**Ecosystem Function in Savannas** Michael J. Hill 2010-11-17 Fascinating and diverse, savanna ecosystems support a combination of pastoral and agropastoral communities alongside wild and domestic herbivores that can be found nowhere else. This diversity has made the study of these areas problematic. *Ecosystem Function in Savannas: Measurement and Modeling at Landscape to Global Scales* addresses some of the discontinuities in the treatment of savannas by the scientific community and documents a range of measurements, methods, technologies, applications, and modeling approaches. Based on contributions from leading authorities and experts on savanna systems worldwide, the book describes the global savanna biome in terms of its broad ecological properties, temporal dynamics, disturbance levels, and human dimensions. The text examines carbon, water, energy, and trace gas fluxes for major global savanna regions. It looks at quantitative surface properties of savannas that can be retrieved using remote sensing and numerical approaches used to explore savanna dynamics. The authors also discuss how savanna modeling and measurement approaches might be unified. By presenting this confluence of information in a single resource, the book provides a platform for examining synergies, connections, integrative opportunities, and complementarities among approaches and data sources. This information can then be used to harmonize measurement and modeling methods among scales and across disciplinary boundaries. The book builds a bridge across the markedly different perspectives on savannas by which ecologists, biogeochemists, remote sensors, geographers, anthropologists, and modelers approach their science.

Glaciated Coasts Duncan M. Fitzgerald 2013-09-03 Glaciated Coasts is a collection of articles that deals with shoreline morphologies of glaciated coasts and the processes that formed these coastlines in North America. This book examines nonsandy shorelines and covers a range of geologic and geographic coastal settings in a northern-southern order. This text investigates and compares the glaciated northern shorelines. These shorelines north of the glacial limit are mostly of the primary form in different stages of modification by marine agents. Shorelines are associated with embayments; baymouth barriers in turn enclose embayments. This book describes beaches as having coarse or mixed sediment populations. Most beaches worldwide have gravel clasts that have been rounded and sorted by marine processes. In the southeastern coast of Alaska, active tectonics on a mountainous shoreline is evident. The region also shows emergent and submerging shorelines with a glacial imprint undergoing formation by modern processes. This book also gives examples of gravel beach environments in various coastal settings. This book can prove useful for students of meteorology, oceanography as well as to marine ecologists and biologists. It can also benefit readers whose interest lie with coastal environment or with the general earth sciences.

Methods of Biochemical Analysis, Volume 34 Clarence H. Suelter 1990-03-06 Biomedical Applications of Mass Spectrometry Edited by Clarence H. Suelter and J. Throck Watson This unusual text is not simply a compilation of mass spectrometric methods but provides, instead, insight into specific approaches mass spectroscopists use when applying the technique to a variety of biological problems. Each chapter provides guidance in using the appropriate

**Downsiders** Neal Shusterman 2012-02-21 Beneath the sewer grates and manholes of the city lies a strange and secret world called the Downside. Every Downsider knows that it's forbidden to go Topside, and most fear a collision of the two worlds. But fourteen-year-old Talon is curious about what goes on above ground, and one day he ventures out in search of medicine for his ailing sister. There he meets Lindsay, who is as curious about Talon's world as he is about hers. When Lindsay visits the Downside for the first time, she marvels at the spirit of the Downsiders, and the way they create works of art from topside "trash," like old subway tokens and forgotten earrings. As awed as she is by the Downside, however, she also questions its origins, and when she finds out that this fantastic world is not all it appears to be, she is determined to tell Talon the truth. Then a construction accident threatens to crush Talon's world, and his loyalty is put to the test. Can the truth save the Downside, or will it destroy an entire civilization? Neal Shusterman takes readers on an amazing journey into a place that's only a few steps away, yet beyond their wildest dreams.

**Bacterial and Eukaryotic Porins** Roland Benz 2006-03-06 This first book dedicated to the topic relates the known physiological functions of porins to their molecular structure and mechanism, as documented by various in vitro and in vivo methods, including the generation of null mutants in mice. For the first time, it brings together biophysical evidence with studies performed in a cellular context, presenting a unified picture of the fundamental importance of porins for cellular function. With 16 contributions by an interdisciplinary team of leading porin researchers, this reference is essential reading for every molecular or structural biologist with an interest in this essential protein family.

Materializing Digital Futures Toija Cinque 2022-01-27 Digital, visual media are found in most aspects of everyday life, from workplaces to household devices - computer and digital television screens, appliances such as refrigerators and home assistants, and applications for social media and gaming. Each technologically enabled opportunity brings an increasingly sophisticated language with the act of pursuing the intrasensorial ways of perceiving the world around us - through touch, movement, sound and vision - that is the heart of screen media use and audience engagement with digital artifacts. Drawing on digital media's currently evolving transformation and transforming capacity this book builds a story of the multiple processes in robotics and AI, virtual reality, creative image and sound production, the representation of data and creative practice. Issues around commodification, identity, identification, and political economy are critically examined for the emerging and affecting encounters and perceptions that are brought to bear.

