[Encyclopedia of Community Policing and Problem Solving](#) Kenneth J. Peak 2013-05-28 Community policing, as a philosophy, supports the systematic use of partnerships and problem-solving techniques to proactively address the immediate conditions that give rise to public safety issues, including crime, social disorder, and fear of crime—as opposed to responding to crime after it occurs. Community policing expands the traditional police mandate. It broadens the focus of fighting crime to include solving community problems and forming partnerships with people in the community so average citizens can contribute to the policing process. Originating during police reform efforts of the 1970s, the philosophy of community policing is currently widespread and embraced by many citizens, police administrators, scholars, and local and federal

politicians. What sorts of collaborative partnerships have evolved between policing agencies and the individuals and communities they serve? How do police departments engage in systematic examination of identified problems to develop effective responses? How have police departments aligned their organizational structures to best support community partnerships and proactive problem solving? Just how effective have efforts at community policing been? These questions and more are explored within the pages of this new reference work. Features: A collection of 150 to 175 entries are organized in A-to-Z fashion in one volume available in both electronic and print formats. Signed entries, authored by significant figures in the field, each conclude with Cross-References and Suggestions for Further Readings to guide students to in-depth resources. Brief "What Works" case studies within appropriate

entries profile community policing programs and strategies as tried in various cities and communities. Although organized in A-to-Z fashion, a thematic "Reader's Guide" in the front matter groups related entries by broad topic areas (e.g., Foundations; Methods & Practices; Legislation & National Organizations; Changing Agency Culture; Planning & Implementation; Training & Curriculum; Assessment & Evaluation; etc.). Also included in the front matter, a Chronology provides students with historical perspective of the development of community policing. The entire work concludes with a Resources appendix listing classic books, journals, and associations, followed by a comprehensive Index.

Putting Fear of Crime on the Map Bruce J. Doran 2011-09-21 Since first emerging as an issue of concern in the late 1960s, fear of crime has become one of the most researched topics in contemporary criminology and receives considerable attention in a range of other disciplines including social ecology, social psychology and geography. Researchers looking the subject have consistently uncovered alarming characteristics, primarily relating to the behavioural responses that people adopt in relation to their fear of crime. This book reports on research conducted over the past eight years, in which efforts have been made to pioneer the combination of techniques from behavioural geography with Geographic Information Systems (GIS) in order to map the fear of crime. The first part of the book outlines the history of research into fear of crime, with an emphasis on the many approaches that have been used to investigate the problem and the need for a spatially-explicit approach. The second part provides a technical break down of the GIS-based techniques used to map fear of crime and summarises key findings from two separate study sites. The authors describe collective avoidance behaviour in relation to disorder decline models such as the Broken Windows Thesis, the potential to integrate fear mapping with police-community partnerships and emerging avenues for further research. Issues discussed include fear of crime in relation to housing prices and disorder, the use of fear mapping as a means with which to monitor the impact of Closed Circuit Television (CCTV) and fear mapping in transit environments.

Handbook of Survey Methodology for the Social Sciences Lior Gideon 2012-06-21 Surveys enjoy great ubiquity among data collection methods in social research: they are flexible in questioning techniques, in the amount of questions asked, in the topics covered, and in the various ways of interactions with respondents. Surveys are also the preferred method by many researchers in the social sciences due to their ability to provide quick profiles and results. Because they are so commonly used and fairly easy to administer, surveys are often thought to be easily thrown together. But designing an effective survey that yields reliable and valid results takes more than merely asking questions and waiting for the answers to arrive. Geared to the non-statistician, the Handbook of Survey Methodology in Social Sciences addresses issues throughout all phases of survey design and implementation. Chapters examine the major survey methods of data collection, providing expert guidelines for asking targeted questions, improving accuracy and quality of responses, while reducing sampling and non-sampling bias. Relying on the Total Survey Error theory, various issues of both sampling and non-sampling sources of error are explored and discussed. By covering all aspects of the topic, the Handbook is suited to readers taking their first steps in survey methodology, as well as to those already involved in survey design and execution, and to those currently in training. Featured in the Handbook: • The Total Survey Error: sampling and non-sampling errors. • Survey sampling techniques. • The art of question phrasing. • Techniques for increasing response rates • A question of ethics: what is allowed in survey research? • Survey design: face-to-face, phone, mail, e-mail, online,

