**Authoritarian Regimes in the Long Twentieth Century** Florian Kühner-Wielach 2022-10-10 This special issue of the journal "zeitgeschichte" presents the results of the doctoral theses written within the framework of the "Doctoral College European Historical Dictatorship and Transformation Research" (2009–2012) as selected scholarly essays. The contributions are devoted to authoritarian regimes of the 20th century in Austria, Belarus, Greece, Hungary, Italy, Latvia, Lithuania, Poland, Portugal, Romania, Spain, and the Soviet Union. Using various methods from the humanities and social sciences, different aspects of mainly "small" dictatorships are examined: conditions of emergence, structures, continuities, as well as preceding and subsequent processes of political and social transformation. Das vorliegende Sonderheft der Zeitschrift »zeitgeschichte« stellt die Ergebnisse der im Rahmen des Initiativkollegs (IK) Europäische historische Diktatur- und Transformationsforschung (2009–2012) verfassten Promotionsarbeiten in Form ausgewählter wissenschaftlicher Essays vor. Die Beiträge widmen sich autoritären Regimes des 20. Jahrhunderts in Belarus, Griechenland, Italien, Lettland, Litauen, Österreich, Polen, Portugal, Rumänien, Spanien, Ungarn und der Sowjetunion. Mittels verschiedener geistes- und sozialwissenschaftlicher Methoden werden unterschiedliche Aspekte vor allem »kleiner« Diktaturen untersucht: Entstehungsbedingungen, Strukturen, Kontinuitäten sowie vor- und nachgelagerte Prozesse politischer und gesellschaftlicher Transformation.

**The Routledge Companion to Banking Regulation and Reform** Ismail Ertürk 2016-10-04 The Routledge Companion to Banking Regulation and Reform provides a prestigious cutting edge international reference work offering students, researchers and policy makers a comprehensive guide to the paradigm shift in banking studies since the historic financial crisis in 2007. The transformation in banking over the last two decades has not been authoritatively and critically analysed by the mainstream academic literature. This unique collection brings together a multi-disciplinary group of leading authorities in the field to analyse and investigate post-crisis regulation and reform. Representing the wide spectrum of non-mainstream economics and finance, topics range widely from financial innovation to misconduct in banking, varieties of Eurozone banking to reforming dysfunctional global banking as well as topical issues such as off-shore financial centres, Libor fixing, corporate governance and the Dodd-Frank Act. Bringing together an authoritative range of international experts and perspectives, this invaluable body of heterodox research work provides a comprehensive compendium for researchers and academics of banking and finance

as well as regulators and policy makers concerned with the global impact of financial institutions.

**Classical Marxism in an Age of Capitalist Crisis** William Briggs 2019-04-08 Will capitalism survive forever? Capitalism has always lived in and with crisis. Wars, revolutions, economic depression and repeated recessions, the threat of nuclear annihilation and ecological disaster have all failed to break the dominance of this economic and political system. Challenging the predominance of capitalism in a world fraught with inequalities, this book returns to classical Marxism to reaffirm its relevance. It explores the contradictions within capitalism as well as explaining why Marxism has been unable to mount a sustained challenge to capitalism. In order to explore concrete alternatives in a period of increasing capitalist globalisation and crisis, it goes on to present perspectives by which theory and practice might be reunited to building independent political and organisational structures. A search for "something better", this volume will be an engaging read for scholars and researchers of politics, especially political theory and political economy, economics, and sociology.

**Living Standards in Southeast Asia** Anne Booth 2019 Living Standards in Southeast Asia: Changes over the Long Twentieth Century, 1900-2015 examines changes in living standards across the ten countries of Southeast Asia (Indonesia, Malaysia, Singapore, Philippines, Thailand, Brunei, Myanmar, Vietnam, Cambodia and Laos) from the early years of the 20th century to the early 21st century. It covers both the last decades of the colonial period, the transition to independence and the decades from 1960 to the 2010s. The study uses a range of monetary and non-monetary indicators to assess how living standards have changed over time. It examines the outcomes in the context of debates about economic growth, inequality and poverty alleviation which began in the 1960s and 1970s, and continue to the present.

