in the transformation of world orders. In contrast to previous policies of repression towards labour unrest, these recent disputes centring round wages and working conditions have been met with a more permissive response on the part of the state, as the CCP ostensibly seeks to facilitate a transition away from a model of political economy based on 'low-road' labour relations and export dependence. *Labour and Development in East Asia* shows that such inter-linkages between labour, geopolitical transformations, and states' developmental strategies have been much more central to East Asia's development than has commonly been recognised. By adopting an explanatory framework of the labour-geopolitics-development nexus, the book theorises and provides an historical analysis of the formation and transformation of the East Asian regional political economy from the end of the Second World War to the present, with particular reference to Japan, South Korea, Taiwan and China. In recent years, the young, educated, and affluent have surged back into cities, reversing decades of suburban flight and urban decline. and yet all is not well. In *The New Urban Crisis*, Richard Florida, one of the first scholars to anticipate this back-to-the-city movement, demonstrates how the forces that drive urban growth also generate cities' vexing challenges, such as gentrification, segregation, and inequality. Meanwhile, many more cities still stagnate, and middle-class neighborhoods everywhere are disappearing. We must rebuild cities and suburbs by empowering them to address their challenges. *The New Urban Crisis* Downloaded by

The Colour of Our Future Xolela Mangcu 2015-07-01 South Africa is ready for a new vocabulary than can form the basis for a national consciousness which recognises racialised identities while affirming that, as human beings, we are much more than our racial, sexual, class, religious or national identities. The Colour of Our Future makes a bold and ambitious contribution to the discourse on race. It addresses the tension between the promise of a post-racial society and the persistence of racialised identities in South Africa, which has historically played itself out in debates between the 'I don't see race' of non-racialism and the 'I'm proud to be black' of black consciousness. The chapters in this volume highlight the need for a race-transcendent vision that moves

beyond 'the festival of negatives' embodied in concepts such as non-racialism, non-sexism, anti-colonialism and anti-apartheid. Steve Biko's notion of a 'joint culture' is the scaffold on which this vision rests; it recognises that a race-transcendent society can only be built by acknowledging the constituent elements of South Africa's EuroAfricanAsian heritage. The distinguished authors in this volume have, over the past two decades, used the democratic space to insert into the public domain new conversations around the intersections of race and the economy, race and the state, race and the environment, race and ethnic difference, and race and higher education. Presented here is some of their most trenchant and yet still evolving thinking.

Lenette Azzi-Lessing 2017 - Behind from the Start examines what's behind the stubbornly high rate of poverty among young children in the U.S and its consequences. It explains the multiple ways in which early-life poverty robs millions of children of a promising future, and calls for dramatic changes in how we approach this problem---

Biokerosene Martin Kaltschmitt 2017-08-09 This book provides a detailed overview of aspects related to the overall provision chain for biokerosene as part of the global civil aviation business. Starting with a review of the current market situation for aviation fuels and airplanes and their demands, it then presents in-depth descriptions of classical and especially new types of non-edible biomass feedstock suitable for biokerosene provision.

Subsequent chapters discuss those fuel provision processes that are already available and

those still under development based on various biomass feedstock materials, and present e.g. an overview of the current state of the art in the production of a liquid biomass-based fuel fulfilling the specifications for kerosene. Further, given the growing interest of the aviation industry and airlines in biofuels for aviation, the experiences of an air-carrier are presented. In closing, the book provides a market outlook for biokerosene. Addressing a broad range of aspects related to the pros and cons of biokerosene as a renewable fuel for aviation, the book offers a unique resource.

Tax, Order, and Good

Government E.A. Heaman

2017-06-08 Was Canada's Dominion experiment of 1867 an experiment in political domination? Looking to taxes provides the answer: they are a privileged measure of both political agency and political domination. To pay one's taxes was the sine qua non of entry into political life, but taxes are also the point of politics, which is always about the

wealth. Modern states have everywhere been born of tax revolts, and Canada was no exception. Heaman shows that the competing claims of the propertied versus the people are hardwired constituents of Canadian political history. Tax debates in early Canada were philosophically charged, politically consequential dialogues about the relationship between wealth and poverty. Extensive archival research, from private papers, commissions, the press, and all levels of government, serves to identify a rising popular challenge to the patrician politics that were entrenched in the Constitutional Act of 1867 under the credo "Peace, Order, and good Government." Canadians wrote themselves a new constitution in 1867 because they needed a new tax deal, one that reflected the changing balance of regional, racial, and religious political accommodations. In the fifty years that followed, politics became social politics and a liberal state became a modern administrative one. But

emerging conceptions of fiscal fairness met with intense resistance from conservative statesmen, culminating in 1917 in a progressive income tax and the bitterest election in Canadian history. *Tax, Order, and Good Government* tells the story of Confederation without exceptionalism or misplaced sentimentality and, in so doing, reads Canadian history as a lesson in how the state works. *Tax, Order, and Good Government* follows the money and returns taxation to where it belongs: at the heart of Canada's political, economic, and social history.