computer-assisted.? • Dealing with sensitive issues in surveys. • Demographics of respondents: implications for future survey research. • Dealing with nonresponse, and nonresponse bias The Handbook of Survey Methodology in Social Sciences offers how-to clarity for researchers in the social and behavioral sciences and related disciplines, including sociology, criminology, criminal justice, social psychology, education, public health, political science, management, and many other disciplines relying on survey methodology as one of their main data collection tools.

Introduction to Criminal Justice Callie Marie Rennison 2021-02-02 Introduction to Criminal Justice: Systems, Diversity, and Change, Fourth Edition, offers students a brief, yet thorough, introduction to criminal justice with up-to-date coverage of all aspects of the system in succinct and engaging chapters. Authors Callie Marie Rennison and Mary Dodge weave four true criminal case studies throughout the book, capturing students' attention with memorable stories that illustrate the real-life pathways and outcomes of criminal behavior and victimization. Designed to show the connectedness of the criminal justice system, each case study brings the chapter concepts to life. Providing students with a more inclusive overview of criminal justice, important and timely topics such as ethics, policy, gender, diversity, and victimization are emphasized throughout. Critical Issues in Crime and Justice Dan Okada 2018-09-10 Critical Issues in Crime and Justice: Thought, Policy, and Practice provides an incisive overview of issues and perspectives in criminal justice and criminology designed to expand upon key areas of study. With contributed essays from leading scholars in the field, the Third Edition illustrates the breadth of research, policy, and practice implications in areas such as crime theory, law enforcement, jurisprudence, corrections, and criminal justice organization and management. New to this edition are chapters on wrongful convictions, human trafficking, and mental illness and criminal justice, three critical issues facing contemporary policing, courts, and corrections. The coverage of concepts, insights, voices, and perspectives will challenge criminal justice and criminology students to synthesize what they have learned, question standard interpretations, and begin to create new directions and visions for their future careers as professionals in the field.

Transit Crime and Sexual Violence in Cities Vania Ceccato 2020-05-17 How cities are planned and designed has a major impact on individuals' mobility and safety. If individuals feel unsafe in public transportation or on the way to it, they may avoid certain routes or particular times of the day. This is problematic, since research has also found that, in some cities, especially those in the Global South, a large percentage of women are "transit captives". Namely, they have relatively less access to non-public forms of transportation and are, therefore, especially reliant on public transport. This issue is important not only because it affects people's safety but also because it influences the long-term sustainability of a city. In a sustainable city, safety guarantees the ability to move freely for everyone and provides a wider sense of place attachment. Transit Crime and Sexual Violence in Cities examines the evidence of victimization in transit environments in countries around the world, exploring individuals' feelings of perceived safety or lack thereof and the necessary improvements that can make transit safer and, hence, cities more sustainable. The book's contributions are grounded in theories at the crossroads of several disciplines such as environmental criminology, architecture and design, urban planning, geography, psychology, gender and LGBTQI studies, transportation, and law enforcement. International case studies include Los Angeles, Vancouver, Stockholm, London, Paris, São Paulo, Mexico City, Bogotá, Tokyo, Guangzho, Melbourne, and Lagos,

Domestic fortress Rowland Atkinson 2016-11-04 Today's home is a kind of fortress that tells us as much about our need for privacy as it does about ensuring our security. Fortress homes, gated communities and elaborate defensive systems have become everyday features of urban life, highlighting the depth of fear as well as the desire for prestige and social display and the ideological strength of home ownership. This book offers a fresh analysis of our homes, our demands for security and anxieties about invasion, loss and finding seclusion in a worrying and divided world. Using a rich range of sources from cutting-edge research to media accounts, the book considers the fantasies and realities of dangers to the contemporary home and its inhabitants, and details the extreme measures now used in the pursuit of total safety.