**Sameness in Diversity** Laresh Jayasanker 2020-04-14 Americans of the 1960s would have trouble navigating the grocery aisles and restaurant menus of today. Once-exotic ingredients—like mangoes, hot sauces, kale, kimchi, and coconut milk—have become standard in the contemporary American diet. Laresh Jayasanker explains how food choices have expanded since the 1960s: immigrants have created demand for produce and other foods from their homelands;

grocers and food processors have sought to market new foods; and transportation improvements have enabled food companies to bring those foods from afar. Yet, even as choices within stores have exploded, supermarket chains have consolidated. Throughout the food industry, fewer companies manage production and distribution, controlling what American consumers can access. Mining a wealth of menus, cookbooks, trade publications, interviews, and company records, Jayasanker explores Americans' changing eating habits to shed light on the impact of immigration and globalization on American culture.

**Underdevelopment in Peru** Jan Lust 2023-08-03 At a time when Peru continues to reel from the impact of Covid-19 and the eruption of corruption scandals involving five former presidents, this book analyzes the persistence and the structural underpinnings of underdevelopment in Peru. During the commodities boom of 2004–2011, Peru experienced strong levels of economic growth, bringing poverty down and increasing the middle-class population. In the Covid-19 pandemic, however, the severe lack of structural economic and social improvements has been exposed. With the arrival of the pandemic, hospitals collapsed, oxygen supplies dwindled, and informality rose, with dire consequences for the vulnerable, and for those already working on subsistence wages. Delving into the history of the country, Jan Lust outlines the structural problems that came about following Peru's post-colonial entrance into the world economy and the subsequent neoliberal extractive development model adopted in the 1990s. Only by understanding Peru's specific political, economic, and social conditions can a path towards development be found. This book will be of interest to researchers working within politics, economics, critical development studies, and Latin American studies.

**Two Decades of Market Reform in India** Sudipta Bhattacharyya 2013-12-15 Have neoliberal policies truly yielded beneficial effects for India? 'Two Decades of Market Reform in India' presents a collection of essays that challenge the conventional wisdom of Indian market reforms, examining the effects of neoliberal policies enacted by the Indian government and exploding the myths that surround them. In particular, the volume questions the perceived benefits of India's reform policies in the areas of growth, agriculture, industry and poverty alleviation, and examines how the government's focus on preventing a fiscal deficit caused a large-scale decline in development expenditures, which in turn has had a negative impact on the well-being of the poor. With its rich and insightful analysis, 'Two Decades of Market Reform in India' bravely shines a light on the true implications of India's neoliberal governmental policies, and provides a revealing indication of how policy reform since 1991 has, at times, detrimentally affected the general populace of India.

**Planning in the 20th Century and Beyond** Santosh Mehrotra 2020-05-31 The Planning Commission played a crucial role in the type of development that India followed after independence. However, even though most economic analyses of India mention the five-year plans, the Planning Commission as an institution remains little studied. This is why this book proposes to look backward, examining the history of the idea of planning and the history and experience of planning in India. It also looks forward, trying to evaluate, beyond ideologies, which role the practice of planning has and should have in contemporary India. It then proposes that the NITI Aayog, the think tank founded on 1st January 2015 after the demise of the Planning Commission, could learn from this experience. This book addresses three leading questions: why plan economic development? How to plan? And what exactly can/should be planned? These questions are interrelated and the contributors of this volume, each with their own focus, propose elements of replies.

*The Cambridge Economic History of Latin America: Volume 2, The Long Twentieth Century* Bulmer-Thomas, V 2006-01-23 An indispensable reference work for anyone interested in Latin America's economic development.

**Law, History, and Justice** Annette Weinke 2018-12-17 Since the nineteenth century, the development of international humanitarian law has been marked by complex entanglements of legal theory, historical trauma, criminal prosecution, historiography, and politics. All of these factors have played a role in changing views on the applicability of international law and human-rights ideas to state-organized violence, which in turn have been largely driven by transnational responses to German state crimes. Here, Annette Weinke gives a groundbreaking long-term history of the political, legal and academic debates concerning German state and mass violence in the First World War, during the National Socialist era and the Holocaust, and under the GDR.

