The existing field has its origin in the functioning of the human brain in processing information, recognizing pattern, learning from observations and experiments, storing and retrieving information from memory, etc. In particular, the power industry being on the verge of epoch changing due to deregulation, the power engineers require Computational intelligence tools for proper planning, operation and control of the power system. Most of the CI tools are suitably formulated as some sort of optimization or decision making problems. These CI techniques provide the power utilities with innovative solutions for efficient analysis, optimal operation and control and intelligent decision making. This edited volume deals with different CI techniques for solving real world Power Industry problems. The technical contents will be extremely helpful for the researchers as well as the practicing engineers in the power industry.

Peta Lyre's Rating Normal Anna Whateley 2020-04-28 'I'm Peta Lyre,' I mumble. Look people in the eye if you can, at least when you greet them. I try, but it's hard when she is smiling so big, and leaning in. Peta Lyre is far from typical. The world she lives in isn't designed for the way her mind works, but when she follows her therapist's rules for 'normal' behaviour, she can almost fit in without attracting attention. When a new girl, Sam, starts at school, Peta's carefully structured routines start to crack. But on the school ski trip, with romance blooming and a newfound confidence, she starts to wonder if maybe she can have a normal life after all. When things fall apart, Peta must decide whether all the old rules still matter. Does she want a life less ordinary, or should she keep her rating normal? A moving and joyful own voices debut. 'Honest, perceptive and gutsy; I loved tuning into Peta's world.' - Emily Gale
