density as in a journal article or a research handbook chapter. Entries are written in language and style that is broadly accessible, and each is followed by cross-references and a brief

bibliography and further readings. A detailed index and an online version of the work enhances accessibility for today's student audience"-- Provided by publisher.

The Blackwell Companion to the Study of Religion Robert A. Segal

2009-02-04 This prestigious Companion offers the most comprehensive survey to date of the study of religion.

Featuring a team of international contributors, and edited by one of the most widely respected scholars in the field, The Blackwell Companion to the Study of Religion provides an interdisciplinary and authoritative guide to the subject. Examines the main approaches to the study of religion: anthropology, the comparative method, economics, literature, philosophy, psychology,

sociology, and theology. Also covers a diverse range of topical issues, such as the body, fundamentalism, magic, and new religious movements. Consists of 24 essays written by an outstanding team of international scholars. Reviews, within each chapter, an outline of a particular subfield and traces its development up to the present day. Debates how the discipline may look in the future. Represents all the major issues, methods and positions in the field.

Cultural Anthropology Carol R. Ember

environmental issues.

Comparison Rita Felski 2013-06-15 An extended volume of *New Literary History* that considers the practice of comparison in literary studies and other disciplines within the humanities. Writing and teaching across cultures and disciplines makes the act of comparison inevitable. Comparative theory and methods of comparative literature and cultural anthropology have permeated the humanities as they engage more centrally with the cultural flows and circulation of past and present globalization. How do scholars make ethically and politically responsible comparisons without assuming that their own values and norms are the standard by which other cultures should be measured? *Comparison* expands upon a special issue of the

journal New Literary History, which analyzed theories and methodologies of comparison. Six new essays from senior scholars of transnational and postcolonial studies complement the original ten pieces. The work of Gayatri Chakravorty Spivak, Ella Shohat, Robert Stam, R. Radhakrishnan, Bruce Robbins, Ania Loomba, Haun Saussy, Linda Gordon, Walter D. Mignolo, Shu-mei Shih, and Pheng Cheah are included with contributions by anthropologists Caroline B. Brettell and Richard Handler. Historical periods discussed range from the early modern to the contemporary and geographical regions that encompass the globe. Ultimately, *Comparison* argues for the importance of greater self-reflexivity about the politics and methods of comparison in teaching and in research.

Anthropology of Addictions and Recovery Irene Glasser 2011-12-14 It is nearly impossible to discuss alcohol, tobacco, and drugs without applying our own cultural prism. In a concise, non-technical manner, Glasser combines her own research with that of others to show the importance of removing cultural biases to uncover crucial understandings about substance use and misuse. Ethnographic examples

elucidate the diverse meanings of alcohol, tobacco, and drugs around the world as well as the psychological and physiological effects of their use. Glasser applies anthropological research methods in her examination of treatment and recovery and uncovers why some programs are more effective than others. The books focus on culture and how it affects peoples relationships to mind-altering substances, together with hands-on activities at the end of each chapter, will generate new realizations and open doors for further exploration.

Exotics at Home Micaela di Leonardo
2000-03-16 What is the exotic, after all? In this study, Micaela di Leonardo reveals the face of power within the mask of cultural

difference. Focusing on the intimate and shifting relations between popular portrayals of exotic Others and the practice of anthropology, that profession assumed to be America's Guardian of the Offbeat, she casts new light on gender, race, and the public sphere in America's past and present. Chicago's 1893 Columbian World Exposition and today's college-town ethnic boutiques frame di Leonardo's century-long analysis.

Human Sexuality Anne Bolin 2021-06-29
This groundbreaking second edition of *Human Sexuality* continues its broad and interdisciplinary goal of providing readers with a comprehensive overview on sexuality as a core part of our individual identities and social lives. Edited by anthropological experts on the

subject, this unique textbook integrates evolutionary and cultural aspects to provide a fully interdisciplinary approach to human sexuality that is rare in this area of scholarship. Fully updated throughout in line with developments in the field, this second edition includes fresh material exploring new sexual identities, sexual violence and consent, Internet pornography, conversion therapy, polyamory, and much more. In addition to providing a rich array of photographs, illustrations, tables, and a glossary of terms, this textbook explores: pregnancy and childbirth as a bio-cultural experience life-course issues related to gender identity, sexual orientations, behaviors, and lifestyles socioeconomic, political, historical, and ecological influences