Higher Education Response to Exponential Societal Shifts Freeman, Jerrid P. 2020-06-26 Based on a structure developed centuries ago, higher education systems are being challenged to alter their landscape and culture. With a rapidly changing knowledge base, job market, and societal and community needs, it is imperative that higher education systems remain adaptive and responsive. However, critical changes must still occur within the higher education system in order to accommodate these new societal needs. Higher Education Response to Exponential Societal Shifts is a critical scholarly publication that provides cutting-edge research on the facilitation of professional growth and commitment to lifelong learning and empowers leaders to be change agents who creatively solve leadership challenges. The book promotes the development of leaders who are committed to service, fairness, equity, and cross-disciplinary collaboration in diverse communities and the global venue and prepares them with the vital knowledge and skills needed to become effective leaders in today's complex world. Featuring a wide range of topics such as faculty development, accreditation, and higher education, this book is ideal for teachers, deans, chancellors, provosts, academicians, administrators, policymakers, curriculum designers, researchers, and students.

Encyclopedia of Criminology J. Mitchell Miller 2013-12-17 This three-volume work offers a comprehensive review of the pivotal concepts, measures, theories, and practices that comprise criminology and criminal justice. No longer just a subtopic of sociology, criminology has become an independent academic field of study that incorporates scholarship from numerous disciplines including psychology, political science, behavioral science, law, economics, public health, family studies, social work, and many others. The three-volume Encyclopedia of Criminology presents the latest research as well as the traditional topics which reflect the field's multidisciplinary nature in a single, authoritative reference work. More than 525 alphabetically arranged entries by the leading authorities in the discipline comprise this definitive, international resource. The pivotal concepts, measures, theories, and practices of the field are addressed with an emphasis on comparative criminology and criminal justice. While the primary focus of the work is on American criminology and contemporary criminal justice in the United States, extensive global coverage of other nations' justice systems is included, and the increasing international nature of crime is explored thoroughly. Providing the most up-to-date scholarship in addition to the traditional theories on criminology, the Encyclopedia of Criminology is the essential one-stop reference for students and scholars alike to explore the broad expanse of this multidisciplinary field.

International Handbook of Victimology Shlomo Giora Shoham 2010-02-23 In the nearly four decades since the First International Symposium on Victimology convened in Jerusalem in 1973, some concepts and themes have continued to hold a prominent place in the literature, while new ones have also emerged. Exploring enduring topics such as conceptions of victimhood, secondary and hidden victimization, and social services for victims along with more recent issues, the International Handbook of Victimology provides an interdisciplinary study of the topic from a diverse range of professionals on the cutting edge of victimology research. Forty experts from top research facilities and universities around the world provide input on the traditional longstanding issues that surround the field of victimology and explore newer themes such as restorative justice, the use of government-sponsored crime victimization surveys, compensation and restitution schemes, and victims' rights legislation. The second in a trilogy of volumes, this handbook examines victimology from criminology, sociology, psychology, law, and philosophy perspectives. Topics discussed include: Theoretical and historical frameworks used in the study of victimology Advances in research methods, including GIS technology Patterns of victimization, including drug- sex-, and work-related Responses to victimization by the

victim and society Restorative justice issues Victimization as it occurs in various social divisions Describing current research and identifying new ideas and topics of concern, the book collectively presents the "state-of-the-art" of the field today. In doing so, it helps to inform contemporary understanding of an eternal societal plague. Those wishing to continue their studies should consult the International Handbook of Criminology and the International Handbook of Penology and Criminal Justice, which complete the trilogy.

Doing Qualitative Research Differently Wendy Hollway 2012-11-12 Hollway and Jefferson have updated their ground-breaking book for students and researchers looking to do qualitative research differently. The new edition critically reviews many of the assumptions, claims and methods of qualitative research and also acts as a 'how to' guide to the method the authors call the Free Association Narrative Interview. In the new edition, the authors situate their arguments firmly within a tradition of psychosocial research and show how their method has developed over the last decade. The book follows this approach through the phases of empirical research practice. At each stage they use examples from their own research and end with an extended case study which demonstrates the value of their method in producing a psychosocial research subject; that is, one with socially-imbued depth, complexity and biographical uniqueness.