*The Real Name of God* Rabbi Wayne Dosick 2012-05-29 Reveals the real, whole name of God and its place within

each of us • Explains how none of the God-names commonly used in the Bible is God's real name • Shows how the real name of God unites all religions from both West and East • Includes spiritual techniques, prayers, poems, and meditative chants to bring each of us into deep, personal, intimate, living relationship with God Of the many names of God commonly used in the Bible and other sacred literature, none is God's real name. Every God-name, including YHWH, reflects only one of God's many aspects, such as the loving creator, the militaristic authoritarian, or the all-knowing judge. None embodies the wholeness, the totality, the full Essence of God. Who then are we to speak to when we seek God? If you can't truly know something until you know its name, how can we truly know God? The culmination of years of translation research and etymological investigation, Rabbi Wayne Dosick's work digs through many layers of presumption and deeply ingrained beliefs to reveal the real name of God hiding in plain sight in the Bible: Anochi. He shows how this sacred name unites all religions--both of the West and the East. The name Anochi enables us to finally meet the whole, complete, real God--both the grand God of the vast universe and the God of breath, soul, and heart who dwells within each of us. This in-depth exploration of God's name includes spiritual techniques, poems, guided prayers, and meditative chants to bring each of us into personal, intimate, and purposeful relationship with God. By knowing the real name of God, we can affirm the connection to the Divine at the core of our being. We can touch the face of God that resides deep within us all.

**The Complete Mars Trilogy: Red Mars, Green Mars, Blue Mars** Kim Stanley Robinson 2015-07-30 All three volumes of the worldwide bestselling Mars trilogy.

**Desolation Road** Ian McDonald 2014-01-31 It all began thirty years ago on Mars, with a greenperson. But by the time it all finished, the town of Desolation Road had experienced every conceivable abnormality; from Adam Black's Wonderful Travelling Chautauqua and Educational 'Stravaganza (complete with its very own captive angel), to the Astounding Tatterdemalion Air Bazaar. Its inhabitants ranged from Dr. Alimantando, the town's founder and resident genius, to the Babooshka, a barren grandmother who just wants her own child – grown in a fruit jar; from Rajendra Das, mechanical hobo who has a mystical way with machines to the Gallacelli brothers, identical triplets who fell in love with – and married – the same woman. **REVIEWS** "Ian McDonald's Desolation Road is one of my most personally influential novels. It's an epic tale of the terraforming of Mars, whose sweep captures the birth and death of mythologies, economics, art, revolution, politics... Desolation Road pays homage to David Byrne's Catherine Wheel, to Ray Bradbury's entire canon and to Jack Vance, blending all these disparate creators in a way that surprises, delights, then surprises and delights again." – Cory Doctorow (Boing Boing) "McDonald's first novel, it absolutely bowled me over when it came out, and while I have read everything he's

published since, and admire all of it and like most of it, this remains my favourite... some of the most beautiful prose imaginable... If you ever want to demonstrate how different science fiction can be, what an incredible range and sweep of things are published with a little spaceship on the spine, Desolation Road is a shining datapoint, because it isn't like anything else and yet it is coming from a knowledge of what the genre can do and can be and making something new out of it." – Jo Walton (Tor.com) "This is the kind of novel I long to find yet seldom do. Desolation Road is a rara avis... Extraordinary and more than that!" – Philip José Farmer

**Icehenge** Kim Stanley Robinson 2014-01-07 An early novel from Science Fiction legend Kim Stanley Robinson, now available for the first time in decades: Icehenge. On the North Pole of Pluto there stands an enigma: a huge circle of standing blocks of ice, built on the pattern of Earth's Stonehenge--but ten times the size, standing alone at the farthest reaches of the Solar System. What is it? Who came there to build it? The secret lies, perhaps, in the chaotic decades of the Martian Revolution, in the lost memories of those who have lived for centuries. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**Biochemistry of Signal Transduction and Regulation** Gerhard Krauss 2006-03-06 This all-new edition of a classic text has been thoroughly revised to keep pace with the rapid progress in signal transduction research. With didactic skill and clarity the author relates the observed biological phenomena to the underlying biochemical processes. Directed to advanced students, teachers, and researchers in biochemistry and molecular biology, this book describes the molecular basis of signal transduction, regulated gene expression, the cell cycle, tumorigenesis and apoptosis. "Provides a comprehensive account of cell signaling and signal transduction and, where possible, explains these processes at the molecular level" (Angewandte Chemie) "The clear and didactic presentation makes it a textbook very useful for students and researchers not familiar with all aspects of cell regulation." (Biochemistry) "This book is actually two books: Regulation and Signal Transduction." (Drug Research)

