They involve telepathy, psychotronics, psychokinesis, and out-of-body experiences such as remote viewing. This is the widely cited and quoted report prepared by U.S. Army Medical Intelligence and Information Agency for the Defense Intelligence Agency in 1975. Recently released through the FOIA, it has only been available in nearly illegible PDF editions. This transcription presents the full report with four major new addenda: biographical trace data on the researchers and subjects named; relevant imagery; a complete study done by members of the Hungarian Academy of Sciences on the Pavlita

most comprehensive reorganization of human society ever attempted by a nation-state. This is the story of how the agitation of Karl Marx and Friedrich Engels, two mid-nineteenth-century European thinkers and writers, led to a great and terrible world religion that brought down a mighty empire, consumed the world in conflict, and left in its wake a devastation whose full costs can only now be tabulated.

Edgar M. Howell 1956 The purpose of this text is to provide the Army with a factual account of the organization and operations of the Soviet resistance movement behind the German forces on the Eastern Front during World War II. This movement offers a particularly valuable case study, for it can be viewed both in relation to the German occupation in the Soviet Union and to the offensive and defensive operations of the Wehrmacht and the Red Army. The scope of the study includes an over-all picture of a quasi-

military organization in relation to a larger conflict between two regular armies. It is not a study in partisan tactics, nor is it intended to be. German measures taken to combat the partisan movement are sketched in, but the story in large part remains that of an organization and how it operated. The German planning for the invasion of Russia is treated at some length because many of the circumstances which favored the rise and development of the movement had their bases in errors the Germans made in their initial planning. The operations of the Wehrmacht and the Red Army are likewise described in considerable detail as the backdrop against which the operations of the partisan units are projected. Because of the lack of reliable

This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human

the United States was fighting communism by backing dictators from Iran to South Vietnam, from Latin America to the Middle East--while engaging in covert operations the world over. Brands offers no apologies for communist behavior, but he deftly illustrates the strained thinking that led Washington to commit gravely disproportionate resources (including tens of thousands of lives in Korea and Vietnam) to questionable causes. He keenly analyzes the changing policies of each administration, from Nixon's juggling (SALT talks with Moscow, new relations with Communist China, and bombing North Vietnam) to Carter's confusion to Reagan's laserrattling. Equally important is his incisive, often amusing look at how the anti-Soviet struggle was

exploited by politicians, industrialists, and government agencies. He weaves in deft sketches of figures like Barry Goldwater and Henry Jackson (who won a Senate seat with the promise, "Many plants will be converting from peace time to all-out defense production"). We see John F. Kennedy deliver an eloquent speech in 1957 defending the rising forces of nationalism in Algeria and Vietnam; we also see him in the White House a few years later, ordering a massive increase in America's troop commitment to Saigon. The book ranges through the economics and psychology of the Cold War, demonstrating how the confrontation created its own constituencies in private industry and public life. In the end, Americans claimed

victory in the Cold War, but Brands's account gives us reason to tone down the celebrations. "Most perversely," he writes, "the call to arms against communism caused American leaders to subvert the principles that constituted their country's best argument against communism." This far-reaching history makes clear that the Cold War was simultaneously far more, and far less, than we ever imagined at the time.

Nineteen EU member states use a common currency (the euro), and 22 member states participate in the Schengen area of free movement in which internal border controls have been eliminated. In addition, the EU has been developing a Common Foreign and Security Policy (CFSP), which includes a Common Security and Defense Policy (CSDP), and pursuing cooperation in the area of Justice and Home Affairs (JHA) to forge common internal security measures. Member states work together through several EU institutions to set policy and to promote their collective interests. In recent years, however, the EU

has faced a number of internal and external crises. Most notably, in a June 2016 public referendum, voters in the United Kingdom (UK) backed leaving the EU. The pending British exit from the EU (dubbed "Brexit") comes amid multiple other challenges, including the rise of populist and to some extent anti-EU political parties, concerns about democratic backsliding in some member states (including Poland and Hungary), ongoing pressures related to migration, a heightened terrorism threat, and a resurgent Russia. The United States has supported the European integration project since its inception in the 1950s as a means to prevent another catastrophic conflict on the European continent and foster democratic allies and st

trading partners. Today, the United States and the EU have a dynamic political partnership and share a huge trade and investment relationship. Despite periodic tensions in U.S.-EU relations over the years, U.S. and EU policymakers alike have viewed the partnership as serving both sides' overall strategic and economic interests. EU leaders are anxious about the Trump Administration's commitment to the EU project, the transatlantic partnership, and an open international trading system-especially amid the Administration's imposition of tariffs on EU steel and aluminum products since 2018 and the prospects of future auto tariffs. In July 2018, President Trump reportedly called the EU a "foe" on trade but the

This report serves as a primer on the EU. The Long Game Rush Doshi 2021-06-11 For more than a century, no US adversary or coalition of adversaries - not Nazi Germany, Imperial Japan, or the Soviet Union - has ever reached sixty percent of US GDP. China is the sole exception, and it is fast emerging into a global superpower that could rival, if not eclipse, the United States. What does China want, does it have a grand strategy to achieve it, and what should the United States do about it? Taking readers behind the Party's closed doors, he uncovers Beijing's long, methodical game to displace America from its hegemonic position in both the East Asia regional and global orders through three sequential "strategies of displacement."

Beginning in the 1980s, China focused for two decades on "hiding capabilities and biding time." After the 2008 Global Financial Crisis, it became more assertive regionally, following a policy of "actively accomplishing something." Finally, in the aftermath populist elections of 2016, China shifted to an even more aggressive strategy for undermining US hegemony, adopting the phrase "great changes brought about by

Ironically, his proposed approach takes a page from Beijing's own strategic playbook to undermine China's ambitions and strengthen American order without competing dollar-for-dollar, ship-for-ship, or loan-for-loan.

how the Third World policies of the two twentieth-century superpowers - the United States and the Soviet Union - gave rise to resentments and resistance that in the end helped topple one superpower and still seriously challenge the other. Ranging from China to Indonesia, Iran, Ethiopia, Angola, Cuba, and Nicaragua, it provides a truly global perspective on the Cold War. And by exploring both the development of interventionist ideologies and the revolutionary movements that confronted interventions, the book links the past with the present in ways that no other major work on the Cold War era has succeeded in doing.