Fear of Crime Dan A. Lewis 2017-07-28 Most studies of fear of crime assume that is primarily induced by direct or indirect contact with a criminal event. Consequently programs designed to deal with this problem focus on either increased police protection or a number of crime prevention programs. In this study, Dan A. Lewis and Greta W. Salem raise questions both about the validity of these assumptions and the effectiveness of the programs. A five-year investigation has led the authors to challenge those theories that focus only on the psychological responses to victimizations and fail to take into account the social and political environments within which such fears are shaped and nurtured. Explicitly laying out a 'social control' perspective which informs their research and analysis, the authors examine the fear of crime in ten neighborhoods in Chicago, San Francisco, and Philadelphia which represent the range of communities typically found in urban areas. On the basis of their analysis the authors contend that fear of crime is not related to exposure or knowledge about criminal events alone but also stems from residents' concerns about broad changes taking place in their neighborhoods. Many people, they argue, are afraid not only because crime occurs but also because they believe that they have lost control over the environment in which they live. Lewis and Salem conclude that the eradication of fear of crime requires strategies that move beyond the traditional crime prevention programs to consider ways to restore the control that community residents feel they have lost and the possibilities for a more equitable distribution of security in urban areas.

Victimology William G. Doerner 2011-05-09 This breakthrough work provides an organizing structure for the history and current state of the field of victimology, and outlines the reasons compelling a separate focus on crime victims. Highly readable, *Victimology* explores the role of victimology in today's criminal justice system, examining the consequences of victimization and the various remedies now available for victims. In addition to adding the latest developments in victimology, the authors have included a new chapter on property victimization, and have enhanced and expanded the chapter on personal victimization. The text is supplemented by learning tools including chapter-by-chapter learning objectives, key terms, illustrative figures and tables, and a listing of related Internet sites. * The text provides a comprehensive overview of the origins and scope of victimology, with detailed chapters on specific types of victimization * The authors offer analysis of policy decisions and historical events, with an eye toward future developments in the field * A key chapter highlights the important global impact of restorative justice on responding to the plight of victims * The ever-changing dynamics of contemporary work and school victimization are dissected with special attention to causes and societal responses * The text is supplemented by learning tools including chapter-by-chapter learning objectives, key terms, illustrative figures and tables, and listings of related Internet sites

Crime and Public Policy James Q. Wilson 2012-06-01 Crime in the United States has fluctuated considerably over the past thirty years, as have the policy approaches to deal with it. During this time criminologists and other scholars have helped to shed light on the role of incarceration, prevention, drugs, guns, policing, and numerous other aspects to crime control. Yet the latest research is rarely heard in public discussions and is often missing from the desks of policymakers. This book accessibly summarizes the latest scientific information on the causes of crime and evidence about what does and does not work to control it. Thoroughly revised and updated, this new version of *Crime and Public Policy* will include twenty chapters and five new substantial entries. As with previous editions, each essay reviews the existing literature, discusses the methodological rigor of the studies, identifies what policies and programs the studies suggest, and then points to policies now implemented that fail to reflect the evidence. The chapters cover the principle institutions of the criminal justice system (juvenile justice, police, prisons, probation and parole, sentencing), how broader aspects of social life inhibit or encourage crime (biology, schools, families, communities), and topics currently generating a great deal of attention (criminal activities of gangs, sex offenders, prisoner reentry, changing crime rates). With contributions from trusted, leading scholars, *Crime and Public Policy* offers the most comprehensive and balanced guide to how the latest and best social science research informs the understanding of crime and its control for policymakers, community leaders, and students of crime and criminal justice.