**Latin America and the Caribbean in the Global Context** Betty Horwitz 2016-01-29 Current perspectives on Latin America's role in the world tend to focus on one question: Why is Latin America always falling behind? Analysts and scholars offer answers grounded in history, economic underdevelopment, or democratic consolidation. Bagley and Horwitz, however, shift the central question to ask why and to what extent does Latin America matter in world politics, both now and in the future. This text takes a holistic approach to analyze Latin America's role in the international system. It invokes a combination of global, regional, and sub-regional levels to assess Latin America's insertion into a globalized world, in historical, contemporary, and forward-looking perspectives. Conventional international relations theory and paradigms, introduced at the beginning, offer a useful lens through which to view four key themes: political economy, security, transnational issues and threats, and democratic consolidation. The full picture presented by this book breaks down the evolving power relationships in the hemisphere and the ways in which conflict and cooperation play out through international organizations and relations.

**The Long Shadow** David Reynolds 2013-11-07 In Britain we have lost touch with the Great War. Our overriding sense now is of a meaningless, futile bloodbath in the mud of Flanders -- of young men whose lives were cut off in their prime for no evident purpose. But by reducing the conflict to personal tragedies, however moving, we have lost the big picture: the history has been distilled into poetry. In *The Long Shadow*, critically acclaimed author David Reynolds seeks to redress the balance by exploring the true impact of 1914-18 on the 20th century. Some of the Great War's legacies were negative and pernicious but others proved transformative in a positive sense. Exploring big themes such as democracy and empire, nationalism and capitalism and re-examining the differing impacts of the War on Britain, Ireland and the United States, *The Long Shadow* throws light on the whole of the last century and demonstrates that 1914-18 is a conflict that Britain, more than any other nation, is still struggling to comprehend. Stuningly broad in its historical perspective, *The Long Shadow* is a magisterial and seismic re-presentation of the Great War.

**Reproduction on the Reservation** Brianna Theobald 2019-08-20 This pathbreaking book documents the transformation of reproductive practices and politics on Indian reservations from the late nineteenth century to the present, integrating a localized history of childbearing, motherhood, and activism on the Crow Reservation in Montana with an analysis of trends affecting Indigenous women more broadly. As Brianna Theobald illustrates, the federal government and local authorities have long sought to control Indigenous families and women's reproduction, using tactics such as coercive sterilization and removal of Indigenous children into the white foster care system. But Theobald examines women's resistance, showing how they have worked within families, tribal networks, and activist groups to confront these issues. Blending local and intimate family histories with the histories of broader movements such as WARN (Women of All Red Nations), Theobald links the federal government's intrusion into Indigenous women's reproductive and familial decisions to the wider history of eugenics and the reproductive rights movement. She argues convincingly that colonial politics have always been--and remain--reproductive politics. By looking deeply at one tribal nation over more than a century, Theobald offers an especially rich analysis of how Indigenous women experienced pregnancy and motherhood under evolving federal Indian policy. At the heart of this history are the Crow women who displayed creativity and fortitude in struggling for reproductive self-determination.

**Dark Continent** Mark Mazower 2009-05-20 "A useful, important book that reminds us, at the right time, how hard [European unity] has been, and how much care must be taken to avoid the terrible old temptations." --Los Angeles Times *Dark Continent* provides an alternative history of the twentieth century, one in which the triumph of democracy was anything but a forgone conclusion and fascism and communism provided rival political solutions that battled and sometimes triumphed in an effort to determine the course the continent would take. Mark Mazower strips away myths that have comforted us since World War II, revealing Europe as an entity constantly engaged in a bloody project of self-invention. Here is a history not of inevitable victories and forward marches, but of narrow squeaks and unexpected twists, where townships boast a bronze of Mussolini on horseback one moment, only to melt it down and recast it as a pair of noble partisans the next. Unflinching, intelligent, *Dark Continent* provides a provocative vision of Europe's past, present, and future and confirms Mark Mazower as a historian of valuable gifts.