A Profile of the Performing Arts Industry

David H. Gaylin
2015-10-07 Attending a live concert or theatrical performance can be a thrilling experience. At their best, the performing arts represent the height of human creativity and expression. But the presentation on stage, whether it is Shakespeare, Beethoven, or The Lion King, depends on a business backstage. This book provides an overview of both the product on stage and the industry that makes it possible. While the industry's product is unique—with unique supply and demand characteristics—it is still an industry, with supply inputs, organization structures, competitors, business models, value chains, and customers.

We will examine each of the

major segments (Broadway, regional theater, orchestra, opera, and ballet) along these business dimensions. This book will give lovers of the performing arts an understanding of the business realities that make live performances possible. Managers, board members, and performers will be better equipped to take on the strategic challenges their companies face. People contemplating any of these roles will have a better idea of what to expect. Business analysts and students of strategy will discover how economic frameworks apply in this unique setting where culture and commerce converge.

encountered an industrialising modernity, this book explores how different forms of work have been valued up to the present day. Focusing on the cultural, intellectual, social and political implications of wages, the chapters in this collection historicise the labour market, conceiving it as complex system of social relations which evolve through time and differ according to space. They show how the level of wages and other forms of remuneration reflect not only marginal productivity and scarcity but also the nature of work relations and wider political, social and economic circumstances. With examples ranging across several centuries and different parts of the globe, it shows how wages are influenced by the specific organization and processes of work, conflict and power, social status and hierarchies between workers, custom and identity, family structure and professional ethics, ideology, politics and policy. Leading and Managing Indigenous Education in the Postcolonial World Zane Ma Rhea 2014-07-11 This book brings together the academic fields of educational leadership, educational administration, strategic change management, and Indigenous education in order to provide a critical, multi-perspective, systems level analysis of the provision of education services to Indigenous people. It draws on a range of theorists across these fields internationally, mobilising social exchange and intelligent complex adaptive systems theories to address the key problematic of intergenerational, educational failure. Ma Rhea establishes the basis for an Indigenous rights approach to the state provision of education to Indigenous people.

peoples that includes recognition of their distinctive economic, linguistic and cultural rights within complex, globalized, postcolonial education systems. The book problematizes the central concept of a partnership between Indigenous people and non-Indigenous school leaders, staff and government policy makers, even as it holds this key concept at its centre. The infantilising of Indigenous communities and Indigenous people can take priority over the education of their children in the modern state; this book offers an argument for a profound rethinking of the leadership and management of Indigenous education. *Leading and Managing Indigenous Education in the Postcolonial World* will be of value to researchers and postgraduate students focusing on Indigenous education, as well as teachers, education administrators and bureaucrats, sociologists of education, Indigenous education specialists, and those in international and comparative education.

False Dawn Steven A. Cook
2017-05-01 Half a decade after Arabs across the Middle East poured into the streets to demand change, hopes for democracy have disappeared in a maelstrom of violence and renewed state repression. Egypt remains an authoritarian state, Syria and Yemen are in the midst of devastating civil wars, Libya has descended into anarchy, and the self-declared Islamic State rules a large swath of territory. Even Turkey, which also experienced large-scale protests, has abandoned its earlier shift toward openness and democracy and now more closely resembles an autocracy. How did things go so wrong so quickly across a wide range of regimes? In *False Dawn*, noted Middle East regional expert Steven A. Cook looks at the trajectory of events across the region from the initial uprising in Tunisia to the failed coup in Turkey to explain why the Middle Eastern uprisings did not succeed. Despite appearances, there were no true revolutions in the Middle East.

ago: none of the affected societies underwent social revolutions, and the old structures of power were never eliminated. Even supposed successes like Tunisia still face significant barriers to democracy because of the continued strength of old regime players. Libya, the state that came closest to revolution, has fragmented into chaos, and Turkey's president, Recep Tayyip Erdogan, has used the recent coup against him as grounds for a widespread crackdown on his opponents, reinforcing the Turkish leader's personal power. After taking stock of how and why the uprisings failed to produce lasting change, Cook considers the role of the United States in the region. What Washington cannot do, Cook argues, is shape the politics of the Middle East going forward. While many in the policymaking community believe that the United States must "get the Middle East right," American influence is actually quite limited; the future of the region lies in the hands of the people who live