Safety and Security in Transit Environments Vania Ceccato 2015-06-30 *Safety and Security in Transit Environments* presents interdisciplinary studies from leading international authors. This important volume identifies key challenges and complexities in addressing security and safety concerns in transit settings, policy recommendations for prevention, and new frontiers for research at transit settings. Chapter 9 of this book is open access under a CC BY license via link.springer.com.

Criminal Victimization (2009) Jennifer L. Truman 2011-01 This is a print on demand edition of a hard to find publication. Presents the annual estimates of rates and levels of violent crime (rape or sexual assault, robbery, aggravated assault, and simple assault), property crime (burglary, motor vehicle theft, and property theft), and personal theft (pocket picking and purse snatching). It describes the year-to-year change from 2008 and trends for the 10-year period from 2000 through 2009. The Nat. Criminal Victimization Survey collects information on non-fatal crimes, reported and not reported to the police, against persons age 12 or older from a nationally representative sample of U.S. households. This report also includes data on the characteristics of victims of crime; estimates of intimate partner violence; and use of firearms and other weapons during the crime. Illustrations.

Fear of Crime Hale 2004-07 Studies of the fear of crime are a fast-growing research area within criminology. This volume collects significant contributions to the field and includes an introductory essay by the editors. The articles offer an overview followed by reflection on the causes of vulnerability, the sources of information on victimization, the methods used to survey fear, the theoretical models employed to explain it and the nature of policies designed to reduce fear.

Victimology and Victim Assistance Yoshiko Takahashi 2018-11-14 *Victimology and Victim Assistance* offers insights into the criminal justice system from the perspective of often overlooked participants—victims. Delving into victim involvement in the criminal justice system, the impact of crime on victims, and new directions in victimology and victim assistance, authors Yoshiko Takahashi and Chadley James provide crucial insights and practical applications into the field of victim assistance. With an emphasis on advocacy, intervention, and restoration, this book examines real issues and barriers in the criminal justice system for victims and offers a way forward for future criminal justice or other human service professionals.

Encyclopedia of Quality of Life and Well-Being Research Alex C. Michalos 2014-02-12 The aim of this encyclopedia is to provide a comprehensive reference work on scientific and other scholarly research on the quality of life, including health-related quality of life research or also called patient-reported outcomes research. Since the 1960s two overlapping but fairly distinct research communities and traditions have developed concerning ideas about the quality of life, individually and collectively, one with a fairly narrow focus on health-related issues and one with a quite broad focus. In many ways, the central issues of these fields have roots extending to the observations and speculations of ancient philosophers, creating a continuous exploration by diverse explorers in diverse historic and cultural circumstances over several centuries of the qualities of human existence. What we have not had so far is a single, multidimensional reference work connecting the most salient and important contributions to the relevant fields. Entries are organized alphabetically and cover basic concepts, relatively well established facts, lawlike and causal relations, theories, methods, standardized tests, biographic entries on significant figures, organizational profiles, indicators and indexes of qualities of individuals and of communities of diverse sizes, including rural areas, towns, cities, counties, provinces, states, regions, countries and groups of countries.

The Routledge International Handbook on Fear of Crime Murray Lee 2017-12-01 The *Routledge International Handbook on Fear of Crime* brings together original and international state of the art contributions of

theoretical, empirical, policy-related scholarship on the intersection of perceptions of crime, victimisation, vulnerability and risk. This is timely as fear of crime has now been a focus of scholarly and policy interest for some fifty years and shows little sign of abating. Research on fear of crime is demonstrative of the inter-disciplinarity of criminology, drawing in the disciplines of sociology, psychology, political science, history, cultural studies, gender studies, planning and architecture, philosophy and human geography. This collection draws in many of these interdisciplinary themes. This collection also extends the boundaries of fear of crime research. It does this both methodologically and conceptually, but perhaps more importantly it moves us beyond some of the often repeated debates in this field to focus on novel topics from unique perspectives. The book begins by plotting the history of fear of crime's development, then moves on to investigate the methodological and theoretical debates that have ensued and the policy transfer that occurred across jurisdictions. Key elements in debates and research on fear of crime concerning gender, race and ethnicity are covered, as are contemporary themes in fear of crime research, such as regulation, security, risk and the fear of terrorism, the mapping of fear of crime and fear of crime beyond urban landscapes. The final sections of the book explore geographies of fear and future and unique directions for this research.