**The Economic Development of Manchuria in the First Half of the Twentieth Century** Kungtu C. Sun 1969-07-01 Presents the author's statistical research on the agricultural and industrial development of Manchuria in the first half of the Twentieth Century. Contains numerous data tables.

**Suriname in the Long Twentieth Century** R. Hoeffte 2013-12-18 Despite its modest size, the republic of Suriname is today the site of many distinctive processes of globalization. This intersectional study teases out the complex relationships among class, gender, and ethnic identity over the course of Suriname's modern history, from the capital city of Paramaribo to the country's resource-rich rainforest.

**Revolutionary Thought in the 20th Century** Ben Turok 1980 This book brings together key writings by major revolutionary activists and thinkers. As such,

it is very different from the usual collections of articles by academics who themselves have no experience of revolutionary struggles. This book is a mirror of Marxist thinking which has come out of such struggles - in a century that has experienced an unparalleled upsurge of people's war against repressive regimes. It brings together pieces by Marx and Lenin.

**Business as Usual** Craig Calhoun 2011-05-01 Situates the current crisis in the historical trajectory of the capitalist world-system, showing how the crisis was made possible not only by neoliberal financial reforms but by a massive turn away from manufacturing things of value towards seeking profit from financial exchange and credit. Much more basic than the result of a few financial traders cheating the system, this is a potential historical turning point. In original essays, the contributors establish why the system was ripe for crisis of the past, and yet why this meltdown was different. The volume concludes by asking whether as deep as the crisis is, it may contain seeds of a new global economy, what role the US will play, and whether China or other countries will rise to global leadership. Contributors include: Immanuel Wallerstein, David Harvey, Saskia Sassen, James Kenneth Galbraith, Manuel Castells, Nancy Fraser, Rogers Brubaker, David Held, Mary Kaldor, Vadim Volkov, Giovanni Arrighi, Beverly Silver, and Fernando Coronil. The three volumes can be purchased individually or as a set.

*Labor and Monopoly Capital* Harry Braverman 1998-12 First published in 1974, this book is now the foundation text for many basic areas of scholarly inquiry, including the science of managerial control, and the eradication of skill from work under capitalism.

**A History of Big Recessions in the Long Twentieth Century** Andrés Solimano 2020-02-20 Examines the array of financial crises, slumps, depressions and recessions that happened around the globe during the twentieth century.

*Women and the Periodical Press in China's Long Twentieth Century* Michel Hockx 2018-05-24 In this major new collection, an international team of scholars examine the relationship between the Chinese women's periodical press and global modernity in the late nineteenth and twentieth centuries. The essays in this richly illustrated volume probe the ramifications for women of two monumental developments in this period: the intensification of China's encounters with foreign powers and a media transformation comparable in its impact to the current internet age. The book offers a distinctive methodology for studying the periodical press, which is supported by the development of a bilingual database of early Chinese periodicals. Throughout the study, essays on China are punctuated by transdisciplinary reflections from scholars working on periodicals outside of the Chinese context, encouraging readers to rethink common stereotypes about lived womanhood in modern China, and to reconsider the nature of Chinese modernity in a global context.

**The Corporate Rich and the Power Elite in the Twentieth Century** G. William Domhoff 2019-06-21 The Corporate Rich and the Power Elite in the Twentieth Century demonstrates exactly how the corporate rich developed and implemented the policies and created the government structures that allowed them to dominate the United States. The book is framed within three historical developments that have made this domination possible: the rise and fall of the union movement, the initiation and subsequent limitation of government social-benefit programs, and the postwar expansion of international trade. The book's deep exploration into the various methods the corporate rich used to centralize power corrects major empirical misunderstandings concerning all three issue-areas. Further, it explains why the three ascendant theories of power in the early twenty-first century—interest-group pluralism, organizational state theory, and historical institutionalism—cannot account for the complexity of events that established the power elite's supremacy and led to labor's fall. More generally, and convincingly, the analysis reveals how a corporate-financed policy-planning network, consisting of foundations, think tanks, and policy-discussion groups, gradually developed in the twentieth century and played a pivotal role in all three issue-areas. Filled with new archival findings and commanding detail, this book offers readers a remarkable look into the nature of power in America during the twentieth century, and provides a starting point for future in-depth analyses of corporate power in the current century.