**Dystopia** Gregory Claeys 2016-11-17 Dystopia: A Natural History is the first monograph devoted to the concept of dystopia. Taking the term to encompass both a literary tradition of satirical works, mostly on totalitarianism, as well as real despotisms and societies in a state of disastrous collapse, this volume redefines the central concepts and the chronology of the genre and offers a paradigm-shifting understanding of the subject. Part One assesses the theory and prehistory of 'dystopia'. By contrast to utopia, conceived as promoting an ideal of friendship defined as 'enhanced sociability', dystopia is defined by estrangement, fear, and the proliferation of 'enemy' categories. A 'natural history' of dystopia thus concentrates upon the centrality of the passion or emotion of fear and hatred in modern despotisms. The work of Le Bon, Freud, and others is used to show how dystopian groups use such emotions. Utopia and dystopia are portrayed not as opposites, but as extremes on a spectrum of sociability, defined by a heightened form of group identity. The prehistory of the process whereby 'enemies' are demonised is explored from early conceptions of monstrosity through Christian conceptions of the devil and witchcraft, and the persecution of heresy. Part Two surveys the major dystopian moments in twentieth century despotisms, focussing in particular upon Nazi Germany, Stalinism, the Chinese Cultural Revolution, and Cambodia under Pol Pot. The concentration here is upon the political religion hypothesis as a key explanation for the chief excesses of communism in particular. Part Three examines literary dystopias. It commences well before the usual starting-point in the secondary literature, in anti-Jacobin writings of the 1790s. Two chapters address the main twentieth-century texts usually studied as representative of the genre, Aldous Huxley's Brave New World and George Orwell's Nineteen Eighty-Four. The remainder of the section examines the evolution of the genre in the second half of the twentieth century down to the present.

**Ares Express** Ian McDonald 2014-01-31 A Mars of the imagination, like no other, in a colorful, witty SF novel, taking place in the kaleidoscopic future of Ian McDonald's Desolation Road, Ares Express is set on a terraformed

Mars where fusion-powered locomotives run along the network of rails that is the planet's circulatory system and artificial intelligences reconfigure reality billions of times each second. One young woman, Sweetness Octave Glorious-Honeybun Asiim 12th, becomes the person upon whom the future -- or futures -- of Mars depends. Big, picaresque, funny; taking the Mars of Ray Bradbury and the more recent, terraformed Marses of authors such as Kim Stanley Robinson and Greg Bear, *Ares Express* is a wild and woolly magic-realist SF novel, featuring lots of bizarre philosophies, strange, mind-stretching ideas, and trains as big as city blocks. **REVIEWS** "Ares Express is a long, adventure-filled, extravagantly colorful, often funny, quite moving, highly imaginative, excellently written story, set on a glorious Mars built partly of sharp-edged Kim Stanley Robinson-style extrapolation, but mostly of lush, loving, Ray Bradbury-style semi-SF, semi-Fantasy, Martian dreams... I loved it wholeheartedly." – SF Site "Hugo-winner McDonald's virtues have long been underappreciated by major North American publishers... McDonald's fantastic Mars is vividly detailed and owes much to Bradbury's Martian stories. Despite a bit of hand waving around technology that is glibly indistinguishable from magic, this sequel is entirely worthy of its rightly lauded predecessor [*Desolation Road*]." – Publishers Weekly "One of the strangest, weirdest, fantastic reads of your life." – SF Crowsnest "McDonald is clever, lyrical... snarky, and utterly wondrous. The characters would be completely unbelievable in our world, but in theirs they are inevitable..." – Night Owl Reviews

**Internet of Things Use Cases for the Healthcare Industry** Pethuru Raj 2021-04-01 This book explores potentially disruptive and transformative healthcare-specific use cases made possible by the latest developments in Internet of Things (IoT) technology and Cyber-Physical Systems (CPS). Healthcare data can be subjected to a range of different investigations in order to extract highly useful and usable intelligence for the automation of traditionally manual tasks. In addition, next-generation healthcare applications can be enhanced by integrating the latest knowledge discovery and dissemination tools. These sophisticated, smart healthcare applications are possible thanks to a growing ecosystem of healthcare sensors and actuators, new ad hoc and application-specific sensor and actuator networks, and advances in data capture, processing, storage, and mining. Such applications also take advantage of state-of-the-art machine and deep learning algorithms, major strides in artificial and ambient intelligence, and rapid improvements in the stability and maturity of mobile, social, and edge computing models.

*Green Planets* Gerry Canavan 2014-04-15 Contemporary visions of the future have been shaped by hopes and fears about the effects of human technology and global capitalism on the natural world. In an era of climate change, mass extinction, and oil shortage, such visions have become increasingly catastrophic, even apocalyptic. Exploring the close relationship between science fiction, ecology, and environmentalism, the essays in *Green Planets* consider how science fiction writers have been working through this crisis. Beginning with H. G. Wells and passing through major twentieth-century writers like Ursula K. Le Guin, Stanislaw Lem, and Thomas Disch to contemporary authors like Margaret Atwood, China Miéville, and Paolo Bacigalupi—as well as recent blockbuster films like *Avatar* and *District 9*—the essays in *Green Planets* consider the important place for science fiction in a culture that now seems to have a very uncertain future. The book includes an extended interview with Kim Stanley Robinson and an annotated list for further exploration of "ecological SF" and related works of fiction,

nonfiction, films, television, comics, children's cartoons, anime, video games, music, and more. Contributors include Christina Alt, Brent Bellamy, Sabine Höhler, Adeline Johns-Putra, Melody Jue, Rob Latham, Andrew Milner, Timothy Morton, Eric C. Otto, Michael Page, Christopher Palmer, Gib Prettyman, Elzette Steenkamp, Imre Szeman.