Crime Prevention Steven P. Lab 2019-08-21 Crime Prevention: Approaches, Practices, and Evaluations, Tenth Edition, meets the needs of students and instructors for engaging, evidence-based, impartial coverage of interventions that can reduce or prevent deviance. This edition examines the entire gamut of prevention, from physical design to developmental prevention to identifying high-risk individuals to situational initiatives to partnerships and beyond. Strategies include primary prevention measures designed to prevent conditions that foster deviance; secondary prevention measures directed toward persons or conditions with a high potential for deviance; and tertiary prevention measures to deal with persons who have already committed crimes. In this book, Lab offers a thorough and well-rounded discussion of the many sides of the crime prevention debate in clear and accessible language, including the latest research concerning space syntax, physical environment and crime, neighborhood crime prevention programs, community policing, crime in schools, and electronic monitoring and home confinement. This book is essential for undergraduates studying criminal justice, criminology, and sociology, in the US and globally. Online resources include an instructor's manual, test bank, and lecture slides for faculty, and a wide array of resources for students.

The Urban Fabric of Crime and Fear Vania Ceccato 2012-06-21 How does the city's urban fabric relate to crime and fear, and how is that fabric affected by crime and fear? Does the urban environment affect one's decision to commit an offence? Is there a victimisation-related inequality within cities? How do crime and fear interrelate to inequality and segregation in cities of developing countries? What are the challenges to planning cities which are both safe and sustainable? This book searches for answers to these questions in the nature of the city, particularly in the social interactions that take place in urban space distinctively guided by different land uses and people's activities. In other words, the book deals with the urban fabric of crime and fear. The novelty of the book is to place safety and security issues on the urban scale by (1) showing links between urban structure, and crime and fear, (2) illustrating how different disciplines deal with urban vulnerability to (and fear of) crime (3) including concrete examples of issues and challenges found in European and North American cities, and, without being too extensive, also in cities of the Global South.

Social Order and the Fear of Crime in Contemporary Times Stephen D. Farrall 2009-10 The fear of crime has been recognized as an important social problem, affecting a significant number of people. In this book, the authors review the findings from over 35 years of research into attitudes to crime and propose a new model, separating those who only 'expressively' fear crime from those who have actual experience of worrying about it.

Gender and Political Violence Candice D. Ortobals 2018-03-09 This book examines the role of gender in political conflicts worldwide, specifically the intersection between gender and terrorism. Political violence has historically been viewed as a male domain with men

considered the perpetrators of violence and power, and women as victims without power. Whereas men and masculinity are associated with war and aggression, women and femininity conjure up socially constructed images of passivity and peace. This distinction of men as aggressors and women as passive victims denies women their voice and agency. This book investigates how women cope with and influence violent politics, and is both a descriptive and analytical attempt to describe in what ways women are present or absent in political contexts involving political violence, and how they deal with gender assumptions, express gender identities, and frame their actions regarding political violence encountered in their lives. The book looks to reach beyond the notion of women as victims of terrorism or genocide without agency, and to recognize the gendered nature of political conflicts and how women respond to violence. This book will be of interest to advanced undergraduate and graduate students in political science, sociology, cultural studies, and gender studies, academics in terrorism studies and gender studies, government officials, NGOs, and professionals working in areas of violent conflict.

The Routledge International Handbook of Islamophobia Irene Zempi 2019-02-11 Islamophobic hate crimes have increased significantly following the terrorist attacks of 9/11 and 7/7. More recently, the rhetoric surrounding Trump's election and presidency, Brexit, the rise of far-right groups and ISIS-inspired terrorist attacks worldwide have promoted a climate where Islamophobia and anti-Muslim sentiments have become 'legitimised'. The Routledge International Handbook of Islamophobia provides a comprehensive single-volume collection of key readings in Islamophobia. Consisting of 32 chapters accessibly written by scholars, policy makers and practitioners, it seeks to examine the nature, extent, implications of, and responses to Islamophobic hate crime both nationally and internationally. This volume will appeal to undergraduate and postgraduate students as well as postdoctoral researchers interested in fields such as Criminology, Victimology, Sociology, Social Policy, Religious Studies, Law and related Social Sciences subjects. It will also appeal to scholars, policy makers and practitioners working in and around the areas of Islamophobic hate crimes.