**The Geometry of Imperialism** Giovanni Arrighi 1983 Few terms in the vocabulary of politics are so confused as "imperialism." Does it refer essentially to colonial rule? Or is it primarily an economic phenomenon, connected to the export of capital? What is its relation to nationalism? Which societies, in the past or present, can be properly described as imperialist? Giovanni Arrighi resolves these ambiguities by the construction of a formal model that integrates all of them into a single structure. He shows how a coherent paradigm of imperialism can be derived from Hobson's classic study of imperialism at the turn of the century, and illustrates it with a series of geometrical figures. The genesis of English imperialism is traced, from the seventeenth to twentieth centuries. Then the pattern of German and American imperialism are compared and contrasted. Arrighi looks at the consequences of the rise of multinational corporations for the traditional versions of the concept of imperialism and concludes that they transform its meaning. In a new afterword, Arrighi responds to his critics and sketches a reconceptualized theory of "imperialism" as a struggle for world hegemony.

**Global Capitalism** Jeffrey A. Frieden 2020-07-21 "One of the most comprehensive histories of modern capitalism yet written." —Michael Hirsh, New York Times An authoritative, insightful, and highly readable history of the twentieth-century global economy, updated with a new chapter on the early decades of the new century. *Global Capitalism* guides the reader from the globalization of the early twentieth century and its swift collapse in the crises of 1914–45, to the return to global integration at the end of the century, and the subsequent retreat in the wake of the financial crisis of 2008.

*Greening Europe* Anna-Katharina Wöbse 2021-12-20 Today, the environment seems omnipresent in European policy within and beyond the European Union. The idea of a shared European environment, however, has come a long way and is still being contested. *Greening Europe* focuses on the many ways people have interacted with nature and made it an issue of European concern. The authors ask how notions of Europe mattered in these activities and they expose the many entanglements of activists across the subcontinent who set out to connect and network, and to exchange knowledge, worldviews, and strategies that exceeded their national horizons. Moving beyond human agency, the handbook also highlights the eminent role nature played in both "greening" Europe and making Europe a shared environment.

**Capital in the Twenty-First Century** Thomas Piketty 2017-08-14 What are the grand dynamics that drive the accumulation and distribution of capital? Questions about the long-term evolution of inequality, the concentration of wealth, and the prospects for economic growth lie at the heart of political economy. But satisfactory answers have been hard to find for lack of adequate data and clear guiding theories. In this work the author analyzes a unique collection of data from twenty countries, ranging as far back as the eighteenth century, to uncover key economic and social patterns. His findings transform debate and set the agenda for the next generation of thought about wealth and inequality. He shows that modern economic growth and the diffusion of knowledge have allowed us to avoid inequalities on the apocalyptic scale predicted by Karl Marx. But we have not modified the deep structures of capital and inequality as much as we thought in the optimistic decades following World War II. The main driver of inequality--the tendency of returns on capital to exceed the rate of economic growth--today threatens to generate extreme inequalities that stir discontent and undermine democratic values if political action is not taken. But economic trends are not acts of God. Political action has curbed dangerous inequalities in the past, the author says, and may do so again. This original work reorients our understanding of economic history and confronts us with sobering lessons for today.

**Non-Performing Loans, Non-Performing People** Melissa García-Lamarca 2022-11-15 *Non-Performing Loans, Non-Performing People* tells the previously untold stories of those living with mortgage debt in times of precarity and explores how individualized indebtedness can unite resistance in the struggle toward housing justice. The book builds on several years of Melissa García-Lamarca's engagement with activist research in Barcelona's housing movement, in particular with its most prominent collective, the Platform for Mortgage-Affected People (PAH). What García-Lamarca learned from fellow activists and the movement in Barcelona pushed her to rethink how lived experiences of indebtedness connect to larger political- economic processes related to housing and debt. The book is also inspired by feminist scholars who integrate the lens of everyday life into explorations of contemporary political economy and by anthropologists who connect macroprocesses to lived experience. Distinctive in how it integrates a racialized, gendered, and decolonial perspective, García-Lamarca's research of mortgaged lives in precarious times explores two principal phenomena: first, how financial speculation is experienced in the day-to-day and differentially embedded in the dynamics of (urban) capital accumulation, and second, how collective action can unleash the liberating possibility of indebtedness.

