Building a Just World Order Alfred de Zayas 2021-10-01 In 2011, the UN Human Rights Council created the mandate of the Independent Expert on the Promotion of a Democratic and Equitable International Order. This book, based on the reports by Dr. Alfred de Zayas, the first mandate-holder (2012-2018), offers a brilliant and comprehensive critique of the UN system, addressing the changes that must be made in order to further the emergence of a democratic and equitable international order. De Zayas proposes concrete reforms of the UN system, notably the Security Council. He advocates recognition of peace as a human right, slashing military budgets, and establishing the right of self-determination as a conflict-prevention measure. As it concerns the global economy, he calls for reversing the adverse impacts of World Bank and International Monetary Fund policies, rendering free-trade agreements compatible with human rights, abolishing tax havens and ISDS, alleviating the foreign debt crisis, and criminalizing war-profiteers and pandemic vultures. He denounces unilateral coercive measures, economic sanctions and financial blockades, because they demonstrably have led to hundreds of thousands of deaths. "Alfred de Zayas is a gifted human rights lawyer who, alongside Jakob Moller, pioneered the development of UN human rights jurisprudence. He was a dynamic Special Rapporteur, as is evidenced by his Principles for a Democratic and Equitable International Order." --BERTRAND RAMCHARAN, Acting UN High Commissioner for Human Rights 2002-2004 "The 25 Zayas Principles of International Order are a modern Magna Carta. If implemented by the international community, they would help ensure peace with social justice in the 21st century. Pursuant to the UN Charter member States bear responsibility for future generations. Hence, they should take concrete measures to achieve this rules-based order in international solidarity." --Maria Fernanda Espinosa, President of the 73rd session of the UN General Assembly, 2018-19 "Zayas proposes a new functional paradigm of human rights for all. His elaboration on principles and on how to apply international law uniformly is a welcome contribution to a necessary debate on the foundations of a just international order." --Professor Dr. Carlos Correa, University of Buenos Aires, Executive Director of South Centre

**The Storyteller's Secret** Carmine Gallo 2016-02-23 How did a Venice Beach T-shirt vendor become television's most successful producer? How did an entrepreneur who started in a garage create the most iconic product launches in business history? How did a timid pastor's son overcome a paralyzing fear of public speaking to captivate sold-out crowds at Yankee Stadium, twice? How did a human rights attorney earn TED's longest standing ovation, and how did a Facebook executive launch a movement to encourage millions of women to "lean in"? They told brilliant stories. In *The Storyteller's Secret: From TED Speakers to Business Legends, Why Some Ideas Catch on and Others Don't*, keynote speaker, bestselling author, and communication expert Carmine Gallo reveals the keys to telling powerful stories that inspire, motivate, educate, build brands, launch movements, and change lives. The New York Times has called a well-told story "a strategic tool with irresistible

power" - the proof lies in the success stories of 50 icons, leaders, and legends featured in *The Storyteller's Secret*: entrepreneurs like Richard Branson, Sara Blakely, Elon Musk, Steve Jobs, and Sheryl Sandberg; spellbinding speakers like Dr. Martin Luther King, Jr., Bryan Stevenson, and Malala Yousafzai; and business leaders behind famous brands such as Starbucks, Southwest Airlines, Wynn Resorts, Whole Foods, and Pixar. Whether your goal is to educate, fundraise, inspire teams, build an award-winning culture, or to deliver memorable presentations, a story is your most valuable asset and your competitive advantage. In *The Storyteller's Secret*, Gallo explains why the brain is hardwired to love stories - especially rags-to-riches stories - and how the latest science can help you craft a persuasive narrative that wins hearts and minds. "The art of storytelling can be used to drive change," says billionaire entrepreneur Richard Branson. And since the next decade will see the most change our civilization has ever known, your story will radically transform your business, your life, and the lives of those you touch. Ideas that catch on are wrapped in story. Your story can change the world. Isn't it time you shared yours?