The Routledge International Handbook on Fear of Crime Murray Lee 2017-12-01 The Routledge International Handbook on Fear of Crime brings together original and international state of the art contributions of theoretical, empirical, policy-related scholarship on the intersection of perceptions of crime, victimisation, vulnerability and risk. This is timely as fear of crime has now been a focus of scholarly and policy interest for some fifty years and shows little sign of abating. Research on fear of crime is demonstrative of the inter-disciplinarity of criminology, drawing in the disciplines of sociology, psychology, political science, history, cultural studies, gender studies, planning and architecture, philosophy and human geography. This collection draws in many of these interdisciplinary themes. This collection also extends the boundaries of fear of crime research. It does this both methodologically and conceptually, but perhaps more importantly it moves us beyond some of the often repeated debates in this field to focus on novel topics from unique perspectives. The book begins by plotting the history of fear of crime's development, then moves on to investigate the methodological and theoretical debates that have ensued and the policy transfer that occurred across jurisdictions. Key elements in debates and research on fear of crime concerning gender, race and ethnicity are covered, as are contemporary themes in fear of crime research, such as regulation, security, risk and the fear of terrorism, the mapping of fear of crime and fear of crime beyond urban landscapes. The final sections of the book explore geographies of fear and future and unique directions for this research.

The Routledge International Handbook of Rural Criminology Joseph F. Donnermeyer 2016-04-28 49% of the world's population lives in small towns, villages and farms, yet until recent years criminological scholarship has focused almost exclusively on urban crimes. The Routledge

International Handbook of Rural Criminology is the first major publication to bring together this growing body of scholarship under a single cover. For many years rural criminology has remained marginalized and often excluded from the mainstream, with precedence given to urban criminology: this volume intends to address that imbalance. Pioneering in scope, this book brings together leading international scholars from fourteen different countries to offer an authoritative synthesis of theoretical and empirical literature. This handbook is divided into seven parts, each addressing a different aspect of rural criminology: Rurality and crime Criminological dimensions of food and agriculture Violence and rurality Drug use, production and trafficking in the rural context Intersections between rural and green criminology Policing, justice and rurality Teaching rural criminology Edited by a world renowned scholar of rural criminology, this book explores rural crime issues in over thirty-five countries including Japan, Sweden, Brazil, Australia, Tanzania, the US, and the UK. This is the first Handbook dedicated to rural criminology and is an essential resource for criminologists, sociologists and social geographers engaged with rural studies and crime.

Crime Prevention Steven P. Lab 2023-02-28 Crime Prevention:

Approaches, Practices, and Evaluations, Eleventh Edition, meets the needs of students and instructors for engaging, evidence-based, impartial coverage of interventions that can reduce or prevent deviance. This edition examines the entire gamut of prevention, from physical design, to developmental prevention, to identifying high-risk individuals, to situational initiatives, to partnerships, and beyond. Strategies include primary prevention measures designed to prevent conditions that foster deviance, secondary prevention measures directed toward persons or conditions with a high potential for deviance, and tertiary prevention measures to deal with persons who have already committed crimes. In this book, Lab offers a thorough and well-rounded discussion of the many sides of the crime prevention debate in clear and accessible language, including the latest research concerning space syntax, physical environment and crime, neighborhood crime prevention programs, community policing, crime in schools, and electronic monitoring and home confinement. This book is essential for undergraduates studying criminal justice, criminology, and sociology, in the U.S. and globally. Online resources include an instructor's manual, test bank, and lecture slides for faculty, and a wide array of resources for students.