**The Big Red Book of Modern Chinese Literature: Writings from the Mainland in the Long Twentieth Century** Yunte Huang 2016-02-01 A panoramic vision of the Chinese literary landscape across the twentieth century. Chinese literary imagination has encompassed an astonishing array of moods and styles—from sublime lyricism to witty surrealism, poignant documentary to the ironic, the transgressive, and the defiant. Huang provides the requisite context for these revelatory works of fiction, poetry, essays, letters, and speeches in helpful headnotes, chronologies, and brief introductions to the Republican, Revolutionary, and Post-Mao Eras. From belles lettres to literary propaganda, from poetic revolution to pulp fiction, *The Big Red Book of Modern Chinese Literature* is an eye-opening, mesmerizing, and indispensable portrait of China in the tumultuous twentieth century.

**Adam Smith in Beijing** Giovanni Arrighi 2009-01-05 In the late eighteenth century, the political economist Adam Smith predicted an eventual equalization of power between the West and the territories it had conquered. In this magisterial new work, Giovanni Arrighi shows how China's extraordinary rise invites us to reassess radically the conventional reading of *The Wealth of Nations*. He examines how recent US attempts to create the first truly global empire were conceived to counter China's spectacular economic success Now America's disastrous failure in Iraq has made the People's Republic of China the true winner in the US War on Terror. China may soon become again the kind of noncapitalist market economy that Smith described, an event that will reconfigure world trade and the global balance of power.

**Women in China's Long Twentieth Century** Gail Hershatter 2007-03-29 "An important and much-needed introduction to this rich and fast-growing field. Hershatter has handled a daunting task with aplomb." —Susan L. Glosser, author of *Chinese Visions of Family and State, 1915–1953*

**The Economic Development of Latin America in the Twentieth Century** André A. Hofman 2000 Hofman, a researcher with the Chile-based Economic Commission for Latin America and the Caribbean, uses growth accounting methods and previously unavailable long-term series data to assess the economic performance of the region during the century from a comparative and historical perspective. In particular he compares Latin American economies to those of advanced capitalist economies, to newly industrialized economies, and to Spain and Portugal because of the historical ties. He looks at the reasons for the poor or negative growth during the 1980s and the apparent recovery in the 1990s and at such problems as debt, income inequality, high inflation, cyclical instability, and political and policy instability. **Alabama in the Twentieth Century** Wayne Flynt 2004-10-10 A multifaceted study of Alabama's history over the course of the twentieth century features chapters on politics, education, women, religion, the arts, the military, and other vital topics, covering both Alabama's triumphs and low points.

**Musicking in Twentieth-Century Europe** Klaus Nathaus 2020-12-16 Music has gained the increasing attention of historians. Research has branched out to explore music-related topics, including creative labor, economic histories of music production, the social and political uses of music, and musical globalization. This handbook both covers the history of music in Europe and probes its role for the making of Europe during a "long" twentieth century. It offers concise guidance to key historical trends as well as the most important research on central topics within the field.

**Labor and Monopoly Capital** Harry Braverman 1998-12-01 This widely acclaimed book, first published in 1974, was a classic from its first day in print. Written in a direct, inviting way by Harry Braverman, whose years as an industrial worker gave him rich personal insight into work, *Labor and Monopoly Capital* overturned the reigning ideologies of academic sociology. This new edition features an introduction by John Bellamy Foster that sets the work in historical and theoretical context, as well as two rare articles by Braverman, "The Degradation of Work in the Twentieth Century" (1975) and "Two Comments" (1976), that add much to our understanding of the book.

