THE YELLOW WALLPAPER ILLUSTRATED CHARLOTTE PERKINS GILMAN 2021-06-14 "The Yellow Wallpaper" is a short story by American writer Charlotte Perkins Gilman, first published in January 1892 in The New England Magazine.[1] It is regarded as an important early work of American feminist literature, due to its illustration of the attitudes towards mental and physical health of women in the 19th century. Narrated in the first person, the story is a collection of journal entries written by a woman whose physician husband (John) has rented an old mansion for the summer. Forgoing other rooms in the house, the couple moves into the upstairs nursery. As a form of treatment, the unnamed woman is forbidden from working, and is encouraged to eat well and get plenty of air, so she can recuperate from what he calls a "temporary nervous depression - a slight hysterical tendency", a diagnosis common to women during that period

THE EU ANTI-CORRUPTION REPORT ANDI HOXHAJ 2019-10-16 This book analyses the development of anti-corruption as a policy field in the European Union with a particular focus on the EU Anti-Corruption Report. It reconstructs the origins of anti-corruption policy in the 1990s when the EU started to recognise corruption as a serious crime with a cross-border dimension. It also analyses the processes surrounding the downfall of the Santer Commission on charges of corruption in 1999 and the enlargement of the EU. This incorporation of transitional new Member States was accompanied by a number of specific measures, instruments and monitoring mechanisms to combat corruption at the supranational level, finally leading to the introduction of the EU-wide Anti-Corruption Report in 2014. The book presents an in-depth analysis of its implementation, abandonment and the way forward under the European Semester as the new instrument for achieving EU anti-corruption reforms. It offers a new interpretation of the Report as a form of reflexive governance that operates at multiple levels and involves not only the European institutions and national governments, but also the role of civil society actors in the process of developing anti-corruption policy. It applies the theory of reflexive governance in analysing the impact of the Report in the UK, Romania and Albania, including the involvement of non-state actors in anti-corruption policy making in these countries. The book concludes with a discussion on how future EU Anti-Corruption policy can make use of reflexive governance and offers recommendations to enhance anti-corruption policies of the EU, the Member States and Candidate States. **PARTIAL DIFFERENTIAL EQUATIONS** WALTER A. LOVE IN EDUCATION & THE ART OF LIVING BECKY L. NOEL L SMITH 2020-01-01 It is common for teachers and students of education to feel disheartened about the profession and their own aims and purposes once they become conscious of the dehumanizing tendencies of the schooling institution. As teacher educators, we have also known many students who, after studying critical perspectives aimed at exposing the power and privilege flowing through the public schools, then look to us with the question, "Where's the hope?" Our attempt to answer our students' questions has led us to consider what beauty and love in education look like. Where can it be seen, and how can we bring this forward so it can be instructive to those who are faced with similar questions about the incredibly important craft of teaching? This collection of narratives, essays, and poetic expressions includes the perspectives of students and educators who, in varying ways, express gratitude toward those who came before them and a deep desire to keep the faith alive. The authors share narrative accounts of someone or something in the public schools or learning experiences in general that inspired and nurtured the passionate desire to achieve goods internal to some shared practice – that is, some art at living – such that there was a transformative readjustment to the very nature of experience itself. We share with readers the stories and intellectual habits that have fueled us, inspired us, and that continue to push us to engage in the practice of cultivating educational dynamics that are meaningful and transformative for ourselves, our students, and our communities. The book concludes with an exploration into how teachers might not only root their craft, but the habit of love in general, in a sense of freedom.