Global Trends 2040 National Intelligence Council 2021-03 "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Innovative Internet Secrets Doug Knell 2018-01-11 "There are so many secrets packed in here, I have to wonder if the Illuminati will have this author assassinated" - Derrick Mennings, Marxist Internet Weekly Digest Written by an engineering expert with comprehensive knowledge of SEO marketing, computers, and the best Belgian beers to drink with them. Preview the book to enter enlightenment. Give Me A Couple Of Hours And I'll Turn You Into An Internet Wizard! There are other internet secrets books and they work as excellent paperweights and have some therapeutic benefits, too: you can use them to put you to sleep. This book is not to be equated with all those boring-as-all-hell books with dubious internet insights and SEO tips. Trust us: what you know about the internet isn't as much as you think you know. Beyond the basics, how clued in are you really about the internet? You probably know more about Bangladesh (which ain't much, right?) than you do about web development, link building, and search engine optimization. The internet may play an integral role in our lives, yet in informal testing, close to 92% of internet users scored no more than basic competence with it. Less than 16% had any legitimate knowledge of SEO marketing. I can hear you from here: "Basic competence is good enough for me. Why would I want or need to do more than that?" You can use the Google or Bing search engine (but lazily, not with any genuine optimization), get around the Gmail and Hotmail interfaces, buy an airline ticket at Expedia, order a book at Amazon, and post an update at Facebook. Is that mastery when anyone can do that? Complacency never does anyone any favors. If the complacent had won out, we'd still believe the world is flat and airplane flight is impossible. Do you really need to be told that the internet is one of those things you cannot afford to be complacent about? Your livelihood, your identity, your social networks, your ability to distinguish yourself from the competition will all one day be measured by the breadth and depth of your internet skills. Development of the web hasn't stood still. Should your skills? Every single one of these internet secrets will shoot your internet productivity into the stratosphere and leave you head and shoulders above your peers. We're not naive to think you don't know any of these secrets, but we're confident you don't know about most of them. Any of these 100+ internet insights will more than make up for the book's cost \* Keep your computer and other devices protected: the best anti-virus & malware tools internet tools you should install to keep your computer, mobile phone, and tablet from being

crippled. \* Set up sharable internet networks wherever you happen to be, like standing in front of Buckingham Palace. \* Start building your favorite link bookmarks across all internet browsers and platforms. \* Avoid internet scams. \* Download and view internet videos offline. Video streaming sucks bandwidth from your 4G plan. \* Keep your identity safe. \* Transfer large files. \* Set up online music libraries so you can listen to your music anywhere, anytime. \* Shop on the internet for the absolute best prices. \* View web sites optimally on any device. \* Remember your passwords for any site and situation. \* And much, much more. Some of these internet secrets you could discover if you knew where to look, but it would take you months to collect the same knowledge you'll find here. Other internet tools we've picked up from years of experience. You won't find those gems anywhere else. Dump your other SEO books and for-idiots web development guides. You will not find another internet book this practical or enjoyable for any price. The new internet isn't going anywhere, but you should. Let's get going, with us as your guide along this infinitely more diverse Information Superhighway.

### How to Find Your Dream Sales Job - The Future is Yours to Create!

Susan A. Enns 2020-09-01 Sales is considered to be one of the most recession proof careers. Why should you consider a sales career, how to know if you would be good at it, how to write a resume and a gender neutral cover letter, what to include in your LinkedIn profile, how to do interview prep, what to wear, how to access the hidden job market, how to evaluate a job offer, how to resign from your current job .... it's all in this book! More Details: A study published by Jobfox, identified Sales Representative/Business Development as the most recession-proof profession. Profit Magazine reported; "Finding the right sales talent was one of the biggest concerns facing sales organizations today." Similar studies conducted annually by Manpower Inc. report that the position of "sales representative" is consistently considered by management as one