Design and Culture Maurice Barnwell 2021-06-15 *Design and Culture: A Transdisciplinary History* offers an inclusive overview that crosses disciplinary boundaries and helps define the next phase of global design practice. This book examines the interaction of design with advances in technology, developments in science, and changing cultural attitudes. It looks to the past to prepare for the future and is the first book to offer an innovative transdisciplinary design history that integrates multidisciplinary sources of knowledge into a mindful whole. It shows design as a process that expresses goals through values and beliefs, functioning as a major factor in contemporary cultural life. Starting with the development of the Industrial Revolution, the book focuses on the evolution of design and culture.

The Full Employment Horizon in 20th-Century America Michael

Dennis 2021-02-11 Through moments of social protest, policy debate, and popular mobilization, this book follows the campaign for economic democracy and the fight for full employment in the United States. Starting in the 1930s, Dennis explores its intellectual and philosophical underpinnings, the class struggle that determined the fate of legislation and the role of left-wing civil rights activists in its revival. Demonstrating how the campaign for full employment intersected with movements for women's

liberation and civil rights, it explores how social groups and oppressed minorities interpreted and appropriated the promise of full employment. For many, full employment provided an indispensable path to racial and gender emancipation. In this book, Dennis uncovers the class dimensions and the resistance to full employment in the US. He demonstrates how the recurring debates over full employment consistently exposed the contradictions inherent in a capitalist society and challenged the assertion that an allegedly free enterprise system automatically generated employment for all.

changing times and changing educational needs. While many individual institutions have had their histories written or their stories told, to date no single book has attempted to explore the full scope of the military school in American history. *Cadets on Campus* is the first book to cover the origin, history, and culture of the nation's military schools—secondary and collegiate—and this breadth of coverage will appeal to historians and alumni alike. Author John Alfred Coulter identifies several key figures who were pivotal to the formation of military education, including Sylvanus Thayer, the “father of West Point,” and Alden Partridge, the founder of the school later known as Norwich University, the first private military school in the country. He also reveals that military schools were present across the nation, despite the conventional wisdom that most military schools, and, indeed, the culture that surrounds them, were limited to the South. Coulter addresses the

2018-01-12 The book details sources of thermal energy, methods of capture, and applications. It describes the basics of thermal energy, including measuring thermal energy, laws of thermodynamics that govern its use and transformation, modes of thermal energy, conventional processes, devices and materials, and the methods by which it is transferred. It covers 8 sources of thermal energy: combustion, fusion (solar) fission (nuclear), geothermal, microwave, plasma, waste heat, and thermal energy storage. In each case, the methods of production and capture and its uses are described in detail. It also discusses novel processes and devices used to improve transfer and transformation processes.

Abundance? Ian Milligan 2019-03-28 Believe it or not, the 1990s are history. As historians turn to study this period and beyond, they will encounter a historical record that is radically different from what has ever existed before. Old websites, social media, blogs, photographs, and videos are all part of the massive quantities of digital information that technologists, librarians, archivists, and organizations such as the Internet Archive have been collecting for the past three decades. In *History in the Age of Abundance?* Ian Milligan argues that web-based historical sources and their archives present extraordinary opportunities as well as daunting technical and ethical

challenges for historians. Through case studies, he outlines the approaches, methods, tools, and search functions that can help a historian turn web documents into historical sources. He also considers the implications of the size and scale of digital sources, which amount to more information than historians have ever had at their fingertips, and many of which are by and about people who have traditionally been absent from the historical record. Scrutinizing the concept of the web and the mechanics of its archives, Milligan explains how these new media challenge, reshape, and enrich both the historical profession and the historical record. A wake-up call for historians of the twenty-first century, *History in the Age of Abundance?* is an essential introduction to the way web archives work, what possibilities they open up, what risks they entail, and what the shift to digital information means for historians, their professional training and organization, and