on sexual behavior early childhood sexuality, puberty, and adolescence birth control, fertility, conception, and sexual differentiation HIV infection, AIDS, AIDS globalization, and sex work. Utilizing viewpoints across cultural and national boundaries and taking into account the evolution of human anatomy, sexual behavior, attitudes, and beliefs across the globe, Human Sexuality, Second Edition, remains an essential text for educators and students who wish to understand human sexuality in all of its richness and complexity.

Drugging the Poor Merrill Singer
2007-08-10 Singer offers a fresh set of ideas for understanding how the global socioeconomic system insures that massive quantities of psychotropic drugs reach the poorest

sectors of American society. *Drugging the Poor* provides a unified theoretical framework to assess how all drugs, including tobacco, heroin, alcohol, cocaine, and diverted pharmaceuticals contribute to maintaining social inequality among the wealthier and poorer social classes in American society. Singers analysis rejects conventional approaches that see tobacco or alcohol manufacturers and distributors, on the one hand, and drug cartels and mafias, on the other, as completely different entities. Instead, he shows how legal and illegal drug corporations share key features and follow the same economic principles. He also emphasizes that mixing legal and illegal drugs to self-medicate against social discrimination,

poverty, and structural violence offers short-term relief, but in the long run, it functions to maintain an unjust and oppressive system. *Drugging the Poor* actively challenges the assumption that how things are is how they always have been or how they need to be.

The Cultural Shaping of Accounting
Ahmed Riahi-Belkaoui 1995-05-30 An important but usually overlooked variable that affects the process and product of accounting is culture. Consensus on what constitutes proper accounting methods and behavior varies among countries, and it is this cultural relativism and its impacts that Riahi-Belkaoui explores here. His purpose is to elaborate on the nature of cultural relativism in accounting and in the interpretation of accounting data. He thus shows the

way culture determines accounting judgments, and explains the intercultural differences in the perception of accounting concepts, and in the field's self-regulation internationally. His point is that accounting is actually a cultural rather than a technical process, and that professionals as well as academics should be aware of this. A challenging, useful discussion for teachers, graduate students, and accounting practitioners, particularly in international settings.

Militarized Maternity Megan D.

McFarlane 2021-04-08 The rights of pregnant workers as well as (the lack of) paid maternity leave have increasingly become topics of a major policy debate in the United States. Yet, few discussions have focused on

the U.S. military, where many of the latest policy changes focus on these very issues. Despite the armed forces' increases to maternity-related benefits, servicewomen continue to be stigmatized for being pregnant and taking advantage of maternity policies. In an effort to understand this disconnect, Megan McFarlane analyzes military documents and conducts interviews with enlisted servicewomen and female officers. She finds a policy/culture disparity within the military that pregnant servicewomen themselves often co-construct, making the policy changes significantly less effective. McFarlane ends by offering suggestions for how these policy changes can have more impact and how they could potentially serve as an example for the broader societal

debate.

Mission Strategy in the City Enoch Jinsik Kim 2017-11-07 This book was written to suggest an appropriate mission strategy by identifying key issues that impact urban ethnicities through an urban socioanthropological lens. This book is based on the author's sixteen years of living in China, where he conducted missionary work in urban areas. The book discusses the author's interactions with enclaves of ethnic minorities who had recently arrived in the city after migrating from rural areas. The minorities' struggles to balance cultural assimilation and tradition preservation are highlighted throughout. The book explains that similar phenomena occur within Korean

American communities in Los Angeles as well. Based on these observations, the author states that immigrants in many cities face similar social issues and find similar resolutions to them. Though there are many negative aspects to urban areas, readers will see some positive features of cities that can contribute to effective evangelism. The book highlights three main points: (1) Ethnic urban dwellers evolve into many more diverse ways than commonly thought. (2) Ethnic groups are actively choosing the future of their community types. (3) Modern cities create many new communication channels interethnically and also across social strata within ethnicities.