of the most difficult jobs to fill. According to the research in the book "How to Hire & Develop Your Next Top Performer - The Five Qualities That Make Sales People Great", 1 in 4 people have an aptitude and are well suited for a career in sales. So, if there are that many sales organizations always looking to hire sales people, and so many people have the ability to sell, why are so many sales people having difficulties finding their dream sales position? It's probably because few of us are ever taught how to actually find it. This eBook is going to fix that. "How to Find Your Dream Sales Job - The future is yours to create!" will ask and answer four basic questions: 1. Why should you consider a career in sales? 2. How to know if you would be good at it? 3. What does your dream job look like? 4. How do you go out into the job marketplace and find it? Why should you consider a sales career, how to know if you would be good at it, how to write a resume and a gender neutral cover letter, what to include in your LinkedIn profile, how to do interview prep, what to wear, how to access the hidden job market, how to evaluate a job offer, how to resign from your current job .... IT'S ALL IN THIS BOOK! Written by Susan A. Enns, a sales coach and author who has been in sales, in one form or another, for well over 3 decades. Over those 30 plus years, in all capacities at all levels of sales, sales management, and executive level management, she has interviewed hundreds, maybe even thousands of candidates for various sales and sales management positions. With that experience under her belt and a record of proven performance to her credit, she wrote this book. She started to write it the day she met a very enterprising young man who wanted to start a career in sales. He told her he found a company online and they were going to charge him more than \$3000 to teach him how to find a sales job. She thought at the time that was highway robbery, let alone questioning if it was even legal. She finished writing it shortly after the COVID-19 Pandemic of 2020 changed the world, and so many talented sales people were forced to change jobs and were hitting the job market on a moment's notice. As Confucius once said, "Choose a job you love, and you will never have to work a day in your life". Susan has had such a rewarding career in sales, she wants to help you explore the same opportunity. So let's get started!

Do you want to know what it is? Well. I'll tell you. The Secret To Making Money Online Is To Understand That Content Is KING! Maybe you've heard this term before, but I don't think that most people realize the true power behind this old saying. Let's face it, while you can use it to check email, shop, and socialize with people, the primary reason 99% of people come to the internet is searching for information, a.k.a content. The internet is called the information super highway for this very reason. If you want to make the most money online as quickly as possible you need to be selling what people are looking for! Which is what? Information, or content! Now here are the two most popular and lucrative business models that you can use to make money with content starting today! **Lucrative Content Business Model #1: Niche Websites** The main draw for any website for any visitor online is the amount and quality of the content on it. People are interested in many things, and there are literally thousands of little niche marketplaces out there. And if you can create a website or blog focused around a certain subject matter, then put informative and high quality content on it, you can make money quickly and easily. This is easily done, because there are tons of companies and corporations doing business inside that niche marketplace and they'll gladly pay you to advertise on your site. So you capture people's attention with high quality content and make money from advertising, the same way television programs capture attention and make money from commercials. This is a great way to make money, but there is another way to make an extreme amount of money quick and easily with content. **Once You Discover How To Properly Exploit All Of The Content In The Public Domain For Your Own Profits, You're Literally Going To Bust Your Gut Laughing At Everyone Doing It The Hard Way!** Public domain content is like steroids for your internet marketing business. **ORDER NOW.**

**Using SANs and NAS** W. Curtis Preston 2002-02-05 Data is the lifeblood of modern business, and modern data centers have extremely demanding requirements for size, speed, and reliability. Storage Area Networks (SANs) and Network Attached Storage (NAS) allow organizations to manage and back up huge file systems quickly, thereby keeping their lifeblood flowing. W. Curtis Preston's insightful book takes you through the ins and outs of building and managing large data

centers using SANs and NAS. As a network administrator you're aware that multi-terabyte data stores are common and petabyte data stores are starting to appear. Given this much data, how do you ensure that it is available all the time, that access times and throughput are reasonable, and that the data can be backed up and restored in a timely manner? SANs and NAS provide solutions that help you work through these problems, with special attention to the difficulty of backing up huge data stores. This book explains the similarities and differences of SANs and NAS to help you determine which, or both, of these complementing technologies are appropriate for your network. Using SANs, for instance, is a way to share multiple devices (tape drives and disk drives) for storage, while NAS is a means for centrally storing files so they can be shared. Preston exams each technology with a vendor neutral approach, starting with the building blocks of a SAN and how they can be assembled for effective storage solutions. He covers day-to-day management and backup and recovery for both SANs and NAS in detail. Whether you're a seasoned storage administrator or a network administrator charged with taking on this role, you'll find all the information you need to make informed architecture and data management decisions. The book fans out to explore technologies such as RAID and other forms of monitoring that will help complement your data center. With an eye on the future, other technologies that might affect the architecture and management of the data center are explored. This is sure to be an essential volume in any network administrator's or storage administrator's library.