Revolutionary Art and Politics in Egypt

Rounwah
Adly Riyadh Bseiso 2023-01-26
This book examines the role of artists in Egypt during the 2011 revolution, when street art from graffiti to political murals became ubiquitous facets of revolutionary spaces. Through interviews, personal testimonies, and accounts of the lived experience of 25 street artists, the book explores the meaning of art in revolutionary political contexts, specifically by focusing on artistic production during 'liminal' moments as the events of the Egyptian revolution unfolded. The author privileges the perspective of the actors themselves to examine the ways that artists reacted to events and conceived of their art as means to further the goals of the revolution. critiques the top-down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler, more democratic entrepreneurialism In an entirely fresh take on school reform, business journalist and bestselling author Andrea Gabor argues that Bill Gates, Eli Broad, and other leaders of the prevailing education-reform movement have borrowed all the wrong lessons from the business world. After the Education Wars explains how the market-based measures and carrot-and-stick incentives informing today's reforms are out of sync with the nurturing culture that good schools foster and—contrary to popular belief—at odds with the best practices of thriving twenty-first-century companies as well. These rich, detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up—lessons also learned from both the open-source software and quality

movements. The good news is that solutions born of this philosophy are all around us: from Brockton, Massachusetts, where the state's once-failing largest high school now sends most graduates to college, to Leander, Texas, a large district where school improvement, spurred by the ideas of quality guru W. Edwards Deming, has become a way of life. A welcome exception to the doom-and-gloom canon of education reform, After the Education Wars makes clear that what's needed is not more grand ideas, but practical and informed ways to grow the best ones that are already transforming schools.

Mexico, Offshore Finance and State Power asks how these offshore financial services affect the power of the state. Combining a concept analysis with empirical research, the book finds that economic actors go offshore to create money more than to hide it. Legal offshore banking trumps tax planning or money laundering in its impact on state power. Offshore Finance and State Power also reveals that the relationship between the two is not straightforward. Offshore finance can limit state power by transmitting the volatility of unregulated offshore banking into the domestic economy. Yet, counterintuitively, offshore finance can also enhance state power. It provides governments with an extraterritorial vehicle to cover up political conflicts over how to finance the state and to mitigate class conflict. To which extent a state can put offshore finances at its own service, depends on a country's domestic elite constellation and the tax and bank bargains they have forged throughout history.

governance and today's social and political trends. The book situates regional developments within broader international currents, without forgoing the distinct features of each socio-historical context. With its common historical, cultural, and socio-economic foundations, the Maghreb is a cohesive area of study that allows for greater understanding of domestic developments from both single-country and comparative perspectives. This volume refines the geo-historical unity of the Maghreb by accounting for social connections, both within the nation-state and across political boundaries and historical eras. It illustrates that non-institutional phenomena are equally formative to the ongoing project of post-colonial sovereignty, to social construction and deployments of state power, and to local outlooks on social equity, economic prospects, and cultural identity.

ballooned as the country continued its breakneck economic growth. Simultaneously, global markets in metals and fuels experienced a boom of unprecedented extent and duration. Meanwhile, resource-rich states in the Global South from Argentina to Angola began to advance a range of new development strategies, breaking away from the economic orthodoxies to which they had long appeared tied. In *China's Wake* reveals the surprising connections among these three phenomena. Nicholas Jepson shows how Chinese demand not only transformed commodity markets but also provided resource-rich states with the financial leeway to set their own policy agendas, insulated from the constraints and pressures of capital markets and multilateral creditors such as the International Monetary Fund. He combines analysis of China-led structural change with fine-grained detail on how the boom played out across fifteen different resource-rich

countries. Jepson identifies five types of response to boom conditions among resource exporters, each one corresponding to a particular pattern of domestic social and political dynamics. Three of these represent fundamental breaks with dominant liberal orthodoxy—and would have been infeasible without spiraling Chinese demand. Jepson also examines the end of the boom and its consequences, as well as the possible implications of future China-driven upheavals. Combining a novel theoretical approach with detailed empirical analysis at national and global scales, *In China's Wake* is an important contribution to global political economy and international development studies.

provides a critical overview of developments in education and social welfare policy in the years following the 2010 general election. It explores the conceptual background of a 'Big Society' used to frame Coalition policy and shows how the underlying spectre of neoliberalism both creates issues for policy attention and undermines ensuing policy solutions. This book charts those changes which have impacted upon education and schooling in England and Wales and is divided into two parts. Part I analyses Conservative philosophical thought and policy discussions that underpin the social, welfare and education policies introduced under the Conservative-led coalition government of 2010–15 and the subsequent Conservative administration since 2015. Part II looks at these policies in detail and concludes with a discussion of possible alternative policy approaches. Set against a backdrop of unprecedented economic crisis and austerity,