**Seven Lives from Mass Observation** James Hinton 2016-09-29 What was it like to live in Britain during the second half of the twentieth century? In a successor to his acclaimed *Nine Wartime Lives: Mass Observation and the Making of the Modern Self*, James Hinton uses autobiographical writing contributed to *Mass Observation* since 1981 to explore the social and cultural history of late twentieth-century Britain. Prompted by thrice-yearly open-ended questionnaires, *Mass*

*Observation's* volunteers wrote about their political attitudes, religious beliefs, work, childhoods, education, friendships, marriages, sex lives, mid-life crises, aging - the whole range of human emotion, feeling, attitudes, and experience. At the core of the book are seven 'biographical essays': intimate portraits of individual lives set in the context of the shift towards the more tolerant and permissive society of the 1960s and the rise of Thatcherite neo-liberalism as the structures of Britain's post-war settlement crumbled from the later 1970s. The mass observers featured in the book, four women and three men, are drawn from across the social spectrum - wife of a small businessman, teacher, social worker, RAF wife, mechanic, lorry driver, City banker: all active and forceful characters with strong opinions and lives crowded with struggle and drama. The honesty and frankness with which they wrote about themselves takes us below the surface of public life to the efforts of 'ordinary', but exceptionally articulate and self-reflective, people to make sense of their lives in rapidly changing times.

**Virginia Woolf and the World of Books** Nicola Wilson 2018-09-27 A celebration of the centenary of the founding of Leonard and Virginia Woolf's Hogarth Press.

**Alternatives to Democracy in Twentieth-Century Europe** Sabrina P. Ramet 2019-06-12 Alternatives to Democracy in Twentieth-Century Europe examines the historical examples of Soviet Communism, Italian Fascism, German Nazism, and Spanish Anarchism, suggesting that, in spite of their differences, they had some key features in common, in particular their shared hostility to individualism, representative government, laissez faire capitalism, and the decadence they associated with modern culture. But rather than seeking to return to earlier ways of working these movements and regimes sought to design a new future - an alternative future - that would restore the nation to spiritual and political health. The Fascists, for their part, specifically promoted palingenesis, which is to say the spiritual rebirth of the nation. The book closes with a long epilogue, in which Ramet defends liberal democracy, highlighting its strengths and advantages. In this chapter, the author identifies five key choke points, which would-be authoritarians typically seek to control, subvert, or instrumentalize: electoral rules, the judiciary, the media, hate speech, and surveillance, and looks at the cases of Viktor Orbán's Hungary, Jarosław Kaczyński's Poland, and Donald Trump's United States.

**The Long Twentieth Century** Giovanni Arrighi 1994 Winner of the American Sociological Association PEWS Award (1995) for Distinguished Scholarship *The Long Twentieth Century* traces the epochal shifts in the relationship between capital accumulation and state formation over a 700-year period. Giovanni Arrighi masterfully synthesizes social theory, comparative history and historical narrative in this account of the structures and agencies which have shaped the course of world history over the millennium. Borrowing from Braudel, Arrighi argues that the history of capitalism has unfolded as a succession of "long centuries"—ages during which a hegemonic power deploying a novel combination of economic and political networks secured control over an expanding world-economic space. The modest beginnings, rise and violent unravel-ing of the links forged between capital, state power, and geopolitics by hegemonic classes and states are explored with dramatic intensity. From this perspective, Arrighi explains the changing fortunes of Florentine, Venetian, Genoese, Dutch, English, and finally American capitalism. The book concludes with an examination of the forces which have shaped and are now poised to undermine America's world power.

**Adam Smith in Beijing** Giovanni Arrighi 2009-01-05 In the late eighteenth century, the political economist Adam Smith predicted an eventual equalization of power between the West and the territories it had conquered. In this magisterial new work, Giovanni Arrighi shows how China's extraordinary rise invites us to reassess radically the conventional reading of *The Wealth of Nations*. He examines how recent US attempts to create the first truly global empire were conceived to counter China's spectacular economic success Now America's disastrous failure in Iraq has made the People's Republic of China the true winner in the US War on Terror. China may soon become again the kind of noncapitalist market economy that Smith described, an event that will reconfigure world trade and the global balance of power.
